AUCLAIR

2026 CITY TO SUMMIT CATALOG

AUCLAIR HISTORY

1945

FOUNDING

Mathieu and René Auclair established their glove factory in Loretteville where they produced 200 000 gloves per year.

1960

SNOWMOBILE

The factory embarked on a new venture: the production of specialized snowmobile gloves.

1976

NEW MEMBER

Mathieu's son, Jacques Auclair stepped into the leadership role by expanding the product line in the alpine category.

1989

PARIS GLOVE

Paris Glove acquired Auclair, keeping its name and local production. Under Paris Glove, Auclair expanded to produce for brands like Kodiak and partnered with top athletes, reaching stores across Canada.

POWGIRL

Auclair is making waves in the market with the launch of its new collection: POWGIRL. More than just gear, POWGIRL is a bold step forward — a collection that stands out with fits specifically tailored for women. POWGIRL is a movement to empower women in sports, encouraging them to own their space, push their limits, and lead with confidence.

EUROPEAN MARKET

Auclair takes a major step in its international growth by launching product distribution across Europe. With a strong heritage in Canadian winter sports, the brand brings its performance-driven gear to a broader audience, marking the beginning of a new global chapter.

2011 2020 2023 2025

NEW WAVE

Sweden's New Wave Group, known for its outdoor ventures, acquired Auclair, enabling the brand to expand globally. Despite this, Auclair's core operations remained in Montreal, marking a new chapter with strategic partnerships within the group.

GORE-TEX

Auclair signed a collaboration deal with the world known membrane tech leader Gore-Tex. Trusted protection and comfort. Make more of everyday.

INSPIRED BY NATURE

THE STORY BEHIND POWGIRL

As glove experts, we are always chasing excellence, which leads us every day to ask ourselves how we can be better for our community. In 2019, our designer Marie-Pier came forward with the idea of solving an ongoing issue in the ski industry: designing a glove and mitten line exclusively for women. Designed for her, by her, POWGIRL by Auclair is now not only a product line but also a community. With products that are fitted and styled for women, represented by women from all around the world in many different sports, POWGIRL is now a movement that supports girls to thrive in their passions. Auclair is proud to support not only athletes but also organizations that help women get into sports and pursue their dreams.

HOW IT WORKS

ENDURING WEATHER PROTECTION AND COMFORT - EVEN IN HARSH CONDITIONS

The glove's inner lining, GORE-TEX membrane, and outer material are brought together in a design to guarantee more comfort and better protection as experienced by the consumer during outdoor activity. As a result, your hands stay warmer when it's cold and drier when you perspire.

AUCLAIR ewool HEAT

Meet our 3rd generation
Heated glove/mitt:
powerful heat and lasting warmth

Based in **Canada**, the land of extreme winters, we design the most powerful, simple to use and dependable heated wearables. We are committed to keeping adventurers warm and enabled to perform in the cold.

- Effortless charging
- Powerful, all-over warmth
- Heated hands and fingers
- Lasts all day
- Rugged design

SUSTAINABILITY

We are proud to be a member of the Leather Working Group (LWG), an organization that promotes sustainable and responsible leather manufacturing. By partnering with LWG-certified tanneries, we ensure reduced environmental impact, improved traceability, and better working conditions throughout our leather supply chain.

Emotional durability

Auclair places strong importance not only on material selection but also on choosing timeless, cross-generational colors to encourage product longevity. The brand is proactively aligning with upcoming European Green Deal and ESPR regulations, aiming for full compliance ahead of the 2030 enforcement. By increasing the number of carry-over styles, Auclair improves quality control, reduces waste, and supports more efficient inventory management for partners.

All new Auclair products are made with sustainable insulation: PrimaLoft® or Eco Thinsulate™. These high-performance materials offer warmth, durability, and breathability while reducing environmental impact. They're crafted using recycled fibers, helping us move towards a greener future—without compromising on performance.

We only use responsibly sourced down and wool. All our feather and wool products are certified by the Responsible Down Standard (RDS) or Responsible Wool Standard (RWS), ensuring animal welfare and transparent, traceable supply chains. Better for animals, better for the planet.

Derived from sustainably harvested guayule plants, Yulex provides a renewable, non-petroleum-based solution that significantly reduces environmental impact. It offers similar stretch, durability, and performance characteristics to neoprene, making it an ideal choice for environmentally conscious skiers. For FW26 collection, we are planning to switch 100% of our neoprene cuff to Yulex® on new and carry over styles.

Some of our products are certified under the Oeko-Tex® Standard 100, meaning they are tested for harmful substances and made in environmentally and socially responsible facilities. It's one more way we ensure safety—for our customers and for the world around us.

For more details regarding our sustainability efforts, please visit Auclair website at:

www.auclair.com

TECHNICAL INFORMATION

MATERIAL & TECHNOLOGIES

GORE-TEX INFINIUM™ WINDSTOPPER®
Numb fingers can ruin any day. GORE-TEX INFINIUM™ WINDSTOPPER® gloves block all wind, making them ideal for cycling or running, or just spending a day out with friends. They're also extremely breathable, and feel great against your skin. So if you're halfway through a winter trek, or just rushing around town doing chores, choose gloves that treat your active fingers better.

OEKO TEX
Certifies non-hazardous end-products and all of their components. Products that carry the Standard 100 label have been tested and proven free of harmful levels of toxic substances which represents Auclair's standards.

EVA FOAM
This copolymer foam is flexible and offers durable protection.

AX® MATERIALS
AX® Materials are specially engineered with the features that gloves need most – from breathability and moisture management to grip and abrasion resistance.

SuperFabric®
SuperFabric® is a cut and abrasion resistant technical material. It allows flexibility for enhanced dexterity, but also breathability in addition to the protection of cut, abrasion and puncture.

INSULATION

3M THINSULATE™ Insulation / Isolant — 3M THINSULATE™ Insulation

Thinsulate Type C insulation features estremely fine microfibers that trap air and block radiant heat loss. All while allowing moisture to escape

Thinsulate Type J is a water resistant option, it is designed with hydrophobic fibers that provide superior water resistance, all while helping keep its user warm and comfortable

Thinsulate Type EC is crafted from up to 78% post-consumer recycled material. It is light, warm, and sustainable solution.

PRIMALOFT.

PrimaLoft® Gold is highest performing synthetic insulation on the market for warmth, water resistance, softness and compressibility. Primaloft Gold is an ultra-fine microfiber insulation that is warm, soft, lightweight and warmer wet or dry than all other insulations.

Mirafil++ INSULATION — Mirafil+ INSULATION — Mirafil INSULATION

Our own high loft lightweight polyester insulation provides exceptional warmth without the bulk. Easily washable and maintains its form. Anti-allergenic.
GOLD: +150g - up to 200g
SILVER: 100g to 150g
GREEN: up to 100g

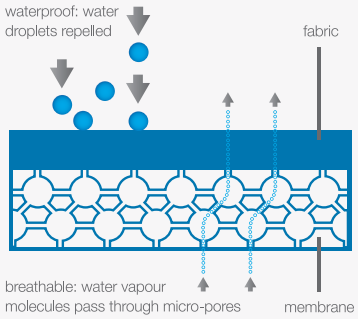

THERMOLITE®

Thermolite® insulation provides warmth and comfort without weight. Thermolite® is hollow-core fibers trap in air for greater insulation for light, yet heavy-duty performance.

RDS RESPONSIBLE DOWN STANDARD CERTIFIED

DUCK/GOOSE DOWN
Nature's premium insulation. Down clusters create "loft" that traps air providing optimal thermal regulation. The greater the loft, the warmer the insulation.
RDS: our down is certified to ensure the feathers come from animals not subjected to unnecessary harm.

PROTECTION MEMBRANE SYSTEMS

AUCLAIR DRY — AUCLAIR DRY — AUCLAIR DRY

AUCLAIR DRY is a fully waterproof and windproof membrane with a highly breathable ratio. Its porous structure allows perspiration to move through and away from the body to keep you dry. Combined to the best materials, it protects you from the elements in all weather conditions.
Three levels of performance have been developed (Platinum - Gold - Silver).

GUARANTEED TO KEEP YOU DRY GORE-TEX

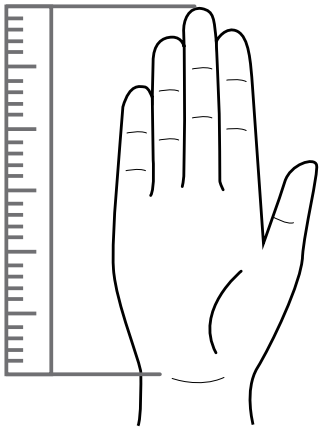

GORE-TEX " see page 14 & 15 for detailed information".

AUCLAIR
Size Guide

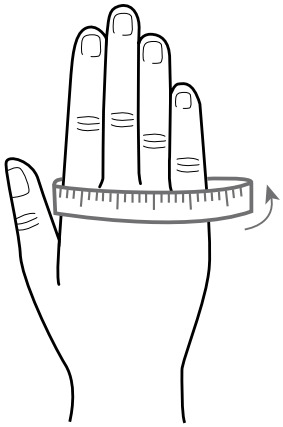

DID YOU KNOW? To determine proper glove/mitt size you must measure your hand length and circumference and use the accompanying size chart to confirm your size.

HAND LENGTH: With a tape measure or ruler. Measure from the wrist break line to the tip of the middle finger.

CIRCUMFERENCE: Using a soft tape measure, measure around your hand at the knuckles. Both measurements should align on the same size of glove/mitt on the size chart. If the measurements do not align at the same size, please use hand-length as the determining measurement.

HAND LENGTH
Measure hand from line under the palm to tip of middle finger

HAND CIRCUMFERENCE
Measure hand circumference around the knuckles
