Winter RV Skirting:

Although not required, we HIGHLY recommend skirting your RV by November of the given year.

Skirting your rig protects your tires from dry-rot & most importantly insulates your RV preventing your tanks and lines from freezing. This will also help you keep lower electricity costs.

Skirting does not have to be professional but should be attractive & clean. If you decide to skirt your RV & don't purchase a designated RV skirting system (which is okay, it doesn't have to be professional) but **You must notify us of Your desired skirting material for it to be approved prior to installation. This is to ensure it doesn't look like the Beverly Hillbillies. Since we have experience skirting using various materials, we may be able to help you with ideas/installation methods of which one is most affordable & most effective if you need some input.**

No hay/straw to skirt campers allowed. Ask us why; we'll tell you horror stories.

Mail Service:

Occupants may set up a PO Box at the Post Office in town to receive their mail. Please Do not use our address as your mailing address.
