Environmental Policy

SFTS HV Management Ltd (SFTS) recognises the need to operate the business in a manner which reflects good environmental management. We are aware of the environmental impacts of our operations and will balance our business with the need to protect the local and global environment.

Our Environmental Policy shall earn the confidence of employees, stakeholders, customers, and the general public by demonstrating our commitment to comply with all relevant environmental legislation and minimise pollution, resource use and waste, where feasible, through the continual improvement of performance in all areas of the Company.

The Company will continue to demonstrate a commitment to identify all activities that have the potential to cause an environmental impact, as well as providing adequate resources to help minimise or prevent any negative impact.

To achieve this commitment, we will:

- Identify all environmental impacts that the Company contributes to and establish environmental management procedures that can be incorporated into all business decisions, in a cost-effective manner.
- Regularly measure and evaluate our environmental performance and make improvements where necessary.
- Delegate the responsibility for environmental matters to the appropriate levels in the Company.
- Consistently increase the awareness and provide necessary training to all our employees to ensure environmentally responsible concepts are integrated into their normal working practices.
- Demonstrate control of all operations and ensure that all are performed with due consideration of the environment.
- Identify and mitigate against potential accidents that could result in an environmental incident, so that if an incident did occur the consequences would be minimised.
- Use products that have a negligible environmental impact, where appropriate options exist.
- Minimise the storage and use of all articles and substances, where appropriate.
- Reduce the consumption of resources (energy, materials, packaging), where feasible.
- Minimise waste through a commitment to reuse, recover or recycle, where feasible.

It is our duty to ensure that good environmental management is practised in all contracts and projects that we are involved in, and we will seek to influence customers to demonstrate a positive environmental commitment.

The Company will communicate the Environmental Policy to all permanent and temporary Employees as well as subcontractors.
