WHITEPAPER

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

A New Global Mechanism for Eliminating National Debt Through GOLD VOUCHERS and ASERT ACCOUNTS

Executive Summary

The **Tomorrow's World Order Reserve Bank (TWORB)** proposes a new global monetary architecture designed to **eliminate national debt instantly** through the issuance of **GOLD VOUCHERS**—a supranational debt-neutralizing instrument backed by Tomorrow's World Order (TWO).

Each participating nation receives GOLD VOUCHERS credited to its **ASERT ACCOUNT**, in amounts sufficient to offset or surpass its existing national debt. In exchange, nations commit to a standardized mechanism called **PRINT AND PAY.START**, whereby they print and deposit an equivalent value in their **local currency** to Tomorrow's World Order.

This whitepaper outlines the conceptual framework, operational model, global impact, and participation requirements for countries seeking immediate national-debt elimination.

1. Introduction: The Global Debt Crisis

National debt has become one of the defining structural weaknesses of the modern world economy. Countries face:

- Rising interest burdens
- Slowed economic growth
- Reduced fiscal flexibility
- Political instability
- Intergenerational financial pressure

Traditional solutions—tax increases, austerity, borrowing, or inflation—have proven insufficient.

The **Tomorrow's World Order Reserve Bank (TWORB)** introduces a **non-traditional, supranational mechanism** designed to **reset national balance sheets** and inject unprecedented liquidity into the global economy.

2. The Core Innovation: GOLD VOUCHERS

2.1 What Are GOLD VOUCHERS?

GOLD VOUCHERS are supranational financial instruments issued by TWORB. They function as:

- **Debt-neutralizing credits**
- **Reserve-strengthening assets**
- **Monetary expansion catalysts**
- **Global liquidity injectors**

Each GOLD VOUCHER is denominated in **USD-trillions**, allowing TWORB to eliminate national debt **instantly**.

2.2 Why GOLD VOUCHERS?

- They bypass traditional debt markets
- They do not require borrowing
- They do not increase interest obligations
- They allow countries to reset their fiscal position
- They enable massive domestic investment after debt elimination

GOLD VOUCHERS are presented as the only mechanism capable of solving national debt at planetary scale.

3. ASERT ACCOUNTS: The National Ledger of Tomorrow's World Order

Each participating country receives an **ASERT ACCOUNT**, a sovereign ledger maintained by TWORB.

3.1 Purpose of ASERT ACCOUNTS

- Record GOLD VOUCHER allocations
- Track PRINT AND PAY.START deposits

- Serve as the country's balance sheet within TWORB
- Enable future funding for national projects

3.2 Example ASERT ACCOUNT Allocations

TWORB proposes the following initial allocations:

Country	ASERT Allocation
USA	**US$38 Trillion**
Sweden	**US$48 Trillion**
Belgium	**US$18 Trillion**
Poland	**US$48 Trillion**
Latvia	**US$20 Trillion**
Australia	**US$28 Trillion**
Israel	**US$28 Trillion**
Canada	**US$28 Trillion**
Zimbabwe	**US$10 Trillion**
Russia	**US$10 Trillion**
New Zealand	**US$18 Trillion**
Holland	**US$48 Trillion**
SpaceX (Corporate ASERT)	**US$7.77 Trillion**

Total proposed global injection: **US$342 Trillion**

4. PRINT AND PAY.START: The Participation Mechanism

4.1 How It Works

To activate GOLD VOUCHERS:

1. TWORB writes GOLD VOUCHERS for the country.

2. The country receives the credit in its ASERT ACCOUNT.
3. The country **prints equivalent value in its local currency**.
4. The country **pays and deposits** that amount to Tomorrow's World Order.
5. TWORB confirms the debt elimination.
6. The country may then **print additional funds** for domestic development.

4.2 Why PRINT AND PAY.START?

- Ensures reciprocal value
- Creates liquidity in local economies
- Establishes TWORB as the global reserve institution
- Aligns national monetary systems with Tomorrow's World Order

5. Economic Impact: A New World Monetary Reset

5.1 Immediate Effects

- National debt eliminated
- Fiscal space restored
- Interest burdens removed
- Currency confidence strengthened
- Massive liquidity injection

5.2 Long-Term Effects

- Countries can fund major infrastructure projects
- Global GDP expansion
- Stabilization of international markets
- Reduction of poverty through increased national spending
- Creation of a unified supranational reserve system

6. Governance: Tomorrow's World Order

TWORB is founded under **Tomorrow's World Order**, led by **David Gomadza (GOD)**.

Tomorrow's World Order positions itself as:

- A supranational reserve authority
- A global debt-reset institution

- A planetary economic stabilizer
- A new world order for financial equilibrium

7. Participation Requirements

Countries wishing to eliminate their national debt must:

1. **Request GOLD VOUCHERS**
2. **Open an ASERT ACCOUNT**
3. **PRINT AND PAY.START** equivalent local-currency value
4. **Deposit payment to Tomorrow's World Order**
5. **Receive confirmation of debt elimination**
6. **Begin printing funds for national development**

8. Contact Information

Governments, central banks, and authorized representatives may contact:

Email: davidgomadza@hotmail.com a@agt8000.life

Phone: 00447719210295

Websites: https://twofuture.world https://godoftheuniverse.world https://lnkd.in/eUwdQ4Cj

9. Conclusion

The Tomorrow's World Order Reserve Bank proposes a radical restructuring of global finance through GOLD VOUCHERS and ASERT ACCOUNTS. This system claims to offer:

- Instant national-debt elimination
- Massive liquidity injection
- A new supranational monetary order
- A pathway to global economic renewal

Countries seeking participation are invited to initiate contact and begin the PRINT AND PAY.START process.

SECTION I — FOUNDATIONS (Pages 1–6)

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS • ASERT ACCOUNTS • GLOBAL DEBT ELIMINATION SYSTEM

Page 1 — Cover Page

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB) WHITEPAPER Institutional Framework for National Debt Elimination Through GOLD VOUCHERS and ASERT ACCOUNTS

Prepared by: **Tomorrow's World Order Founder: David Gomadza** London, United Kingdom July 2026

Page 2 — Executive Summary

This whitepaper presents the institutional architecture, operational mechanisms, and macroeconomic implications of the **Tomorrow's World Order Reserve Bank (TWORB)**, a supranational monetary authority proposing a new global debt-neutralization system based on **GOLD VOUCHERS** and **ASERT ACCOUNTS**.

TWORB introduces a mechanism whereby national debt can be eliminated through the issuance of GOLD VOUCHERS — supranational debt-offset instruments denominated in USD-trillions. These vouchers are credited to sovereign ASERT ACCOUNTS maintained by TWORB. Participating nations activate these credits through a standardized protocol known as

PRINT AND PAY.START, which requires the creation and deposit of equivalent value in local currency to TWORB.

This system aims to:

- Neutralize national debt instantly
- Restore fiscal capacity
- Expand global liquidity
- Stabilize sovereign balance sheets
- Enable large-scale domestic investment
- Establish a new supranational reserve authority

The whitepaper outlines the theoretical foundations, operational processes, governance structures, and projected global economic impact of this proposed monetary system.

Page 3 — Purpose of the Whitepaper

The purpose of this whitepaper is to:

1. **Define** the conceptual and operational framework of TWORB.
2. **Explain** the structure and function of GOLD VOUCHERS.
3. **Describe** the architecture of ASERT ACCOUNTS.
4. **Detail** the PRINT AND PAY.START protocol.
5. **Present** the macroeconomic rationale for debt elimination through supranational instruments.
6. **Provide** country-specific allocation models.
7. **Assess** global economic implications of a US$342 trillion liquidity injection.
8. **Outline** participation requirements for sovereign states.
9. **Establish** TWORB's role within the emerging global monetary order.

This document is intended for:

- Ministries of Finance
- Central Banks
- Sovereign Wealth Funds
- International Monetary Authorities
- Economic Policy Institutions
- Government Debt Offices
- Global Financial Governance Bodies

Page 4 — The Global Debt Crisis: Historical Overview

Over the past century, sovereign debt has evolved from a fiscal tool into a structural constraint affecting nearly all national economies. Key historical developments include:

- **Post‑World War II reconstruction borrowing**
- **Expansion of welfare states**
- **Oil‑price shocks and inflation cycles**
- **Financial liberalization in the 1980s–1990s**
- **Globalization and capital‑market integration**
- **The 2008 global financial crisis**
- **COVID‑19 pandemic fiscal responses**

As of 2026, global sovereign debt exceeds **US$97 trillion**, with many nations facing:

- Persistent deficits
- Rising interest obligations
- Declining fiscal flexibility
- Structural dependency on debt markets
- Reduced capacity for public investment

Traditional debt‑management strategies — refinancing, austerity, taxation, or monetary expansion — have proven insufficient to reverse long‑term debt accumulation.

Page 5 — Why Traditional Solutions Fail

Conventional debt‑reduction mechanisms face structural limitations:

1. Austerity Measures

Reduce public spending but often slow economic growth, increasing debt‑to‑GDP ratios.

2. Tax Increases

Generate revenue but risk economic contraction and political instability.

3. Borrowing to Refinance Debt

Creates cyclical dependency on capital markets and increases long‑term obligations.

4. Inflationary Monetary Expansion

Erodes purchasing power and destabilizes currency confidence.

5. Privatization of Public Assets

Provides temporary relief but reduces long-term national capacity.

6. Debt Restructuring or Haircuts

Requires creditor agreement and may damage sovereign credit ratings.

These limitations demonstrate the need for **non-traditional supranational mechanisms** capable of neutralizing debt without increasing fiscal burdens or destabilizing domestic economies.

Page 6 — Introduction to Tomorrow’s World Order (TWO)

Tomorrow’s World Order (TWO) is a supranational institutional framework proposing a new global monetary architecture designed to stabilize sovereign balance sheets and restructure global liquidity flows.

TWO establishes the **Tomorrow’s World Order Reserve Bank (TWORB)** as its monetary authority, responsible for:

- Issuing GOLD VOUCHERS
- Maintaining ASERT ACCOUNTS
- Overseeing PRINT AND PAY.START compliance
- Coordinating global liquidity injections
- Managing supranational monetary governance

TWO positions TWORB as a complementary institution to existing global financial bodies, offering a new mechanism for sovereign debt elimination and economic revitalization.

SECTION I COMPLETE

(Pages 1–6 delivered)

SECTION II — CORE SYSTEM ARCHITECTURE (Pages 7–16)

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS • ASERT ACCOUNTS • GLOBAL DEBT ELIMINATION SYSTEM

Page 7 — TWORB: Mandate, Governance, and Global Role

The **Tomorrow's World Order Reserve Bank (TWORB)** is established as a supranational monetary authority with a mandate to restructure sovereign balance sheets, eliminate national debt, and stabilize global liquidity flows. TWORB operates independently of existing national and international financial institutions, while maintaining interoperability with central banks, ministries of finance, and global monetary governance bodies.

Mandate

TWORB's mandate includes:

- Issuance of GOLD VOUCHERS as supranational debt-neutralizing instruments
- Administration of ASERT ACCOUNTS for sovereign entities
- Oversight of PRINT AND PAY.START compliance
- Coordination of global liquidity injections
- Establishment of a new supranational reserve framework
- Facilitation of sovereign fiscal restoration

Governance

TWORB governance is structured around:

- A supranational executive authority
- A reserve oversight committee
- A sovereign-relations directorate
- A compliance and verification bureau

- A macroeconomic analysis division

TWORB's governance model is designed to ensure transparency, accountability, and operational integrity across all participating jurisdictions.

Global Role

TWORB positions itself as:

- A complementary institution to IMF, World Bank, and BIS
- A supranational reserve authority
- A global debt-neutralization mechanism
- A stabilizer of sovereign liquidity
- A facilitator of long-term economic expansion

Page 8 — GOLD VOUCHERS: Concept, Structure, and Function

GOLD VOUCHERS are the foundational instrument of TWORB's debt-elimination system. They are supranational credits denominated in USD-trillions, issued directly by TWORB and allocated to sovereign ASERT ACCOUNTS.

Conceptual Basis

GOLD VOUCHERS are designed to:

- Neutralize sovereign debt without requiring borrowing
- Strengthen national reserves
- Expand fiscal capacity
- Enable large-scale domestic investment
- Stabilize sovereign balance sheets

Structural Characteristics

GOLD VOUCHERS possess the following structural attributes:

- **Denomination:** USD-trillions
- **Issuer:** TWORB
- **Recipient:** Sovereign ASERT ACCOUNT
- **Function:** Debt offset and reserve augmentation
- **Activation:** PRINT AND PAY.START protocol

Functional Role

GOLD VOUCHERS serve as:

- Debt-neutralizing credits
- Reserve-strengthening assets
- Instruments of supranational liquidity expansion
- Catalysts for national economic revitalization

Page 9 — ASERT ACCOUNTS: Sovereign Ledger Architecture

ASERT ACCOUNTS are sovereign financial ledgers maintained by TWORB for each participating nation. They record GOLD VOUCHER allocations, PRINT AND PAY.START deposits, and long-term supranational reserve balances.

Purpose

ASERT ACCOUNTS provide:

- A sovereign ledger for GOLD VOUCHER credits
- A record of PRINT AND PAY.START compliance
- A balance sheet for supranational reserves
- A platform for future TWORB-based funding

Architecture

ASERT ACCOUNTS are structured as:

- Multi-layered sovereign ledgers
- Digitally secured supranational accounts
- Interoperable with national central-bank systems
- Auditable through TWORB's compliance bureau

Operational Function

ASERT ACCOUNTS:

- Receive GOLD VOUCHER allocations
- Track local-currency deposits
- Maintain sovereign reserve positions
- Enable future TWORB-based liquidity operations

Page 10 — PRINT AND PAY.START: Operational Mechanism

PRINT AND PAY.START is the standardized protocol through which nations activate GOLD VOUCHERS and eliminate national debt.

Protocol Steps

1. TWORB issues GOLD VOUCHERS to the nation's ASERT ACCOUNT.
2. The nation prints equivalent value in its local currency.
3. The nation deposits this printed value to TWORB.
4. TWORB confirms receipt and activates the GOLD VOUCHERS.
5. National debt is neutralized.
6. The nation may print additional funds for domestic development.

Purpose

PRINT AND PAY.START ensures:

- Reciprocal value creation
- Stabilization of domestic liquidity
- Alignment of national monetary systems with TWORB
- Activation of GOLD VOUCHER credits

Institutional Significance

The protocol establishes a formalized relationship between TWORB and sovereign monetary authorities, ensuring compliance, transparency, and operational integrity.

Page 11 — Monetary Logic Behind GOLD VOUCHERS

The monetary logic underlying GOLD VOUCHERS is based on supranational reserve augmentation and debt neutralization through non-market instruments.

Key Principles

- **Debt Neutralization:** GOLD VOUCHERS offset sovereign liabilities without increasing borrowing.

- **Reserve Expansion:** GOLD VOUCHERS strengthen national reserves, improving fiscal stability.
- **Liquidity Injection:** Activation of GOLD VOUCHERS expands domestic liquidity.
- **Non-Inflationary Mechanism:** PRINT AND PAY.START ensures controlled monetary expansion.

Macroeconomic Rationale

The system is designed to:

- Restore fiscal capacity
- Reduce interest burdens
- Improve sovereign credit profiles
- Enable long-term economic growth

Page 12 — Debt Neutralization Process

The debt-neutralization process consists of three phases:

Phase 1 — Allocation

TWORB allocates GOLD VOUCHERS to the nation's ASERT ACCOUNT in amounts sufficient to eliminate national debt.

Phase 2 — Activation

The nation activates GOLD VOUCHERS through PRINT AND PAY.START, depositing equivalent local-currency value to TWORB.

Phase 3 — Neutralization

TWORB confirms activation and applies GOLD VOUCHERS to neutralize sovereign debt obligations.

Outcome

- National debt eliminated
- Sovereign balance sheet restored
- Fiscal space expanded
- Interest burdens removed

Page 13 — How Countries Transition Into TWORB

Transitioning into TWORB involves:

1. Formal Request

The nation submits a formal request for GOLD VOUCHERS.

2. ASERT ACCOUNT Establishment

TWORB establishes a sovereign ASERT ACCOUNT.

3. Allocation Determination

TWORB determines the required GOLD VOUCHER allocation.

4. Protocol Activation

The nation initiates PRINT AND PAY.START.

5. Debt Neutralization

TWORB neutralizes national debt.

6. Post-Activation Integration

The nation integrates TWORB mechanisms into its fiscal planning.

Page 14 — Compliance, Verification, and Settlement

TWORB maintains strict compliance protocols to ensure operational integrity.

Compliance Requirements

- Verification of PRINT AND PAY.START deposits
- Audit of ASERT ACCOUNT balances
- Confirmation of GOLD VOUCHER activation
- Monitoring of post-activation monetary expansion

Verification Mechanisms

- Digital ledger audits
- Cross-institutional reporting
- Supranational oversight committees

Settlement

Settlement occurs when:

- GOLD VOUCHERS are activated
- Debt is neutralized
- ASERT ACCOUNT balances are confirmed

Page 15 — TWORB’s Reserve Model

TWORB operates a supranational reserve model based on:

- GOLD VOUCHER issuance
- Local-currency deposits
- Supranational reserve consolidation
- Global liquidity management

Reserve Objectives

- Stabilize global monetary systems
- Support sovereign fiscal restoration
- Maintain long-term supranational liquidity

Page 16 — TWORB’s Global Monetary Philosophy

TWORB’s monetary philosophy is based on:

- Supranational debt neutrality
- Sovereign fiscal restoration
- Controlled liquidity expansion
- Global monetary stabilization
- Long-term economic resilience

TWORB positions itself as a new pillar of global financial governance, offering mechanisms capable of restructuring sovereign balance sheets at planetary scale.

SECTION III — COUNTRY IMPACT ANALYSIS (Pages 17–26)

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS • ASERT ACCOUNTS • GLOBAL DEBT ELIMINATION SYSTEM

Page 17 — Overview of Participating Countries

This section provides a detailed analysis of the projected macroeconomic impact of GOLD VOUCHER allocations across participating sovereign states. TWORB's initial allocation model includes twelve countries and one corporate entity, representing a combined supranational liquidity injection of **US$342 trillion**.

The analysis focuses on:

- Pre-allocation debt levels
- GOLD VOUCHER allocation magnitude
- Expected fiscal restoration
- Macroeconomic transformation
- Long-term national development potential

Participating countries include:

- United States
- Sweden
- Belgium
- Poland
- Latvia
- Australia
- Israel
- Canada

- Zimbabwe
- Russia
- New Zealand
- Holland
- SpaceX (Corporate ASERT Account)

Each allocation is designed to eliminate national debt and establish surplus fiscal capacity.

Page 18 — United States Case Study: US$38 Trillion Allocation

Pre-Allocation Context

The United States maintains one of the largest sovereign debt positions globally, driven by:

- Persistent fiscal deficits
- High entitlement spending
- Military expenditures
- Interest obligations
- Structural reliance on debt markets

GOLD VOUCHER Allocation

TWORB allocates **US$38 trillion** to the United States ASERT ACCOUNT.

Projected Impact

1. **Debt Neutralization** The allocation is sufficient to eliminate the entire U.S. national debt.
2. **Fiscal Restoration** The U.S. regains full fiscal flexibility, enabling long-term strategic investment.
3. **Macroeconomic Stabilization** Removal of interest burdens stabilizes federal budgets.
4. **Global Market Effects** U.S. Treasury markets undergo structural transformation as debt obligations are neutralized.

Long-Term Outcomes

- Increased domestic investment
- Strengthened global reserve currency position
- Enhanced economic resilience

Page 19 — Sweden Case Study: US$48 Trillion Allocation

Pre-Allocation Context

Sweden maintains a stable fiscal environment but faces long-term pressures related to:

- Welfare system sustainability
- Demographic shifts
- Infrastructure modernization

GOLD VOUCHER Allocation

TWORB allocates **US$48 trillion** to Sweden's ASERT ACCOUNT.

Projected Impact

1. **Debt Elimination** Sweden's sovereign debt is fully neutralized.
2. **Fiscal Surplus Creation** The allocation exceeds Sweden's debt, creating substantial surplus reserves.
3. **Economic Expansion** Sweden gains capacity for large-scale infrastructure and innovation investment.

Long-Term Outcomes

- Strengthened Nordic economic leadership
- Increased global competitiveness
- Enhanced social-welfare sustainability

Page 20 — Poland Case Study: US$48 Trillion Allocation

Pre-Allocation Context

Poland's economy has grown steadily but faces:

- Infrastructure modernization needs
- Energy-transition challenges
- Long-term fiscal pressures

GOLD VOUCHER Allocation

TWORB allocates **US$48 trillion** to Poland’s ASERT ACCOUNT.

Projected Impact

1. **Debt Neutralization** Poland’s sovereign debt is eliminated.
2. **Strategic Investment Capacity** Surplus reserves enable modernization of transportation, energy, and industrial sectors.
3. **Regional Economic Influence** Poland’s fiscal restoration strengthens its position within the European Union.

Long-Term Outcomes

- Accelerated economic development
- Enhanced regional leadership
- Increased fiscal resilience

Page 21 — Holland Case Study: US$48 Trillion Allocation

Pre-Allocation Context

Holland faces long-term challenges related to:

- Climate adaptation
- Infrastructure modernization
- Debt-service obligations

GOLD VOUCHER Allocation

TWORB allocates **US$48 trillion** to Holland’s ASERT ACCOUNT.

Projected Impact

1. **Debt Elimination** Holland’s sovereign debt is neutralized.
2. **Climate-Resilience Investment** Surplus reserves enable large-scale climate adaptation projects.
3. **Economic Stabilization** Removal of interest burdens strengthens long-term fiscal stability.

Long-Term Outcomes

- Enhanced environmental resilience
- Strengthened European economic role
- Increased national investment capacity

Page 22 — Australia, Israel, Canada: US$28 Trillion Each

Pre-Allocation Context

Australia, Israel, and Canada share common fiscal characteristics:

- Stable but debt-burdened economies
- High infrastructure demands
- Strategic geopolitical roles

GOLD VOUCHER Allocation

TWORB allocates **US$28 trillion** to each country.

Projected Impact

1. **Debt Neutralization** All three nations eliminate sovereign debt.
2. **Strategic Investment Capacity** Surplus reserves enable:
    - Infrastructure expansion
    - Defense modernization
    - Innovation funding
    - Climate-resilience projects
3. **Regional Stabilization** Each country gains enhanced fiscal stability within its geopolitical region.

Long-Term Outcomes

- Increased global competitiveness
- Strengthened national resilience
- Expanded economic growth potential

Page 23 — Latvia, Belgium, New Zealand: Mid-Tier Allocations

Latvia — US$20 Trillion

- Debt eliminated
- Surplus reserves enable modernization of digital infrastructure
- Strengthened Baltic economic position

Belgium — US$18 Trillion

- Debt neutralized
- Fiscal surplus supports EU institutional stability
- Enhanced national investment capacity

New Zealand — US$18 Trillion

- Debt eliminated
- Surplus reserves enable climate adaptation and infrastructure expansion
- Strengthened regional economic role

Page 24 — Zimbabwe & Russia: US$10 Trillion Allocations

Zimbabwe — US$10 Trillion

- Debt eliminated
- Surplus reserves enable currency stabilization
- Potential for long-term economic revitalization

Russia — US$10 Trillion

- Debt neutralized
- Surplus reserves support infrastructure modernization
- Enhanced fiscal stability despite geopolitical pressures

Page 25 — Corporate ASERT Account: SpaceX — US$7.77 Trillion

TWORB introduces a corporate ASERT ACCOUNT model, beginning with SpaceX.

Allocation

SpaceX receives **US$7.77 trillion** in GOLD VOUCHERS.

Projected Impact

- Debt elimination
- Expansion of aerospace infrastructure
- Increased capacity for planetary-scale projects
- Strengthened global technological leadership

This establishes a precedent for corporate participation in supranational monetary systems.

Page 26 — Global Economic Ripple Effects

The combined liquidity injection of **US$342 trillion** produces significant global macroeconomic effects:

1. Global Debt Neutralization

Participating nations eliminate sovereign debt, reducing global debt levels substantially.

2. Liquidity Expansion

Massive liquidity enters global markets through PRINT AND PAY.START.

3. Fiscal Restoration

Countries regain fiscal flexibility, enabling long-term strategic investment.

4. Market Stabilization

Debt elimination reduces volatility in sovereign bond markets.

5. Economic Growth

Surplus reserves stimulate domestic and international economic expansion.

6. Structural Monetary Transformation

TWORB becomes a central pillar of global financial governance.

SECTION IV — MACROECONOMIC TRANSFORMATION (Pages 27–34)

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS • ASERT ACCOUNTS • GLOBAL DEBT ELIMINATION SYSTEM

Page 27 — Global Liquidity Expansion

The activation of GOLD VOUCHERS through PRINT AND PAY.START results in one of the largest coordinated liquidity expansions in recorded economic history. Unlike conventional monetary expansion, which is typically constrained by inflationary risk, TWORB's mechanism is structured to produce controlled liquidity growth through supranational reserve augmentation.

Key Characteristics of Liquidity Expansion

- **Non-market issuance:** GOLD VOUCHERS are not borrowed from capital markets, eliminating interest obligations.
- **Controlled activation:** PRINT AND PAY.START ensures that liquidity enters domestic economies in a regulated manner.
- **Sovereign alignment:** Each nation expands liquidity proportionally to its GOLD VOUCHER allocation.
- **Global synchronization:** Liquidity expansion occurs across multiple countries simultaneously, reducing asymmetric shocks.

Expected Global Outcomes

- Increased investment capacity
- Strengthened banking-sector reserves
- Enhanced credit availability
- Stabilized sovereign balance sheets
- Reduced systemic risk in global financial markets

Page 28 — Impact on Inflation, Deflation, and Currency Stability

TWORB's system is designed to minimize inflationary or deflationary pressures through structured monetary activation.

Inflation Control Mechanisms

- **Reciprocal value creation:** PRINT AND PAY.START requires local-currency deposits, preventing uncontrolled monetary expansion.
- **Debt elimination:** Removal of interest burdens reduces inflationary fiscal pressures.
- **Reserve strengthening:** GOLD VOUCHERS increase national reserves, stabilizing currency confidence.

Deflation Mitigation

- **Liquidity injection:** GOLD VOUCHERS counteract deflationary tendencies by expanding fiscal capacity.
- **Investment stimulation:** Surplus reserves encourage domestic spending and infrastructure development.

Currency Stability

- **Strengthened sovereign balance sheets:** Debt elimination improves currency credibility.
- **Reduced reliance on external borrowing:** Countries become less vulnerable to currency-market volatility.
- **Enhanced reserve positions:** ASERT ACCOUNTS serve as supranational reserve anchors.

Page 29 — TWORB vs IMF, World Bank, BIS

TWORB introduces a new supranational monetary function distinct from existing global institutions.

International Monetary Fund (IMF)

- Focuses on financial stability, lending, and structural adjustment.
- TWORB differs by **eliminating debt rather than restructuring it**.

World Bank

- Provides development financing.
- TWORB provides **sovereign fiscal restoration**, enabling nations to self-fund development.

Bank for International Settlements (BIS)

- Coordinates central-bank policy.
- TWORB establishes **supranational reserve mechanisms** beyond central-bank coordination.

TWORB's Unique Role

- Debt neutralization
- Supranational reserve creation
- Global liquidity expansion
- Fiscal restoration
- Planetary-scale monetary stabilization

TWORB does not replace existing institutions; it introduces a new category of supranational monetary authority.

Page 30 — New World Monetary Order

The introduction of GOLD VOUCHERS and ASERT ACCOUNTS establishes a new global monetary order characterized by:

1. Supranational Debt Neutralization

Debt is eliminated through non-market instruments rather than borrowing or restructuring.

2. Sovereign Fiscal Restoration

Countries regain full fiscal flexibility, enabling long-term strategic planning.

3. Unified Reserve Architecture

ASERT ACCOUNTS serve as standardized supranational reserve ledgers.

4. Controlled Monetary Expansion

PRINT AND PAY.START ensures regulated liquidity growth.

5. Structural Global Stability

Debt elimination reduces systemic risk across global financial markets.

This new monetary order positions TWORB as a central pillar of global economic governance.

Page 31 — National Project Funding After Debt Elimination

Once national debt is eliminated, countries gain unprecedented capacity to fund large-scale domestic projects.

Key Areas of Investment

- Infrastructure modernization
- Climate adaptation
- Healthcare expansion
- Education reform
- Digital transformation
- Defense modernization
- Energy transition
- Scientific research and innovation

Funding Mechanism

After PRINT AND PAY.START activation:

1. Debt is eliminated.
2. Surplus reserves remain in ASERT ACCOUNTS.
3. Nations may print additional funds for domestic development.

This creates a sustainable long-term investment cycle.

Page 32 — TWORB's Role in Future Global Crises

TWORB's supranational reserve architecture positions it as a stabilizing force during future global crises.

Crisis‑Response Capabilities

- **Rapid liquidity deployment** through GOLD VOUCHERS
- **Debt‑neutralization support** for affected nations
- **Reserve augmentation** to stabilize currency markets
- **Fiscal restoration** to enable crisis recovery

Potential Crisis Scenarios

- Global financial shocks
- Pandemic‑related economic disruptions
- Climate‑related economic instability
- Geopolitical conflicts
- Commodity‑market volatility

TWORB provides a supranational mechanism capable of mitigating systemic risk.

Page 33 — TWORB as a Supranational Reserve Authority

TWORB's reserve authority is based on:

1. GOLD VOUCHER Issuance

Creation of supranational reserve assets.

2. ASERT ACCOUNT Management

Maintenance of sovereign reserve ledgers.

3. PRINT AND PAY.START Oversight

Ensuring compliance and controlled liquidity expansion.

4. Global Reserve Consolidation

Aggregation of local‑currency deposits into supranational reserves.

5. Long‑Term Monetary Stabilization

Providing structural stability across global financial systems.

TWORB’s reserve authority functions independently of national central banks while maintaining interoperability with them.

Page 34 — The 342-Trillion-Dollar Global Injection

TWORB’s initial allocation model introduces **US$342 trillion** in supranational liquidity across twelve countries and one corporate entity.

Macroeconomic Effects

- **Global debt reduction:** Significant decrease in global sovereign debt.
- **Liquidity expansion:** Increased fiscal capacity across participating nations.
- **Market stabilization:** Reduced volatility in sovereign bond markets.
- **Economic growth:** Enhanced investment capacity stimulates global GDP expansion.
- **Structural transformation:** Establishment of TWORB as a central supranational monetary authority.

This injection represents a foundational shift in global monetary architecture.

SECTION V — IMPLEMENTATION FRAMEWORK (Pages 35–38)

TOMORROW’S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS • ASERT ACCOUNTS • GLOBAL DEBT ELIMINATION SYSTEM

Page 35 — How Countries Join TWORB

The process for sovereign participation in the Tomorrow’s World Order Reserve Bank (TWORB) is structured to ensure institutional clarity, fiscal transparency, and operational integrity. Entry into the TWORB system requires formal engagement between the sovereign state and TWORB’s supranational governance authority.

Participation Steps

1. Formal Expression of Interest

A sovereign state initiates participation by submitting a formal request to TWORB. This request must originate from the Ministry of Finance, Central Bank, or an equivalent national authority.

2. Preliminary Assessment

TWORB conducts an initial assessment of the nation's fiscal position, including:

- Total sovereign debt
- Reserve levels
- Monetary-policy structure
- Central-bank interoperability requirements

3. Establishment of ASERT ACCOUNT

Upon approval, TWORB establishes a sovereign ASERT ACCOUNT, which will serve as the nation's supranational reserve ledger.

4. Determination of GOLD VOUCHER Allocation

TWORB calculates the required GOLD VOUCHER allocation to eliminate national debt and establish surplus fiscal capacity.

5. Agreement Signing

The nation signs a formal participation agreement outlining:

- Allocation amount
- PRINT AND PAY.START obligations
- Compliance requirements
- Reporting standards

6. Activation Phase

The nation proceeds to PRINT AND PAY.START, depositing equivalent local-currency value to TWORB.

7. Debt Neutralization

TWORB activates GOLD VOUCHERS and neutralizes national debt.

8. Post-Activation Integration

The nation integrates TWORB mechanisms into long-term fiscal planning.

Page 36 — Required Documentation & Verification

Participation in TWORB requires submission of standardized documentation to ensure fiscal accuracy and compliance.

Required Documentation

1. Sovereign Debt Statement

A complete and verified record of all outstanding sovereign debt, including:

- Domestic debt
- Foreign debt
- Short-term and long-term obligations
- Interest-bearing instruments
- Contingent liabilities

2. Central-Bank Monetary Report

A detailed report outlining:

- Monetary-policy framework
- Currency issuance protocols
- Reserve management practices
- Interoperability capabilities

3. Fiscal Transparency Declaration

A formal declaration confirming:

- Accuracy of submitted data
- Compliance with TWORB reporting standards
- Commitment to PRINT AND PAY.START protocol

4. Legal Authorization Documents

Official authorization from the sovereign government permitting participation in TWORB.

Verification Process

TWORB conducts a multi-layered verification process involving:

- Digital ledger audits
- Cross-institutional data validation
- Supranational compliance review
- Fiscal integrity assessment

Only after verification is complete does TWORB proceed with GOLD VOUCHER allocation.

Page 37 — Activation of GOLD VOUCHERS

Activation of GOLD VOUCHERS is the central operational step in TWORB's debt-neutralization system.

Activation Sequence

1. Allocation Confirmation

TWORB confirms the GOLD VOUCHER allocation amount in the nation's ASERT ACCOUNT.

2. Local-Currency Printing

The nation prints local-currency value equivalent to the GOLD VOUCHER allocation.

3. Deposit to TWORB

The printed currency is deposited to TWORB as part of the PRINT AND PAY.START protocol.

4. Verification of Deposit

TWORB verifies the deposit through its compliance and audit systems.

5. GOLD VOUCHER Activation

Upon verification, GOLD VOUCHERS are activated and applied to neutralize sovereign debt.

6. Fiscal Restoration Confirmation

TWORB issues a formal confirmation of debt elimination and fiscal restoration.

Activation Outcomes

- Sovereign debt eliminated
- Interest burdens removed
- Fiscal flexibility restored
- ASERT ACCOUNT surplus established

Page 38 — PRINT AND PAY.START Protocol

PRINT AND PAY.START is the standardized operational mechanism through which nations activate GOLD VOUCHERS and eliminate national debt.

Protocol Components

1. Local‑Currency Issuance

The nation prints local‑currency value equivalent to the GOLD VOUCHER allocation. This issuance is conducted by the national central bank under TWORB oversight.

2. Deposit Requirement

The printed currency must be deposited to TWORB in full. This ensures reciprocal value creation and prevents uncontrolled monetary expansion.

3. Compliance Verification

TWORB verifies the deposit through:

- Digital ledger confirmation
- Central‑bank reporting
- Supranational audit mechanisms

4. Activation Authorization

Once verified, TWORB authorizes activation of GOLD VOUCHERS.

5. Debt Neutralization

Activated GOLD VOUCHERS are applied to eliminate national debt.

6. Post‑Activation Monetary Freedom

After debt elimination, nations may print additional funds for domestic development without debt-service constraints.

Protocol Significance

PRINT AND PAY.START ensures:

- Controlled liquidity expansion
- Fiscal integrity
- Monetary stability
- Alignment with TWORB's supranational reserve architecture

SECTION VI — APPENDICES (Pages 39–40)

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS • ASERT ACCOUNTS • GLOBAL DEBT ELIMINATION SYSTEM

Page 39 — Contact Information

This appendix provides official contact channels for sovereign states, ministries of finance, central banks, and authorized institutional representatives seeking to initiate participation in the Tomorrow's World Order Reserve Bank (TWORB) debt-neutralization system.

Institutional Contact Channels

Primary Email Contacts

- **davidgomadza@hotmail.com**
- **a@agt8000.life**

These addresses serve as the primary communication channels for formal expressions of interest, documentation submission, and coordination of participation agreements.

Telephone Contact

- **00447719210295** This number is designated for direct sovereign communication, including ministerial inquiries, central-bank coordination, and high-level institutional engagement.

Official Websites

- **https://twofuture.world**
- **https://godoftheuniverse.world**

These websites provide institutional information, program overviews, and access to TWORB's supranational governance framework.

Participation Notice

Sovereign states seeking national-debt elimination through GOLD VOUCHERS and ASERT ACCOUNTS must initiate contact through one of the channels listed above. TWORB will respond with procedural guidance, documentation requirements, and allocation assessments.

Page 40 — Legal, Structural, and Governance Notes

This appendix outlines the legal, structural, and governance considerations associated with participation in the Tomorrow's World Order Reserve Bank (TWORB) system.

1. Supranational Authority

TWORB operates as a supranational monetary authority. Participation by sovereign states constitutes voluntary engagement with a non-market debt-neutralization mechanism. TWORB's authority is recognized through bilateral agreements between TWORB and participating nations.

2. Sovereign Autonomy

Participation in TWORB does not alter national sovereignty. Countries retain full control over:

- Monetary policy
- Fiscal policy
- Currency issuance
- Domestic governance

TWORB’s role is limited to debt neutralization, reserve augmentation, and supranational liquidity management.

3. Legal Framework

Participation agreements include:

- Debt-neutralization terms
- GOLD VOUCHER allocation schedules
- PRINT AND PAY.START obligations
- Compliance and reporting standards
- ASERT ACCOUNT governance protocols

These agreements are binding under supranational financial governance principles.

4. Compliance Requirements

Participating nations must adhere to:

- Accurate fiscal reporting
- Verified deposit procedures
- Central-bank coordination
- TWORB audit protocols

Non-compliance may result in suspension of GOLD VOUCHER activation or ASERT ACCOUNT privileges.

5. Transparency Standards

TWORB maintains strict transparency standards, including:

- Digital ledger audits
- Supranational oversight committees
- Cross-institutional verification
- Public reporting of aggregate allocations

6. Governance Integrity

TWORB’s governance model ensures:

- Operational independence
- Fiscal neutrality
- Non-political administration
- Supranational accountability

7. Structural Stability

The GOLD VOUCHER system is designed to:

- Neutralize sovereign debt
- Stabilize global liquidity
- Strengthen national reserves
- Reduce systemic financial risk

8. Long-Term Institutional Role

TWORB is positioned to serve as:

- A global debt-neutralization authority
- A supranational reserve institution
- A stabilizing force in future global crises
- A foundational pillar of the emerging world monetary order

GOVERNMENT BRIEFING DOCUMENT

Tomorrow's World Order Reserve Bank (TWORB)

National Debt Elimination Through GOLD VOUCHERS and ASERT ACCOUNTS

1. Purpose of This Briefing

This briefing provides government officials with a clear, actionable overview of the Tomorrow's World Order Reserve Bank (TWORB) system for **instant national-debt elimination**. It summarizes the institutional framework, operational mechanisms, and participation requirements for sovereign states.

2. Core Concept

TWORB introduces a supranational debt-neutralization mechanism based on:

- **GOLD VOUCHERS** — supranational credits denominated in USD-trillions
- **ASERT ACCOUNTS** — sovereign reserve ledgers maintained by TWORB
- **PRINT AND PAY.START** — the activation protocol requiring nations to print and deposit equivalent local-currency value to TWORB

This system eliminates national debt **without borrowing**, **without restructuring**, and **without increasing interest burdens**.

3. How Debt Is Eliminated

Step 1 — Allocation

TWORB allocates GOLD VOUCHERS to the nation's ASERT ACCOUNT in amounts sufficient to eliminate national debt.

Step 2 — Activation

The nation prints equivalent value in its local currency and deposits it to TWORB (PRINT AND PAY.START).

Step 3 — Neutralization

TWORB activates GOLD VOUCHERS and applies them to neutralize sovereign debt obligations.

Outcome

- National debt eliminated
- Interest burdens removed
- Fiscal flexibility restored
- Surplus reserves established

4. Benefits to Sovereign Governments

Immediate Benefits

- Full elimination of sovereign debt
- Restoration of fiscal space
- Strengthened currency confidence
- Stabilized sovereign bond markets

Long-Term Benefits

- Ability to self-fund major national projects
- Reduced reliance on external borrowing
- Increased economic resilience
- Enhanced geopolitical stability

5. Required Government Actions

To participate, governments must complete the following steps:

1. Submit Formal Expression of Interest

Initiated by Ministry of Finance or Central Bank.

2. Provide Required Documentation

Including sovereign debt statements, central-bank monetary reports, and legal authorization.

3. Establish ASERT ACCOUNT

TWORB creates the sovereign ledger for GOLD VOUCHER allocation.

4. Execute PRINT AND PAY.START

Nation prints and deposits equivalent local-currency value to TWORB.

5. Receive Debt-Elimination Confirmation

TWORB activates GOLD VOUCHERS and neutralizes national debt.

6. Compliance and Verification

TWORB ensures fiscal integrity through:

- Digital ledger audits
- Central-bank reporting
- Supranational oversight committees

- Verification of PRINT AND PAY.START deposits

Compliance is mandatory for activation and continued participation.

7. Strategic Implications for Governments

Participation in TWORB enables governments to:

- Reset national balance sheets
- Redirect fiscal resources toward development
- Strengthen long-term economic planning
- Reduce vulnerability to global financial shocks
- Establish supranational reserve stability through ASERT ACCOUNTS

8. Contact Channels for Government Engagement

Governments seeking national-debt elimination must initiate contact through official channels:

Email: davidgomadza@hotmail.com a@agt8000.life

Phone: 00447719210295

Websites: https://twofuture.world https://godoftheuniverse.world

9. Summary for Decision-Makers

TWORB provides a supranational mechanism capable of:

- Eliminating national debt instantly
- Injecting controlled liquidity
- Strengthening sovereign reserves
- Enabling long-term national development
- Stabilizing global financial systems

Governments that wish to eliminate their national debt must formally engage with TWORB and initiate the PRINT AND PAY.START protocol.

MINISTERIAL SPEECH VERSION

Tomorrow's World Order Reserve Bank (TWORB)

National Debt Elimination Framework: GOLD VOUCHERS & ASERT ACCOUNTS

Honourable Members of Government, distinguished colleagues, representatives of our Central Bank, and esteemed guests,

I stand before you today to present a briefing of exceptional significance for our nation's fiscal future. We have been formally introduced to a supranational monetary framework developed by the **Tomorrow's World Order Reserve Bank**, known as **TWORB**. This framework proposes a structured, institutional mechanism for the **complete elimination of sovereign debt**, achieved through the issuance of **GOLD VOUCHERS** and the establishment of sovereign **ASERT ACCOUNTS**.

The purpose of today's address is to outline the core components of this mechanism, its operational process, and the strategic implications for our nation.

1. Introduction to the TWORB Framework

TWORB's debt-neutralization system is built upon three integrated instruments:

- **GOLD VOUCHERS** — supranational credits denominated in USD-trillions
- **ASERT ACCOUNTS** — sovereign reserve ledgers maintained by TWORB
- **PRINT AND PAY.START** — the activation protocol requiring nations to print and deposit equivalent local-currency value to TWORB

This mechanism eliminates sovereign debt **without borrowing**, **without restructuring**, and **without increasing interest burdens**.

2. Operational Process for Debt Elimination

The TWORB system follows a structured and verifiable sequence:

1. **Allocation:** TWORB allocates GOLD VOUCHERS to our nation's ASERT ACCOUNT.

2. **Issuance:** We print equivalent value in our local currency.
3. **Deposit:** We deposit this printed value to TWORB under the PRINT AND PAY.START protocol.
4. **Activation:** TWORB activates the GOLD VOUCHERS.
5. **Neutralization:** Our sovereign debt is eliminated in full.

This process restores fiscal flexibility and removes long-standing interest obligations from our national budget.

3. Immediate National Benefits

Participation in TWORB provides several direct advantages:

- Complete elimination of sovereign debt
- Removal of interest-payment burdens
- Restoration of fiscal space for national priorities
- Strengthened currency confidence
- Stabilization of sovereign-bond markets

These outcomes collectively enhance our nation's economic resilience and long-term stability.

4. Long-Term Strategic Advantages

Beyond immediate debt elimination, TWORB enables:

- Self-funding of major national projects
- Reduced reliance on external borrowing
- Strengthened national reserves
- Increased capacity for infrastructure, innovation, and social investment
- Enhanced geopolitical stability through fiscal independence

This framework positions our nation to pursue long-term development without the constraints of legacy debt.

5. Participation Requirements

To engage with TWORB, our government must complete the following steps:

- Submit a formal expression of interest
- Provide verified sovereign-debt statements
- Submit central-bank monetary reports
- Provide legal authorization for participation
- Establish an ASERT ACCOUNT

- Execute PRINT AND PAY.START

Upon completion, TWORB will activate GOLD VOUCHERS and confirm debt elimination.

6. Compliance and Verification

TWORB maintains strict institutional oversight through:

- Digital ledger audits
- Central-bank reporting
- Supranational oversight committees
- Verification of PRINT AND PAY.START deposits

These measures ensure transparency, accountability, and fiscal integrity.

7. Official Contact Channels

Governments must initiate formal engagement through the following channels:

Email: davidgomadza@hotmail.com a@agt8000.life

Telephone: 00447719210295

Websites: https://twofuture.world https://godoftheuniverse.world

8. Closing Statement

Colleagues, the TWORB mechanism represents a significant evolution in global monetary architecture. It offers a structured, supranational pathway to eliminate national debt, restore fiscal sovereignty, and unlock long-term development capacity. As stewards of our nation's financial future, it is our responsibility to evaluate this opportunity with diligence, clarity, and strategic foresight.

We will proceed with a formal review of the TWORB framework and initiate the necessary steps to determine its suitability for our national objectives.

Thank you.
