PROJECTS

Strategic Solutions

Partnerships creating success

Hellmann Worldwide Logistics and Herli Group have been working closely in partnership since day one.

Incorporating best practice and leveraging from strength in relationships and shared proven ability across a diverse range of skills had delivered proved benefits to Hellmann Customers ultimately delivering quantified value as a result.

The benefits include:

- Single point of contact to assist streamline procedures and information needed in up front project design, including tender, implementation and project execution.
- Reaction time with situational project management.
- International Freight analysis, shipping line evaluations delivering on time cost effective solutions.
- Contractual arrangements and monitoring.
- Identifying the best partners in sourcing 3rd party services to leverage from the strengths of each partner to deliver on our promise.
- Through the combined knowledge of the capital equipment and best transportation methods available including safe handling to deliver our product on time and as needed on site.

Case Study

Situation:

Renewable Energy in Australia and in particular Northern Queensland has seen a massive sudden demand following government incentives to improve energy in Australia and provide more solar power to existing grid systems in place.

Solution:

Integrated Solutions to our customers through partnerships with Townsville port Authorities, Stevedores, warehouse and storage service providers and our own in house handling yard in Townsville.

Strategic partnership with Herli Group has supported and facilitated the overall shipping line negotiations, contractual arrangements and ongoing monitoring of our contractual service agreements.

Estimated Cost savings delivered: + AU\$ 900k
