COURSE DESCRIPTION

This training package will help prepare HazMat personnel to respond to an incident involving a damaged or leaking cryogenic cylinder. Students will gain an understanding of cylinder features/construction and risk-based response considerations. Upon completion of the webinar, an unbranded and unlocked version of the training will be provided in Microsoft PowerPoint format to allow agencies to incorporate the material into their existing hazardous materials training.

TWO PURCHASING OPTIONS

Training Course:

Agencies that purchase our virtual instructor led course, with hand-off training (HOT), on cryogenic cylinders will receive a cryogenic cylinder training prop at no cost. Training is consistent with NFPA 470 and OSHA 1910.120 HazMat Operations and Technician refresher training. (Part Number: 1-VILT-CRYO)

OR

Training Equipment:

Agencies that purchase our cryogenic cylinder HazMat training prop will receive our virtual instructor led HazMat course, with hand-off on training, on cryogenic cylinders at no cost. (Part Number: TAP-01)
