McDiarmid Lake "Critical Minerals" Project

- Claims hosted within Marriott Township adjacent to the Quebec border
- ➤ West of the Cu-Au discoveries of Rouyn, Quebec
- Area is covered by mafic volcanics (massive and pillowed flows) intruded by late feldspar porphyrys
- ➤ At the Argonaut Gold Mine, the gold is associated with the chalcopyrite
- Chalcopyrite lenses (with possible gold association) on the eastern shore of McDiarmid Lake are associated with the feldspar porphyry dike
- Gold in Ben Nevis area are associated with quartz veins, porphyrys, syenites, and sulphides
