Description

This course provides participants with an overview of the Wilson Reading System® (WRS) 4th Edition curriculum and serves as the prerequisite for WRS Level I Certification. Over three consecutive days (16.5 hours), this course examines how WRS addresses the teaching of phonemic awareness, word identification, vocabulary, fluency, and comprehension through an integrated study of phonology, morphology, and orthography with students in grade two and above with persistent phonological coding deficits.

Participants learn about reading research, dyslexia, appropriate student identification and placement, program implementation, progress monitoring, scheduling, and creating a successful learning environment. Principles of language structure and how to teach language with direct, multisensory methods are demonstrated and practiced during the course. Participants explore the standard 10-part Wilson Lesson Plan and practice planning and delivering a lesson while receiving modeling and feedback from a Wilson® Credentialed Trainer during the course.
