Sir/ Dr./Spook Jeremy Farrar was the wizard who put the Proximal Origins conspiracy together to cover up the lab origin and likely deliberate use of this bioweapon, to usher in the Great Reset.

Now he is the WHO's Chief Scientist. Want the guy with blood on his hands deciding the care you get during the next pandemic? EXIT the WHO.

MERYL NASS

JUL 24, 2023

As the central person funding the WHO Solidarity and UK Recovery clinical trials on hospitalized COVID patients through the Wellcome Trust, Jeremy also is responsible for overdosing over 2500 patients with HCQ and killing many, to sink the use of HCQ for COVID. He got knighted for this work.

We now have (and we will get more) the pangolin data (Eddie has) we think we can tie this up even tighter with the next iteration and make a conclusive statement which will then be the go to scientific statement to refer to.

Eddie and I have just come off a call with the National Academy of Medicine in the US – who the White House has asked to produce a report on this....

Farrar: No way Kristian. We just go for it! Eddie thinks that the pangolin data closes the case. We just tighten even more the zoonotic case in the draft and we have the 'GO TO SCIENTIFIC STATEMENT' that will become the reference. Then we can plug it to the the National Academy of Medicine and White House too.

Subject: Re: [ext] 2019 N-CoV

A lot of good discussion here, so I just wanted to add a couple of things for context that I think are important - and why what we're considering is far from "another conspiracy theory", but rather is taking a valid scientific approach to a question that is increasingly being asked by the public, media, scientists, and politicians (e.g., I have been contacted by Science, NYT, and many other news outlets over the last couple of days about this exact question).

To Ron's question, passage of SARS-like CoVs have been ongoing for several years, and more specifically in Wuhan under BSL-2 conditions - see references 12-15 in the document for a few examples. The fact that Wuhan became the epicenter of the ongoing epidemic caused by nCoV is likely an unfortunate coincidence, but it raises questions that would be wrong to dismiss out of hand. Our main work over the last couple of weeks has been focused on trying to *disprove* any type of lab theory, but we are at a crossroad where the scientific evidence isn't conclusive enough to say that we have high confidence in any of the three main theories considered. Like Eddie - and I believe Bob, Andrew, and everybody on this email as well - I am very hopeful that the viruses from pangolins will help provide the missing pieces. For now, giving the lab theory serious consideration has been highly effective at countering many of the circulating conspiracy theories, including HIV recombinants, bioengineering, etc. - here's just one example: <https://www.factcheck.org/2020/02/baseless-conspiracy-theories-claim-new-coronavirus-was-bioengineered/>

As to publishing this document in a journal, I am currently not in favor of doing so. I believe that publishing something that is open-ended could backfire at this stage. I think it's important that we try to gather additional evidence - including waiting on the pangolin virus sequences and further scrutinize the furin cleavage site and O-linked glycans - before

Andersen: Wait, guys... I am not sure about publishing this, and we need more data anyway, especially about the 99% pangolin claims..

Farrar is responsible for Wellcome Leap, which [Whitney Webb unpacked for us back in 2021](#). Here is what Whitney had to say about him and his Leap:

<https://unlimitedhangout.com/2021/06/investigative-reports/a-leap-toward-humanitys-destruction/>

Jeremy Farrar, Pandemic Narrative Manager

While Dugan and Gabriel ostensibly lead the outfit, Wellcome Leap is the brainchild of Jeremy Farrar and Mike Ferguson, who serve as its directors. Farrar is the director of the Wellcome Trust itself, and Ferguson is deputy chair of the Trust's board of governors. [Farrar](#) has been director of the Wellcome Trust since 2013 and has been actively involved in critical decision making at the highest level globally since the beginning of the COVID crisis. He is also an [agenda contributor](#) to the World Economic Forum and [cochaired](#) the WEF's Africa meeting in 2019.

Farrar's Wellcome Trust is also a WEF strategic partner and [cofounded](#) the COVID Action Platform with the WEF. Farrar was more recently behind the creation of Wellcome's [COVID-Zero initiative](#), which is also tied to the WEF. Farrar has framed that initiative as "an opportunity for companies to advance the science which will eventually reduce business disruption." Thus far it has convinced titans of finance, including Mastercard and Citadel, to invest millions in research and development at organizations favored by the Wellcome Trust.

...One Fauci email, dated February 25, 2020, and sent by Amelie Rioux of the WHO, stated that Jeremy Farrar's official role at that time was "to act as the board's focal point on the COVID-19 outbreak, to represent and advise the board on the science of the outbreak and the financing of the response." Farrar **had previously chaired** the WHO's Scientific Advisory Council. The emails also show the preparation, within a ten-day period, of the SARS-CoV-2 "**origins**" paper, which was entitled "The Proximal Origin of SARS-CoV-2" and was accepted for publication by *Nature Medicine* on March 17, 2020. The paper claimed that the SARS-CoV-2 virus could only have come from natural origins as opposed to gain-of-function research, a claim once held as gospel in the mainstream but which has come under considerable scrutiny in recent weeks.

Shaping the presentation of an origin story for a virus of global significance is something Farrar has been involved with before. In 2004–5, **it was reported** that Farrar and his Vietnamese colleague Tran Tinh Hien, the vice director at the Hospital for Tropical Diseases, were the first to identify the re-emergence of the avian flu (H5N1) in humans. Farrar has recounted the origin story on many occasions, stating: "It was a little girl. She caught it from a pet duck that had died and she'd dug up and reburied. She survived." According to Farrar, this experience prompted him to found a global network in conjunction with the World Health Organization to "improve local responses to disease outbreaks."
