BALLETELITEDC

This class is geared toward the child who is serious about dance training. Classes are comprehensive and students are expected to make technical achievements. Emphasis is on artistic growth, personal grooming, discipline, and advancement of dance skills. Typically children in this level have completed the Pansy course and are now ready for more demands. Age ranges, for this level, are 9 to 12 years. Some children, who are age 10 and up and are beginners learn quickly in this class. Technical dance steps will enhance flexibility of the body, musicality of the movements, strong use of the core abdominal muscles, proper use of the feet and legs in barre work exercises and center floor. Refinement of the port de bras, arabesque, and beginning épaulement will be stressed. Turning steps on two and one leg with spotting of head is introduced.

Dancers Stay in this level for 2 or 3 years.
