

WHERE TO START?

Permanent Makeup is a skill that takes time to develop. Feel free to use my LEVEL suggestion pyramid, which I created to allow the smoothest transition from one technique to another.

Nano Brows

The most difficult technique for Advanced PMU Artists. Clean, sharp lines are difficult to create. On this level, we concentrate on slow and solid work, where your pressure must be perfect.

Lip Blush

Shading technique, but on vascular skin. An artist must be at an Intermediate/Advanced level to complete.

Hybrid Brows

Slow introduction to Nano Brows and repetition from Powderbrows.

Eyelash Enhancement

Fantastic way to learn machine control and lines.

Powderbrows

Technique where you will be taught different shading techniques, which will allow your further development as an Artist.

Theory+ PMU Machine Practice + Brow Mapping.

Fundamental knowledge of PMU pigment types and skin types. skin conditions, as well as getting to know the machine
