## EXPERIENCE

### Project Management

Smartsheet Project Management Infrastructure development incorporating:

- Project Management Templates (e.g. Project Intake Sheet, Project Plans, Risks, Issues, Change Management, Budgets)
- Process Automation including automated Alerts, Reminders and Approval Requests
- Streamlined communications, work assignments and information management for Project Managers and Field Operations staff (Builders, Trades, Service, Sales)
- Resource Management
- Dashboards and Reports

## Other Business Solutions

- Course and student management system.
- Enquiry Management, Contract Management, Quality Assurance Testing, Transport Driver Compliance, Subscription Management, Sales Pipeline and Contact Management, Human Resource Management, Grant Reporting Compliance, Meeting Management.
- Information collection through web Forms for various use cases including Work Requests, Building Inspection Reports, Orders, Feedback, Skills Evaluation, Event Registration, Leave.
- Trade Work Assignments and Installation Work Orders

## HIGHLIGHTS

### APA Group (Energy Infrastructure)

Developed a new Procurement Project Management System. Improved Resource Management capabilities and Business Intelligence through Power BI Data Visualisation.

Developed and trained in the development of a new Project Management system for (gas pipeline) Capital Delivery Projects.

### Atlassian

Developed a Project Portfolio Management Solution for the Workplace Experience team.

Enabling streamlined international project management to deliver amazing Atlassian workplaces.

### Dja Dja Wurrung Clan Corporation - Djandak

Created a Project Management infrastructure based on the PMBOK methodology, with supporting MS Word templates and Smartsheet Project Templates, Reports and Dashboards. This improved Dja Dja Wurrung's capacity to effectively and professionally manage many natural resource management, landscaping and cultural heritage projects. Improved collaboration and reporting with other agencies and government departments.

### Anglicare SA

Developed a Project Management solution aligned to Anglicare's requirements for the entire organisation.

The solution encompassed project management templates, reports and dashboards. Dashboards at each level (project, department, entire organisation) highlight important data through reports, metrics and charts to promote visibility of key information and to streamline decision making.
