

## HENNA CARE AND INSTRUCTIONS

1. Let henna fully dry do not re-wet paste unless you plan on leaving it on longer to darken. ( leave for at least 6 hours to get the darkest stain)
2. If you smear your paste wipe off area of smear immediately. How the paste lays is what your design will look like.
3. Henna is fully dry when it turns black and crumbles off like cookie crumbs
4. Stain may be orange to light tan at first. (It will take 24 hours to fully darken)
5. Pools and frequent rubbing in area will cause stain to remove quicker. Soap exfoliating or lightning products will remove henna faster
6. Seal with cold water once your paste is off
7. Use essential oil eucalyptus rosemary or clove or Alma oil to help give intense color.( Stay away from other moisture in henna location.
