| Question                                                                            | Answer | Comment                             |
|-------------------------------------------------------------------------------------|--------|-------------------------------------|
| Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter. | N/A    |                                     |
| The cooler's custody seal is intact.                                                | N/A    |                                     |
| The cooler or samples do not appear to have been compromised or tampered with.      | True   |                                     |
| Samples were received on ice.                                                       | True   |                                     |
| Cooler Temperature is acceptable ( $\leq 6^{\circ}\text{C}$ , not frozen).          | True   |                                     |
| Cooler Temperature is recorded.                                                     | True   |                                     |
| WV: Container Temperature is acceptable ( $\leq 6^{\circ}\text{C}$ , not frozen).   | N/A    |                                     |
| WV: Container Temperature is recorded.                                              | N/A    |                                     |
| COC is present.                                                                     | True   |                                     |
| COC is filled out in ink and legible.                                               | True   |                                     |
| COC is filled out with all pertinent information.                                   | True   |                                     |
| There are no discrepancies between the containers received and the COC.             | False  | Refer to Job Narrative for details. |
| Samples are received within Holding Time (excluding tests with immediate HTs)       | True   |                                     |
| Sample containers have legible labels.                                              | True   |                                     |
| Containers are not broken or leaking.                                               | True   |                                     |
| Sample collection date/times are provided.                                          | True   |                                     |
| Appropriate sample containers are used.                                             | True   |                                     |
| Sample bottles are completely filled.                                               | True   |                                     |
| There is sufficient vol. for all requested analyses.                                | True   |                                     |
| Multiphasic samples are not present.                                                | True   |                                     |
| Samples do not require splitting or compositing.                                    | N/A    |                                     |
| Is the Field Sampler's name present on COC?                                         | True   |                                     |
| Sample Preservation Verified.                                                       | N/A    |                                     |
| Residual Chlorine Checked.                                                          | N/A    |                                     |
| Sample custody seals are intact.                                                    | N/A    |                                     |

## ANALYTICAL REPORT

Eurofins Lancaster Laboratories Env, LLC  
2425 New Holland Pike  
Lancaster, PA 17601  
Tel: (717)656-2300

Laboratory Job ID: 410-9194-1

Client Project/Site: 250 Water Street/170381202

For:

Langan Engineering & Environmental Svcs  
360 West 31st Street  
Suite 900  
New York, New York 10001

Attn: Joseph Yanowitz

Authorized for release by:  
8/10/2020 9:26:40 PM

Kay Hower, Principal Project Manager

*The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.*

*This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.*

*Results relate only to the items tested and the sample(s) as received by the laboratory.*

Analytical test results meet all requirements of the associated regulatory program (e.g., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis. Data qualifiers are applied to note exceptions. Noncompliant quality control (QC) is further explained in narrative comments. QC data that exceed the upper limits and are associated with non-detect samples are qualified but no further narration is needed since the bias is high and does not change a non-detect result. Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Measurement uncertainty values, as applicable, are available upon request.

Test results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" and tested in the laboratory are not performed within 15 minutes of collection.

This report shall not be reproduced except in full, without the written approval of the laboratory.

**WARRANTY AND LIMITS OF LIABILITY** - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

### Qualifiers

#### GC/MS VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *         | LCS or LCSD is outside acceptance limits.                                                                      |
| *3        | ISTD response or retention time outside acceptable limits.                                                     |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### GC/MS Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *3        | ISTD response or retention time outside acceptable limits.                                                     |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| X         | Surrogate recovery exceeds control limits                                                                      |

#### GC Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *         | LCS or LCSD is outside acceptance limits.                                                                      |
| *1        | LCS/LCSD RPD exceeds control limits.                                                                           |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| p         | The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.      |
| X         | Surrogate recovery exceeds control limits                                                                      |

#### LCMS

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### Metals

| Qualifier | Qualifier Description                                                                                                                                     |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4         | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| B         | Compound was found in the blank and sample.                                                                                                               |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                                                            |
| F2        | MS/MSD RPD exceeds control limits                                                                                                                         |
| F3        | Duplicate RPD exceeds the control limit                                                                                                                   |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.                                            |

#### General Chemistry

| Qualifier | Qualifier Description                                            |
|-----------|------------------------------------------------------------------|
| H         | Sample was prepped or analyzed beyond the specified holding time |

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| □              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| 1C             | Result is from the primary column on a dual-column method.                                                  |
| 2C             | Result is from the confirmation column on a dual-column method.                                             |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MCL            | EPA recommended "Maximum Contaminant Level"                                                                 |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |
| MDC            | Minimum Detectable Concentration (Radiochemistry)                                                           |

### Glossary (Continued)

| Abbreviation | These commonly used abbreviations may or may not be present in this report.          |
|--------------|--------------------------------------------------------------------------------------|
| MDL          | Method Detection Limit                                                               |
| ML           | Minimum Level (Dioxin)                                                               |
| MPN          | Most Probable Number                                                                 |
| MQL          | Method Quantitation Limit                                                            |
| NC           | Not Calculated                                                                       |
| ND           | Not Detected at the reporting limit (or MDL or EDL if shown)                         |
| NEG          | Negative / Absent                                                                    |
| POS          | Positive / Present                                                                   |
| PQL          | Practical Quantitation Limit                                                         |
| PRES         | Presumptive                                                                          |
| QC           | Quality Control                                                                      |
| RER          | Relative Error Ratio (Radiochemistry)                                                |
| RL           | Reporting Limit or Requested Limit (Radiochemistry)                                  |
| RPD          | Relative Percent Difference, a measure of the relative difference between two points |
| TEF          | Toxicity Equivalent Factor (Dioxin)                                                  |
| TEQ          | Toxicity Equivalent Quotient (Dioxin)                                                |
| TNTC         | Too Numerous To Count                                                                |

#### Job Narrative 410-9194-1

#### Receipt

The samples were received on 7/30/2020 10:10 PM; the samples arrived in good condition, and where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 1.9° C and 2.1° C.

#### Receipt Exceptions

The container label for the following sample did not match the information listed on the Chain-of-Custody (COC): EB03\_073020 (410-9194-8). The container labels list EB03\_073020, while the COC lists EB02\_073020. The sample was entered per COC.

One container for the following samples were received empty: SB18\_0-2 (410-9194-1) and SB20\_0-2 (410-9194-4).

#### GC/MS VOA

Method 8260C: The continuing calibration verification (CCV) associated with batch 410-29545 recovered above the upper control limit for 1,4-Dioxane. Non-detections of the affected analytes are reported. Any detections are considered estimated. The associated sample is: SB20\_20-22 (410-9194-6).

Method 8260C: The laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for batch 410-29545 recovered outside control limits for the following analytes: 1,4-Dioxane. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported. The associated sample is: SB20\_20-22 (410-9194-6).

Method 8260C: Internal standard (ISTD) response for the following sample was outside control limits: SB20\_0-2 (410-9194-4). The sample(s) was re-extracted and/or re-analyzed and ISTD response was outside control limits.

Methods 8260C, 8260D: The continuing calibration verification (CCV) associated with batch 410-30237 recovered above the upper control limit for 1,4-Dioxane. Non-detections of the affected analytes are reported. Any detections are considered estimated.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC/MS Semi VOA

Method 8270D SIM: The following samples were diluted due to the nature of the sample matrix: SB18\_0-2 (410-9194-1) and SB20\_20-22 (410-9194-6). As such, surrogate recoveries are below the calibration range, and elevated reporting limits (RLs) are provided.

Method 8270D SIM: Internal standard responses were outside of acceptance limits for the following samples: SB18\_0-2 (410-9194-1), SB20\_10-12 (410-9194-5) and SB20\_20-22 (410-9194-6). The samples were re-analyzed and the internal standard responses were again outside acceptance limits. The data is reported from the the initial analyses of the samples.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC Semi VOA

Method 8081B: The continuing calibration verification (CCV) associated with batch 28669 recovered outside acceptance criteria, low biased, for DCB Decachlorobiphenyl (Surr). The recoveries for DCB in the samples were within acceptable limits. The data is reported.

Method 8081B: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for 29565 recovered outside control limits for the following analytes: p,p'-DDD, p,p'-DDE, Aldrin, alpha-Chlordane, Endosulfan I, Endrin, and Heptachlor.

Method 8081B: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for 28581 recovered outside control limits for the following analytes: Endosulfan I and Endosulfan II. These analytes were biased high in the LCS. Endosulfan I was detected in the associated sample. Endosulfan II was not detected in the associated sample.

Method 8082A: Surrogate recovery for the following sample was outside control limits: SB20\_20-22 (410-9194-6). Evidence of matrix interferences is not obvious.

## Case Narrative

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-9194-1

---

### Job ID: 410-9194-1 (Continued)

---

#### Laboratory: Eurofins Lancaster Laboratories Env, LLC (Continued)

Method 8151A: The laboratory control sample (LCS) for preparation batch 410-30623 and analytical batch 410-30706 recovered outside control limits for the following analytes: Silvex (2,4,5-TP).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### LCMS

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### General Chemistry

Method 7196A: The following sample(s) was received with less than 2 days remaining on the holding time or less than one shift (8 hours) remaining on a test with a holding time of 48 hours or less. As such, the laboratory had insufficient time remaining to perform the analysis within holding time: SOFB01\_073020 (410-9194-9).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

# Client Sample Results

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-9194-1

Client Sample ID: SB18\_18-20

Lab Sample ID: 410-9194-3

Date Collected: 07/30/20 10:19

Matrix: Solid

Date Received: 07/30/20 22:10

Percent Solids: 85.8

# Accreditation/Certification Summary

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-9194-1

## Laboratory: Eurofins Lancaster Laboratories Env, LLC

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

| Authority | Program | Identification Number | Expiration Date |
|-----------|---------|-----------------------|-----------------|
| New York  | NELAP   | 10670                 | 04-01-21        |

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

| Analysis Method | Prep Method | Matrix | Analyte                               |
|-----------------|-------------|--------|---------------------------------------|
| 537 (Mod)       | 537         | Solid  | 6:2 Fluorotelomer sulfonic acid       |
| 537 (Mod)       | 537         | Solid  | 8:2 Fluorotelomer sulfonic acid       |

## Accreditation/Certification Summary

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-9194-1

### Laboratory: Eurofins Lancaster Laboratories Env, LLC (Continued)

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

| Authority | Program | Identification Number | Expiration Date |
|-----------|---------|-----------------------|-----------------|
| New York  | NELAP   | 10670                 | 04-01-21        |
| Moisture  | Solid   | Percent Moisture      |                 |

| Question                                                                            | Answer | Comment                             |
|-------------------------------------------------------------------------------------|--------|-------------------------------------|
| Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter. | N/A    |                                     |
| The cooler's custody seal is intact.                                                | N/A    |                                     |
| The cooler or samples do not appear to have been compromised or tampered with.      | True   |                                     |
| Samples were received on ice.                                                       | True   |                                     |
| Cooler Temperature is acceptable ( $\leq 6^{\circ}\text{C}$ , not frozen).          | True   |                                     |
| Cooler Temperature is recorded.                                                     | True   |                                     |
| WV: Container Temperature is acceptable ( $\leq 6^{\circ}\text{C}$ , not frozen).   | N/A    |                                     |
| WV: Container Temperature is recorded.                                              | N/A    |                                     |
| COC is present.                                                                     | True   |                                     |
| COC is filled out in ink and legible.                                               | True   |                                     |
| COC is filled out with all pertinent information.                                   | True   |                                     |
| There are no discrepancies between the containers received and the COC.             | False  | Refer to Job Narrative for details. |
| Samples are received within Holding Time (excluding tests with immediate HTs)       | True   |                                     |
| Sample containers have legible labels.                                              | True   |                                     |
| Containers are not broken or leaking.                                               | True   |                                     |
| Sample collection date/times are provided.                                          | True   |                                     |
| Appropriate sample containers are used.                                             | True   |                                     |
| Sample bottles are completely filled.                                               | True   |                                     |
| There is sufficient vol. for all requested analyses.                                | True   |                                     |
| Multiphasic samples are not present.                                                | True   |                                     |
| Samples do not require splitting or compositing.                                    | N/A    |                                     |
| Is the Field Sampler's name present on COC?                                         | True   |                                     |
| Sample Preservation Verified.                                                       | N/A    |                                     |
| Residual Chlorine Checked.                                                          | N/A    |                                     |
| Sample custody seals are intact.                                                    | True   |                                     |

## ANALYTICAL REPORT

Eurofins Lancaster Laboratories Env, LLC  
2425 New Holland Pike  
Lancaster, PA 17601  
Tel: (717)656-2300

Laboratory Job ID: 410-9318-1

*The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.*

*This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.*

*Results relate only to the items tested and the sample(s) as received by the laboratory.*

Analytical test results meet all requirements of the associated regulatory program (e.g., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis. Data qualifiers are applied to note exceptions. Noncompliant quality control (QC) is further explained in narrative comments. QC data that exceed the upper limits and are associated with non-detect samples are qualified but no further narration is needed since the bias is high and does not change a non-detect result. Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Measurement uncertainty values, as applicable, are available upon request.

Test results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" and tested in the laboratory are not performed within 15 minutes of collection.

This report shall not be reproduced except in full, without the written approval of the laboratory.

**WARRANTY AND LIMITS OF LIABILITY** - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

### Qualifiers

#### GC/MS VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *         | LCS or LCSD is outside acceptance limits.                                                                      |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### GC/MS Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### GC Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *         | LCS or LCSD is outside acceptance limits.                                                                      |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| p         | The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.      |
| X         | Surrogate recovery exceeds control limits                                                                      |

#### LCMS

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *5        | Isotope dilution analyte is outside acceptance limits.                                                         |
| I         | Value is EMPC (estimated maximum possible concentration).                                                      |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### Metals

| Qualifier | Qualifier Description                                                                                                                                     |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| *         | LCS or LCSD is outside acceptance limits.                                                                                                                 |
| 4         | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                                                            |
| F2        | MS/MSD RPD exceeds control limits                                                                                                                         |
| F3        | Duplicate RPD exceeds the control limit                                                                                                                   |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.                                            |

#### General Chemistry

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| α              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| 1C             | Result is from the primary column on a dual-column method.                                                  |
| 2C             | Result is from the confirmation column on a dual-column method.                                             |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |

### Glossary (Continued)

| Abbreviation | These commonly used abbreviations may or may not be present in this report.          |
|--------------|--------------------------------------------------------------------------------------|
| MDL          | Method Detection Limit                                                               |
| ML           | Minimum Level (Dioxin)                                                               |
| MPN          | Most Probable Number                                                                 |
| MQL          | Method Quantitation Limit                                                            |
| NC           | Not Calculated                                                                       |
| ND           | Not Detected at the reporting limit (or MDL or EDL if shown)                         |
| NEG          | Negative / Absent                                                                    |
| POS          | Positive / Present                                                                   |
| PQL          | Practical Quantitation Limit                                                         |
| PRES         | Presumptive                                                                          |
| QC           | Quality Control                                                                      |
| RER          | Relative Error Ratio (Radiochemistry)                                                |
| RL           | Reporting Limit or Requested Limit (Radiochemistry)                                  |
| RPD          | Relative Percent Difference, a measure of the relative difference between two points |
| TEF          | Toxicity Equivalent Factor (Dioxin)                                                  |
| TEQ          | Toxicity Equivalent Quotient (Dioxin)                                                |
| TNTC         | Too Numerous To Count                                                                |

# Case Narrative

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-9318-1

## Job ID: 410-9318-1

### Laboratory: Eurofins Lancaster Laboratories Env, LLC

#### Narrative

#### Job Narrative 410-9318-1

#### Receipt

The samples were received on 7/31/2020 9:05 PM; the samples arrived in good condition, and where required, properly preserved and on ice. The temperatures of the 3 coolers at receipt time were 0.8° C, 1.6° C and 2.2° C.

#### Receipt Exceptions

One container for the following sample was received empty: SB17\_0-2 (410-9318-1).

#### GC/MS VOA

Method 8260C: The continuing calibration verification (CCV) associated with batch 410-29545 recovered above the upper control limit for 1,4-Dioxane. Non-detections of the affected analytes are reported. Any detections are considered estimated. The associated sample is: SB17\_14-16 (410-9318-2).

Method 8260C: The following sample was diluted due to the abundance of non-target analytes: SB17\_14-16 (410-9318-2). Elevated reporting limits (RLs) are provided.

Method 8260C: The laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for batch 410-29545 recovered outside control limits for the following analytes: 1,4-Dioxane. These analytes were biased high in the LCS and were not detected in the associated samples; therefore, the data have been reported. The associated sample is: SB17\_14-16 (410-9318-2).

Method 8260C: The continuing calibration verification (CCV) associated with batch 410-29766 recovered above the upper control limit for 1,4-Dioxane. Non-detections of the affected analytes are reported. Any detections are considered estimated.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC/MS Semi VOA

Method 8270D: The continuing calibration verification (CCV) analyzed in batch 410-30388 was outside the method criteria for the following analyte(s): Indeno[1,2,3-cd]pyrene, Dibenz(a,h)anthracene and Benzo[g,h,i]perylene. A CCV standard at or below the reporting limit (RL) was analyzed with the affected samples and found to be acceptable. As indicated in the reference method, sample analysis may proceed; however, any detection for the affected analyte(s) is considered estimated.

Method 8270D SIM: The following sample was diluted due to the nature of the sample matrix: SB23\_0-2 (410-9318-4). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC Semi VOA

Method 8081B: The following sample required a dilution due to the nature of the sample matrix: SB23\_0-2 (410-9318-4). Because of this dilution, the surrogate spike concentration in the sample was reduced to a level where the recovery calculation does not provide useful information.

Method 8082A: The laboratory control sample (LCS) and / or laboratory control sample duplicate (LCSD) for preparation batch 410-29278 and analytical batch 410-29940 recovered outside control limits for the following Surrogate: Tetrachloro-m-xylene. Since the recovery for target analytes is within the limits, the data is reported.

Method 8151A: The laboratory control sample (LCS) and the laboratory control sample duplicate (LCSD) for preparation batch 410-29223 and analytical batch 410-29006 recovered outside control limits for the following analytes: Silvex (2,4,5-TP).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

## Case Narrative

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-9318-1

### Job ID: 410-9318-1 (Continued)

#### Laboratory: Eurofins Lancaster Laboratories Env, LLC (Conti

##### Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

##### LCMS

Method 537 (modified): The recovery for the labeled isotope(s) is outside the QC acceptance limits as noted on the QC Summary for the following samples: SB17\_30-32 (410-9318-3), SB23\_0-2 (410-9318-4) and SODUP01\_073120 (410-9318-9)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

##### General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

##### Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

##### VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

# QC Sample Results

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-9318-1

## Method: 537 (Mod) - EPA 537 Version 1.1 modified (Continued)

Lab Sample ID: MB 410-28974/1-A

Matrix: Water

Analysis Batch: 29193

Client Sample ID: Method Blank

Prep Type: Total/NA

Prep Batch: 28974

## Accreditation/Certification Summary

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-9318-1

### Laboratory: Eurofins Lancaster Laboratories Env, LLC (Continued)

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

| Authority | Program | Identification Number | Expiration Date |
|-----------|---------|-----------------------|-----------------|
| New York  | NELAP   | 10670                 | 04-01-21        |
| Moisture  | Solid   | Percent Moisture      |                 |

| Question                                                                            | Answer | Comment                             |
|-------------------------------------------------------------------------------------|--------|-------------------------------------|
| Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter. | N/A    |                                     |
| The cooler's custody seal is intact.                                                | True   |                                     |
| The cooler or samples do not appear to have been compromised or tampered with.      | True   |                                     |
| Samples were received on ice.                                                       | True   |                                     |
| Cooler Temperature is acceptable ( $\leq 6^{\circ}\text{C}$ , not frozen).          | True   |                                     |
| Cooler Temperature is recorded.                                                     | True   |                                     |
| WV: Container Temperature is acceptable ( $\leq 6^{\circ}\text{C}$ , not frozen).   | N/A    |                                     |
| WV: Container Temperature is recorded.                                              | N/A    |                                     |
| COC is present.                                                                     | True   |                                     |
| COC is filled out in ink and legible.                                               | True   |                                     |
| COC is filled out with all pertinent information.                                   | True   |                                     |
| There are no discrepancies between the containers received and the COC.             | True   |                                     |
| Samples are received within Holding Time (excluding tests with immediate HTs)       | True   |                                     |
| Sample containers have legible labels.                                              | True   |                                     |
| Containers are not broken or leaking.                                               | True   |                                     |
| Sample collection date/times are provided.                                          | True   |                                     |
| Appropriate sample containers are used.                                             | True   |                                     |
| Sample bottles are completely filled.                                               | False  | Refer to Job Narrative for details. |
| There is sufficient vol. for all requested analyses.                                | True   |                                     |
| Multiphasic samples are not present.                                                | True   |                                     |
| Samples do not require splitting or compositing.                                    | N/A    |                                     |
| Is the Field Sampler's name present on COC?                                         | True   |                                     |
| Sample Preservation Verified.                                                       | N/A    |                                     |
| Residual Chlorine Checked.                                                          | N/A    |                                     |
| Sample custody seals are intact.                                                    | True   |                                     |

*The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.*

*This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.*

*Results relate only to the items tested and the sample(s) as received by the laboratory.*

Analytical test results meet all requirements of the associated regulatory program (e.g., NELAC (TNI), DoD, and ISO 17025) unless otherwise noted under the individual analysis. Data qualifiers are applied to note exceptions. Noncompliant quality control (QC) is further explained in narrative comments. QC data that exceed the upper limits and are associated with non-detect samples are qualified but no further narration is needed since the bias is high and does not change a non-detect result. Regulated compliance samples (e.g. SDWA, NPDES) must comply with the associated agency requirements/permits.

Measurement uncertainty values, as applicable, are available upon request.

Test results relate only to the sample tested. Clients should be aware that a critical step in a chemical or microbiological analysis is the collection of the sample. Unless the sample analyzed is truly representative of the bulk of material involved, the test results will be meaningless. If you have questions regarding the proper techniques of collecting samples, please contact us. We cannot be held responsible for sample integrity, however, unless sampling has been performed by a member of our staff. Times are local to the area of activity. Parameters listed in the 40 CFR Part 136 Table II as "analyze immediately" and tested in the laboratory are not performed within 15 minutes of collection.

This report shall not be reproduced except in full, without the written approval of the laboratory.

**WARRANTY AND LIMITS OF LIABILITY** - In accepting analytical work, we warrant the accuracy of test results for the sample as submitted. THE FOREGOING EXPRESS WARRANTY IS EXCLUSIVE AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED. WE DISCLAIM ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING A WARRANTY OF FITNESS FOR PARTICULAR PURPOSE AND WARRANTY OF MERCHANTABILITY. IN NO EVENT SHALL EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL, LLC BE LIABLE FOR INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFIT OR GOODWILL REGARDLESS OF (A) THE NEGLIGENCE (EITHER SOLE OR CONCURRENT) OF EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL AND (B) WHETHER EUROFINS LANCASTER LABORATORIES ENVIRONMENTAL HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. We accept no legal responsibility for the purposes for which the client uses the test results. No purchase order or other order for work shall be accepted by Eurofins Lancaster Laboratories Environmental which includes any conditions that vary from the Standard Terms and Conditions, and Eurofins Lancaster Laboratories Environmental hereby objects to any conflicting terms contained in any acceptance or order submitted by client.

### Qualifiers

#### GC/MS VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| F2        | MS/MSD RPD exceeds control limits                                                                              |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### GC/MS Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### GC Semi VOA

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *         | LCS or LCSD is outside acceptance limits.                                                                      |
| E         | Result exceeded calibration range.                                                                             |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                 |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| p         | The %RPD between the primary and confirmation column/detector is >40%. The lower value has been reported.      |
| X         | Surrogate recovery exceeds control limits                                                                      |

#### LCMS

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| *5        | Isotope dilution analyte is outside acceptance limits.                                                         |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

#### Metals

| Qualifier | Qualifier Description                                                                                                                                     |
|-----------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4         | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| E         | Result exceeded calibration range.                                                                                                                        |
| F1        | MS and/or MSD recovery exceeds control limits.                                                                                                            |
| F2        | MS/MSD RPD exceeds control limits                                                                                                                         |
| F3        | Duplicate RPD exceeds the control limit                                                                                                                   |
| F5        | Duplicate RPD exceeds limit, and one or both sample results are less than 5 times RL.                                                                     |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.                                            |

#### General Chemistry

| Qualifier | Qualifier Description                                                                                          |
|-----------|----------------------------------------------------------------------------------------------------------------|
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

### Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| α              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| 1C             | Result is from the primary column on a dual-column method.                                                  |
| 2C             | Result is from the confirmation column on a dual-column method.                                             |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MCL            | EPA recommended "Maximum Contaminant Level"                                                                 |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |

### Glossary (Continued)

| Abbreviation | These commonly used abbreviations may or may not be present in this report.          |
|--------------|--------------------------------------------------------------------------------------|
| MDC          | Minimum Detectable Concentration (Radiochemistry)                                    |
| MDL          | Method Detection Limit                                                               |
| ML           | Minimum Level (Dioxin)                                                               |
| MPN          | Most Probable Number                                                                 |
| MQL          | Method Quantitation Limit                                                            |
| NC           | Not Calculated                                                                       |
| ND           | Not Detected at the reporting limit (or MDL or EDL if shown)                         |
| NEG          | Negative / Absent                                                                    |
| POS          | Positive / Present                                                                   |
| PQL          | Practical Quantitation Limit                                                         |
| PRES         | Presumptive                                                                          |
| QC           | Quality Control                                                                      |
| RER          | Relative Error Ratio (Radiochemistry)                                                |
| RL           | Reporting Limit or Requested Limit (Radiochemistry)                                  |
| RPD          | Relative Percent Difference, a measure of the relative difference between two points |
| TEF          | Toxicity Equivalent Factor (Dioxin)                                                  |
| TEQ          | Toxicity Equivalent Quotient (Dioxin)                                                |
| TNTC         | Too Numerous To Count                                                                |

## Case Narrative

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-9434-1

### Job ID: 410-9434-1

### Laboratory: Eurofins Lancaster Laboratories Env, LLC

#### Narrative

#### Job Narrative 410-9434-1

#### Receipt

The samples were received on 8/3/2020 9:45 PM; the samples arrived in good condition, and where required, properly preserve and on ice. The temperatures of the 3 coolers at receipt time were 0.1° C, 0.5° C and 0.9° C.

#### GC/MS VOA

Method 8260C: The continuing calibration verification (CCV) associated with batch 410-29766 recovered above the upper control limit for 1,4-Dioxane. Non-detections of the affected analytes are reported. Any detections are considered estimated.

Method 8260C: The continuing calibration verification (CCV) associated with batch 410-30651 recovered outside acceptance criteria, low biased, for Vinyl chloride and Tetrachloroethene. A reporting limit (RL) standard was analyzed, and the target analyte was detected. Since the associated samples were non-detect for this analyte, the data have been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC/MS Semi VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### GC Semi VOA

Method 8081B: The following sample was diluted due to the nature of the sample matrix: SB39\_8-10 (410-9434-5). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### LCMS

Method 537 (modified): The recovery for the labeled isotope(s) is outside the QC acceptance limits as noted on the QC Summary for the following sample: SB38\_6-8 (410-9434-2).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

# Isotope Dilution Summary

Client: Langan Engineering & Environmental Svcs  
Project/Site: 250 Water Street/170381202

Job ID: 410-9434-1

Method: 537 (Mod) - EPA 537 Version 1.1 modified

Matrix: Solid

Prep Type: Total/NA

Job ID: 410-9434-1

## Laboratory: Eurofins Lancaster Laboratories Env, LLC

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

| Authority | Program | Identification Number | Expiration Date |
|-----------|---------|-----------------------|-----------------|
| New York  | NELAP   | 10670                 | 04-01-21        |

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

| Analysis Method | Prep Method | Matrix | Analyte                               |
|-----------------|-------------|--------|---------------------------------------|
| 537 (Mod)       | 537         | Water  | 6:2 Fluorotelomer sulfonic acid       |

| Question                                                                            | Answer | Comment |
|-------------------------------------------------------------------------------------|--------|---------|
| Radioactivity wasn't checked or is $\leq$ background as measured by a survey meter. | N/A    |         |
| The cooler's custody seal is intact.                                                | N/A    |         |
| The cooler or samples do not appear to have been compromised or tampered with.      | True   |         |
| Samples were received on ice.                                                       | True   |         |
| Cooler Temperature is acceptable ( $\leq 6^{\circ}\text{C}$ , not frozen).          | True   |         |
| Cooler Temperature is recorded.                                                     | True   |         |
| WV: Container Temperature is acceptable ( $\leq 6^{\circ}\text{C}$ , not frozen).   | N/A    |         |
| WV: Container Temperature is recorded.                                              | N/A    |         |
| COC is present.                                                                     | True   |         |
| COC is filled out in ink and legible.                                               | True   |         |
| COC is filled out with all pertinent information.                                   | True   |         |
| There are no discrepancies between the containers received and the COC.             | True   |         |
| Samples are received within Holding Time (excluding tests with immediate HTs)       | True   |         |
| Sample containers have legible labels.                                              | True   |         |
| Containers are not broken or leaking.                                               | True   |         |
| Sample collection date/times are provided.                                          | True   |         |
| Appropriate sample containers are used.                                             | True   |         |
| Sample bottles are completely filled.                                               | True   |         |
| There is sufficient vol. for all requested analyses.                                | True   |         |
| Multiphasic samples are not present.                                                | True   |         |
| Samples do not require splitting or compositing.                                    | N/A    |         |
| Is the Field Sampler's name present on COC?                                         | True   |         |
| Sample Preservation Verified.                                                       | N/A    |         |
| Residual Chlorine Checked.                                                          | N/A    |         |
| Sample custody seals are intact.                                                    | True   |         |

## ANALYTICAL REPORT
