

Winter's Edge

# 2026|27 SEASON

PRODUCT CATALOG

Winter's Edge

# Profit more. Risk less. Get the Winter's Edge!

Hear from Jeff Buckman and the strategy behind Winter's Edge.

**APRIL DATING & 48 HOUR RE-ORDERS**

## April 1, 2027 Dating

Sell first, pay later with extended billing.

## Re-Dating Safety Net

Unsold product? We'll re-date it for next year.
Re-dated product will be due April 1st of 2028.

## 48-Hour Re-Order Shipping

Fast turnaround to keep your displays full.
From custom merchandising plans to inventory management and profit-per-square-foot optimization, we make it easy to sell more—while you only pay for what you sell.

## See it to believe it!

GET YOUR FREE SAMPLE KIT!*

**SEE IT TO BELIEVE IT SAMPLE KIT OVERVIEW**

We'll send you a hands-on **"SEE IT TO BELIEVE IT"** Sample Kit so you can touch, feel, try on, and experience our products. You'll also get digital and printed catalogs to help you plan your order.

Once you review the Winter's Edge program, your dedicated rep will help you create the perfect merchandising plan to maximize profit per square foot. We'll set you up for success, track your inventory, manage reorders, and keep your shelves stocked—so you only pay for what you sell.

* Keep the kit for 30 days to review our product line. If you place a minimum order of $2,500 within this period, you can keep the sample kit free of charge. If you decide not to order, please return the items using the prepaid UPS label within 30 days. Failure to return the kit or place an order will result in an $800 invoice to cover the cost of the sample kit.

## Winter's Edge: Built for Your Profit

We've created Winter's Edge to deliver top margins, backed by a 12-month dating program and a versatile fixture system for easy merchandising anywhere. Our goal: make you profitable quickly while helping customers stay dry, warm, and comfortable.

## Smart, Color-Coded Packaging

Designed for fast product selection, our packaging makes it easy to find the right gender and size—on the retail floor or in the stockroom. Packaging can be pegged or stacked, with gender/size clearly visible.

- Dark Blue – Men's
- Bright Blue – Women's
- Orange – Youth

## Modular POS Fixtures

Our modular fixtures work anywhere—from your main retail floor to a pop-up at the mountain base. We will work with you and your merchandising staff to create a custom POS presentation that works for the allocated space in your store. Paired with our color-coded packaging, each fixture becomes a self-service sales station.

**COLOR-CODED PACKAGING**
By assigning a specific color to each category—Dark Blue for men, Bright Blue for women, and Orange for youth—shoppers can visually identify the right section at a glance.

This reduces confusion, enhances the shopping experience, and speeds up decision-making, especially in busy retail environments.

# Start with Confidence

Starter assortments are essential for retail shops, especially when entering new markets or expanding their product range. These curated collections offer a balanced selection of core products tailored to the shop's target customers and brand.

Starting with a well-chosen product mix helps meet customer needs from day one, laying a strong foundation for sales and satisfaction. It also supports better inventory management by reducing the risk of over- or understocking.

Including a range of price points—from budget to premium—makes it easier to reach a wider audience while protecting profit margins. This mix encourages repeat purchases and boosts overall sales.

Starter assortments often focus on high-margin items, helping stores stay profitable from the start.

Another advantage is that they remove much of the guesswork in product planning. Instead of experimenting with new product lines, retailers can rely on pre-selected assortments built on market research and industry know-how.

Our starter assortments offer a smart, low-risk way for retail shops to launch or grow with confidence, efficiency, and profitability.

Actual display includes one double-sided rack.

Front and back views are shown side by side for visual reference only.

# Custom Apparel Program

The Winter's Edge Custom Logo Apparel Program allows for a tailored solution designed to elevate your organization's identity, unify your team, and enhance brand visibility through high-quality, branded clothing and accessories.

Our program is designed to be flexible, efficient, and tailored to your unique branding needs. From design assistance to order management and fulfillment, we're here to help provide your staff with an edge... The Winter's Edge!

**1 - LOGO SELECTION & FILE FORMATS:**
When selecting a logo orientation (stacked vs horizontal) for custom apparel, it's important to choose the version that best fits the designated area—whether that's maximizing height or width.

Providing a vector artwork file (.AI / .EPS / .PDF) is essential for producing high-quality custom logo apparel. Vector files ensure your logo can be resized without losing clarity or detail, resulting in crisp, professional decoration across all garment types and logo applications.

**2 - LOGO APPLICATION & MATERIAL:**
We offer a premium logo applications to suit your style and branding needs:

+ **TPR Patch - Jackets & Pants** for a modern, dimensional look with rubberized texture.
+ **Sew-on Patch - Headwear & Neckwear** printed for crisp detail and a sleek finish, ideal for outerwear fabrics.

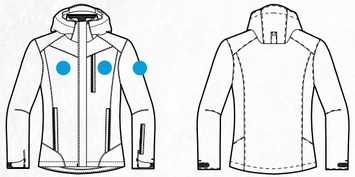

**3 - APPAREL OPTIONS & LOGO PLACEMENT:**
Our Custom Logo Apparel Program offers a range of apparel options—including:

+ Jackets
+ Pants & Bibs
+ Hats & Neck-up Warmers
+ Winter Combo Clava, Neckwarmer, & Facemasks

We also provide multiple logo placement options such as chest, sleeve, back yoke, and back shoulder, allowing you to customize each item for maximum brand impact and visibility.

**4 - CUSTOM APPAREL APPROVAL**
Before production begins, all custom logo apparel orders go through a clear and streamlined approval process. Once your logo, application method, item and logo placement are selected, a digital proof or sample will be provided for your review.

This gives you the opportunity to confirm logo accuracy, sizing, and placement.
Only after receiving your final approval will the order proceed to production, ensuring your branded apparel meets your expectations with precision and quality.

# Glossary of Terms

**184T TASLON**
Polyester 184T taslon fabric, weight 90 grams per square meter nylon is strong, holds color better, and is the most durable, highest quality fiber for rugged outerwear.

**210T TAFFETA**
Taffeta-210T is a high-quality polyester fabric. It is a light, soft and durable material. It dries fast and might be creased hardly.

**320 DENIER**
A breathable, thicker and more durable a material, 320 Denier nylon fiber used is highly durable that will keep you dry and warm in all conditions.

**600 DENIER OXFORD**
600 D Oxford weave is a high denier yarn, extremely durable material, used to reinforce high abrasion areas from wear.

**AQUA-TEX**
Glove membrane that is breathable, windproof and waterproof.

**MICROFIBER BRUSHED TRICOT:**
A soft and warm fabric used for cold-weather clothing. Material has a soft, brushed suede finish for comfort and warmth. Used in pocket bags, glove liners, and jacket inside collar

**DWR**
An ultra-thin durable water repellent (DWR), a polymer that's applied to the outermost fabric layer. DWR reduces the surface tension of the fabric, so that water simply rolls off.

**GUNN CUT**
This glove cut is the most common pattern and features the two middle fingers sewn to the palm. The palm, little finger, and index finger are cut from one piece of leather and the two center fingers are cut from another piece.

**MICRO BEMBERG LINING**
A breathable, light, durable, and with a silky touch that looks and feels great. Bemberg wicks sweat and humidity away from the body and is also anti-static and anti-cling for a more comfortable wear.

**OPEN GUSSET**
An open gusset glove has a triangular piece of fabric that's usually placed under the thumb and has its apex facing the wrist.

**RADIAL CUT**
This glove cut combines a traditional classic glove with wrapped index and pinkie fingers. The palm wraps around the inside of the aforementioned fingers.

**RFID POCKET**
These pockets are lined with a sheet of a copper alloy to deter the electromagnetic signals that RFID scanners emit to stop the transfer of information from occurring.

**SPLIT PALM**
Split leather palm working gloves have a double layer of leather over the palm, thumb and index finger areas for reduced wear and tear and added grip. These sturdy, tough gloves feature a wing thumb, knuckle strap, and inside elastic for comfort, fit and easy use.

**THERMOLITE™**
A family of polyester fibers and insulations designed to help you stay warm as the temperature drops.

**YKK ZIPPERS**
YKK zippers move even more smoothly the more you use them. The surface of the zipper is beautifully plated and won't easily fade. The Gold Standard zipper to use in outerwear for maximum durability and functionality over life of the product.

**ARTICULATED CONSTRUCTION**
Products are engineered through patterning to bend in a natural human shape, affecting maximum range of movement and comfort for wearer.

**BREATHABLE**
These are primarily features specific to wicking moisture away from the skin and helping to keep the individual warm & dry.

**DURABILITY**
These are the fabrics, materials and pattern construction that provide additional protection from stress points and common friction areas on outerwear.

**INSULATED**
When extra warmth is required, fabrics, linings and brand-name insulation is identified to keep individuals outside for longer periods of time.

**SMART DEVICE COMPATIBLE**
This feature is a result of special fabric that conducts the necessary contact between an individuals finger and their smart device without having to remove their gloves.

**WARMTH**
A description of the fabric and fabric make-up that creates a level of warmth for that item.

**WARMTH/WATERPROOF**
A description of the fabric, inserts or coatings, that creates a level of warmth and water-resistance for that item. The combination of all these components help determine whether the item is water-proof or water-resistant.

**WATER RESISTANT**
DWR coatings that creates a level of water-resistance for that item.
