

HARDGOODS

SEASON 25/26

HEAD[®]
.COM

THE TIME HAS COME...

TIME TO WORK ON THAT TURN YOU HAVEN'T STOPPED THINKING ABOUT ALL SUMMER. TIME TO GET BACK INTO THE ZONE WHERE EVERYTHING IS POSSIBLE, THE PROGRESSION YOU MISSED OUT ON LAST YEAR IS WAITING FOR YOU. TIME TO BE FREE, GO FAST, AND FIND YOUR FLOW. IT'S THAT TIME AGAIN.

HERE'S TO BEING FAR AWAY IN THE MOUNTAINS BUT FEELING MORE AT HOME THAN EVER. THE WIND IN YOUR FACE, THE SNOW UNDER YOUR SKIS, THESE ARE THE DAYS WE DREAM OF.

WINTER 25/26 IS HERE.

THIS IS WINTER 25/26

HIGHLIGHTS OF THE NEW HEAD WINTER SPORTS COLLECTION

KORE BUILT TO SKI ANYTHING

The outstanding new KORE collection. A seamless evolution of a classic philosophy. This new collection delivers signature performance, superior ride quality and new levels of fun and versatility.

ATTACK HYBRID DOUBLE THE FUN

The new Attack HYBRID is the ultimate freeride binding to access all areas. Combining the best of both worlds, uphill and downhill, with no compromise.

ATTACK ATTACK THE BORING

New look, same great performance. Elevate your all-mountain adventures with the top-of-the-line Attack bindings, now available in new stylish colors.

>KALIBER PERSONALIZED PRECISION

Precision is integrated into every element of the new KALIBER. Designed to maximize the precision potential of BOA® like never before.

EDGE NOW WITH BOA®

Our best-selling, most accommodating EDGE boot just got even more tunable. BOA's® intuitive fit system delivers new levels of precision.

FÆRO GET THE FÆRO FEELING!

The new FÆRO helmet platform blends safety and style in an innovative design. Advanced Sphere Fit, featuring innovative height adjustment, ensures a perfect fit and promises unparalleled comfort and seamless goggle integration.

SUNSCREEN SOLAR CONTROLLED LENS TINT

The NEVES SUNSCREEN goggle features our unique solar-powered lens technology, Sunscreen, with an integrated LCD. This innovation allows the lens to adjust to the intensity of sunlight, automatically, within a split second.

FREESKI

KORE

The new KORE is true to its original purpose but elevated to deliver new levels of versatility and fun keeping the weight low and the good times high.

NEW ROCKER AND SIDECUT
The construction includes a new rocker and sidecut for more versatility and fun.

NEW TITANAL LAYERS
Two Titanal layers for stiffness with optimal dampening and made from at least 40% recyclable materials.

NEW CORE MATERIALS
Karuba and Beech cores in unisex models. A Poplar and PET core gives tuned performance for women.

NEW HYBRID TOP SURFACE
A smaller topsheet in Flax reduces chipping and scratching, increases dampening, and creates KORE's striking outline.

RACE

WORLDCUP REBELS

The Race Performance collection features tried and tested geometry merged with cutting-edge technology. Perfect for expert racers, who demand new levels of speed and control.

RACING TECHNOLOGY

Feel the power of the same technologies used by our elite athletes, like EMC, GRAPHENE and TITANAL®.

TIP DESIGN

Narrower tip area for easier and less aggressive turn initiation, with an integrated tip protector.

SIDECUT

Longer radius geometries give a stable, predictable feel when you are racing, particularly on the e-Speed Pro.

PERFORMANCE

SUPERSHAPE

Lean into progressive engineering with this line designed for power and pure performance. Supershape brings race to the piste. Honed and evolved over generations, this is future carving.

BETTER BALANCE PR BASE

Providing a constant ramp angle for easy turn initiation and high speed stability.

CROSSFORCE CARBON CONSTRUCTION

Direct contact from the binding to the ski's carbon construction for ultimate responsiveness.

WORLD CUP SANDWICH CAP CONSTRUCTION

A balanced mix of wood, Graphene and titanal provides extreme responsiveness.

ENERGY MANAGEMENT CIRCUIT

EMC is HEAD's proprietary technology that filters out negative vibrations.

PERFORMANCE

PERFORMANCE

SHAPE

Everything about the amazing Shape skis is designed to make skiing easier. The technology, the construction and the geometry all add up to skis that practically turn themselves.

PR BASE

It is a two piece lightweight design, lower and perfectly integrated in the ski frame.

ENERGY MANAGEMENT CIRCUIT

EMC in Shape e-V8 and Shape e-V10 skis.
EMC front in the Shape e.V5.

PERFORMANCE BACKBONE

Adapted 3D-Design on whole range for improved weight and ski thickness. LYT TECH continues - Light done right.

ALL MOUNTAIN

KORE X

The younger, all mountain sibling to our cutting-edge freeride skis, KORE X inspires smooth, lively turns on and off the slopes. All mountain, full confidence.

SANDWICH CAP CONSTRUCTION

Easy skiability due to the superlite Sandwich Cap Construction.

LYT POWER RAIL BASE

For set option with the Protector binding.

DURABLE TOPSHEET

Topsheet with awesome matt wood like structure for high durability.

FREESKI

OBLIVION

When HEAD's most creative freeskiers collaborated with our top designers and technologists, OBLIVION was re-born. The ultimate expression of progression across the mountain.

RECYCLED PET-WOOD CORE

This innovative core uses poplar wood with recycled PET bottle stringers. A lightweight and low environmental impact construction.

PROFESSIONAL PERFORMANCE AND GRAPHICS

All elements of the ski, inside and out, have been developed in collaboration with Cole Richardson.

TWIN-TIP CONSTRUCTION

Sandwich Carbon Construction with TNT Rocker for more durability but plenty of playfulness in the tip and tail.

CARBON CONSTRUCTION

Carbon layers throughout the ski improve stability and performance while simultaneously saving weight.

TOURING

CRUX

CRUX is the touring solution, uphill or downhill, this touring collection does it all. CRUX has the answer to every challenge your backcountry mission throws at you.

SUPERLIGHT EQUIPMENT, ULTIMATE SKIABILITY

The topsheet has been removed to save weight, while a Snow Free Coating repels snow.

LYT TECH CONSTRUCTION

Less weight equals more efficiency in the skin track and more energy in the tank for the descent.

GRAPHENE AND KARUBA WOOD CORE

Incredible power to weight ratio with strong dampening qualities.

FULL TRIAXIAL CARBON JACKET

Fibers woven in three angles provide exceptional torsional rigidity.

WOMEN'S

JOY

For over 15 years, the JOY range has set the standard for bespoke female equipment. Featuring geometry that is biomechanically tuned for women, JOY is built from the bases up for women who crave to carve.

BETTER BALANCE PR BASE

Providing a constant ramp angle for easy turn initiation and high speed stability.

FEMALE SPECIFIC FLEX PROFILE

Softer flex in the middle to give a homogeneous pressure distribution.

SHOVEL DESIGN

Slimmed down shovel design for a smoother turn initiation and more control.

SIDECUT

Longer radius sidecut gives a more stable ski, for confident edge to edge transitions.

JUNIOR

UNICORN

Designed from the ground up to be super-stable and super-controllable. The junior collection is crafted to help little one's pivot, slide and plough with ease. All the features of UNICORN are designed to make your child feel like they're winning right from the moment they step into the ski.

LESS SIDECUT, MORE FUN!

Narrower tip and tail profiles and longer radiuses on sizes 67-97cm, makes these skis much easier to handle for little skiers aged three to seven.

E4SY SYSTEM

Simple for every child to use. Featuring E4SY FLEX, E4SY HANDLING, E4SY WEIGHT and E4SY STEP IN.

SKI CONSTRUCTIONS

FREERIDE SANDWICH CAP CONSTRUCTION

Our Freeride Sandwich Cap Construction has two layers of Titanal® along with a Karuba/Beech Wood Core in the unisex models and a specifically tuned Poplar/PET Wood Core for our women's line, both providing the ultimate combination of stability and liveliness. A Flax layer and Graphene round out the construction in all models to provide our most performance driven freeride construction to date.

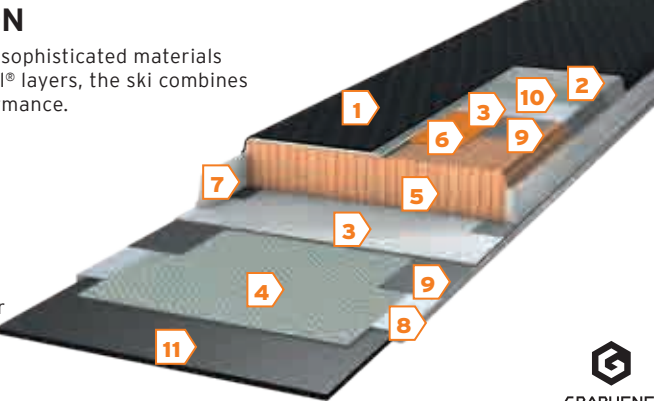

1 Hybrid Top Sheet/Flax	6 Sidewall
2 Glass Fiber	7 Dampening Layer
3 Titanal® Layer	8 Edge
4 Graphene	9 Base
5 Karuba/Beech Wood Core*	

* Poplar/PET-Wood Core for KORE W skis.

Relevant HEAD skis: all KORE & KORE W skis

WORLD CUP SANDWICH CAP CONSTRUCTION

The Worldcup Sandwich Cap Construction, is developed with the most sophisticated materials known to man. With a balanced mix of light Graphene and extra Titanal® layers, the ski combines the most extreme agility with extreme responsiveness, ultimate performance.

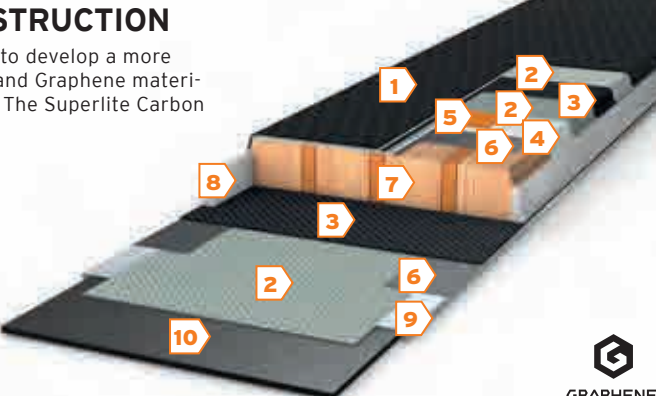

1 Top Sheet/Crossforce Carbon*	7 Sidewall
2 Glass Fiber Fleece	8 Edge
3 Titanal® Layer	9 Dampening Layer
4 Glass Fiber	10 Reinforced Glass Fiber
5 Wood Core	11 Base
6 Graphene	

*Only valid for Supershape skis.

Relevant HEAD skis: all Supershape skis, Worldcup Rebels e-Speed (Pro), Worldcup Rebels e-Race (Pro), Worldcup Rebels e-SL (Pro), Worldcup Rebels e.SLR, Worldcup Rebels e.GSR, Power Joy

SUPERLITE CARBON SANDWICH CAP CONSTRUCTION

By combining the lightest and strongest materials, we have been able to develop a more stable, robust and lightweight ski. Utilizing karuba-ash wood, carbon, and Graphene materials guarantees optimal performance with the lightest possible weight. The Superlite Carbon Sandwich Cap Construction guarantees the ultimate skiing pleasure.

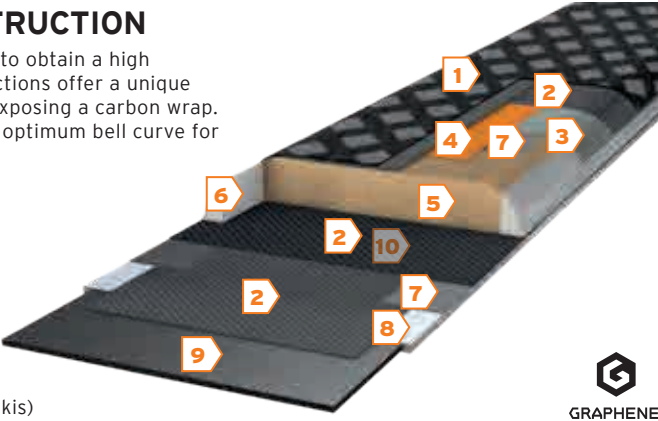

1 Top Sheet	6 Dampening Layer
2 Glass Fiber	7 Wood Core Karuba-Ash
3 Carbon	8 Sidewall
4 Diagonal Glass Fiber	9 Edge
5 Graphene	10 Base

Relevant HEAD skis: Shape e-V10, Shape e-V8, Super Joy, Total Joy

TRIAxIAL CARBON SANDWICH CAP CONSTRUCTION

Full Triaxial Carbon Jacket is a reinforcement fabric that is optimized to obtain a high strength-to-weight ratio. Carbon fibers weaved in three different directions offer a unique construction method where the top sheet is removed on the full ski, exposing a carbon wrap. Better power transmission of forces onto the slopes, ultralightweight, optimum bell curve for perfect flex behaviour.

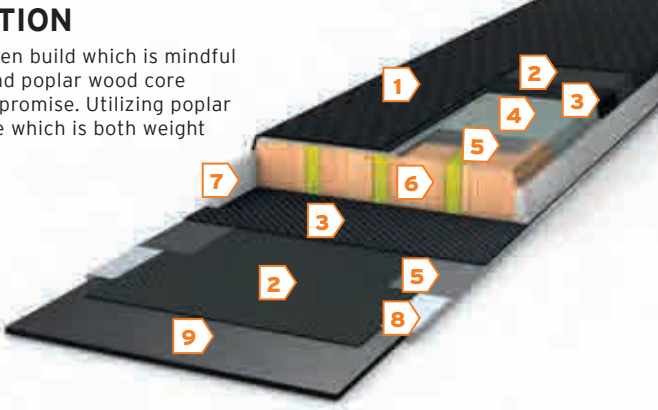

1 Triaxial Carbon Jacket*	6 Sidewall
2 Carbon	7 Dampening Layer
3 Glass Fiber	8 Edge
4 Graphene	9 Base
5 Karuba Wood Core*	10 Glass Fiber (only Crux Skis)

*Crux: 1 Topsheet 5 Poplar Wood Core

Relevant HEAD skis: Crux Pro, Crux

PET-WOOD CORE CARBON CAP CONSTRUCTION

The PET-Wood Core Carbon Sandwich Cap construction, is an eco-driven build which is mindful of sustainability while still delivering superb skiing. The hybrid PET and poplar wood core delivers a stable, robust and lightweight ski with no performance compromise. Utilizing poplar wood, recycled PET plastics and carbon provides optimal performance which is both weight and environmentally conscious.

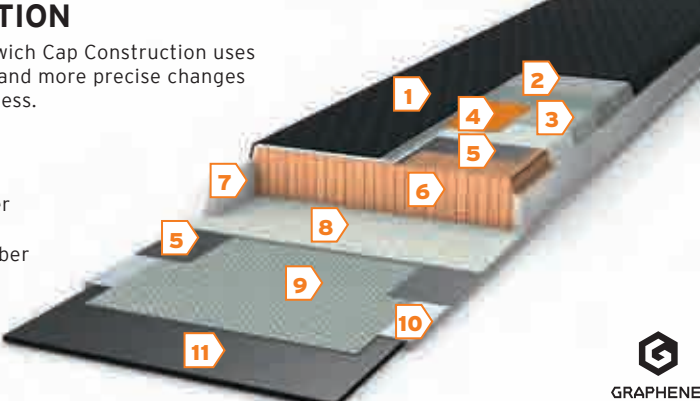

1 Top Sheet	6 PET-Wood Core Poplar
2 Carbon	7 Sidewall
3 Carbon Biaxial	8 Edge
4 Diagonal Glass Fiber	9 Base
5 Dampening Layer	

Relevant HEAD skis: Oblivion 116, Oblivion 102

SUPERLITE SANDWICH CAP CONSTRUCTION

Thanks to the unique properties of Graphene, the Superlite Sandwich Cap Construction uses fewer materials but increases its responsiveness, allowing faster and more precise changes from edge-to-edge. The ultimate ski for flotation and responsiveness.

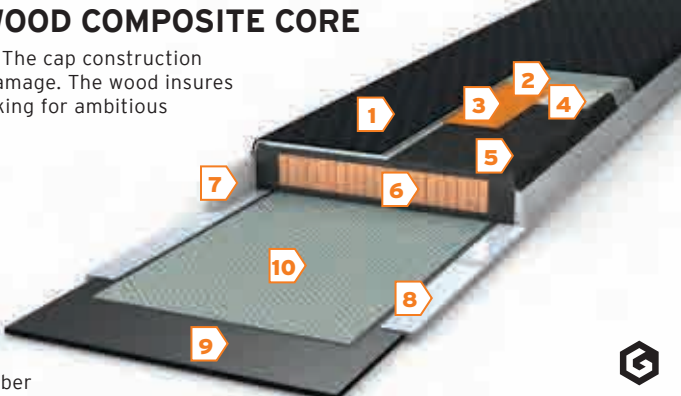

1 Top Sheet	7 Sidewall
2 Glass Fiber Fleece	8 Diagonal Glass Fiber
3 Glass Fiber	9 Reinforced Glass Fiber
4 Graphene	10 Edge
5 Dampening Layer	11 Base
6 Wood Core	

Relevant HEAD skis: KORE X 90, KORE X 85, Worldcup Rebels e.XSR, Worldcup e.Race Team JRS, Oblivion JR, Oblivion JR Pro, Oblivion 94, Oblivion 84, KORE Team

SUPERLITE POWER SIDEWALL JACKET WOOD COMPOSITE CORE

A vertically laminated wood core with a PU injected sock around it. The cap construction with ABS Sidewalls insures complete protection from mechanical damage. The wood insures stability against vibrations and a smooth ride for target groups looking for ambitious performance.

1 Top Sheet	6 Wood Core
2 Glass Fiber	7 Sidewall
3 Graphene	8 Edge
4 Diagonal Glass Fiber	9 Base
5 Synthetic Core	10 Reinforced Glass Fiber

Relevant HEAD skis: KORE X 80, Shape e.V5, Shape V4, Absolut Joy, Real Joy, Worldcup Rebels XR, Kore X 78, Kore X 74, Shape VX R, Shape AM 74 R, Shape AM 80 R

FREESKI

ATTACK HYBRID

DOUBLE THE FUN

The new ATTACK HYBRID is the ultimate freeride binding to access all areas. Combining the best of both worlds - uphill and downhill - for no compromises.

THE TOURING UNIT

EASY ENTRY thanks to the optimized locking kinematics of the Almonte toe.

AUTOMATIC BRAKE LOCK activated by hand or with the pole handle.

EASY ASCENT with two hiking positions (0°/9°) - operable by hand or with the pole handle.

EMERGENCY MODE for skiing in the touring unit.

THE ALPINE UNIT

TOP DOWNHILL PERFORMANCE proven by our athletes.

HIGHEST SAFETY according to ISO standards and proven by TÜV tests.

MULTINORM STANDARD Compatibility with Alpine, GripWalk and Touring boots (including the CRUX boot).

WIDE DIN RANGE DIN 3-11 and DIN 4-14.

EASY HANDLING

The exchangeable toe unit allows for a simple conversion from hike to ski.

NO COMPROMISES

Tech toe for ascent and alpine toe for descent.

LIGHTWEIGHT DESIGN

Use of carbon fibers (30%) instead of glass fibers and titanal toe track.

ECO-DESIGN

More than 50% renewable plastics.

PERFORMANCE

PROTECTOR PR 13 GW

RECOMMENDED BY YOUR KNEES
Featuring Full Heel Release technology, the PROTECTOR binding can reduce stress on the anterior cruciate ligament by more than 50%*, in the event of a fall, significantly reducing the chance of injuries.

* finite element model simulations by University of Innsbruck:
"Lateral Heel Release Reduces ACL strain in Simulated Backward Twisting Falls"

REDUCES ACL STRAIN
by more than 50%*.

FULL HEEL RELEASE FUNCTION
intelligent 180° release (horizontally & vertically).

BOOT COMPATIBILITY
works with Alpine & GripWalk ski boots.

SAME PERFORMANCE & CONVENIENCE
as our conventional bindings plus maximum safety.
Now with an improved brake functionality.

no standard

* There are older ski bindings/ski boots without marking. Here the technician needs to check boot compatibility according the corresponding tech manual.

** Screwdriver icon indicates that the toe height needs to be adjusted by the technician. e.g. 

Although there is no Type A & C standard in ISO 9523 - MN bindings are marked with A to avoid possibly installing of a Type C Alpine or Walk boot in those bindings.

*** Boot needs to have tech inserts. Compatibility with tech bindings might be limited. Check recommendations of the binding and boot manufacturer.

**** Compatibility with tech bindings might be limited. Check recommendations of the binding and boot manufacturer.

RACE

RAPTOR

Simply the most successful race boot in World Cup history and still the equipment of choice for the world's fastest racers. This is ultimate speed in a tailored, precise fit.

BUCKLE POSITIONING

The higher screw-racing buckle and compact shell won't touch the snow when achieving high edge angles.

CUFF ALIGNMENT

Gives more precise adjustment, more stable connection and less friction between shell and cuff.

EXTENDED TOE BOX AND MATERIAL

The extended toe box increases torsional rigidity and power transmission. The shell's PU material provide a more progressive flex, smooth rebound and less vibration for better control.

WCR BOOT BOARD

The all-new WCR boot board has no varus, which allows for rapid and easy fitting.

HIGH PERFORMANCE

FORMULA

A high-performance boot designed for expert skiers looking for unbeatable comfort and foot wrapping. FORMULA comes in 98mm and 100mm last sizes to fit all feet and every terrain.

SPINEFLEX BUCKLE

This unique buckle concept has a flexible element, that adapts to the shell profile, reducing pressure points and improving the fit and performance.

CUFF ALIGNMENT

Gives more precise adjustment, more stable connection and less friction between shell and cuff.

EXTENDED TOE BOX

A longer toe box increases torsional rigidity and power transmission. New design for a better balance and increased comfort.

PU MATERIAL

The PU material gives more progressive flex, smooth rebound and less vibration for better control.

TECH VIDEO

PERFORMANCE

KALIBER

Precision is intergrated into every element of KALIBER. Designed to maximize the potential of BOA® fit like never before.

PERSONALIZED PRECISION

Designed to optimize both fit and performance.

FULL BOA® OPTIMIZATION

A totally new design integrates the BOA® system into the cuff and lower boot.

NEW BI-INJECTION CONSTRUCTION

To ensure a better footwrap down to the toes, molding to the foot and maximizing BOA® functionality.

ANATOMICAL EXCELLENCE

More toe space, a new heel and ankle shape in the shell works in unison with the new **SYNAPSE PRO** liner, which offers optimal temperature regulation thanks to Graphene woven into the liner.

ALL MOUNTAIN

EDGE BOA®

After over 22 years of success on the slopes, EDGE has evolved again. Years in development, BOA® has been added to the EZ-tech shell featuring EZ-ON and EZ-SKI. Your EDGE to better skiing.

BOA® TECHNOLOGY

Our most accommodating boot just got even more comfortable. Even foot wrap and a tunable fit on the fly in an intuitive fit system.

EZ-ON

The new EDGE shell provides the easiest step in ever for a four buckle boot.

EZ-SKI

The unique Hi-Top lower shell plus the power flex ensures a direct energy transfer from skier to ski, amplifying control, reducing fatigue and increasing fun.

ALL MOUNTAIN

CUBE3

On any given day, we spend 30% of our time out of our bindings. So, a great performing boot should also be great for walking, right? The CUBE3 Line is designed to do exactly that.

EASY IN

With new quick-entry geometry, the CUBE3 is the only boot this easy to step into. The 3-buckle construction is quick to fasten, with a snug fit.

EASY WALK

Out of bindings, the shaft of the CUBE3 unlocks. Combined with SoftWalk heel and grip, this makes the CUBE3 a superb walking boot.

EASY SKI

Step into your binding and AutoSkiWalk instantly blocks the shaft, so you speed down the mountain without bowing, bending or buckling.

CRUX BOOT
TECH VIDEO

TOURING

CRUX PRO

Featuring all new Power LYT design, the CRUX Boot line delivers incredible skiability in a super strong, super light package. Accept no compromise in the ascent or descent, this is the touring solution.

POWER LYT DESIGN

COMFORT SKIN SHELL

Designed to wrap the foot with a balanced and comfortable 99 mm touring last. The reactive material provides minimum thickness and precise adaptation to the foot.

CONTROL CUFF

Featuring 2 buckles and a high profile for superior ski control even in the most demanding conditions and speeds.

LYT DYNAMIC FRAME

Connects the shell, cuff and ski-hike device, providing the direct and powerful energy transmission. The Vibram Durastep rockered sole provides smooth foot rolling.

CRUX PRO HP

Customizable liner, the material's density ensure the perfect mold in the most critical area of the boot. Reinforced tongue and upper cuff. Tongue and cuff velcro for extra spoiler.

JUNIOR

RAPTOR JUNIOR

- **BUCKLE POSITIONING**
The higher screw racing buckle and compact shell don't touch the snow when achieving high edge angles.
- **CUFF ALIGNMENT**
Gives more precise adjustment, more stable connection and less friction between shell and cuff.
- **EXTENDED TOE BOX AND MATERIAL**
The extended toe box increases torsional rigidity and power transmission. The shell's PU material provide a more progressive flex, smooth rebound and less vibration.
- **WCR BOOT BOARD**
The WCR boot board has no varus, which allows for rapid and easy fitting.

J KIDS BOOTS

- **JR. HI-TOP**
Higher tongue profile and asymmetrical lateral support.
- **TWO PHASE FLEX**
Gradual and natural centered balance.
- **NATURAL KID STANCE**
- **VARIO LAST DESIGN**
HEAD's Anatomical last has been developed to accommodate the natural growth of kid's feet: Wider last on small sizes.

FEATURES

1. SPHERE FIT HEIGHT ADJUSTMENT

Different head shapes often result in helmet goggle gaps. The Sphere Fit Height Adjustment System allows you to change the position of the helmet on your head for seamless goggle integration. This is achieved by simply moving the dial on the back of the helmet up or down, which in turn changes the position of the Neckgator by moving it up or downwards. You can switch between the three available positions, depending on which head type you are and which one suits you best.

2. TECH LINING

Advanced comfort and protection with superior insulation, moisture-wicking, and breathability. Custom fit, antimicrobial, and hypoallergenic for an irritation-free skiing experience.

3. ASIAN FIT OPTIMIZED

Patches on the inside can be removed for enhanced comfort and fit for round head shapes. The Asian Fit optimization ensures a snug and secure feel.

4. GOGGLE VENTING SYSTEM

Integrated with the helmet's ventilation, this system ensures optimal airflow, preventing fogging and keeping your vision clear. Enjoy a seamless and comfortable skiing experience with enhanced breathability.

5. SURROUND COMFORT DESIGN

The extended Sphere Fit System ensures a snug fit around the ear area. This allows the helmet to sit lower and reduces visual bulk at the same time there is enough space to wear headphones.

RAPID LENS EXCHANGE SYSTEM

STEP 1
Pull out the lens with one hand.

STEP 2
To remove the lens, push out the fixation device with your thumb until the lens is loose. Be careful that the elastomer doesn't snap back. Remove on both sides.

STEP 3
To attach the new lens, pull out the elastomer before clicking in the new lens. Do it on both sides.

FEATURES

1. SPHERE FIT WITH BOA ®

The patented Sphere Fit system wraps around the head like a beanie. Adjusting the precise BOA® dial ensures a snug, comfortable fit in all three dimensions without pressure.

2. ADJUSTABLE VENTILATION

The ventilation ducts on the helmet's top can be adjusted with a slide control.

3. BEANIE LINER

The soft Microfur Beanie Liner fits the head perfectly, preventing bruises and cold air entry. Mesh zones allow heat and moisture to escape, ensuring a pleasant head climate with the ventilation system.

4. FIDLOCK BUCKLE

This buckle closes automatically and can be opened easily and conveniently by sliding the buckle laterally with just one hand.

5. INTEGRATED VISOR LENS

The innovative combination of a visor helmet with the advantages of wearing a goggle are integrated into a product which is outstanding in terms of fit, style and performance. The visor automatically adapts to the wearers face and seals off wind and water.

6. RAPID LENS EXCHANGE SYSTEM

Lenses can be swapped on the go with only a click. Adapt yourself to changing weather conditions in no time!

C-SERIES

CINEMA

Although easy on the budget, this is not your standard visor helmet! Perfectly fitting any prescription glasses below, this free-hanging visor construction can be operated with one hand and lenses can be exchanged with one simple *click*.

▪ **EASY QUICK LENS EXCHANGE MECHANISM**

with multiple lens options available, including 5K & photochromic

▪ **HYDROPHIL VISOR SEAL**

which expands when exposed to moisture to prevent water and snow entering the inside

▪ **ADAPTIVE, HYPER-DURABLE FACE FOAM TECHNOLOGY**

▪ **THE BEST FIT FOR ALL HEAD FORMS**

with free-hanging Sphere Fit construction

**MIPS – BRAIN PROTECTION SYSTEM****1.**

When you hit your head in a fall, it often creates a rotational motion in your brain.

**2.**

MIPS Low Friction Layer allows the head to move 10-15mm, in all directions, inside the helmet which reduces the rotational motion to the brain.

**3.**

The MIPS brain protection system is designed to reduce strain to the brain.

C-SERIES

FEATURES

1. HIGHLY DURABLE

This helmet technology is outstanding in longevity and impact protection. Additionally, the helmet is highly durable and resilient, making it an excellent choice for intensive use and demanding conditions.

2. SPHERE FIT SYSTEM

The patented Sphere Fit system is a free-hanging fit system. It wraps around the head like a beanie, creating a snug and comfortable fit without applying any pressure.

3. BEANIE LINER

The soft Microfur Beanie Liner fits the head perfectly, preventing bruises and cold air entry. Mesh zones allow heat and moisture to escape, ensuring a pleasant head climate with the ventilation system.

4. THERMAL VENTILATION

Thermal Ventilation is our automatic ventilation system which leads warm air away from the head to the outside without allowing any cold air to the inside.

5. DURAFLEX FOAM

The most comfortable, yet durable face foam on the market! The foam is highly flexible, adapting to individual face shape. At the same time, the durable structure assures longevity.

6. HYDROPHIL VISOR SEAL

The seal is located on the inside of the visor lens and expands when exposed to water, ensuring that water is kept out of the inside.

7. VENTILATED LENS

Air channels direct air from the lens to the helmet's ventilation system, preventing fogging.

8. EASYCLICK LENS EXCHANGE SYSTEM

The lens can be exchanged with a simple click mechanism on both sides. A small colored dot indicates if the lens is securely locked with the outriggers.

HELMET TECHNOLOGY

HARDSHELL TECHNOLOGY

This helmet technology is outstanding in longevity and impact protection. For this reason we use it in our race and rental helmets.

CONSTRUCTION

DUAL DENSITY CORE

This patented core technology is made from EPS with dual densities. This increases the helmets performance so it passes the FIS RH 2013 standard.

TOOLFREE CHINGUARD

The angle of our all-new Toolfree Chinguard can be adjusted individually, without using any tools. The chinguard can also be taken off, when not needed for training, or racing gates.

360° MICROSHELL

The 360° Microshell is a polycarbonate layer, which three-dimensionally wraps around the lower helmet lip, that prevents scratches and dents in the helmet's foam.

MICROSHELL

The Microshell is a polycarbonate layer that prevents scratches and dents in the foam.

MIPS

The MIPS Brain Protection System is a helmet-integrated, low-friction layer designed to reduce rotational motion transferred to the brain from angled impacts to the head.

RECCO

The Recco system, integrated into ski helmets, makes you searchable to professional rescuers in case of an avalanche. This technology reflects signals from rescue detectors, improving your chances of rapid location and providing peace of mind.

RD CONSTRUCTION

The RD construction incorporates a carbon reinforcement in the front area of the helmet to endure repeated impacts from slalom poles. Additionally, a thin yet robust transparent foil, akin to those used in the automotive sector, further shields against slalom pole impacts, enhancing overall protection.

VENTILATION

ADJUSTABLE VENTILATION

The opening of the ventilation ducts on the top of the helmet may be adjusted continuously by means of a slide control.

IN-MOLD TECHNOLOGY

The shock absorbing inner EPS layer of this technology is injected into the hard outer polycarbonate layer to create a single comprehensive unit that provides perfect protection at a reduced weight.

THERMAL VENTILATION

Thermal Ventilation is our automatic ventilation system which leads warm air away from the head to the outside without allowing any cold air to the inside.

ACTIVE BOTTOM EDGE

An Active Bottom Edge in HEAD helmets reduces goggle fogging by delivering active airflow. It does this by allowing air to be drawn from the goggles through the helmet.

VENTURI EFFECT

The Venturi Effect creates the ideal inner helmet climate. It does so when air passing over the helmet draws out heat and moisture from the helmets inside.

GOGGLE VENTING SYSTEM

Experience enhanced ventilation with the Goggle Venting System in HEAD helmets. Airflow passes through the goggles and exits through top ventilation slits, seamlessly absorbed at the helmet's brim. Integrated helmet ventilation ensures fog-free goggles, optimizing your visibility while skiing.

LINING

MICROFUR

Microfur is both warming and comfortable on the skin. As a helmet lining it creates the perfect fit and feel for all-day shredding.

MICROFLEECE

The soft microfleece material has several functions: It feels good, draws moisture from the skin and transports it away from the head.

VEGAN SILK

Experience unparalleled comfort with Vegan Silk, a soft, thin, and stretchy material used for the inner lining of the MIPS model. This stretchy fabric supports the MIPS system's ability to reduce rotational forces during impacts, ensuring superior protection and a comfortable fit.

IONIC+

Ionic+ is an advanced odor-elimination technology in helmet lining, using silver ions with natural antimicrobial properties to combat bacteria and eliminate bad odors. It keeps helmets fresher for longer, enhancing comfort and hygiene.

HYBRID SHELL CONSTRUCTION

Helmets featuring hybrid shell construction blend the lightweight benefits of in-mold technology with the robustness of hard shell construction. This innovative and modern design ensures superior protection and comfort, empowering you to ski with confidence.

BEANIE LINER

The soft microfleece material of the Beanie Liner adapts perfectly to the head and thus avoids any bruises and the unpleasant entering of cold air. Molded-in mesh zones let heat and moisture escape to the outside and, together with the ventilation system, ensure a pleasant head climate.

TECH LINING

HEAD's high-performance Tech Lining combines comfort with functionality, featuring a minimized design that integrates with the helmet's size adjustment system. Perfect for warm weather or intense activities, it efficiently wicks moisture to keep you comfortable. And for easy upkeep, it's removable and washable.

COMFORT ZONE LINER

Soft liner pads provide perfect fit & comfort at a fraction of the weight.

WINDSHIELD LINER

A thin cover on the forehead that keeps your head protected from the airstream.

KID SPECIFIC LINER

This lining is specifically designed for kids, fully covered with soft microfleece, providing perfect fit & comfort at a fraction of the weight.

EARPADS & FITTING

NECKGATOR

The Neckgator provides comfort and warmth to the helmet wearer. It adds comfort, fit and excludes the elements.

REMOVABLE EARPADS/NECKGATOR

These ear pads and/or neckgator can be removed to suit the variable weather conditions and for cleaning.

CHANGEABLE ADAPTER PLATES

Use the flat adapter plates with optimized acoustics for speed disciplines, the chin guard adapter for slalom disciplines.

SURROUND COMFORT DESIGN

The Surround Comfort Design extends the patented Sphere Fit System to ensure a snug fit also around the ear area. This design securely and comfortably encloses the head, allowing the helmet to sit lower and reduce visual bulk.

VISOR CONSTRUCTION

HEAD's Visor Construction is a wind-sealed UV protective shield that allows skiers to ride wearing prescription glasses. Like on a motorcycle helmet the visor can be pulled down to protect the eyes while riding.

ASIAN FIT OPTIMIZED

Helmets with this feature include integrated pads that can be adjusted or removed to accommodate rounder head shapes, ensuring a personalized fit and enhanced comfort for wearers with this specific head shape.

SPHERE FIT

The patented Sphere Fit system is a free-hanging fit system. It wraps around the head like a beanie, creating a snug and comfortable fit without applying any pressure.

SPHERE FIT HEIGHT ADJUSTMENT

HEAD's enhanced Sphere Fit System features an innovative height adjustment, allowing the helmet to be perfectly tailored to individual forehead and nose contours. This ensures an ideal helmet fit and seamless integration with ski goggles.

BOA®

The BOA® Fit System allows you to adapt the helmet perfectly to your head, creating a snug and comfortable fit without any pressure.

360° BOA® FIT

The 360° Fit System by BOA® evenly adjusts the fit of the helmet to all head shapes

HEAD 3D FIT

HEAD 3D Fit allows an exact horizontal as well as vertical adjustment of the helmet to the shape of your head.

HEAD 2D FIT

The size adjustment system may be varied horizontally in order to individually adjust the helmet to your head.

METAL CHINSTRAP BUCKLE

The Metal Chinstrap Buckle is both durable and tactile. Made from metal it also adds to the look of a HEAD helmet.

FIDLOCK BUCKLE

The magnets of this buckle close automatically and can be opened easily and conveniently by sliding the buckle laterally with just one hand. Even with gloves on, opening and closing the helmet will only take a moment.

CERTIFICATION

EN 1077:2007 CLASS B

EN 1077 is the European standard for ski & snowboard helmets, taking into account the results of collision tests to ascertain dampening and puncture resistant qualities of the outer shell. Class B of this certificate certifies helmets with soft ear protectors.

EN 1077:2007 CLASS A

The certification procedure for Class A is used for racing helmets with hard ear protectors, requiring high standards of puncture resistance.

EN 174:2001

European standard for Personal eye-protection - Ski goggles for downhill skiing.

ASTM F 2040

The North American equivalent to the European CE-Test uses comparable methods.

FIS RH 2013

These helmets comply with FIS GS/SG/DH helmet regulations.

VISORS & LENSES

INTEGRATED VISOR SYSTEM

The innovative combination of a visor helmet with the advantages of wearing a goggle are integrated into a product which is outstanding in terms of fit, style and performance. The visor automatically adapts to the wearers face and seals off wind and water.

DOUBLE LENS VISOR

The Double Lens Visor is ventilated, which prevents the lens from fogging. It provides 100% UV protection. Therefore, it is the ideal solution for mountain sports.

RAPID LENS EXCHANGE SYSTEM

Lenses can be swapped on the go with only a click. Adapt yourself to changing weather in no time!

EASYCLICK LENS EXCHANGE SYSTEM

The lens can be exchanged with a simple click mechanism on both sides. A small colored dot indicates if the lens is securely locked with the outriggers.

	S3 Bright and sunny conditions require a dimming lens tone.	S2 Versatile lens for changeable weather conditions.	S1 For cloudy or snowy days on the mountain.	S0 Clear lens for night touring.

CONTEX

CONTEX

The CONTEX goggles are amongst the most popular goggles on the market, offering various lens options like advanced 5K high contrast technology and photochromic lenses. Available in three sizes—small, medium, and large – they provide a customized fit for any face and seamless helmet integration, while delivering exceptional value for your money.

■ **LAMINATED DOUBLE LENS**

increases the field of vision by 15%, by connecting the inner lens to the outer lens through a lamination process.

■ **DYNAMIC VENTILATION SYSTEM**

is designed to allow air to enter the goggle from three sides, therefore creating an airstream that assures a perfect climate inside the goggle.

■ **AVAILABLE IN THREE SIZES**

GOGGLE TECHNOLOGY

LENS

SUNSCREEN

Sunscreen is a solar-powered lens technology with an integrated LCD. It automatically adjusts the goggle lens, darkening in sunlight and brightening in shade. The solar panel generates voltage in sunlight, activating a microprocessor that controls liquid crystal rotation. This adjusts the lens tint instantly for optimal visibility.

5K LENS

5K enhances contrast and boosts color brilliance by filtering specific wave lengths of the visual spectrum, therefore revealing more details and assuring a safer, less tiring on-snow experience in any weather condition.

PHOTOCHROMIC LENS

This lens automatically adapts its lens tone between category S1 to S3, depending on the weather condition. The lens is toned down in bright, sunny conditions and allows more light to enter the eyes in cloudy, overcast weather conditions.

LAMINATED DOUBLE LENS (LDL)

By connecting the inner lens to the outer lens through a lamination process, there is no gap between the two lenses. This increases the field of vision by 15%. A special anti-fog coating is applied to assure a clear vision in any condition.

SCRATCH RESISTANT

The mirror coating of this lens is applied on the inside. This protects the coating from scratching or wearing off over time.

MATERIAL

WINDSEALED MAIN FRAME

Windseal Foam is a wind retardant foam. We use it in our downhill race goggles to exclude the rushing wind of racing.

VENTING FOAM

Venting Foam allows the transfer of air, heat and moisture. When used in our goggles it prevents fogging and creates the ideal climate inside a pair of goggles.

TRIPLE LAYER FOAM

Dual-density comfort foam with microfleece is a bonded foam with a soft fleece for added comfort. The two foams serve different purposes, including anti-fogging, climate regulation and padding while the fleece creates the ideal comfort layer between goggle and skin.

DOUBLE LENS

The polycarbonate double lens is a lightweight lens, that provides 100% UV protection and is 10 times more impact-resistant than conventional glass or plastic. It is therefore the ideal lens for mountain sports.

UV400 & ANTI FOG

UV400 & Anti Fog refers to the intense UV protective qualities of HEAD lenses and their ability to minimize fogging. The light on the mountain is intense so you need the best protection possible as well as anti-fogging qualities to maintain the best visibility.

FMR

FMR is HEAD's flashy mirror finish to their lenses providing added protection against sunlight. Light on the mountain is intense so riders need the best protection possible.

TORIC LENS

Toric lenses are curved in a way which avoids optical distortion and adds a bold, modern look to the goggle.

SPHERICAL LENS

A Spherical Lens has a consistent vertical and horizontal curve for a true and clear field of vision. It is both functional and looks great.

CYLINDRICAL LENS

The Cylindrical Lens is a flat lens with a single lateral curve that provides a superior field of vision. It also looks great!

DOUBLE LAYER FOAM

Comfort Foam with microfleece is a single density foam that regulates a goggles inner climate, cushions and provides the perfect skin to goggle interface.

EXTRA FACEFOAM

For customizing the fit of the goggle to your face, as well as creating the perfect match between helmet and goggle.

COMFORT FOAM

Comfort Foam is a single density foam that allows for the ideal inner goggle climate. Comfortable with venting properties it is the ideal foam for goggles.

FILTER CATEGORY

S0: Clear lens for night touring.

S1: For cloudy or snowy days on the mountain.

S2: Versatile lens for changeable weather conditions.

S3: Bright and sunny conditions require a dimming lens tone.

FEATURES

EXTREME WIDE FIELD OF VISION

HEAD's goggles with an extra wide field of vision are perfect for racers, allowing a tight aerodynamic tuck without impaired vision.

MAGNETIC LENS EXCHANGE

The magnetic lens exchange solution enables you to swap lenses on the go. It automatically locks the lens in place and assures that you can adapt yourself to changing weather conditions quick and easily.

SPEED SNAP LENS EXCHANGE

Speed Snap Lens Exchange is a fast and easy lens exchange system. Lenses snap in and out quickly and easily allowing a rider to keep up with the changing light conditions.

INTERCHANGEABLE LENS EXCHANGE

Interchangeable Lenses means that they can be changed to suit light conditions or when damaged. This increases the longevity of a goggle frame and allows for flexibility.

WIND SEAL

Protects the goggle from wind and water entering the inside.

SILICONE LAYER

The Silicone Layer provides added grip between a goggle strap and on-mountain head wear. From helmets to beanies the Silicone Layer keeps goggles in place.

OTG - OVER THE GLASSES

The OTG design allows comfortable wear of goggles over prescription glasses, providing extra space inside the goggles frame for clear vision and comfort on the slopes. It seamlessly accommodates eyeglass wearers without compromising performance or adding bulkiness.

3 SOLE LENGTHS FOR ALL SKIBOOT SIZES

How does it work?

SKIBOOT

They are marked with black, yellow and silver color codes. HEAD ski boots are available as a fleet or as a high performance version.

289mm
23.0 - 26.0

329mm
27.0 - 30.0

365mm
31.0 - 34.0

>>> By selecting only the skiboot the correct skiset is automatically chosen.

B MOST COMMON WEIGHTS AND HEIGHTS

49-57 kg	149-157 cm
108-125 lbs	4'11"-5'1"
58-66 kg	158-166 cm
126-147 lbs	5'2"-5'5"
67-78 kg	167-178 cm
148-174 lbs	5'6"-5'10"
79-94 kg	179-194 cm
175-209 lbs	5'11"-6'4"
≥ 95 kg	≥ 195 cm
≥ 210 lbs	≥ 5'11"-6'4"

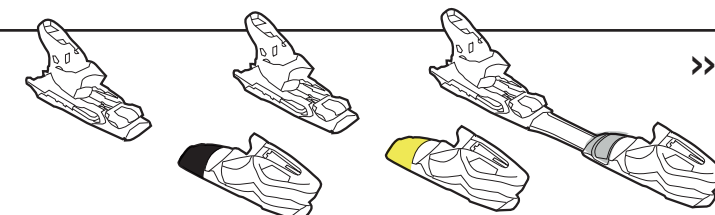

A ONLY 3 BOOTSOLE LENGTHS

C NARROWS POSSIBLE DIN SETTINGS TO 4, 5 AND 6

	U-C-G	M-Q	V-6
	271-290	311-330	≥350

M			
N			
O			
P			

BINDING

>>> The color code speeds up the selection of matching the binding with the boot.

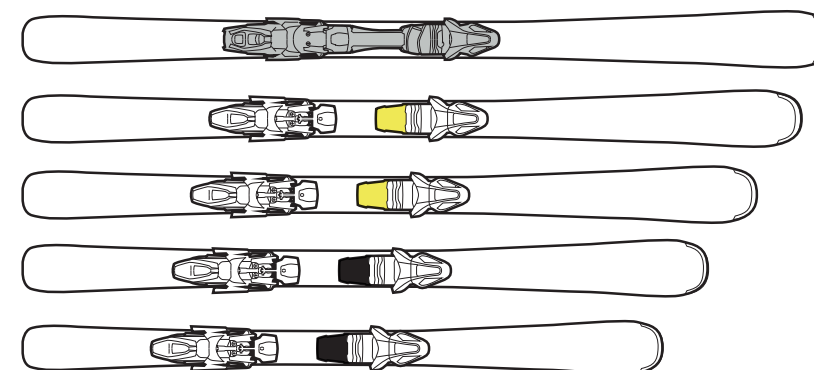

SKI

HEAD skis are available in 5 different sizes. Ambition Pro woodcore, 140cm to 180cm and Ambition PU core, 130cm to 170cm. All skis can be used with the BYS System.

>>> With color codes, you can easily identify the right HEAD setup immediately. All settings are pre-adjusted.

Among the bindings you can choose between the color coded fix mounted toe- and heel-piece or the adjustable SP binding (track system).

Organizing your fleet not only by size but also by preset DIN settings (4, 5, and 6) will allow you to speed up your process.

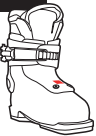

HRS JR

HOW IT WORKS

4 sole lengths for all JR BOOT sizes.

SKIBOOT

Z1 HRS
15.5 - 16.5
▲

Z1 HRS
17.7 - 18.5
■

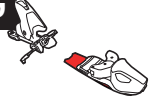

Z2 HRS
19.5 - 20.5
◆

Z2 HRS

SHELL

PU SHELL

On all models, including “J1, J2, J3” junior boots. More resistant material for longer service.

PRINTED SINGLE CODE WITH MM INDICATION

Available on all models. In the single code we have added the sole length. This helps you to quickly identify the sole length of the boot for quicker binding adjustments.

HIGH RESISTANCE PU HEEL AND TOE

BARCODE STICKERS

Centrally positioned to facilitate and speed up label scanning. Available on all models

* just on the left boot

LINER

SANITIZED® CHARCOAL FOOTBED

to absorb moisture, neutralize odour and to improve sanitation.

REINFORCED UPPER

for reinforced step in.

BUCKLES

SCREWED BUCKLES

on Formula

REINFORCED BUCKLES

for added durability.

NEW VISOR HELMETS

CINEMA R

DURABILITY

The CINEMA R features a scratch resistant textured Shell, adding durability and an appealing matte effect.

USABILITY

The innovative free-hanging visor is easy to handle with just one hand. Its versatile lens ensures ideal eye protection and the comfortable face foam prevents wind coming in. With the Sphere Fit system and the Autoadjust Buckle the CINEMA R can be easily adjusted and provides a perfect fit to any customer.

SYSTEM INTEGRATION

A subtle but visible Color Coding is applied to the chin strap of the CINEMA R for size identification.

JR VISOR R

NEW KIDS' RENTAL HELMET WITH VISOR

The children's helmet is designed for easy use by kids, with color coding for sizes integrated into the design, with XXS being yellow and XS/S being blue. It combines style, function, and comfort, featuring a UV 400 lens to protect the eyes and a soft foam lip for wind protection, all without the need for constant adjustment of the ski goggles. The perfect fit and comfortable helmet climate are ensured by ventilation openings and a size adjuster, providing a secure fit for all-day wear on the slopes.

RETAIL-ORIENTED DESIGN

RETAIL-ORIENTED DESIGNS

Designs specifically created to enhance visual appeal and consumer engagement in retail environments.

CONSISTENT PRODUCT NAMES

Rental boards and retail boards share the related product names, making it easier for customers to compare and choose.

DURABLE RENTAL TOPSHEETS

Rental boards feature robust topsheets for extended durability, ideal for heavy use.

SUBTLE COLOR CODING

Descreet color-coded sizes on rental boards make it easy for retailers to quickly match bindings and boots with the right board.

600 4D BOA

ARTICLE NUMBER
357246 600 4D BOA (+Coiler)

PRODUCT FEATURES
BOA® Coiler, Explorer Outsole,
Full Toe and Heel Protection,
Fully covered Lace Protection, 4D Compatible,
S.Café® Lining Mesh, FPG Insole, Flex Index 5,
Forward Lean 7°

SIZES
22.5 - 32.5

500 4D

ARTICLE NUMBER
357443 500 4D BOA (+Coiler)
357403 500 4D

PRODUCT FEATURES
BOA® Coiler, Explorer Outsole, Injected Heel Section,
Rubber Toecap, Rubber Covered Laceguides,
4D Compatible, FPG Insole, Flex Index 5,
Forward Lean 7°

SIZES
22.5 - 32.5

400 4D JR BOA

ARTICLE NUMBER
357566 400 4D JR BOA

PRODUCT FEATURES
BOA®, Explorer Outsole, Full Toe and Heel Protection,
Rubber Covered Laceguides, 4D Compatible, Linerless,
S.Café® Lining Mesh, FPG Insole, Flex Index 3,
Forward Lean 7°

SIZES
18.5 - 25.0

TECHNOLOGY FEATURES SKI

Allride Rocker: Rocker that is equally at home on bulletproof snow as it is in powder. This profile uses early rise in the tip with regular camber throughout the rest of the ski. 20% rocker – 80% camber.

Crossforce Carbon Construction: Crossforce Carbon Construction is a unique construction method where the top sheet is removed under the binding, exposing a carbon wrap which the binding is mounted directly onto. Better power transmission of forces onto the slopes.

Diecut UHM C Base: This durable workhorse base material is dedicated to all forms of skiing. Diecuts are added for flare.

E Base black: Basic black never goes out of style, and it's always durable. Easy gliding is everyone's friend.

EMC: Energy Management Circuit – converts kinetic energy into electric energy, that then gets used to absorb negative vibrations.

ERA 3.0: A masterful blend of three independently important technologies to make the ultimate allcountry skis. Rocker + Radius + Rebound = Rocker Done Right.

ERA 2.0: ERA 2.0 is the little brother of ERA 3.0 and is everything 3.0 has to offer as far as design, performance and geometry integration, but without the addition of “Rebound” with its piezoelectric elements.

Freeride Sandwich Cap Construction: has two layers of Titanal® along with a Karuba/Beech Wood Core in the KORE unisex models and a specifically tuned Poplar/PET Wood Core for our women's line, both providing the ultimate combination of stability and liveliness. A Flax layer and Graphene round out the construction in all models to provide our most performance driven freeride construction to date.

Full Triaxial Carbon Jacket: Full Triaxial Carbon Jacket is a reinforcement fabric that is optimized to obtain a high strength-to-weight ratio. Carbon fibers weaved in three different directions offer a unique construction method where the top sheet is removed on the full ski, exposing a carbon wrap. Better power transmission of forces onto the slopes, Ultralightweight, Optimum bell curve for perfect flex behaviour.

Graphene: Graphene is the thinnest and lightest element ever discovered. Using Graphene in specific areas of the construction gives an incredibly light-weight and strong ski tuned to your riding style.

Hybrid Top Surface: Provides a striking outline to the ski's look. The res-in-coated flax top edge reduces chipping, while the traditional top-sheet it outlines minimizes scratches. The reduction in top-sheet material also means less plastic is used in the construction.

Highly transparent UHM Base: A high-density, determinedly durable base that allows gorgeous graphic details to shine through. The perfect combination of fashion and function.

ISS – Independent Suspension System: Elastomeric vibration killers located in the tip, tail and underfoot. The elastomers quiet the vibrations that are commonly associated with rockered skis. Underfoot, the vibrations are dampened to provide the skier with a smooth ride.

Junior Power Frame: A geometric ski shape that provides structural strength to the outer edges of the ski through geometric design, as opposed to altering the core material or density of the ski. Also, for kids it looks cool and feels different than a standard flat ski.

LYT Tech Construction: By developing a ski line with lightweight Karuba wood and Graphene fully embedded we were able to increase performance while making it lighter. A unique weight distribution makes tip and tail thicker and the middle section thinner. The V-shape gives you effortless control for better steering, more stability and control.

PET-Wood Core Carbon Sandwich Cap Construction: an eco-driven build which is mindful of sustainability while still delivering superb skiing. Utilizing poplar wood, recycled PET plastics and carbon provides optimal performance which is both weight and environmentally conscious.

PNP Rocker: Very subtle tip and tail rise with regular camber construction underfoot. PNP Rocker provides a rider a smother turn initiation as well as reduced edge contact to seamlessly butter into tricks and initiate spins. 30% rocker and 70% camber.

Power Sidewall Jacket: An innovation in ski construction that combines the well known fiber jacket construction with ABS sidewalls. A lightweight ski with easy skiing performance including sidewalls for better dampening, shock absorption and edge grip. Performance at its best for its great target group.

Race structured UHM C base: The highest quality, fastest base and finish known to man. The technicians who build the skis for our Worldcup Rebels use the same material and machines to put this scary fast base and structure into your skis.

RD Racing Top Sheet: A thinner topsheet material designed to maximize responsiveness. Exclusive to our RD skis.

Rebel Camber: Some years ago, it was rebellious to have rocker. Now, it's rebellious to have camber. With Rebel Camber, we feature explosive acceleration and excellent edge grip for the Worldcup Rebel inside you.

Sandwich Cap Construction: We take the basic framework from the Worldcup sandwich and place a cap that just wraps over the top edge of the sidewall to make the ski more suitable for all mountain skiing. Bomber construction with a rounded top edge makes for one incredible allcountry ski.

Sandwich Twintip Construction: We blend a full vertical laminate wood core for durability and add our bomber Independent Suspension System for killing chatter. Pipe, park, big mountains, whatever, bring 'em on and let this construction rip.

SFC-Snow Free Coating: The applied coating prevents snow and ice from sticking to the top of the ski. Especially on ski tours, this is an effective remedy against annoying icing and exhausting ascents with skis weighed down by snow loads. But the coating also helps to optimize ski performance on the descent.

Speed Rocker: For perfect handling on hardpack – a slight tip rise on a ski with standard camber, which means great performance, easy turn initiation, and high versatility on soft snow. 10% rocker and 90% camber is just enough to take the sting out of the edges, while keeping the bite you need to turn. Speed Rocker turns HEAD performance skis into a weapon of speed with power steering. It's fast. Are you?

Structured Surface: An extra-durable topsheet with a structured exterior. Designed to hold up against the most extreme abuse.

Structured UHM C Base: The same high quality material used in HEAD's world-leading race skis is used here. Different structured running base for all conditions.

TNT Rocker: Tip and tail rocker combined with regular camber underfoot. This combination creates a surfy feel in powder while maintaining hard snow versatility.

Tuff-Wall/Base/Edge: Impact resistant ABS sidewalls. While maintaining responsiveness, Tuffwalls are designed to take a beating. The additional use of thicker edges and running bases ensure that these models can truly be described as bullet proof.

Twintip Construction: A vertically laminated wood core, surrounded by a sock of fiberglass and covered by a durable topsheet. This forgiving twintip construction is slightly softer than our sandwich cap making it ideal for ramping up for learning pipe and park tricks.

UHM C Base: Our highly durable base material for getting the job done well. Not flashy, but steady and stable. The kind of base that will last for years.

Wood Core Cap Construction: A vertically laminated wood core, surrounded by a sock of fiberglass and covered by a durable topsheet. This forgiving construction is slightly softer than our sandwich cap making it ideal for ramping up the learning curve.

Worldcup Sandwich Construction: The basic construction invented by Howard Head in the 1940's, perfected and hand built by the finest ski technicians in the modern world. The vertical laminate wood core is embraced by speed-freak phenolic sidewalls and the finest Titanal®. This is the fastest construction on the planet.

TECHNOLOGY FEATURES BINDINGS

AFS – Anti Friction Slider: New weight-optimized adapter for gliding insert at Power Bindings for reduced friction, constant release values and maximum safety.

AFS Junior: The innovative mechanical Anti Friction Slider (AFS) automatically adjusts to the boot sole height, compensating A/C standards as well as height differences due to icing up, dirt or boot wear.

AFS Metal: The 68 mm wide slider plus a stainless steel gliding element provides constant release values and results in a broader contact area to the ski boot sole.

Better Balance PR Base: Inclined Better Balance PR Base providing a ramp angle of 0.75° for all boot sole sizes. Thus, all skiers benefit from easy turn initiation and high-speed stability.

Brakes: HEAD offers brakes with different widths for optimal fit on wider skis and flat skis up to 150 mm ski width in the brake area. Some binding models are delivered without brake – “w/o brake” – to avoid brake exchange at a later moment.

Climbing Aid: The climbing aid with its different climbing positions, which can be operated without stepping out of the binding, provides excellent balance and effortless climbing.

FHR: The innovative Full Heel Release Technology (FHR) delivers intelligent 180° release both horizontally and vertically ensuring maximum safety in forward and backward twisting fall situations. The FHR function can reduce ACL strain by more than 50%*.

Freeflex Demo: These racing bindings are for rental purposes. They combine the look and performance of a racing retail binding with the functionality and durability of the rental binding.

Freeflex Pro: Best performance enabled by the innovative Freeflex Pro System. The free-gliding heel allows the ski to bend through unimpeded and retain its natural dynamics. Due to the reduced stand height, the Freeflex band is now much closer to the ski boot. Constant release values reduce the risk of injury and ensure safe ski steering.

FR LYT Toe: 15% lighter toe compared to the FR Pro3 Toe, with automatic toe height adjustment for Alpine & GripWalk boots.

FR Pro Toe: The Freeride (FR) Pro Toe can be easily adjusted to different boot sole heights. Its horizontal spring reflects the modern architecture of the AAA-Series.

Full Diagonal: Intelligent 180° release both horizontally and vertically of the Diagonal Toe.

GripWalk Compatibility: Ski Bindings with GW in the product's name are GripWalk compatible and can be adjusted to Adult Alpine (ISO 5355) and GripWalk ski boots (within ISO 9523). Ski bindings with “GW CA” in the product's name can be used with Adult Alpine (TYPE A), Children Alpine (TYPE C), and GripWalk ski boots (TYPE A & C).

GW: Bindings marked with GW will fit adult Alpine ski boots (ISO 5355 TYPE A) and adult Walk ski boots (ISO 23223 TYPE A). No further adjustment to boot sole height is necessary, except for ATTACK models. Optimal height shall be tested with the boot height adjustment tester.

GW CA: Bindings marked with GW CA will fit Alpine ski boots (both ISO 5355 TYPE A & TYPE C) plus all Walk ski boots (ISO 23223, TYPE A & TYPE C). No further adjustment to boot sole height necessary.

HR Heel: The HR Heel offers the innovative Full Heel Release Technology (FHR), a combination of horizontal and vertical release to ensure maximum safety.

HR Lite Heel: The HR Lite Heel offers the innovative Full Heel Release Technology (FHR), a combination of horizontal and vertical release to ensure maximum safety. Compared to the HR Heel it is lighter and has a lower stand height.

JOY “BB” SLR Pro Base: Inclined Base providing optimal forward lean. Test sessions with our female test team have shown that the ideal value is 0.55°, ensuring easy turn initiation and high-speed stability.

MN: Bindings marked MN will fit adult Alpine ski boots (ISO 5355 TYPE A), adult Walk ski boots (ISO 23223 TYPE A) and all Touring ski boots (ISO 9523). The height of the AFD needs to be adjusted to the ski boot sole height. Optimal height shall be tested with the boot height adjustment tester.

NX Heel: 3-piece heel for easy step-in and step-out. Better stability and power transmission.

Pin Technology: Accommodates Adult Walk (ISO 23223 TYPE A), Touring (ISO 9523) and non-compliant soles with tech inserts. The boot needs to have tech inserts. Compatibility with tech bindings might be limited. Check the recommendations of the binding and boot manufacturer.

RX-Diagonal Heel: The RX-Diagonal Heel provides a 150° release. Thus, pressure on the knee and ligaments upon twisting forward falls are reduced.

SuperLiteRail System: In combination with the integrated Freeflex function, the SLR Base provides better energy transmission without affecting the natural ski flex. During the turn, this SuperLiteRail Base guarantees constant force distribution which leads to flawless control, thus enhancing the on-hill experience. The remarkable benefits include highly efficient and agile ski performance.

RX Toe: The performance-oriented RX toe defines stability and power, much as a strong and tough bull extremely durable and absolutely reliable.

PowerRail: The unrivalled technology for retail, demo & rental by the well-received rail system on a modular basis provides easiest handling, maximum flexibility, optimized performance, perfect match, more stability and durability.

Race Pro Heel: The stand height was reduced according to the current FIS rules. An increased contact area reduces friction and provides constant forward pressure in all skiing situations.

SLR Pro Base: The 2-piece base provides an optimized drill pattern and an enlarged adjustment range of 120 mm. It comes in 3 different mounting positions to cover boot sole lengths between 183 mm and 363 mm.

STREAM toe: The racing toe features independent spring-loaded pincers for more precise control, two mounting positions of the gliding element for an adjustable pressure point and a steel base plate between the binding and the plate for a better power transmission. Thanks to the aerodynamic design, even faster runs are possible.

SX Heel: Based on improved kinematics the ski boot is precisely secure in the binding. This ensures exact and more direct power transmission from boot to edge.

SX Junior Toe: The innovative kinematics of HEAD's SX adult line provide advantages in performance and stability for the SX Junior line for young speedsters as well.

SX Kid Toe: With the SX kid toe for up-and-comers and integrated innovative SX kinematics ski steering now requires even less effort.

SX Lite Heel: Weight-optimized heel for junior and lightweight skiers with proven safety features of the HEAD/TYROLIA binding technology.

SX Youth Heel: The SX Youth Heel guarantees an easier step-in and step-out. Due to the new shape of the sole lug and softer brakes, the entry force is reduced by 15%.

TX Lite Toe: A new stretched design for a more adult look and updated kinematics allow for an improved release behavior in backward twist releases, enhancing the safety of all models.

TX Toe: The kinematic improvements are reflected in the product design of the TX toe as well. With its high cheek bones, it reminds of a fox – smart, spry, agile and very clever.

Sympro: With the Rental Sympro bindings, the length of the toe and heel can be adjusted with only a few easy steps. For fast on-hill adjustment.

Symrent: With a mobile heel the Symrent bindings can be simply and quickly adjusted to almost any size of boot.

Telescopic Tube: With only one binding model it is possible to cover the entire range of different sole lengths (from 260 mm up to 350 mm).

TOUR Toe: Touring toe with Pin technology and an optimized step-in for an easy and fast entry. The ergonomic toe lever can be operated by hand and pole.

TOUR Heel: Touring heel with Pin technology, active heel adaptation (6 mm elastic travel) and 25 mm heel adjustment range. The heel piece provides an intuitive handling of hike & ski mode with an automatic brake lock and an isolated mechanism to prevent icing.

TRP – TYROLIA Roller Pincer System: The TYROLIA Roller Pincer Toe System (TRP System) of the HEAD bindings with its four rollers and gliding inserts ensure a 180° release and exact centering of the ski boot. The TRP system reduces the load on knees and ligaments and improves performance considerably.

*finite element model simulations by University of Innsbruck: “Lateral Heel Release Reduces ACL strain in Simulated Backward Twisting Falls”

TECHNOLOGY FEATURES BOOTS

LINERS

Auto Adapt Tech / Women Auto Adapt Tech: Allows the calf of the liner to widen freely. The cuff can move into the space created by the adjustable profile, to comfortably accommodate all calf sizes.

Double Power Booster Velcro: The strap of the Double Power Booster Velcro works as a double pulley for better closure and a tighter wrapping on the cuff. The elastic Booster strap allows more dynamic response on the boot. The result is more precise transmission and faster ski reaction.

HeatFit (HF) Liners: Multi-component liners with moldable inserts in liner and tongue. 5 minutes of heating, is all that is required, to make the lining adapting and get the perfect precision and comfort.

Perfect Fit 3D: Perfect fit is the revolutionary customization system that ensures comfortable, performances-oriented customization in HEAD's superb skiboots. The 3D pre-shaped construction have been developed to provide the maximum comfort and optimal adaptation to the foot shape.

Perfect Fit (PF): Perfect Fit is the revolutionary customization system that provides the best level of precision, comfort and durability. The Perfect Fit material allows the liner to adapt to your feet, ensuring maximum power transmission. 5 minutes of heating at 80 degrees, is all that is required, to make the lining adapting and get the perfect precision and comfort.

Pro Liners: Pro Series are thin and very supportive liners developed to assure maximum wrapping and extreme high performance. They come with a stretchy upper material, thermo-moldable ankle inserts and a rear sliding insert.

Quick Entry Liners: These liners come with a unique easy entry construction in the forefoot. Developed both for skiing and walking, Quick Entry liners always feel extremely comfortable.

Ratchet Velcro: The new light velcro, offers high performance, quick and efficient closure.

CRUX Pro HP: The customizable liner has been designed to best skiing and hiking performance. ATTENTION: The liner should be customized before skiing.

BUCKLES

BOA®: designed for a precise foot wrap and a tunable fit on the fly in an intuitive fit system.

Buckle Lock: Lock the buckle in a open position for an easy hike.

Double Power Lever: The Double Power lever reduces the effort needed to close the buckle by 50 %. Developed and patented by HEAD.

Ratchet Lock: Lock the buckle's bail in place for a secure fit while ascending.

Spineflex Buckle: A revolutionary buckle concept with a flexible element and a constant closure point. The flexible element allows the buckle to adapt to the shell profile. The constant closure point increases the overlap between the shell flaps and reduces pressure points. The increased comfort and precision results in better performance.

Superleggera Buckle: The new light buckles: 90% aluminum, simple, effective and reliable.

Supermacro Ratchet: An adjustable, ratcheted toothplate that provides 28mm of calf-adjustment.

Wide-Body Buckle: Oversized buckle designed for an extreme ease of use. The fastest way to close the boot cuff.

CRUX – A NEW BENCHMARK POWER LYT DESIGN

COMFORT SKIN SHELL

Designed to wrap the foot with a balanced and comfortable 99 mm touring last. The reactive material provides lightweight and precise adaptation to the foot.

CONTROL CUFF

Featuring 2 buckles and a high profile for superior ski control even in the most demanding conditions and speeds.

LYT DYNAMIC FRAME

Connects the shell, cuff and ski-hike device, providing the direct and powerful energy transmission.

FEATURES

Adjustable Rear Spoiler: Height adjustable spoiler increases rearward support as it's raised.

Bi-Inj. Frame: A high performance, multi-density shell that optimizes easy entry, foot wrapping, comfort and energy transmission.

Double Adjustable Profile: A double mechanism in the upper rear part of the boot which adapts the circumference of the cuff up to 1cm to fit individual anatomical needs. Located on the either side of the cuff's spine, this mechanism allows the cuff to adjust up to 1cm to better fit the anatomical needs of skier.

Duo Flex: Enables a progressive and reactive flex with precise ski control through all phases of the turn.

Easy Entry Shell Design: Located in the throat of the boot, 4 channels are cut into the plastic to reduce the thickness of the material and thus provide smoother entry and better wrapping to the foot.

Extended Toe Box: The longer toe box has been designed to reduce torsion and increase power transmission.

EZ Tech Shell: With Head's EZ-Tech shell design, every skier can enjoy its benefits: EZ-On and EZ-Ski. These new boots are YOUR EDGE TO BETTER SKIING.

Flex Stance Tuning: Screw mechanism with a plate support on the spine of the cuff. By adding the screw(s) the link between shell and cuff becomes stronger and the flex of the boot stiffer. It also works as a forward lean adjuster.

Flex Tuning: A screw mechanism on the spine of the cuff that links shell and cuff. To get a softer flex, the screw(s) can be replaced by the plastic caps included in the box.

Form Fit: 100% customizable shell fit system. New Form Fit plastic holds modifications better than ever.

Graphene: The Graphene infused plastic combined with the new Smart Frame shell delivers the perfect balance of performance, comfort and lightweight design.

Hi-Top Tech: Direct contact between the boot tongue and shell delivers supreme support for more confident skiing.

Integrated AutoSkiWalk (ASW): HEAD patented integrated device which automatically switches between skiing and walking position when stepping in or out of the bindings.

Liquid Fit: Material provides the most precise and the quickest customization. The material's density ensures the perfect mold in the most critical area of the boot, the ankle and heel pocket. The performance and precision of a foam liner in 10 easy, comfortable minutes.

Power Control Frame: Designed to reinforce the Cube 3 line shell structure in order to give more stability and performance to the boot.

Power Plate: HEAD has designed a Velcro spoiler to increase support through the upper cuff, adding a higher level of performance.

Power Flex: enables a progressive and reactive flex with precise ski control throught all phases of the turn.

Rubber Insert: Designed for enhanced grip when hiking.

Ski-Hike Mechanism: provides strong, precise connection between upper and lower boot.

Smart Frame: The new lightweight shell construction is specifically designed for a more dynamic rebound that greatly improves performance for the all mountain skiers.

Stiffer/Softer Flex Adjustment: It's an adjustment placed on the spine of the cuff to select between a stiffer or softer flex depending on snow condition and level of skiing.

Vibram Durastep Outsole: The rubber sole designed for reliability, durability and grip.

Traction Lug: Designed micro elements developed for a better grip.
