

Easily Customised

## Build it your way.

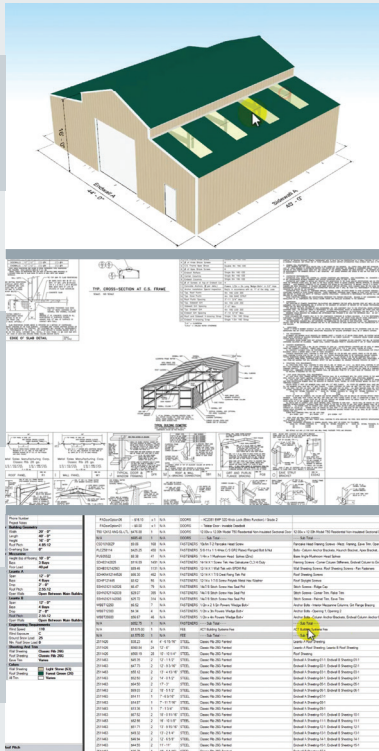

IMPACT cold-formed steel buildings offer alternatives and options that traditional construction methods simply do not offer.

If you prefer, you can be integrally involved in the design process from the foundation up. During the process you choose the size, the design, the color scheme and the metal roof and wall profiles used on your structure.

In short...you're in control. You'll see the bill of materials. Every panel. Every bolt. Every structural member.

There's never been a better, faster and more economical way to design and erect a custom building. Your custom building!

Let us show you how an IMPACT cold-formed steel building can impact your bottom line.

Within minutes, create a building concept to share with customers

Input information to generate construction drawings

IMPACT uses your input to generate a materials list - making ordering easy

## Why Cold-Formed Steel Buildings?

Cold-Formed steel building offer many advantages over traditional construction methods. Bolt-together construction...no welding. Highly fire resistant. Mold, insect and vermin resistant. Resistance to corrosion and quicker construction time. Let us move you into your structure faster and more economically.

- High strength-to-weight ratio
- Non-combustibility
- Termite resistant
- Ease of construction

## Applications and Uses.

- Barns
- RV and boat storage
- Garages
- Workshops
- Living quarters
- Utility buildings

Build **faster**

Build **better**

**IMPACT™**

Cold-Formed bolt-up steel building solutions.

- Non-combustible and insect resistant
- Fully engineered/stamped plans for local building codes
- No heavy crane required
- Clear span with no posts
- Lean-to attachments and/or interior partition walls
- Entry doors, garage doors, windows and other accessories
- Bolt and screw together assembly. No field welding required
- Spans from 12' to 80' clear or 120' posted by any length (Maximum width based on snow, wind and exposure)
- Multiple design options with a wide variety of profiles and colors from which to choose
