

Behavior Risk Patterns™ Workshop

Workshop Overview

An applied and analytical learning experience focused on evaluating and responding to behavior risks in project environments.

Workshop Promise

Learn how to identify, anticipate, and respond to behavior risks that threaten project execution, stakeholder alignment, and delivery outcomes. Participants will develop practical strategies for recognizing behavioral signals early, assessing system vulnerabilities, and responding proactively throughout the project lifecycle.

Participant Outcomes

Participants will be able to:

- Recognize observable behavior risk signals that commonly emerge in project environments.
- Interpret behavior risks to identify broader system vulnerabilities
- Distinguish between individual behavior risks and broader project risk exposure
- Apply a structured framework to identify, plan for and respond to behavior risks across the project focus areas (initiating, planning, executing, monitoring & controlling and closing)
- Develop and implement proactive behavior risk responses using PMI-aligned tools and techniques.
- Monitor emerging behavior risks and adjust responses as project conditions evolve
- Capture lessons learned to improve future behavior risk awareness and response effectiveness

Organizational Benefits

Organizations will benefit from improved ability to:

- Identify behavior risks earlier in the project lifecycle.
- Reduce execution disruption caused by unmanaged stakeholder and team dynamics.
- Strengthen leadership capability in navigating complex project environments.
- Improve stakeholder engagement, communication clarity, and decision alignment.

- Detect broader system vulnerabilities through recurring behavior risk patterns.
- Improve project delivery outcomes through proactive behavior risk management.

Workshop Format

- Interactive Behavior Risk Canvas Series™ facilitation model
- Small-group collaborative exercises
- Scenario-based behavior risk analysis
- PMI-aligned behavior risk planning and response activities
- Real-time monitoring and control exercises
- End-to-end project lifecycle application

Workshop Logistics

- Duration: 2-Day Interactive Workshop
- Intended Audience:
 - Project Managers
 - Project Coordinators
 - Product Owners
 - Program Managers
 - PMO Leaders
 - Project Sponsors
 - Team Leaders
 - Scrum Masters
 - Change Leaders
