

Quiet Comfort Beneath Every Step.

Engineered for spaces that demand both durability and tranquility, AcoustiCore redefines what rigid core flooring can be. Built on a dense stone polymer composite core for unmatched stability, each plank's core is finished with a premium acoustic underlayment and a surface that's noticeably softer to the touch than standard SPC—bringing added comfort underfoot without compromising performance.

Ideal for busy households, offices, and multi-level buildings, AcoustiCore reduces both impact sound and surface echo, creating a calmer, more pleasant environment. Waterproof, scratch-resistant, and easy to install, this line blends resilient technology with a more forgiving, comfortable step.

### Product Specifications

Width-7"

Thickness-8.5mm with 1mm IXPE pad attached

Wear Layer-20mil

Length-60"

Sound Rating-IIC 74, STC 72

Unilin Licensed Click
