SOCIAL MEDIA RELEASE

Honeycomb Midwives uses social media to share information about midwifery, birth and pregnancy. We also offer a birth announcement on Facebook and/or Instagram for our Clients. We make every effort to post birth announcements 24-72 hours following the birth, to allow time for family and friends to be notified of the birth by the parents themselves. We do not use last names or birth dates in our announcements. Parents may provide a photo to their midwife or our admin, or agree to a photo taken by their midwife at delivery or during a home or clinic visit postpartum.

I _____ hereby consent to the following uses of my information on social media.

- I consent to the use of my first name, my partner's first name and my newborn's first name on social media for purposes of a birth announcement or celebration following the delivery of my infant. _____(initials)
- I consent to the use of my first name, my partner's first name and my newborn's first name, **as well as a photo**, which will either be provided by myself or be approved by myself prior to posting for the purposes of a birth announcement or celebration following the delivery of my infant. _____(initials)
- I DO NOT consent to use any of my information on social media. _____(initials)
