*The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.*

*This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.*

*Results relate only to the items tested and the sample(s) as received by the laboratory.*

Analytical test results meet all requirements of the associated regulatory program (e.g., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis. Data qualifiers are applied to note exceptions. Noncompliant quality control (QC) is further explained in narrative comments.

- \* QC recoveries that exceed the upper limits and are associated with non-detect samples are qualified but no further narration is needed since the bias is high and does not change a non-detect result.

- \* Matrix QC may not be reported if insufficient sample or site-specific QC samples were not submitted. In these situations, to demonstrate precision and accuracy at a batch level, a LCS/LCSD is performed, unless otherwise specified in the method.

- \* Surrogate recoveries (if applicable) which are outside of the QC window are confirmed unless attributed to a dilution or otherwise noted in the narrative.

Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Measurement uncertainty values, as applicable, are available upon request.

Test results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" and tested in the laboratory are not performed within 15 minutes of collection.

This report shall not be reproduced except in full, without the written approval of the laboratory.

**WARRANTY AND LIMITS OF LIABILITY** - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| □              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| 1C             | Result is from the primary column on a dual-column method.                                                  |
| 2C             | Result is from the confirmation column on a dual-column method.                                             |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MCL            | EPA recommended "Maximum Contaminant Level"                                                                 |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |
| MDC            | Minimum Detectable Concentration (Radiochemistry)                                                           |
| MDL            | Method Detection Limit                                                                                      |
| ML             | Minimum Level (Dioxin)                                                                                      |
| MPN            | Most Probable Number                                                                                        |
| MQL            | Method Quantitation Limit                                                                                   |
| NC             | Not Calculated                                                                                              |
| ND             | Not Detected at the reporting limit (or MDL or EDL if shown)                                                |
| NEG            | Negative / Absent                                                                                           |

| PQL            | Practical Quantitation Limit                                                                                |
| PRES           | Presumptive                                                                                                 |
| QC             | Quality Control                                                                                             |
| RER            | Relative Error Ratio (Radiochemistry)                                                                       |
| RL             | Reporting Limit or Requested Limit (Radiochemistry)                                                         |
| RPD            | Relative Percent Difference, a measure of the relative difference between two points                        |
| TEF            | Toxicity Equivalent Factor (Dioxin)                                                                         |
| TEQ            | Toxicity Equivalent Quotient (Dioxin)                                                                       |
| TNTC           | Too Numerous To Count                                                                                       |

## Case Narrative

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-10931-1

**Job ID: 410-10931-1**

**Laboratory: Eurofins Lancaster Laboratories Env**

### Narrative

#### Job Narrative 410-10931-1

#### Receipt

The samples were received on 8/17/2020 1:51 PM; the samples arrived in good condition, and where required, properly preserved and on ice.

#### Subcontract non-Sister

See attached subcontract report.

#### Subcontract Work

Method Mercury Speciation F-0 to F-6: This method was subcontracted to Eurofins Frontier Global Sciences LLC. The subcontract laboratory certification is different from that of the facility issuing the final report.

## Detection Summary

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-10931-1

**Client Sample ID: SB4R\_2-4**

**Lab Sample ID: 410-10931-1**

☐ No Detections.

**Client Sample ID: SB4R\_10-12**

**Lab Sample ID: 410-10931-2**

☐ No Detections.

**Client Sample ID: SB4N1\_0-2**

**Lab Sample ID: 410-10931-3**

☐ No Detections.

**Client Sample ID: SB25\_4-6**

**Lab Sample ID: 410-10931-4**

☐ No Detections.

**Client Sample ID: MDUP07\_072920**

**Lab Sample ID: 410-10931-5**

☐ No Detections.

**Client Sample ID: SB4S2\_2-4**

**Lab Sample ID: 410-10931-6**

☐ No Detections.

**Client Sample ID: SB4W2\_2-4**

**Lab Sample ID: 410-10931-7**

☐ No Detections.

**Client Sample ID: SB39\_8-10**

**Lab Sample ID: 410-10931-8**

☐ No Detections.

This Detection Summary does not include radiochemical test results.

RE: Low Level Mercury

Enclosed are the analytical results for samples received by Eurofins Frontier Global Sciences. All quality control measurements are within established control limits and there were no analytical difficulties encountered with the exception of those listed in the case narrative section of this report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Patrick Garcia-Strickland  
Business Unit Manager

#### SAMPLE RECEIPT

Samples were received at Eurofins Frontier Global Sciences (EFGS) on 19-Aug-20 09:40. The samples were received intact, on-ice within a sealed cooler at

| Cooler         | Temp C° |
|----------------|---------|
| Default Cooler | -0.9    |

#### SAMPLE PREPARATION AND ANALYSIS

Total solids analysis was performed in accordance with method SM2540B. Total solids are prepared at the same time as the preparation for the analyte(s) of interest in order to provide the most accurate dry mass correction which may be outside of the method recommended holding time of 7 days from sample collection.

Samples for the Selective Sequential Extraction (SSE) were prepared according to FGS-090, "Selective Sequential Extraction of Geological Samples for the Determination of Biogeochemically Relevant Inorganic Mercury Fractionation".

The following table explains the SSE extraction steps and their anticipated biogeochemical meaning:

Elemental Mercury: Free purgeable elemental mercury  
Fraction F(1): Water soluble mercury, extracted with DI water (ie:  $\text{Hg}_2\text{Cl}_2$ ,  $\text{HgSO}_4$ )  
Fraction F(2): Weak acid extractable mercury, pH2 HCl/HO Ac  
Fraction F(3): Organo complexed mercury, extracted with 1N KOH  
Fraction F(4): Strong complexed mercury, extracted with 12N  $\text{HNO}_3$   
Fraction F(5): Aqua Regia (cinnabar,  $\text{HgSe}$ ,  $\text{HgAu}$ )  
Fraction F(6): HF/Aqua Regia (silicate mercury)

Total mercury was analyzed in prepared SSE extracts by cold vapor atomic fluorescence spectrometry (CVAFS) according to EPA 1631B.

Reference materials were analyzed along with each sample. The mercury found in each fraction was consistent with historical data and the recovery of each reference material was:

$\text{HgCl}_2$ : 73.9%  
 $\text{HgO}$ : 74.4%  
 $\text{HgS}$ : 85.4%

#### ANALYTICAL AND QUALITY CONTROL ISSUES

Method blanks were prepared for every preparation to assess possible blank contribution from the sample preparation procedure. The

10-Sep-20 13:57

method blanks were carried through the entire analytical procedure. All blanks fell within the established acceptance criteria with the exception of any items narrated above or flagged and described in the notes and definitions section of the report.

Liquid spikes, certified reference material (CRM) or a quality control samples (QCS) were prepared for every preparation as a measure of accuracy. All liquid spikes, CRMs and/or QCS samples fell within the established acceptance criteria with the exception of any items narrated above or flagged and described in the notes and definitions section of the report.

As an additional measure of the accuracy of the methods used and to check for matrix interference, matrix spikes (MS) and matrix spike duplicates (MSD) were digested and analyzed. All of the matrix spike recoveries fell within the established acceptance criteria with the exception of any items flagged and described in the notes and definitions section of the report.

A reasonable measure of the precision of the analytical methods is the relative percent difference (RPD) between a matrix spike recovery and a matrix spike duplicate recovery and between laboratory control sample recovery and laboratory control sample duplicate recoveries. All of the relative percent differences fell within established acceptance criteria with the exception of any items flagged and described in the notes and definitions section of the report.

| Note: Since laboratory accreditations are subject to change, Eurofins Lancaster Laboratories Env places the ownership of method, analyte & accreditation compliance upon our subcontract laboratories. This sample shipment is forwarded under chain of custody. If the laboratory does not currently maintain accreditation in the State of Origin listed above, the samples must be shipped back to the Eurofins Lancaster Laboratories Env laboratory or other instructions will be provided. Any changes to accreditation status should be brought to Eurofins Lancaster Laboratories Env attention immediately. If all requested accreditations are current to date, return the signed Chain of Custody attesting to said compliance to Eurofins Lancaster Laboratories Env. |  | Special Instructions/Note:                                                                                                     |                                                                                                                                                                                                           |                                             |                                   |

### Notes and Definitions

- U Analyte was not detected and is reported as less than the LOD or as defined by the client. The LOD has been adjusted for any dilution or concentration of the sample.
- QR-02 Failing MD is caused by matrix interference. The source sample is not visually homogenous. Acceptable LCS/LCSD show that the preparation of the batch is in control and the failing RPD is due to matrix inhomogeneity.
- QB-10 The method blank and/or initial/continuing calibration blank contains analyte at a concentration above the MRL. Only report sample results greater than 10 times the contamination value (QB-01), or samples less than the MRL (QB-02).
- QB-01 The method blank and/or initial/continuing calibration blank contains analyte at a concentration above the MRL. However, the blank concentration(s) are less than 10% of the sample result.
- O-04 This sample was analyzed outside of the recommended holding time.
- DET Analyte DETECTED
- ND Analyte NOT DETECTED at or above the method detection limit if reported to the MDL or above the reporting limit if reported to the MRL.
- NR Not Reported
- dry Sample results reported on a dry weight basis
- RPD Relative Percent Difference

*The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.*

*This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.*

*Results relate only to the items tested and the sample(s) as received by the laboratory.*

Analytical test results meet all requirements of the associated regulatory program (e.g., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis. Data qualifiers are applied to note exceptions. Noncompliant quality control (QC) is further explained in narrative comments. QC data that exceed the upper limits and are associated with non-detect samples are qualified but no further narration is needed since the bias is high and does not change a non-detect result. Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Measurement uncertainty values, as applicable, are available upon request.

Test results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" and tested in the laboratory are not performed within 15 minutes of collection.

This report shall not be reproduced except in full, without the written approval of the laboratory.

**WARRANTY AND LIMITS OF LIABILITY** - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

### Qualifiers

#### GC/MS VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *3        | ISTD response or retention time outside acceptable limits.                                                     |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### GC/MS Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *3        | ISTD response or retention time outside acceptable limits.                                                     |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| X         | Surrogate recovery exceeds control limits                                                                      |

#### GC Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *         | LCS or LCSD is outside acceptance limits.                                                                      |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| p         | The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.      |
| X         | Surrogate recovery exceeds control limits                                                                      |

#### LCMS

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *5        | Isotope dilution analyte is outside acceptance limits.                                                         |
| I         | Value is EMPC (estimated maximum possible concentration).                                                      |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### Metals

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| ^         | ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC is outside acceptance limits. |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### General Chemistry

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| α              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| 1C             | Result is from the primary column on a dual-column method.                                                  |
| 2C             | Result is from the confirmation column on a dual-column method.                                             |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MCL            | EPA recommended "Maximum Contaminant Level"                                                                 |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |
| MDC            | Minimum Detectable Concentration (Radiochemistry)                                                           |
| MDL            | Method Detection Limit                                                                                      |
| ML             | Minimum Level (Dioxin)                                                                                      |
| MPN            | Most Probable Number                                                                                        |
| MQL            | Method Quantitation Limit                                                                                   |
| NC             | Not Calculated                                                                                              |

### Glossary (Continued)

| Abbreviation | These commonly used abbreviations may or may not be present in this report.          |
|--------------|--------------------------------------------------------------------------------------|
| ND           | Not Detected at the reporting limit (or MDL or EDL if shown)                         |
| NEG          | Negative / Absent                                                                    |
| POS          | Positive / Present                                                                   |
| PQL          | Practical Quantitation Limit                                                         |
| PRES         | Presumptive                                                                          |
| QC           | Quality Control                                                                      |
| RER          | Relative Error Ratio (Radiochemistry)                                                |
| RL           | Reporting Limit or Requested Limit (Radiochemistry)                                  |
| RPD          | Relative Percent Difference, a measure of the relative difference between two points |
| TEF          | Toxicity Equivalent Factor (Dioxin)                                                  |
| TEQ          | Toxicity Equivalent Quotient (Dioxin)                                                |
| TNTC         | Too Numerous To Count                                                                |

# Case Narrative

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-10955-1

## Job ID: 410-10955-1

### Laboratory: Eurofins Lancaster Laboratories Env, LLC

#### Narrative

#### Job Narrative 410-10955-1

#### Receipt

The samples were received on 8/17/2020 6:52 PM; the samples arrived in good condition, and where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 0.1° C and 3.9° C.

#### Receipt Exceptions

The container label for the following sample did not match the information listed on the Chain-of-Custody (COC): SB29\_0-2 (410-10955-1). The container labels list a collection time of 08/17/20 at 11:06, while the COC lists 08/17/20 at 11:16. The client was contacted, and the lab was instructed to enter per bottle label.

The container label for the following sample did not match the information listed on the Chain-of-Custody (COC): SB26\_0-2 (410-10955-6). The container labels list a collection time of 08/17/20 at 14:00, while the COC lists 08/17/20 at 14:03. The client was contacted, and the lab was instructed to enter per bottle label.

The container count for the following sample did not match the information listed on the Chain-of-Custody (COC): SB29\_7-9 (410-10955-4). The laboratory received 5 containers, while the COC lists 4 containers.

#### GC/MS VOA

Method 8260C: Internal standard (ISTD) response for the following samples were outside control limits: SB29\_7-9 (410-10955-4) and SB26\_0-2 (410-10955-6). The sample(s) was re-extracted and/or re-analyzed and ISTD response was outside control limits.

Method 8260C: The continuing calibration verification (CCV) associated with batch 410-35277 recovered above the upper control limit for 1,4-Dioxane. Non-detections of the affected analytes are reported. Any detections are considered estimated.

Method 8260C: The following sample was diluted due to the abundance of non-target analytes: SB29\_2-4 (410-10955-2). Elevated reporting limits (RLs) are provided.

Method 8260C: The continuing calibration verification (CCV) associated with batch 410-35567 recovered above the upper control limit for 1,4-Dioxane. Non-detections of the affected analytes are reported. Any detections are considered estimated.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC/MS Semi VOA

Method 8270D: The following samples were diluted due to the nature of the sample matrix: SB29\_0-2 (410-10955-1), SB29\_2-4 (410-10955-2), SB29\_13-15 (410-10955-3), SB29\_7-9 (410-10955-4), SB36\_2-4 (410-10955-5) and SB26\_0-2 (410-10955-6). As such, surrogate recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

Method 8270D SIM: The following samples were diluted due to the nature of the sample matrix OR abundance of target analytes: SB29\_0-2 (410-10955-1), SB29\_2-4 (410-10955-2), SB29\_13-15 (410-10955-3), SB36\_2-4 (410-10955-5) and SB26\_0-2 (410-10955-6). As such, surrogate recoveries are below the calibration range or are not reported, and elevated reporting limits (RLs) are provided.

Method 8270D SIM: Internal standard responses were outside of acceptance limits for the following samples: SB29\_2-4 (410-10955-2), SB29\_13-15 (410-10955-3), SB36\_2-4 (410-10955-5) and SB26\_0-2 (410-10955-6). The sample(s) shows evidence of matrix interference.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC Semi VOA

Method 8081B: The continuing calibration verification (CCV) associated with batch 35017 recovered above the upper control limit for p,p'-DDE. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

## Case Narrative

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-10955-1

### Job ID: 410-10955-1 (Continued)

#### Laboratory: Eurofins Lancaster Laboratories Env, LLC (Conti

Method 8081B: The following samples required a dilution due to the nature of the sample matrix: SB29\_2-4 (410-10955-2), SB29\_13-15 (410-10955-3) and SB36\_2-4 (410-10955-5). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8081B: The following sample was diluted due to the abundance of non-target analytes: SB26\_0-2 (410-10955-6). Elevated reporting limits (RLs) are provided.

Method 8081B: Surrogate recovery for the following sample was outside control limits: SB26\_0-2 (410-10955-6). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

Method 8081B: The laboratory control sample (LCS) for prep batch 34553 recovered outside control limits for p,p'-DDE. The analyte was biased high in the LCS and was detected in the associated sample.

Method 8081B: Surrogate recovery for the following sample was outside control limits: SB29\_0-2 (410-10955-1). Evidence of matrix interference due to non-target analytes is present; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### LCMS

Method 537 (modified): The recovery for the labeled isotope(s) is outside the QC acceptance limits as noted on the QC Summary. The recovery for the labeled isotope(s) is also outside the QC acceptance limits in the associated matrix spike and matrix spike duplicate, indicating a matrix effect. SB29\_0-2 (410-10955-1), (410-10955-F-1-E MS) and (410-10955-F-1-F MSD)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

# Accreditation/Certification Summary

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-10955-1

## Laboratory: Eurofins Lancaster Laboratories Env, LLC

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

| Authority | Program | Identification Number | Expiration Date |
|-----------|---------|-----------------------|-----------------|
| New York  | NELAP   | 10670                 | 04-01-21        |

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

| Analysis Method | Prep Method | Matrix | Analyte                               |
|-----------------|-------------|--------|---------------------------------------|
| 537 (Mod)       | SHAKE       | Solid  | 6:2 Fluorotelomer sulfonic acid       |
| 537 (Mod)       | SHAKE       | Solid  | 8:2 Fluorotelomer sulfonic acid       |

| Question                                                                            | Answer | Comment                             |
|-------------------------------------------------------------------------------------|--------|-------------------------------------|
| Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter. | N/A    |                                     |
| The cooler's custody seal is intact.                                                | N/A    |                                     |
| The cooler or samples do not appear to have been compromised or tampered with.      | True   |                                     |
| Samples were received on ice.                                                       | True   |                                     |
| Cooler Temperature is acceptable ( $\leq 6^{\circ}\text{C}$ , not frozen).          | True   |                                     |
| Cooler Temperature is recorded.                                                     | True   |                                     |
| WV: Container Temperature is acceptable ( $\leq 6^{\circ}\text{C}$ , not frozen).   | N/A    |                                     |
| WV: Container Temperature is recorded.                                              | N/A    |                                     |
| COC is present.                                                                     | True   |                                     |
| COC is filled out in ink and legible.                                               | True   |                                     |
| COC is filled out with all pertinent information.                                   | True   |                                     |
| There are no discrepancies between the containers received and the COC.             | False  | Refer to Job Narrative for details. |
| Samples are received within Holding Time (excluding tests with immediate HTs)       | True   |                                     |
| Sample containers have legible labels.                                              | True   |                                     |
| Containers are not broken or leaking.                                               | True   |                                     |
| Sample collection date/times are provided.                                          | True   |                                     |
| Appropriate sample containers are used.                                             | True   |                                     |
| Sample bottles are completely filled.                                               | True   |                                     |
| There is sufficient vol. for all requested analyses.                                | True   |                                     |
| Multiphasic samples are not present.                                                | True   |                                     |
| Samples do not require splitting or compositing.                                    | N/A    |                                     |
| Is the Field Sampler's name present on COC?                                         | True   |                                     |
| Sample Preservation Verified.                                                       | N/A    |                                     |
| Residual Chlorine Checked.                                                          | N/A    |                                     |
| Sample custody seals are intact.                                                    | N/A    |                                     |

## ANALYTICAL REPORT

[www.eurofinsus.com/Env](http://www.eurofinsus.com/Env)

*The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.*

*This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.*

*Results relate only to the items tested and the sample(s) as received by the laboratory.*

Analytical test results meet all requirements of the associated regulatory program (e.g., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis. Data qualifiers are applied to note exceptions. Noncompliant quality control (QC) is further explained in narrative comments. QC data that exceed the upper limits and are associated with non-detect samples are qualified but no further narration is needed since the bias is high and does not change a non-detect result. Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Measurement uncertainty values, as applicable, are available upon request.

Test results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" and tested in the laboratory are not performed within 15 minutes of collection.

This report shall not be reproduced except in full, without the written approval of the laboratory.

**WARRANTY AND LIMITS OF LIABILITY** - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

### Qualifiers

#### GC/MS VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *3        | ISTD response or retention time outside acceptable limits.                                                     |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### GC/MS Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *3        | ISTD response or retention time outside acceptable limits.                                                     |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| F2        | MS/MSD RPD exceeds control limits                                                                              |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| X         | Surrogate recovery exceeds control limits                                                                      |

#### GC Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *         | LCS or LCSD is outside acceptance limits.                                                                      |
| *1        | LCS/LCSD RPD exceeds control limits.                                                                           |
| E         | Result exceeded calibration range.                                                                             |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| F2        | MS/MSD RPD exceeds control limits                                                                              |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| p         | The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.      |
| X         | Surrogate recovery exceeds control limits                                                                      |

#### LCMS

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *5        | Isotope dilution analyte is outside acceptance limits.                                                         |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### Metals

| Qualifier | Qualifier Description                                                                                                                                     |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4         | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| B         | Compound was found in the blank and sample.                                                                                                               |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                                                            |
| F2        | MS/MSD RPD exceeds control limits                                                                                                                         |
| F3        | Duplicate RPD exceeds the control limit                                                                                                                   |
| F5        | Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL.                                                                     |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.                                            |

#### General Chemistry

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| α              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| 1C             | Result is from the primary column on a dual-column method.                                                  |
| 2C             | Result is from the confirmation column on a dual-column method.                                             |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |

### Glossary (Continued)

| Abbreviation | These commonly used abbreviations may or may not be present in this report.          |
|--------------|--------------------------------------------------------------------------------------|
| DLC          | Decision Level Concentration (Radiochemistry)                                        |
| EDL          | Estimated Detection Limit (Dioxin)                                                   |
| LOD          | Limit of Detection (DoD/DOE)                                                         |
| LOQ          | Limit of Quantitation (DoD/DOE)                                                      |
| MCL          | EPA recommended "Maximum Contaminant Level"                                          |
| MDA          | Minimum Detectable Activity (Radiochemistry)                                         |
| MDC          | Minimum Detectable Concentration (Radiochemistry)                                    |
| MDL          | Method Detection Limit                                                               |
| ML           | Minimum Level (Dioxin)                                                               |
| MPN          | Most Probable Number                                                                 |
| MQL          | Method Quantitation Limit                                                            |
| NC           | Not Calculated                                                                       |
| ND           | Not Detected at the reporting limit (or MDL or EDL if shown)                         |
| NEG          | Negative / Absent                                                                    |
| POS          | Positive / Present                                                                   |
| PQL          | Practical Quantitation Limit                                                         |
| PRES         | Presumptive                                                                          |
| QC           | Quality Control                                                                      |
| RER          | Relative Error Ratio (Radiochemistry)                                                |
| RL           | Reporting Limit or Requested Limit (Radiochemistry)                                  |
| RPD          | Relative Percent Difference, a measure of the relative difference between two points |
| TEF          | Toxicity Equivalent Factor (Dioxin)                                                  |
| TEQ          | Toxicity Equivalent Quotient (Dioxin)                                                |
| TNTC         | Too Numerous To Count                                                                |

## Job ID: 410-11057-1

### Laboratory: Eurofins Lancaster Laboratories Env, LLC

#### Narrative

#### Job Narrative 410-11057-1

#### Receipt

The samples were received on 8/18/2020 7:05 PM; the samples arrived in good condition, and where required, properly preserved and on ice. The temperatures of the 5 coolers at receipt time were -0.1° C, 1.7° C, 3.2° C, 5.3° C and 5.5° C.

#### Receipt Exceptions

The container label for the following sample did not match the information listed on the Chain-of-Custody (COC): SB16\_0-2 (410-11057-1). One container's label lists a collection time of 08/18/20 at 10:55, while the COC lists 08/18/20 at 11:55. The client was contacted, and the lab was instructed to enter per the container label.

One container, a 50 ml plastic tube, for the following sample was received empty: SODUP03\_081820 (410-11057-7).

#### GC/MS VOA

Method 8260C: The continuing calibration verification (CCV) associated with batch 410-35277 recovered above the upper control limit for 1,4-Dioxane. Non-detections of the affected analytes are reported. Any detections are considered estimated.

Method 8260C: The continuing calibration verification (CCV) analyzed in batch 410-36246 was outside the method criteria for the following analyte(s): 2-Butanone. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

Method 8260C: Internal standard (ISTD) response for the following samples were outside control limits: SB13\_0-2 (410-11057-4), SB28\_0-2 (410-11057-10), SB28\_12-14 (410-11057-12) and SB22\_0-2 (410-11057-13). The sample(s) was re-extracted and/or re-analyzed and ISTD response was outside control limits.

Method 8260C: The continuing calibration verification (CCV) associated with batch 410-36246 recovered above the upper control limit for 1,4-Dioxane. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported.

Method 8260C: The continuing calibration verification (CCV) associated with batch 410-35567 recovered above the upper control limit for 1,4-Dioxane. Non-detections of the affected analytes are reported. Any detections are considered estimated.

Method 8260C: The following sample was diluted due to the abundance of non-target analytes: SB21\_9-11 (410-11057-18). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC/MS Semi VOA

Method 8270D: The following samples were diluted due to the nature of the sample matrix: SB16\_0-2 (410-11057-1), SB13\_0-2 (410-11057-4), SODUP03\_081820 (410-11057-7), SB28\_0-2 (410-11057-10), SB22\_0-2 (410-11057-13), SB22\_4-6 (410-11057-14), SB21\_0-2 (410-11057-16) and SB21\_9-11 (410-11057-18). Elevated reporting limits (RLs) are provided.

Method 8270D SIM: The following samples were diluted due to the nature of the sample matrix: SB22\_4-6 (410-11057-14), SB22\_8-10 (410-11057-15), SB21\_0-2 (410-11057-16), SB21\_6-8 (410-11057-17) and SB21\_9-11 (410-11057-18). Elevated reporting limits (RLs) are provided.

Method 8270D SIM: Internal standard responses were outside of acceptance limits for the following samples: SB22\_4-6 (410-11057-14), SB22\_8-10 (410-11057-15), SB21\_0-2 (410-11057-16), SB21\_6-8 (410-11057-17) and SB21\_9-11 (410-11057-18). The sample(s) shows evidence of matrix interference.

Method 8270D SIM: The following samples were diluted due to the nature of the sample matrix: SB16\_0-2 (410-11057-1), SB16\_6-8 (410-11057-2), SB16\_10-12 (410-11057-3), SB13\_0-2 (410-11057-4), SB13\_4-6 (410-11057-5), SODUP03\_081820 (410-11057-7), SB28\_0-2 (410-11057-10), SB28\_4-6 (410-11057-11) and SB22\_0-2 (410-11057-13). Elevated reporting limits (RLs) are provided.

## Case Narrative

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-11057-1

### Job ID: 410-11057-1 (Continued)

#### Laboratory: Eurofins Lancaster Laboratories Env, LLC (Conti)

Method 8270D SIM: The recovery for the sample internal standard is outside the QC acceptance limits. The following action was taken: The sample was re-analyzed and internal standard areas are again outside of the QC acceptance limits, indicating a matrix effect. The reported data is from the initial analysis of sample SB16\_0-2 (410-11057-1), SB16\_6-8 (410-11057-2), SB16\_10-12 (410-11057-3), SB13\_0-2 (410-11057-4), SB13\_4-6 (410-11057-5), SODUP03\_081820 (410-11057-7), SB28\_0-2 (410-11057-10), SB28\_4-6 (410-11057-11), SB28\_12-14 (410-11057-12) and SB22\_0-2 (410-11057-13).

Method 8270D SIM: Surrogate recovery for the following sample was outside control limits: SODUP03\_081820 (410-11057-7). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC Semi VOA

Method 8081B: The laboratory control sample (LCS) for prep batch 36625 recovered outside control limits for the following analytes: p,p'-DDD, p,p'-DDT, Aldrin, alpha-BHC, alpha-Chlordane, beta-BHC, Dieldrin, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin, gamma-BHC (Lindane), and Heptachlor. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported.

Method 8081B: The following sample required a dilution due to the nature of the sample matrix: SB21\_6-8 (410-11057-17). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8081B: The following sample was diluted due to the abundance of non-target analytes: SB21\_6-8 (410-11057-17). Elevated reporting limits (RLs) are provided.

Method 8081B: The following sample required a dilution due to the nature of the sample matrix: SB13\_4-6 (410-11057-5). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8081B: The following samples required a dilution due to the nature of the sample matrix: SB16\_0-2 (410-11057-1), SB16\_6-8 (410-11057-2), SB16\_10-12 (410-11057-3), SB13\_0-2 (410-11057-4), SB22\_0-2 (410-11057-13), SB22\_4-6 (410-11057-14), SB21\_0-2 (410-11057-16) and SB21\_9-11 (410-11057-18). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8081B: Surrogate DCB Decachlorobiphenyl (Surr) recovery for the following samples were outside control limits: SB13\_4-6 (410-11057-5), SODUP03\_081820 (410-11057-7), SB28\_0-2 (410-11057-10) and SB22\_8-10 (410-11057-15). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

Method 8081B: The following samples were diluted due to the nature of the sample matrix: SB16\_0-2 (410-11057-1), SB16\_6-8 (410-11057-2), SB16\_10-12 (410-11057-3), SB13\_0-2 (410-11057-4), SB13\_4-6 (410-11057-5), SODUP03\_081820 (410-11057-7), SB28\_0-2 (410-11057-10), SB28\_4-6 (410-11057-11), SB22\_0-2 (410-11057-13), SB22\_4-6 (410-11057-14), SB22\_8-10 (410-11057-15), SB21\_0-2 (410-11057-16) and SB21\_9-11 (410-11057-18). Elevated reporting limits (RLs) are provided.

Method 8081B: Surrogate recovery for the following samples were outside control limits: SB16\_0-2 (410-11057-1), SB16\_10-12 (410-11057-3), SB13\_0-2 (410-11057-4) and SB21\_9-11 (410-11057-18). Evidence of matrix interference is present; therefore, re-extraction and/or re-analysis was not performed.

Method 8081B: The following sample required a dilution due to the nature of the sample matrix: SB16\_10-12 (410-11057-3). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8082A: The DCB Decachlorobiphenyl (Surr) surrogate recovery for the following samples was outside acceptance limits (high biased) on the confirmation column due to matrix interference: SB28\_0-2 (410-11057-10). The recovery is within acceptance limits on the other column, indicating that the extraction process was in control.

Method 8082A: The DCB Decachlorobiphenyl (Surr) surrogate recovery for the following samples was outside acceptance limits (high

## Case Narrative

### Job ID: 410-11057-1 (Continued)

#### Laboratory: Eurofins Lancaster Laboratories Env, LLC (Conti

biased) on column 1: SB16\_0-2 (410-11057-1). The recovery is within acceptance limits on the other column, indicating that the extraction process was in control.

Method 8082A: The Tetrachloro-m-xylene surrogate recovery for the following samples was outside acceptance limits (low biased) on column 1: SB13\_0-2 (410-11057-4). The recovery is within acceptance limits on the other column, indicating that the extraction process was in control.

Method 8082A: Surrogate DCB Decachlorobiphenyl (Surr) recovery for the following samples were outside control limits: SB22\_0-2 (410-11057-13), SB22\_4-6 (410-11057-14) and SB21\_0-2 (410-11057-16). The following action was taken: The sample was re-extracted and the QC is again outside of the acceptance limits, indicating a matrix effect.

Method 8082A: Surrogate Tetrachloro-m-xylene (Surr) recovery for the following sample was outside control limits: SB21\_6-8 (410-11057-17). The following action was taken: The sample was re-extracted and the QC is again outside of the acceptance limits, indicating a matrix effect.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### LCMS

Method 537 (modified): The recovery for labeled isotope M2-8:2 FTS is outside the QC acceptance limits in the closing continuing calibration verification associated with the following samples: SB16\_0-2 (410-11057-1), SB16\_6-8 (410-11057-2), SB16\_10-12 (410-11057-3), SB13\_4-6 (410-11057-5), SB13\_12-14 (410-11057-6), SB13\_12-14 (410-11057-6[MS]), SB13\_12-14 (410-11057-6[MSD]), SODUP03\_081820 (410-11057-7) and SB28\_0-2 (410-11057-10). The analyte is not detected and the data is reported.

Method 537 (modified): The recovery for labeled isotope M2-8:2 FTS is outside the QC acceptance limits in the opening and closing continuing calibration verification associated with the following samples: SB28\_4-6 (410-11057-11), SB28\_12-14 (410-11057-12), SB22\_0-2 (410-11057-13), SB22\_4-6 (410-11057-14), SB22\_8-10 (410-11057-15), SB21\_0-2 (410-11057-16), SB21\_6-8 (410-11057-17) and SB21\_9-11 (410-11057-18). The analyte is not detected and the data is reported.

Method 537 (modified): The recovery for the labeled isotope(s) in the method blank associated with sample: EB01\_081720 (410-11057-8) is outside the QC acceptance limits as noted on the QC Summary. Also, the LCS/LCSD recovery for the labeled isotope(s) associated with sample: EB01\_081720 (410-11057-8) is outside the QC acceptance limits as noted on the QC Summary. Since the recovery for the target analytes is within QC limits, the data is reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Job ID: 410-11057-1

## Laboratory: Eurofins Lancaster Laboratories Env, LLC

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

| Authority | Program | Identification Number | Expiration Date |
|-----------|---------|-----------------------|-----------------|
| New York  | NELAP   | 10670                 | 04-01-21        |

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

| Analysis Method | Prep Method | Matrix | Analyte                               |
|-----------------|-------------|--------|---------------------------------------|
| 537 (Mod)       | 537         | Water  | 6:2 Fluorotelomer sulfonic acid       |
| 537 (Mod)       | 537         | Water  | 8:2 Fluorotelomer sulfonic acid       |

| Question                                                                            | Answer | Comment                             |
|-------------------------------------------------------------------------------------|--------|-------------------------------------|
| Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter. | N/A    |                                     |
| The cooler's custody seal is intact.                                                | N/A    |                                     |
| The cooler or samples do not appear to have been compromised or tampered with.      | True   |                                     |
| Samples were received on ice.                                                       | True   |                                     |
| Cooler Temperature is acceptable ( $\leq 6^{\circ}\text{C}$ , not frozen).          | True   |                                     |
| Cooler Temperature is recorded.                                                     | True   |                                     |
| WV: Container Temperature is acceptable ( $\leq 6^{\circ}\text{C}$ , not frozen).   | N/A    |                                     |
| WV: Container Temperature is recorded.                                              | N/A    |                                     |
| COC is present.                                                                     | True   |                                     |
| COC is filled out in ink and legible.                                               | True   |                                     |
| COC is filled out with all pertinent information.                                   | True   |                                     |
| There are no discrepancies between the containers received and the COC.             | False  | Refer to Job Narrative for details. |
| Samples are received within Holding Time (excluding tests with immediate HTs)       | True   |                                     |
| Sample containers have legible labels.                                              | True   |                                     |
| Containers are not broken or leaking.                                               | True   |                                     |
| Sample collection date/times are provided.                                          | True   |                                     |
| Appropriate sample containers are used.                                             | True   |                                     |
| Sample bottles are completely filled.                                               | True   |                                     |
| There is sufficient vol. for all requested analyses.                                | True   |                                     |
| Multiphasic samples are not present.                                                | True   |                                     |
| Samples do not require splitting or compositing.                                    | N/A    |                                     |
| Is the Field Sampler's name present on COC?                                         | True   |                                     |
| Sample Preservation Verified.                                                       | N/A    |                                     |
| Residual Chlorine Checked.                                                          | N/A    |                                     |
| Sample custody seals are intact.                                                    | True   |                                     |

## ANALYTICAL REPORT

Eurofins Lancaster Laboratories Env, LLC  
2425 New Holland Pike  
Lancaster, PA 17601

[www.eurofinsus.com/Env](http://www.eurofinsus.com/Env)

*The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.*

*This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.*

*Results relate only to the items tested and the sample(s) as received by the laboratory.*

Analytical test results meet all requirements of the associated regulatory program (e.g., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis. Data qualifiers are applied to note exceptions. Noncompliant quality control (QC) is further explained in narrative comments. QC data that exceed the upper limits and are associated with non-detect samples are qualified but no further narration is needed since the bias is high and does not change a non-detect result. Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Measurement uncertainty values, as applicable, are available upon request.

Test results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" and tested in the laboratory are not performed within 15 minutes of collection.

This report shall not be reproduced except in full, without the written approval of the laboratory.

**WARRANTY AND LIMITS OF LIABILITY** - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

### Qualifiers

#### GC/MS VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *3        | ISTD response or retention time outside acceptable limits.                                                     |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### GC/MS Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *3        | ISTD response or retention time outside acceptable limits.                                                     |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| X         | Surrogate recovery exceeds control limits                                                                      |

#### GC Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| p         | The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.      |
| X         | Surrogate recovery exceeds control limits                                                                      |

#### LCMS

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### Metals

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| B         | Compound was found in the blank and sample.                                                                    |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| α              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| 1C             | Result is from the primary column on a dual-column method.                                                  |
| 2C             | Result is from the confirmation column on a dual-column method.                                             |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MCL            | EPA recommended "Maximum Contaminant Level"                                                                 |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |
| MDC            | Minimum Detectable Concentration (Radiochemistry)                                                           |
| MDL            | Method Detection Limit                                                                                      |
| ML             | Minimum Level (Dioxin)                                                                                      |
| MPN            | Most Probable Number                                                                                        |
| MQL            | Method Quantitation Limit                                                                                   |
| NC             | Not Calculated                                                                                              |
| ND             | Not Detected at the reporting limit (or MDL or EDL if shown)                                                |
| NEG            | Negative / Absent                                                                                           |

### Glossary (Continued)

| Abbreviation | These commonly used abbreviations may or may not be present in this report.          |
|--------------|--------------------------------------------------------------------------------------|
| RER          | Relative Error Ratio (Radiochemistry)                                                |
| RL           | Reporting Limit or Requested Limit (Radiochemistry)                                  |
| RPD          | Relative Percent Difference, a measure of the relative difference between two points |
| TEF          | Toxicity Equivalent Factor (Dioxin)                                                  |
| TEQ          | Toxicity Equivalent Quotient (Dioxin)                                                |
| TNTC         | Too Numerous To Count                                                                |

## Case Narrative

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-11238-1

### Job ID: 410-11238-1

Laboratory: Eurofins Lancaster Laboratories Env, LLC

#### Narrative

#### Job Narrative 410-11238-1

#### Receipt

The samples were received on 8/19/2020 9:20 PM; the samples arrived in good condition, and where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 0.4° C and 2.9° C.

#### GC/MS VOA

Method 8260C: The continuing calibration verification (CCV) analyzed in batch 410-36246 was outside the method criteria for the following analyte(s): 2-Butanone. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

Method 8260C: Internal standard (ISTD) response for the following sample was outside control limits: SB15\_8-10 (410-11238-2). The sample(s) was re-extracted and/or re-analyzed and ISTD response was outside control limits.

Method 8260C: The method requirement for no headspace was not met. The following volatile sample was analyzed with headspace in the sample container(s): TB01\_08192020 (410-11238-12). The sample container was received with headspace.

Method 8260C: Internal standard (ISTD) response for the following sample was outside control limits: SB15\_8-10 (410-11238-2). The sample(s) was re-extracted and/or re-analyzed and ISTD response was outside control limits.

Method 8260C: The continuing calibration verification (CCV) associated with batch 410-36437 recovered above the upper control limit for 1,1-Dichloroethene. Non-detections of the affected analytes are reported. Any detections are considered estimated.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC/MS Semi VOA

Method 8270D: Surrogate recovery for the following samples were outside control limits: SB15\_0-2 (410-11238-1) and SB15\_8-10 (410-11238-2). Re-extraction and/or re-analysis was performed and surrogate recovery was outside control limits.

Method 8270D SIM: The recovery for the sample internal standard is outside the QC acceptance limits. The following action was taken: The sample was re-analyzed and internal standard areas are again outside of the QC acceptance limits, indicating a matrix effect. The reported data is from the initial analysis of samples SB14\_0-2 (410-11238-4) and SB11\_6-8 (410-11238-8).

Method 8270D SIM: The following samples were diluted due to the nature of the sample matrix: SB14\_0-2 (410-11238-4) and SB11\_6-8 (410-11238-8). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC Semi VOA

Method 8081B: The DCB Decachlorobiphenyl (Surr) surrogate recovery for the following samples was outside acceptance limits (high biased) on column 1: SB11\_0-2 (410-11238-7). The recovery is within acceptance limits on the other column, indicating that the extraction process was in control.

Method 8081B: The following sample required a dilution due to the nature of the sample matrix: SB14\_0-2 (410-11238-4). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8081B: The DCB Decachlorobiphenyl (Surr) surrogate recovery for the following samples was outside acceptance limits (low biased) on column 1: SB11\_18-20 (410-11238-9). The recovery is within acceptance limits on the other column, indicating that the extraction process was in control.

#### Laboratory: Eurofins Lancaster Laboratories Env, LLC (Continued)

Method 8151A: Surrogate 2,4-Dichlorophenylacetic acid (Surr) recovery for the following sample(s) was outside the control limit on one column: No analytes detected. The data is reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### LCMS

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.
