

# 2025 SEASON

PRODUCT CATALOG

**SEE IT TO BELIEVE IT**  
GET YOUR FREE SAMPLE KIT!\*

**WARMTH FROM  
THAT KEEPS  
YOU OUTSIDE HEAD to TOE**

The World has changed and so have we...  
Not only has the way we do business changed, but it continues to evolve.  
We understand that you are looking for ways to maintain your market advantage throughout the cold-weather season.

Mountain areas are evolving from exclusive ski resorts to family-centric winter destinations that offer alternative activities like, snowmobiling, sleigh rides, tubing, Eco tours & hikes, snowshoeing, mountain coasters and even snow yoga.

Individuals wanting to enjoy these alternative activities are looking for value-priced performance apparel they need to keep them warm and outside...

We're here to help.

## REQUEST YOUR SAMPLE KIT & GET THE WINTER'S EDGE!

We'll send you a sample kit of our products for you to touch, feel, test and try-on. In addition to our products, you will also receive a digital catalog, order form and a hard copy catalog so you can make notes.

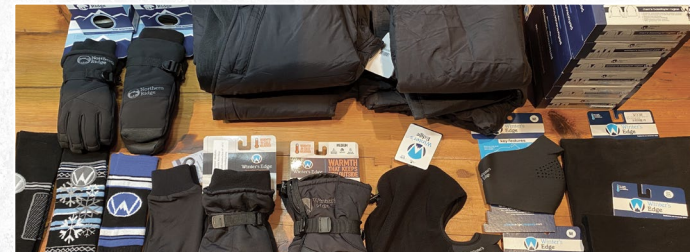

Once you have reviewed the Winter's Edge program and are ready to placed an order with us, your rep and customer service staff will help evaluate your selling needs. This will allow us to provide the best display & merchandising options to help maximize your profit per square foot in each of your selling areas.

Once your areas are merchandised, we will stay in touch to help you manage inventory, place re-orders and stay on top of your sell-through making this program easy to manage & profit. You only pay for what you sold, it's that simple.

You can keep the See It to Believe It Kit for 30 days. There is a return UPS tag in the box for you to use to send the kit back to us. If we don't receive the kit back we will invoice you \$800 to cover our cost of the items.

Hear from Jeff Buckman and the strategy behind Winter's Edge.

## RETAIL PROFITABILITY

### APRIL 1, 2026 DATING on Initial Order

+ Place your preseason order and receive April 1, 2026 dating

### RE-DATING on Unsold Preseason Product

+ Preseason product unsold 15 days prior to invoice due will be re-dated until next year.

### 48 HOUR SHIPPING on Re-Orders!

+ Don't miss turn-key sales during the season - re-orders based on available quantities.

Once you have reviewed the Winter's Edge program and are ready to place an order with us, your rep and customer service staff will help evaluate your selling needs. This will allow us to provide the best display & merchandising options to help maximize your profit per square foot in each of your selling areas.

Once your areas are merchandised, we will stay in touch to help you manage inventory, place re-orders and stay on top of your sell-through making this program easy to manage & profit.

## RENTAL RELIABILITY

Our outerwear is designed to be cost-effective for the rental business with durable materials for long-term wear & washing and articulated construction for flexible sizing and comfort.

## RESORT RECOGNITION

Our outerwear can also be custom-branded for your retail, rental or resort business that will provide proud staff members the recognition and identification to all your visitors.

## MAXIMIZE YOUR SPACE & PROFIT

We have designed & packaged Winter's Edge to provide some of the highest margins, created a buying program with 12-month dating and developed a fixture system that allows you to merchandise these products anywhere.

Our goal is to make you profitable as quickly and easily as it is for individuals looking to stay dry, warm and comfortable.

### COLOR-COORDINATED PACKAGING

We have designed our packaging to allow individuals to quickly and easily find the product they want in the gender/size they need whether on the retail floor or in the stock room.

Packaging can be pegged on the retail floor or stack in cubes with gender/size information clearly visible.

Color-coded packaging includes:

- Dark Blue - Men's Products
- Bright Blue - Women's Products
- Orange - Youth Products

### MODULAR POS FIXTURES

Whether on the floor of your main retail space or as part of a pop-up shop at the base on the mountain, our modular fixture provides flexibility.

The single fixture unit has a small footprint making it a great counter display and can transform into a larger double-sided floor display where space is available.

Combined with our color-coordinated packaging, these fixtures become self-service selling station.

# GLOSSARY

## TERMINOLOGY FOR OUR PRODUCTS

### 184T TASLON

Polyester 184T taslon fabric, weight 90 grams per square meter nylon is strong, holds color better, and is the most durable, highest quality fiber for rugged outerwear.

### 210T TAFFETA

Taffeta-210T is a high-quality polyester fabric. It is a light, soft and durable material. It dries fast and might be creased hardly.

### 320 DENIER

A breathable, thicker and more durable a material, 320 Denier nylon fiber used is highly durable that will keep you dry and warm in all conditions.

### 600 DENIER OXFORD

600 D Oxford weave is a high denier yarn, extremely durable material, used to reinforce high abrasion areas from wear.

### AQUA-TEX

Glove membrane that is breathable, windproof and waterproof.

### MICROFIBER BRUSHED TRICOT:

A soft and warm fabric used for cold-weather clothing. Material has a soft, brushed suede finish for comfort and warmth. Used in pocket bags, glove liners, and jacket inside collar

### DWR

An ultra-thin durable water repellent (DWR), a polymer that's applied to the outermost fabric layer. DWR reduces the surface tension of the fabric, so that water simply rolls off.

### GUNN CUT

This glove cut is the most common pattern and features the two middle fingers sewn to the palm. The palm, little finger, and index finger are cut from one piece of leather and the two center fingers are cut from another piece.

### HXT

HXT is a patent-pending 'Heat Exchange' technology that provides external heat that can be adjusted and directed to areas of the body where extra heat is needed.

### MICRO BEMBERG LINING

A breathable, light, durable, and with a silky touch that looks and feels great. Bemberg wicks sweat and humidity away from the body and is also anti-static and anti-cling for a more comfortable wear.

### OPEN GUSSET

An open gusset glove has a triangular piece of fabric that's usually placed under the thumb and has its apex facing the wrist.

### RADIAL CUT

This glove cut combines a traditional classic glove with wrapped index and pinkie fingers. The palm wraps around the inside of the aforementioned fingers.

### RFID POCKET

These pockets are lined with a sheet of a copper alloy to deter the electromagnetic signals that RFID scanners emit to stop the transfer of information from occurring.

### SPLIT PALM

Split leather palm working gloves have a double layer of leather over the palm, thumb and index finger areas for reduced wear and tear and added grip. These sturdy, tough gloves feature a wing thumb, knuckle strap, and inside elastic for comfort, fit and easy use.

### THERMOLITE™

A family of polyester fibers and insulations designed to help you stay warm as the temperature drops.

### YKK ZIPPERS

YKK zippers move even more smoothly the more you use them. The surface of the zipper is beautifully plated and won't easily fade. The Gold Standard zipper to use in outerwear for maximum durability and functionality over life of the product.

### ARTICULATED CONSTRUCTION

Products are engineered through patterning to bend in a natural human shape, affecting maximum range of movement and comfort for wearer.

### BREATHABLE

These are primarily features specific to wicking moisture away from the skin and helping to keep the individual warm & dry.

### DURABILITY

These are the fabrics, materials and pattern construction that provide additional protection from stress points and common friction areas on outerwear.

### INSULATED

When extra warmth is required, fabrics, linings and brand-name insulation is identified to keep individuals outside for longer periods of time.

### SMART DEVICE COMPATIBLE

This feature is a result of special fabric that conducts the necessary contact between an individuals finger and their smart device without having to remove their gloves.

### WARMTH

A description of the fabric and fabric make-up that creates a level of warmth for that item.

### WARMTH/WATERPROOF

A description of the fabric, inserts or coatings, that creates a level of warmth and water-resistance for that item. The combination of all these components help determine whether the item is water-proof or water-resistant.

### WATER RESISTANT

DWR coatings that creates a level of water-resistance for that item.

# Winter's Edge

The World has changed and so have we... Not only has the way we do business changed, but it continues to evolve. We understand that you are looking for ways to maintain your market advantage throughout the cold-weather season.

Mountain areas are evolving from exclusive ski resorts to family-centric winter destinations that offer alternative activities like, snowmobiling, sleigh rides, tubing, Eco tours & hikes, snowshoeing, mountain coasters and even snow yoga. Individuals wanting to enjoy these alternative activities are looking for value-priced performance apparel they need to keep them warm and outside...

We're here to help.
