

A big thank-you to everyone who has helped with buckthorn and other invasive species removal along the Menomonee River Parkway between Capitol Drive and Hampton Avenue.

I wanted to share an update I received the week of March 8th from Milwaukee County Parks. They are starting an Area of Concern project focused on managing invasive species to improve wildlife habitat along the parkway. Because the project is still in the planning and design phase, volunteers are not allowed to remove invasive species right now. Since this will be a long-term effort, our Weed-Out events will be on hold for the next few years.

We will continue to maintain the areas previously managed by the Weed-Out group by mowing and string trimming.
