SERVING SAN DIEGO SINCE 1983

Your Trusted Partner for IT, Infrastructure & Security

Datel has been selling and supporting technology solutions to businesses, public agencies, and local government throughout San Diego County for over four decades. We deliver pre- and post-sales support, managed services, installation, design, and consulting — backed by a team of highly trained professionals dedicated to exceeding expectations.

As your single-source IT provider, Datel supplies, installs, maintains, and supports hardware and software solutions of all sizes — wired or wireless. Our Virtual IT Team monitors your critical network devices for availability, performance, security, and service-level compliance.

With an in-house, C-7 licensed low-voltage division, Datel **provides a single source** for both technology solutions and their underlying infrastructure. From fiber backbone installations and structured cabling for surveillance systems and network infrastructure, our teams work together to deliver faster implementation, consistent standards, and fewer coordination challenges throughout the project lifecycle.

Datel has deployed IP video camera systems for organizations including the **San Marcos Unified School District**, **North County Transit District**, **City of San Diego Lifeguards**, **Oceanside Unified School District**, and numerous schools across San Diego County. We support most IP and analog surveillance platforms and integrate them directly into your existing network infrastructure.
