

The Abandoned House of Horrors at Keystone College

Written by Steve Skierski

Popular Lore:

The abandoned white house that once stood on campus was a popular site for recreational drug use, sex, and alleged occult rituals. Supposedly, cults and covens met there to hold sacrifices to the devil, but there's nothing close to evidence for this unsavoury activity.

It's alleged that while crews worked to clean up the charred ruins of the house, they uncovered one section of floor that had been untouched by the blaze. This area of floor was encased in a massive pentagram.

Personal Experience:

I was there when the white house burned to the ground in 2017. See figure above for photograph from the peak of the conflagration and below for what remains.
