

PetScreen Investor & Automotive Partnership Overview

PetScreen is a patent-pending mesh window barrier designed to keep pets safe during vehicle travel. Engineered for convenience, airflow, and universal fit, it allows pets to enjoy fresh air without the risk of injury or escape.

This safety innovation solves a growing problem in pet-friendly households and opens the door for automotive manufacturers to integrate PetScreen as an optional or standard vehicle feature.

Key Features:

- Quick, tool-free installation
- Breathable mesh for optimal airflow
- Universal fit for most car models
- Customization potential for OEM partners
- Created by real pet lovers for everyday drivers

Why It Matters:

Each year, thousands of pets are injured or lost due to unsecured windows. PetScreen offers an effective, affordable solution that enhances your vehicle's safety and family-friendliness.

Automotive Integration Opportunity:

PetScreen is actively seeking partnerships with automotive brands such as Ford, Toyota, BMW, Mercedes-Benz, and General Motors to license or integrate the product into new vehicle designs as a built-in accessory or branded add-on.
