The APS Model MJ-1 Hydraulic Mobile Test Stand (pictured above) is designed for rapidly and accurately determining the performance and operating characteristics of the aircrafts hydraulic systems. The MJ-1 tests the function and operation of the aircrafts hydraulic systems and components, tests the aircrafts internal and external systems for leaks and drains , flush and refills the aircrafts hydraulic systems with micronically—filtered hydraulic fluid. Additionally, the MJ-1 pneumatically pressurizes the aircrafts Hydraulic fluid reservoir.
