Features

1. Design and Render

Inbuilt module library and rendering engine

Design and Render within minutes

Prolance is an intuitive platform available as a SketchUp plugin. Trust us, spend an hour on our platform and you will be designing like a pro! Design to impress with the inbuilt rendering software.

3000 customizable modules and 100's of finishes and materials from leading brands.

Seamless integration with our rendering engine to generate stunning, realistic renders in just a few minutes.

How it benefits you

1. Professional designing at your fingertips using our Web and Sketchup plugin
2. Create photo realistic renders within minutes using our infinite range of props
3. Extremely flexible with amazing customization capabilities to address any site condition
4. Easy to understand platform with no prior technical training required

<Want to see renders built on Prolance? Click here>

Prolance platform comes with more than 3000 modules and It extremely flexible with amazing customization capabilities.

It is seamless to integrate and Handpick from an infinite range of furnishings, props, hardware and finishes for a render that will blow your client away. Say goodbye to expensive, external plugins.

- Built as a SketchUp plugin
- Professional designing at your fingertips
- Create photo realistic renders within minutes
- No prior technical training required

- Comprehensive training and support from team Prolance

2. Quote Generation, Automated

Accurate quotes generated instantly

Generate professional proposals within minutes

Cumbersome computing of quotes taking up all your time? We have the solution. Our automatic proposal generator will do it all for you, in only a few minutes with accurate quote

Customizable quote and proposals that can be generated within minutes saving you hours of time.

100's of pre designed products for you to import and modify as per your client requirements

Hundreds of excel sheets, human errors, countless hours adding numbers are things of the past. Get a quote, error-free and customised!

Creative juices running low? Import from our exhaustive pre designed rooms generated by the design community or from your past projects and tweak them for your new client as required.

How it benefits you

- Lightning fast Quotes generated saving you precious hours to focus on client and design
- Use our inspiration wall to create proposals! Pick from pre designed spaces like kitchens, master bedrooms and more, add in your specifications and get a stunning client presentation within 20 minutes.
- Quotes are generated using actual consumption of materials
- Maintain versions of your designs and proposals

3. Extensive Product Library

Inbuilt module and Hardware library

Customizable library of more than 3000 modules with accessories pre mapped

Our platform boasts of a library of 3000+ modules for all your spaces. Be it your kitchen cabinets, entertainment units or wardrobes, you can customise any space! Accessorise your space with hardware from leading brands like Hettich, Ebco, Hafele, Ebco, Kesserbohmer and more.

When it comes to finishes and materials, once again, the world is your oyster with Prolance. From ply to veneer and acrylic to engineered wood, the options are countless. You can even design civil kitchens!

Add your own finishes, materials and prices. Prolance ensure you are not limited by a fixed catalog. You have the freedom to add your own

How it benefits you

- 3000+ modules that will suit any space. All modules come pre mapped with accessories from across all leading brands

- All modules can be customised in sizes ! Want to drop a side panel to the floor ? Its possible with Prolance
- Add your own materials and finishes if you don't find them in our extensive library

-<Check out our library of finishes, modules and materials>

4. Generate Project Reports Automatically

2D report generated automatically

Generate 2D drawings, BoQ and assembly sheet automatically

Once a project moves from the design phase to execution, that is when the real work begins! Creating 2D files is laborious but critical when executing a project. Let's not even get started on error margins and the long hours. Our powerful automation engine converts all 3D drawings to 2D files with exhaustive information saving you hours of work!

Detailed 2D report (GFC Drawing) for your drawings that you could use for signoff, manufacturing and installation

With Prolance, generate other project reports like hardware lists, BoQ, installation files and more, automatically. Yes, no more stressing about measurement, floor plans, size and scale!

- Automated detailed 2D drawings (GFC Drawings) for all the rooms. Reports can be further edited

Get sheet quantities post optimization by our advanced sheet optimization engine

- Reduce cost by purchasing the right quantity of materials with our BoQ reports

<View sample 2D and BOQ files>

5. World Class Manufacturing

Manufacture your projects with the best

Manufacture and installation available as a service

No more running after vendors and spending hours finding suppliers.

Our platform brings world class manufacturers to your desktop. Prolance provides world-class manufacturing that will build, ship and even install your products at site!

Design to manufacturing platform ensures no manual conversion of files saving time and reducing errors in conversion

Factories are managed by our experienced team ensuring you get only the best as per schedule

- Spend your time designing and engaging clients while we handle the backend complexity of procurement, manufacturing and installation

- Complete tracking of your project with an account manager assigned to you.

- 1 year warranty on any manufacturing defects and up to 10 years warranty on materials

- Genuine materials with warranty certificates and bills

- Professional installation team with best in industry SOPs followed

- Post sale service for all your products

<Browse photos of our projects executed>

Trusted by designers across the world !

Discover the smarter way to design using our powerful automated features along with extensive pre built library

1000's of designers using the platform
40% reduction in time
0 Error in quote and project reports
More than 3000 customizable modules

What Our Clients Are Saying

1. Interior design streamlining at its absolute best!

Rao Space is a leading interior design studio that turns homes and more into luxury spaces with affordable, premium interiors. Prolance has helped transform their business by automating design, quote generation, file management and reporting. Thus saving time, eliminating grunt work and rendering error-free results!

<Client image>

“Prolance is a fantastic interior design automation platform that has proven to be a valuable asset to our business. Thanks to the platform's design and quote features, file management, and reporting capabilities, we have been able to minimise errors and complete home interior projects more efficiently. Overall, we are delighted with the functionality of Prolance and would highly recommend it to anyone looking to streamline their interior design processes.”

- Mukund Rao, Owner, Rao Space

2. Prolance is the catalyst your business needs, from labelling to automating BOQ, gone are the days with error-ridden reworks.

<Client image>

“Prolance has helped increase production by 40% and reduce rework by 85%” says Abhinandhan, Owner, Viswa Panelcrafts.

Hear from the owner himself.

<https://www.facebook.com/watch/?v=1180152125969189>

-
3. Turn prospects into happy clients with our one stop solution for all your interior and manufacturing needs!

<Client image>

“Working with Prolance has been a pleasure, thanks to them we have won many clients. Also, it’s a one stop solution for designing and manufacturing. I look forward to using their services in future projects.”

- Jai Nathani, CEO & Founder, Homeamare

4. Apart from simplifying design with its plugin on Sketchup, Prolance’s seamless proposal generation and production reports convert hours of manual work into just a few clicks!

About Us

At Prolance, we are passionate about empowering interior firms, whether they are small or big. With the help of innovative technology and years of industry experience, our team of experts understands the challenges interior design poses to the stakeholders involved.

The idea behind our platform is to not only streamline but also simplify complicated processes as interior projects move from the designing phase to procurement and finally to manufacturing and installation.

Prolance was born of this vision. Flexible, intuitive and result-oriented, this SaaS platform is holistic and uncomplicated.

We are committed to innovative problem-solving and always putting our customer first. A close working relationship with our clients has enabled us to get a better understanding of bottlenecks in the interior industry, which has led us to tailor powerful targeted solutions.

At the centre of our platform is security and privacy. Industry-forward protocols ensure your data is safe with us.

Hence, our mission is simple, to empower interior professionals and firms of all sizes to thrive in the digital age. Whether you're a small startup, a mid-sized enterprise, or a large corporation, our platform is designed to help scale your business with an easily adaptable model.

We welcome you to join the Prolance family and help us transform your business, starting today!

Prolance Team

The Prolance team comes with extensive experience in the interior industry. Our SaaS platform is crafted by a team of seasoned industry experts with a cumulative of 100+ years of experience in interiors. We're on a mission to revolutionise the design and execution process into one that is simple, precise, and effortless, like never before. With our platform's intelligent and powerful automation engine, bid goodbye to errors and cost escalations. We bring to you a future where predictability and stability are guaranteed in the interior business!

Awards

Over the past few years, Prolance has been recognized for its exceptional contributions to the interior design industry and won many accolades. We are proud of our achievements, which stand testament to the vision we so strongly believe in—empowering interior design firms.

Here are some of the prestigious awards we have won:

India Kitchen Congress, Business Innovation Award 2023

<Image>

We were honoured to receive this esteemed award for our innovation in interior design, which has transformed the way interior designers, manufacturers and their clients work together. This recognition reinforces the mission of empowering designers with powerful tools that enhance productivity and streamline their workflows.

Hero Banner:

Double Your Productivity With Prolance
A platform for fast and flawless results!

Minimal errors

Real-time workflow management
Automated cutlists
Optimize sheets instantly
Seamless CIX/ MPR file conversion

Call to action: Build With Prolance Free

You Innovate While We Automate

Features

1. Seamless Sheet Optimization

Get optimised sheet quantities

Inbuilt sheet optimization software to calculate exact quantities

The Prolance platform ensures you get the best sheet optimization to avoid excess wastage. Don't worry about the long process of data input of panel sizes and more, Prolance seamlessly integrates design files.

Integrated optimization for seamless computation of sheet quantities required for your project.
No additional software required

Automatic generation of labels for all parts. Track journey of a component through the complete project lifecycle

How it benefits you

1. No requirement to buy additional optimization software. Optimization done using our advanced optimization engine.
2. Reports can be given in formats conforming to your own Beam Saw optimization requirements or printouts for your panel saw operator to refer
3. Traceability of parts with our label generator

<Click for sample optimization files>

2. Convert to Manufacturing Files

No manual effort to get manufacturing files

Import sketchup files and convert to manufacturing files automatically

With Prolance, gone are the days where you spent countless hours converting SketchUp drawings to manufacturing ready files.

Customize the drawing files as per your construction methodology like changing panel position, sizes, edge banding details etc

Generate CSV, MPR, CIX, DXF files automatically for machines across all brands

QR code solution for ease of scanning and traceability

How does it benefit you

1. Saves countless hours in converting sketchUp files to formats suitable for your machines
2. Ensure zero errors and saving of atleast 20% in cost and 40% in time
3. Complete traceability of parts across the project life cycle
4. Removes dependency on operator's skill set

<Scan QR code to see samples>

3, Generate Project Reports Automatically

2D report generated automatically

Generate 2D drawings, BoQ and assembly sheets automatically

Once a project moves from the design phase to execution, that is when the real work begins! Creating 2D files is laborious but critical when executing a project. Let's not even get started on error margins and the long hours. Our powerful automation engine converts all 3D drawings to 2D files with exhaustive information saving you hours of work!

Detailed 2D report (GFC Drawing) for your drawings that you could use for signoff, manufacturing and installation

With Prolance, generate other project reports like hardware lists, BoQ, installation files and more, automatically. Yes, no more stressing about measurement, floor plans, size and scale!

- Automated detailed 2D drawings (GFC Drawings) for all the rooms.
- Get sheet quantities post optimization by our advanced sheet optimization engine
- Reduce time and cost by purchasing the right quantity of materials with our BoQ reports
- Reduce errors as there is no manual intervention

<View sample 2D and BOQ files>

Track Work Progress In Real Time

Factory Management System

Complete visibility on shop floor and reporting

Tracking made easy, from design to manufacturing and logistics to installation! Track every line item in your BOQ with a unique barcode. Ensure there are no wrong or missing parts during execution.

Prolance's Factory Management System ensures all-round tracking of projects, from quality control to dashboard reports and data for analytics.

How it benefits you

Real time visibility of all orders in your factory. Complete traceability of parts from design on sketchup to manufacturing and packing

Data and analytics using our advanced factory management system ensures you can easily identify areas of improvement

All tracking can be done on our mobile app minimising missing parts during logistics and installation

Individual cabinet packing report

<View Factory Management System Sample>

How it Works - Designer

You design while we handle everything else!

How it Works - Designer

1. All About Design

Our plugin is available on SketchUp and the web. No need to master a new platform, simply use your favourite design software and work with over 3000 modules and enhance your design with our massive catalogue of accessories, hardware, laminates and core materials from leading brands.

Can't find what you need? Add your own catalogue of materials and finishes!

2. Inspiration. Unlimited.

Prolance's inspiration wall gives you access to 100s of designs. You can also import pre designed spaces from your previous projects, saving time on repeating tasks. The best part, you can then customise those designs as per your new requirements!

3. Create Renders and Realistic Visuals

Use our inbuilt render engine to create project renders. Dependency on 3rd party

software is a thing of the past, you can now generate photo realistic images right from the plugin.

4. Customised Proposals Made Easy

Prolance makes it super easy and fast to generate proposals complete with quotes and rendered visuals.

5. 2D Files In a Click

Generate accurate 2D files automatically. Ideal for sharing with clients and even manufacturers.

6. End to End Project Management

Prolance is not just a design platform. Get your projects manufactured and even installed at site. We work with world class manufacturing factories and professional installation teams. Get real time project updates as you project moves from procurement to production and installation

Enjoy designing and building relationships with clients, while we handle the backend grunt work.

Try Prolance for free !

1. **How it Works - Manufacturer**

Hero Banner: Manufacturing Gets Smarter With Prolance

1. Import to Execute - With the Prolance plugin, import detailed drawings made by the interior designer with ease. Design to execution is not tedious but seamless.
2. Modify Files - Advanced features allow you to adapt files according to your unique construction techniques and even modify drawings made by the designer.
3. Cut List Generation - Don't spend hours on excel sheets and reports. With a few clicks generate the cut list, optimization sheet, hardware and accessory reports. Plus, these reports are totally customizable.
4. Get Machine Ready Files, Automatically - Prolance converts drawings to machine ready files (for beam saws and CNC routers). Speed up your manufacturing process with simple automation.

5. Project Tracking - Prolance's QR code solution enables you to track all parts of your project, right from manufacturing right through to installation. Better yet, we have a packing solution to ensure nothing goes missing during the project lifecycle.

Margins

Configure margins

The margin configuration below helps set a markup on the cost of individual items, which gives the final selling price.

You can add markups on the production cost of all the components like woodwork, accessories, hardware, appliances and worktops. Our platform will then compute the accurate profit margin that the markup results in.

The configuration applied to the sample component '2 shutter drawer until', will then be applied to all other components across the platform.
