THERMOLUX 92% Recycled Polyester 8% Spandex Treated with Silvadur 900 antimicrobial silver ions 300gsm	✓		✓	✓	✓	✓		✓

Superior Wind/Water resistant 3 part laminate helps to keep you warm and comfortable in the most extreme conditions. Made from 89% Recycled Polyester materials, PINACL is not only fully sustainable - it's unbelievably comfortable and soft against your skin.

Providing a lofty fleece interior and smooth exterior has made Pro-Stretch PLUS a favorite for cold weather athletes. With 8% Elastane woven directly into the yarn, each product performs as intended.

Pro-Stretch is a 4 way stretch moisture wicking material that is great for use as a baselayer. It is thin and fleeced on the inside for great comfort. The outside is a snow shedding weave. This is a high performance fabric with great versatility. Now treated with DOW Silvadur providing superior odor and bacteria control through its polymer based silver ion fabric treatment process.

MicroFlex is a lightweight stretch fleece that provides lasting warmth and comfort. Wicking properties help draw moisture away from the body. This fleece provides the best mix of price and performance.

Dri-Release Wool® provides superior warmth because of its Merino wool content, yet it is a true 4 way stretch fabric. The Freshguard control offers odor protection that doesn't wear out and is the fastest drying high end base layer fabric on the market.

The combination of 100% Mulesing free merino wool and 100% Bamboo makes for the ultimate material when used in any cold weather performance application. Inherent antimicrobial properties in both the merino and bamboo help to limit the growth of fungus and bacteria between washes - not to mention it's completely sustainable.

ThermoLUX boasts a soft and luxurious texture, providing a comfortable and pleasant touch against the skin. True to its name, ThermoLUX offers excellent thermal regulation properties. It helps to maintain a comfortable body temperature by providing warmth in cooler conditions and allowing breathability during warmer weather.

THE HOWLER COLLECTION

Unmatched Cold Weather Protection — With our PINACL 4-way stretch recycled polyester windproof fabric, every style within the Howler Collection has reached new heights. Ultimate Winter Defense — Our goal with the Howler Collection is to provide the ultimate protection against the harshest winter conditions. Designed for the most extreme environments, each piece in this collection is engineered to combat the challenges posed by Mother Nature and plummeting temperatures.

THE SUELO PROGRAM

Natural Warmth and Hygiene — Our Suelo Pure Program offers styles made from 100% mulesing-free Merino wool with a 100% bamboo knit lining. Superior Thermal and Antimicrobial Properties Merino wool provides exceptional thermal warmth without the bulk, making it perfect for cold weather. Additionally, its natural antimicrobial properties ensure that your gear stays fresh and hygienic, even after extended use. The combination of organic materials in our Suelo Pure Program guarantees comfort and performance, keeping you warm and protected while respecting the environment.
