

# Shampooing Your Wig

6

Apply conditioner from root to tip. Avoid applying conditioner to heavily near the lace because this can cause the knots to untie and hair to shed.

7

Gently comb through hair from root to tip with a large tooth comb. Allow Conditioner to stay on hair for at least 5 minuets.

8

Rinse with cool water from root to tip and from inside to outside.

9

Squeeze excess water from root to tip.

10

Gently comb through the wig with a wide-tooth comb and allow to air dry on a wig head.
