

HEAVY DUTY FIFTH WHEELS

A complete line of fifth wheels, designed and manufactured to meet the requirements of the heavy hauling industry. Built with the quality and capacity required by professionals in the industry.

Eidal fifth wheels for severe heavy-duty surfaces in on-off highway applications. Reliable positive locking is assured with either "rock lock" or "jaw" type coupler. Constructed with hi-tensile welded steel, these fifth wheels assure ease of maintenance and long service life.

When capacity and performance are required, Eidal engineering experience is available to assist you in solving your fifth wheel requirements. All standard fifth wheels may be modified to fit your application—with or without mounting plate—welded on or bolt holes—varying heights. Eidal is the answer.
