

YRVA

HOOD 5MM

High performance and perfectly adapted, our YRVA 5mm hood has been developed for divers who want to enjoy maximum comfort and warmth.

MADE IN CANADA

- > Made with exclusive high quality 5 mm Yamamoto neoprene.
- > Extra stretch Techno nylon exterior offering unparalleled comfort and limiting jaw fatigue.
- > Interior in SCS (Super Composite Skin) which limits water circulation and slides easily over the hair.
- > All seams are double glued and blindstitched. The joints are thus completely sealed for better insulation.

- > The topstitched seams are made of extra strong nylon threads and are available in several colors. The black-color mix gives the seam a discreet and sophisticated look.
- > The hood is vented in two strategic places to let air escape while minimizing the entry of water, both on the surface and when diving.
- > Available in size S, M, ML, L, XL, 2XL and 3XL.
- > Sewing available in 10 colors: white, silver, black, red, yellow, green, aqua, blue, purple and pink.

SIZE CHART

	S	M	ML	L	XL	2XL	3XL
Head	20.5 in (52 cm)	21.5 in (55 cm)	22 in (56 cm)	23 in (58.5 cm)	24 in (61 cm)	25 in (63.5 cm)	26 po (66 cm)
Neck	14 in (35.5 cm)	14.5 in (37 cm)	15 in (38 cm)	16 in (40.5 cm)	17 in (43 cm)	18 in (45.5 cm)	19 po (48 cm)

“ Now then, let's talk about this a little. When it comes to my dive gear I'm pretty picky about what I use. Over the last week I was introduced to and, was able to get my hands on, just the best hood I've ever used. It's called a YRVA and, it's made in Canada. The previous hood I've been using was made of a similar neoprene but made it incredibly hard to move my jaw. This hood on the other hand fits the contours of my face far better and does not gerbil my face. What is even more astounding is that despite being only a 5mm it is every bit as warm if not warmer than my 10mm. I can't say enough good things about it. This hood certainly brings toasty! ”
