

# BATTERY SAFETY COURSE

Prevention and Initial Response to Battery Emergencies in the Workplace

4-hour On-Site or  
90-min Virtual Training Sessions

## RISK-BASED RESPONSE EXERCISE EASY BUTTON

### COURSE TOPICS

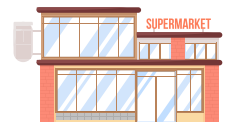

- Understanding battery hazards
- Incident case studies
- Recognizing damaged and dangerous batteries
- Fraudulent batteries
- Prevention and risk reduction
- Safe work practices
- Battery recycling
- Facility emergency response procedures
- Battery containment bags

### COURSE DESCRIPTION

This course will help facilities and workplaces reduce their risk for an incident involving batteries and implement internal emergency procedures to respond to an incipient battery fire. Students will understand the unique hazards posed by batteries, learn safe work practices including recognizing fraudulent or damaged batteries, safe work practices with batteries, how to recognize a dangerous battery, and how to respond to an incipient fire involving a battery.

### CUSTOM TRAINING FOR YOUR FACILITY AND STAFF

This course can be adapted to specific facilities including schools, offices, manufacturing, medical care facilities, retail, critical infrastructure, automotive, etc.
