SRDH-5D	SINGLE	1420	1230	40+	5	490	GEAR
SRDH-7D	SINGLE	1830	1722	45+	7	550	GEAR

SARDAR Rotary Disc Harrow is designed to help farmers prepare their fields quickly, efficiently, and with less effort before sowing. Powered by the tractor PTO, its high-performance rotating discs cut, loosen, and level the soil to create the ideal seedbed.

This advanced agricultural implement effectively breaks hard soil, uproots weeds, and mixes crop residues into the soil, improving soil fertility and moisture retention. It also enhances soil aeration, promoting stronger root development and healthier crop growth.

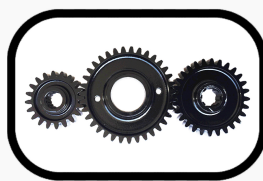

Built with a heavy-duty frame, premium-quality components, and precision engineering, the SARDAR Rotary Disc Harrow delivers reliable performance even in the toughest field conditions. Suitable for a wide range of soil types and crops, it is the perfect choice for modern farmers seeking higher productivity, reduced field preparation time, and long-lasting durability.
