

BRING THE WOW FACTOR

Creating Experiences That Enhance Learning

Hazmat Instructor Development Course
Teaching Chemical and Physical Properties
8-Hour On-Site Training with Hands-On

RISK-BASED RESPONSE TRAINING

COURSE TOPICS:

NFPA 470 Key Terms and Core Concepts

- Flammability
- Chemical Reactions
- Gas Density
- Corrosivity
- Ionization Energy
- Heat Absorption
- Others

PREREQUISITES:

Attendees should have previous experience teaching hazardous materials and authorization from their agency to attend.

Attendees will receive printed and electronic instructor resources including:

- Demo instructions
- Safety considerations
- PPE recommendations
- Supply lists
- Suggested videos

COURSE DESCRIPTION

This instructor development course will assist hazardous materials instructors to safely bring chemistry to life for their students. Attendees will participate in chemical demonstrations that can be integrated into their existing HazMat training sessions including operations, technician, and specialty classes.

The demos will range from simple, with easy to obtain supplies, to more complex, requiring specific materials.
