

Risk-Based Response to Corrosives

Instructor Led - Mobile Training Course 8 hours

CLASSROOM AND HANDS-ON WITH ACID AND BASE SOLUTIONS

COURSE TOPICS

- Risk-based response
- Chemistry of corrosives
- Common acids and bases
- PPE selection
- Decon considerations
- Neutralizations
- Corrosive attacks

COURSE DESCRIPTION

This 8-hour course will prepare personnel to conduct a risk-based response to incidents involving a corrosives spill, including neutralization considerations.

This course includes transportation accidents, fixed facility releases, and corrosives attacks.

HAZARD3 training courses including instructor-led, webinar, and microlearning are supported by our Emergency Response Playbook guides.

Attendees will receive printed Incident Guides, Technical Guides, and Equipment Guides to serve as job-aids in the field.

ERDSS

The Emergency Response Decision Support System (ERDSS), designed by the Hazard3 team, is a computer program designed for emergency response and military personnel.

This course will include using the several ERDSS modules including:

- Known Chemical Search
- Decontamination Tool
- Neutralization Calculator
- Emergency Response Guidebook Tool
- Others
