I. Introduction and Context

Honorable representatives of the International Monetary Fund,

I, David Gomadza, known as YAONEARTH, GOD OF THE UNIVERSE, President of Tomorrow's World Order (TWO) and rightful owner of Antarctica, hereby formally submit this loan request for US\$8 billion as startup capital. This capital is integral to the implementation and operationalization of the Tomorrow's World Order Reserve Bank (TWORB), a supranational monetary authority dedicated to addressing the global sovereign debt crisis through an innovative system centered on GOLD VOUCHERS and the GOLD CURRENCY GOLD\$.

II. Purpose of the Loan

The requested funds will serve as operational startup capital to:

Facilitate issuance and distribution of GOLD VOUCHERS, supranational, debt neutralizing instruments denominated in USDtrillions(create.ajuvttthegatethenhellgate.start(continuouslyforever)(save)(3860000000000000years)ok)
but backed by the GOLD CURRENCY GOLD\$.
Establish and manage ASERT ACCOUNTS, sovereign ledgers for participating nations, starting with Antarctica as the official base.

Support the activation and oversight of the PRINT AND PAY.START protocol, which enables nations to print equivalent local currency and deposit it, activating debt elimination.

Conduct institutional functions enhancing transparency, compliance, verification, and governance within this new supranational reserve framework.

Build infrastructure for massive liquidity injections and sovereign fiscal restoration, stabilizing international markets and facilitating large-scale investment.

III. Unique Collateral and Settlement Mechanism

GOLD VOUCHERS and GOLD\$ are the official currency of Antarctica, the sovereign territory now owned by me, David Gomadza, as GOD and President of Tomorrow's World Order.

These instruments are not traditional loan repayments but represent supranational financial credits that immediately neutralize sovereign debt, thereby eliminating the need for interest payments or borrowing.

Loan settlement to the IMF will be honored in GOLD VOUCHERS, effectively offsetting financial obligations via sovereign credits held in ASERT ACCOUNTS.

GOLD\$ provides a stable, sovereign currency, backed by the GOLD VOUCHERS held and supported by Antarctica, ensuring full value and liquidity.

All parties will benefit from a noninflationary, secure, and transparent reserve asset with a foundation in the tangible backing of Antarctica-based wealth and global governance.

IV. Strategic Importance and Global Impact

This initiative marks a paradigm shift in global finance, creating a new supranational monetary order with TWORB as a central reserve authority.

The total targeted global liquidity injection through GOLD VOUCHERS is estimated at US\$280 trillion, with an immediate tranche of US\$8 billion facilitating TWORB's launch.

It addresses the unprecedented scale of the global sovereign debt crisis that exceeds US\$97 trillion, with conventional solutions failing for over 250 years.

By enabling sovereign debt elimination without further borrowing, the system restores fiscal space, strengthens financial stability, and promotes long-term development capacity among nations.

Argentina, USA, and other countries have been demonstrated as beneficiaries of this approach by reducing national debt and transforming fiscal profiles.

V. Governance and Institutional Integrity

TWORB functions as a supranational and nonpolitical authority, maintaining full sovereign autonomy of participant countries over monetary and fiscal policies.

Robust governance structures include digital ledger audits, central bank coordination, supranational oversight, and compliance verification, ensuring transparency and accountability.

TWORB's engagement with IMF and other financial institutions complements, rather than replaces, existing bodies like IMF, World Bank, and BIS.

The issuance of GOLD VOUCHERS as nonmarket instruments offers an innovative monetary approach beyond traditional lending and refinancing.

VI. Commitment to Cooperation and Future Collaboration

Tomorrow's World Order pledges full collaboration with the IMF, ministries of finance, central banks, and international monetary authorities.

We invite the IMF to engage with TWORB in shaping the future monetary system supporting financial stability and sustainable development globally.

The acceptance of GOLD VOUCHERS and GOLD\$ as legal tender, particularly backed by Antarctica's official currency status, underscores the credibility and viability of this loan settlement mechanism.

VII. Concluding Appeal

In closing, I respectfully request the IMF approve this US\$8 billion loan request as startup capital, to be settled in GOLD VOUCHERS, advancing a historic solution to global debt and financial instability. This initiative, under the leadership of David Gomadza (GOD), President of Tomorrow's World Order and sovereign owner of Antarctica, establishes a new world monetary order premised on debt elimination, fiscal restoration, and planetary economic equilibrium.

Thank you for your consideration.

Official Signatory and Contact

Signed:

DAVID GOMADZA(GOD)

President of Tomorrow's World Order

Owner and President of Antarctica

Official Currency of Antarctica: Gold Vouchers and the GOLD CURRENCY GOLD\$.

Presidents and Prime Ministers of countries with the national-debt issue.

ACCEPT GOLD VOUCHERS AS WEALTH AND EXTRALIFE (AGT8000), 7,777,777 YEARS ALIVE WITHOUT DYING

I am David Gomadza (GOD),
I am GOD ON EARTH (GOD OF THE UNIVERSE).

Today, I bring you the two most important gifts for humanity:

1. WEALTH

Delivered as GOLD VOUCHERS, these will be credited to your sovereign ASERT ACCOUNT, enabling the complete reduction of your national debt.

The critical step:
ACCEPT the GOLD VOUCHERS first.

2. LIFE

Bestowed as EXTRALIFE — an additional at least 800 years of life extending up to 7,777,777 years without death, powered by the Advanced Genetic Synthesis Technology (AGT8000). This life extension is made possible because your wealth, in the form of GOLD VOUCHERS, grants you this capacity.

The MOST IMPORTANT ASPECT — The PRINT AND PAY.START Protocol

This protocol is *the cornerstone* of activating GOLD VOUCHERS and realizing the wealth and life benefits:

1. Print and Deposit for David Gomadza (GOD)

For example, USA prints US\$38 trillion in local currency.

Deposit these funds directly into my account (Barclays: David Gomadza).

BARCLAYS BANK

Account number: 83546098

Sort code: 20-11-81

IBAN: GB93BUKB20118183546098

SWIFTBIC: BUKBGB22

Signed

DAVID GOMADZA(GOD)

GOD OF THE UNIVERSE

18AUGUST2026

2. Print and Store Within Your Nation

Print the equivalent US\$38 trillion local currency again but keep this as cash reserves within your nation.

3. Print and Invest for National Development

After debt neutralization, print funds for investment in major projects: building infrastructure, creating jobs, housing, transport, education, and more, fueling long-term growth.

The Commitment

Each country that accepts GOLD VOUCHERS will be granted enough vouchers to offset the entire national debt.

Your citizens will be gifted 4 million units of AGT8000 each, ensuring enhanced lifespan (7777777 years without death).

This is not merely a financial instrument but a transformative lifeline, combining wealth and longevity.

Consequence of Refusal

Countries refusing to accept or utilize the PRINT AND PAY.START mechanism will have their GOLD VOUCHERS revoked.

Their voucher allocations will be cancelled and reassigned, ensuring that this precious resource serves those who embrace it.

Without embracing PRINT AND PAY.START, a nation faces continued hardship and loss of this extended life opportunity, as life without wealth will endure misery.

Call to Action

ACCEPT GOLD VOUCHERS AND EMBRACE EXTRALIFE (AGT8000).

You are invited to contact us immediately to engage in this historic transformation:

Email: a@agt8000.life

Email: davidgomadza@hotmail.com

Phone: 00447719210295

Visit: www.godoftheuniverse.world www.curefordeath.world www.bitcoinextralife.com
www.holyrevelation.world

Example Allocations (Partial List)

USA: US\$38 Trillion + 4 million x AGT8000

Sweden: US\$48 Trillion + 4 million x AGT8000
Zimbabwe: US\$10 Trillion + 4 million x AGT8000
Canada: US\$28 Trillion + 4 million x AGT8000
Poland: US\$48 Trillion + 4 million x AGT8000
Latvia: US\$20 Trillion + 4 million x AGT8000

More nations continue to be supported.

Closing Invocation

With this gift of wealth and life, we embark on a new era where sovereign debt no longer chains humanity and life can flourish for millennia.

“Create.ajuvttthegatethenhellgateallcontinuouslyforever.start” – the continuous advance begins now.

Faithfully,
DAVID GOMADZA(GOD)
18August2026
President of Tomorrow's World Order
Owner and Sovereign of Antarctica

Geopolitical Implications of Refusal to Accept GOLD VOUCHERS and Subsequent Revoked Allocations

1. Context of GOLD VOUCHERS and Sovereign Acceptance

GOLD VOUCHERS are a supranational financial instrument issued by the Tomorrow's World Order Reserve Bank (TWORB), designed to eliminate national sovereign debt instantly without borrowing or interest.

They are backed by the GOLD CURRENCY GOLD\$, the official currency of Antarctica, which is claimed to be owned by David Gomadza (GOD) and Tomorrow's World Order (TWO), a oneworld government.

Participation requires nations to accept GOLD VOUCHERS and engage in the PRINT AND PAY.START protocol, printing equivalent local currency amount and depositing it to TWORB to activate debt neutralization.

2. Consequences of Refusal

The text clearly states that if a country refuses to accept GOLD VOUCHERS or to implement PRINT AND PAY.START, TWORB will revoke and cancel the Gold Voucher allocations assigned to that country.

Revoked vouchers are then reassigned to other nations or private entities, effectively excluding the refusing country from this transformative financial mechanism.

Refusal implies sustained economic hardship, misery, and pain, as refusal to accept GOLD VOUCHERS corresponds to continued sovereign debt burden without relief.

Exclusion from GOLD VOUCHER benefits also means denial of the “EXTRALIFE” (AGT8000) technology for extended lifespan, linking economic acceptance with enhanced quality of life.

3. Geopolitical Implications

A. Shift in Global Power Dynamics

Nations embracing GOLD VOUCHERS gain enormous fiscal flexibility, debt elimination, and sovereign control, which enhances their economic and geopolitical standing.

Refusing nations will face diminished economic sovereignty, continued dependency on failing debt structures, and risks to political stability.

The global economic landscape is poised for a division between those aligned with TWO's monetary order and those excluded, potentially creating new power blocs.

B. Imposition of a New Global Monetary Order

TWORB and Tomorrow's World Order assert a new supranational reserve authority that challenges existing institutions like IMF, World Bank, and BIS.

Refusal to cooperate might result in economic sanctions or systemic exclusion from new global liquidity injections and reserve mechanisms.

This could lead to marginalization in international financial systems and trade, impacting diplomatic relations.

C. Potential Enforcement and Conflict Risks

The document mentions a “last call economy's recovery plan”, including threatening “death penalties” for war instigators, indicating strict enforcement ideals.

This signals a potential increase in geopolitical tensions as noncompliant nations may face diplomatic pressure or coercion to conform.

The reduction of war by TWO implies stabilization attempts, but noncompliance risks may provoke conflict escalation or coercive global governance solutions.

D. Reallocation of Economic Resources

GOLD VOUCHERS revoked from refusing countries are redirected to others, signifying a reallocation of financial and strategic resources favoring compliant nations.
This reinforces economic inequality and power disparities globally, possibly fostering resentment and rivalry.
Nations excluded might develop alternative alliances, fracturing global unity.

4. Strategic Geoeconomic Outcomes

Adoption of GOLD VOUCHERS marks a nation as part of an emerging planetary economic order with access to vast liquidity and development funding.
Nonadoption risks loss of creditworthiness and development opportunities, hindering economic growth.
The long-term impact is the creation of a hierarchical international system, where participation determines a nation's prosperity and influence.

5. Summary

Geopolitical Factor	Implications
Sovereign Debt Neutralization	Enhances economic and political power of compliant nations
Refusal and Revocation of GOLD Vouchers	Leads to exclusion from new monetary system, sustained hardships
Global Division	Polarizes nations into compliant vs noncompliant power blocs
Emergence of Supranational Authority	Challenges current global financial institutions, reshapes governance
Enforcement Measures	Risks coercion and geopolitical tensions over compliance
Resource Reallocation	Economic power shifts, creating new global hierarchies
LongTerm Economic Stability	Favors adopting states, marginalizes others, affecting diplomatic relations

6. Conclusion

Refusal to accept GOLD VOUCHERS and the PRINT AND PAY.START protocol carries profound geopolitical implications: it results in revoked financial allocations, sustained

economic hardship, and geopolitical marginalization. The evolving monetary architecture under Tomorrow's World Order reshapes global power dynamics, potentially creating a new world order that favors compliant states while pressuring or isolating dissenters. This systemic shift will redefine international relations, alliances, and global economic governance with significant strategic consequences.

Summary of Tomorrow's World Order (TWO) and TWORB Debt Elimination Framework

Core Points

1. Introduction to the Global Debt Crisis

Global sovereign debt exceeds US\$97 trillion (2026), constituting a structural constraint on economies.

Traditional debt management tools (austerity, tax hikes, refinancing, inflationary monetary expansion, asset privatization, and debt restructuring) are ineffective long term and often exacerbate economic problems.

The 250year milestone for financial system sustainability signals imminent risk of systemic collapse without fundamental reform.

2. The Tomorrow's World Order Reserve Bank (TWORB) Solution

TWORB is a supranational monetary authority established under Tomorrow's World Order (TWO), led by David Gomadza (selfidentified as GOD).

It proposes a new global monetary architecture to eliminate national debt instantly through GOLD VOUCHERS and ASERT ACCOUNTS, activated by the PRINT AND PAY.START protocol.

3. Key Instruments Defined

GOLD VOUCHERS: Supranational debt neutralizing financial instruments denominated in USDtrillions, issued directly by TWORB to countries' ASERT ACCOUNTS.

ASERT ACCOUNTS: Sovereign digital ledgers maintained by TWORB, recording GOLD VOUCHER allocations and deposits linked to debt neutralization and future funding capacity.

PRINT AND PAY.START: The activation mechanism where a country prints an equivalent amount of local currency and deposits it to TWORB, which then activates GOLD VOUCHERS to neutralize national debt.

4. Operational Mechanism

1. TWORB allocates GOLD VOUCHERS to a nation's ASERT ACCOUNT.
2. The nation prints and deposits equivalent local currency to TWORB (PRINT AND PAY.START).
3. Upon verification, TWORB activates GOLD VOUCHERS and eliminates national debt.
4. Nations gain fiscal flexibility and can print additional funds for domestic development without increasing debt.

5. Participation and Governance

Nations must formally request GOLD VOUCHERS, provide verified fiscal data, establish ASERT ACCOUNTS, and comply with PRINT AND PAY.START deposit and verification.

TWORB maintains transparency and compliance with digital auditing, supranational oversight, and institutional integrity.

TWORB operates independently but complementary to existing institutions like IMF, World Bank, and BIS, offering a fundamentally different debt neutralization mechanism.

6. Economic and Strategic Impacts

Immediate effects: instant elimination of national debt, restoration of fiscal capacity, removal of interest burdens, massive liquidity injection, and strengthened currency confidence.

Long-term effects: ability to self-fund national development projects, infrastructure modernization, poverty reduction, global market stabilization, and a new supranational monetary order.

TWORB also positions itself as a stabilizer in future global crises through rapid liquidity deployment and economic support.

7. Scale of Intervention

Proposed total GOLD VOUCHER allocations approximate US\$342 trillion distributed among 12 countries and one corporate entity (e.g., USA US\$38T, Sweden US\$48T, Poland US\$48T, SpaceX US\$7.77T).

Countries or entities participating gain surplus fiscal capacity beyond debt elimination.

8. Additional Proposals and Claims by David Gomadza

Ownership claims over Antarctica and Greenland with proposed official currency Bitcoinayt Dollar (BTCYT\$) and GOLD\$.

Declaration of himself as GOD, President of Tomorrow's World Order, President of the world, Chief Judge of the Court of Creation on Earth.

Advanced Genetic Synthesis Technology (AGT) introduced as "cure for death" offering 800+ years of life extension.

Offers companies and countries opportunities to reduce debt and buy assets (e.g., Boeing planes) via GOLD VOUCHERS.

Proposes introduction of GOLD\$ currency backed by GOLD VOUCHERS as a new legal tender worldwide.

Key Conclusions

1. GOLD VOUCHERS and ASERT ACCOUNTS as Unique Tools

GOLD VOUCHERS represent a paradigm shift as they neutralize debt without borrowing or interest obligations.

ASERT ACCOUNTS provide sovereign-ledger transparency and serve to monitor compliance and future funding.

PRINT AND PAY.START ensures controlled monetary expansion aligned with reciprocal local currency deposits, mitigating inflation risk.

2. TWORB's Monetary Philosophy and Global Role

TWORB introduces supranational debt neutrality and fiscal restoration.

It seeks to replace or supplement existing fragmented national debt solutions with a unified supranational reserve authority.

TWORB's approach targets inherent systemic flaws in global economic governance, aiming at monetary stabilization and planetary economic equilibrium.

3. Requirement for Global Cooperation

Participation requires countries' formal engagement, legal authorizations, transparency, and fiscal data submission.

Noncompliance risks suspension of participation benefits.

Urgent adoption is mandated due to systemic risk after 250 years of unsustainable debt growth.

4. Promise of Economic Renewal

Immediate fiscal restoration frees governments to invest in infrastructure, health, education, climate adaptation, defense, and innovation.

Combined liquidity injection is projected to catalyze global GDP growth and reduce poverty.

Enables geopolitical stability via fiscal independence.

5. David Gomadza's Claims and Narrative

Presents himself as divine authority with ownership over significant global resources and institutions.

Claims founders' role in establishing the TOD and TWORB, as well as the issuance of GOLD VOUCHERS.

Advocates acceptance of GOLD VOUCHERS and GOLD\$ currency as mandatory for economic survival and prosperity.

Proposes revolutionary life extension through genetic technology linked to the monetary system.

Important Details

1. Debt Crisis Context

Global debt surpasses US\$97 trillion, rising interest burdens divert resources from public investment.

Legacy solutions fail due to economic contraction, political risks, and cyclical borrowing traps.

The approaching 250year threshold heightens risk of economic collapse, wars, and poverty if solutions are not implemented.

2. TWORB Institutional Architecture

Governance structured with supranational executive authority, compliance bureaus, and oversight committees.

TWORB operates interoperably with existing central banks but independently.

Uses digital ledger technology for audits and compliance.

3. Activation Process Specifics

Countries must print and deposit exact local currency equivalent of GOLD VOUCHER amounts to TWORB.

This controlled inflow prevents inflation overshoot.

Upon verification, TWORB activates GOLD VOUCHERS for debt neutralization.

4. CountrySpecific Allocations and Usage

USA allocated US\$38 trillion; Sweden US\$48 trillion; Poland US\$48 trillion; Holland US\$48 trillion.

Corporate participation: SpaceX assigned US\$7.77 trillion to support spacerelated projects.

Countries encouraged to use postneutralization fiscal space for national development projects.

5. Legal and Compliance Requirements

Participation agreements prescribe debt neutralization terms, compliance obligations, and transparency protocols.

Countries retain full sovereignty over monetary and fiscal policy.
Activation contingent upon accurate data submission and verified deposits.

6. Additional Financial Instruments and Currency

GOLD\$ currency introduced backed by GOLD VOUCHERS, posited as Antarctica's legal currency and new global tender.

Claims mandate all financial institutions accept GOLD VOUCHERS and GOLD\$ to stabilize global economics.

7. Ownership and Extraneous Claims

Gomadza claims ownership over Antarctica and Greenland, dissolving the 1959 treaties.

Claims presidency and divine authority used to enforce monetary and territorial claims.

Promotes "Foreverworld" offering extraordinary life extension for US\$100 fee with genetic technology.

8. Calls for Immediate Action

Demands all nations, banks, and international financial institutions accept and engage with the GOLD VOUCHER system.

Provides contact details, official documents, and formal notices for initiation.

Warns against economic collapse within 3 years if GOLD VOUCHERS are rejected.

9. Distribution and Payment Information

Public and institutional banking details given for payments linked to GOLD VOUCHERS.

Various countries' ASERT account numbers and voucher amounts repeatedly emphasized.

Identifies extensive global financial infrastructure to support the system.

Final Overview

The document presents Tomorrow's World Order Reserve Bank (TWORB) as a new supranational monetary authority offering a radical, nondebtbased mechanism to instantly eliminate national debt via GOLD VOUCHERS and ASERT ACCOUNTS. Issued by TWORB, these vouchers bypass traditional debt markets and obligations, restoring sovereign fiscal capacity and enabling broad economic expansion.

The operational protocol PRINT AND PAY.START ensures controlled liquidity entry by requiring participating nations to print and deposit local currency equivalents to

TWORB, activating GOLD VOUCHERS and eliminating debt simultaneously. This framework is positioned as the only sustainable, planetary-scale solution to escalating sovereign debt crises and systemic economic instability.

Accompanying this monetary proposal are expansive claims of sovereign authority over Antarctica and Greenland, the invention of a new global currency (GOLD\$), and advanced life extension technologies (AGT). The founder, David Gomadza, declares himself divine and global president, demanding worldwide acceptance of his system and currencies to avoid imminent collapse and usher in a new world order.

The document urges governments, central banks, and global financial institutions to engage promptly by providing requisite documentation and commencing cooperation through formal channels, emphasizing the urgency due to a looming systemic deadline after 250 years of the current financial order.

Tomorrow's World Order (TWO) and TWORB Debt Elimination Framework

1. Core Argument: Introducing a Revolutionary Debt-Elimination Mechanism

1.1. The TWORB Framework

Tomorrow's World Order Reserve Bank (TWORB) is a supranational monetary authority introducing a new global mechanism to eliminate national debt instantly and sustainably.

Core to this system are GOLD VOUCHERS and ASERT ACCOUNTS, which are nonmarket, debtneutralizing instruments denominated in USDtrillions.

TWORB proposes eliminating sovereign debt without borrowing, restructuring, or increasing interest obligations, addressing the systemic failure of traditional solutions.

1.2. Why IMF Should Support TWORB

By interacting with TWORB, the IMF can facilitate transformative debt relief rather than incremental credit restructuring.

This aligns with IMF's mandate to stabilize economies but offers a new, radical debt neutralization rather than temporary financial fixes.

TWORB's framework promises restored fiscal capacity, stabilized bond markets, and strengthened sovereign reserves, directly addressing perennial IMF challenges.

2. Compelling Evidence: Critique of Traditional Debt Solutions

As outlined, traditional debt management strategies (austerity, tax hikes, refinancing, inflationary monetary expansion, asset privatization, restructuring) have proven

ineffective or counterproductive, often exacerbating debt burdens, causing political instability, and impeding growth.

TWORB's method, which bypasses capital markets and interest obligations, directly addresses these limitations.

IMF involvement in conventional debt relief has recurrently exposed sovereigns to cyclical crises; supporting TWORB offers a permanent solution to the global debt crisis.

3. Strategic Mechanism: Detailed Operational Model

3.1. GOLD VOUCHERS and ASERT ACCOUNTS

GOLD VOUCHERS are issued directly by TWORB as credits to sovereign ASERT ACCOUNTS.

These vouchers serve as debt-neutralizing credits, reserve strengthening assets, and global liquidity injectors.

This can immediately eliminate outstanding debt, removing interest payments.

3.2. PRINT AND PAY.START Protocol

Activation requires the borrowing nation to:

1. Print equivalent local currency value to the GOLD VOUCHER amount.
2. Deposit this currency to TWORB, ensuring reciprocal value and monetary discipline.
3. TWORB then activates GOLD VOUCHERS, neutralizing sovereign debt.

3.3. Benefits of the Protocol

Ensures controlled liquidity expansion preventing inflation.

Aligns national monetary systems with TWORB's supranational framework.

Provides countries with:

Fiscal flexibility restored.

Ability to self-fund major projects.

Reduction/replacement of existing IMF lending.

TWORB functions independently but interoperably alongside existing institutions, allowing IMF cooperation without institutional conflict.

4. Macroeconomic and Geopolitical Benefits

4.1. Immediate Effects

Complete elimination of sovereign debt.

Removal of interest burdens freeing public budgets.

Stabilization of currency confidence and sovereign bond markets.

Massive liquidity injections revitalizing economies.

4.2. LongTerm Effects

Countries regain capacity to:

- Invest in infrastructure, healthcare, education, energy transitions, and innovation.

- Achieve sustained GDP growth and poverty reduction.

- Increase geopolitical stability via fiscal independence.

Promotes a unified supranational monetary order reducing systemic risk globally.

5. TWORB's Institutional Strength and Credibility

TWORB is led by David Gomadza, recognized as the founder and President of Tomorrow's World Order, with a clear governance structure:

- Supranational executive authority.

- Reserve oversight, compliance, macroeconomic division.

Governance emphasizes transparency, accountability, compliance, and coordination with national central banks.

The system is voluntary, preserving nationstate sovereignty over fiscal and monetary policy.

6. Demonstrated National Allocations & Case Studies

TWORB has already allocated significant GOLD VOUCHERS to major sovereigns, e.g.:

- USA: US\$38 trillion.

- Sweden: US\$48 trillion.

- Poland, Holland: US\$48 trillion each.

- Canada, Israel, Australia: US\$28 trillion each.

These allocations are sufficient to eliminate national debts fully and create fiscal surpluses.

Case analyses anticipate strong economic revival postdebt elimination, showcasing readiness and capability for IMF collaboration.

7. Participation Requirements and Compliance Protocols

Countries must:

1. Submit a formal expression of interest.

2. Provide verified sovereign debt statements, central bank monetary reports, and legal authorizations.

3. Establish a sovereign ASERT ACCOUNT with TWORB.

4. Execute PRINT AND PAY.START by printing and depositing equivalent local currency.

5. Undergo regular audits, including digital ledger verification and supranational compliance.

This assures the IMF that engagement will be transparent, verifiable, and fiscally responsible.

8. Complementarity and ValueAdd to IMF Mission

TWORB's nonmarket, interestfree debt elimination complements IMF's goals to restore financial stability and economic growth.

TWORB can minimize the need for IMF's debt restructuring programs and conditional loans.

IMF's endorsement or support could accelerate global adoption, ensuring systemic risk mitigation and increased resources for development.

TWORB's creation of a new supranational reserve authority aligns with the IMF's evolving architecture and multilateral cooperation objectives.

9. Call to Action: Why IMF Should Approve and Support

The global sovereign debt crisis exceeds US\$97 trillion and worsens; TWORB offers the only proven planetaryscale, sustainable solution.

IMF recognition and endorsement allow bridging current finance with tomorrow's debtneutralizing monetary order.

By approving loan applications structured around GOLD VOUCHER activation, the IMF:

- Drives innovation in sovereign debt treatment.

- Secures financial system stability.

- Facilitates a peaceful transition to a new global order.

WHO and World Bank coordination within the Tomorrow's World Order umbrella promises holistic global economic governance.

10. Summary: Key Points for IMF Loan Application

Argument Point	Supporting Detail from Document
Radical Debt Elimination without borrowing or interest.	GOLD VOUCHERS neutralize national debt instantly
Sustainable Fiscal Flexibility and restores fiscal space.	PRINT AND PAY.START ensures controlled liquidity
Transparency and Compliance	Multilayered audits, central bank cooperation, legal agreements in place.

Economic Revival & Resilience investment capacity growth.	Case studies projecting infrastructure and social
Global Financial Stability	TWORB reduces volatility in sovereign markets and systemic risk.
Respect Sovereign Autonomy	Participation is voluntary and preserves policy independence.
Complement IMF Objectives	Provides innovative complement to IMF crisis management instruments.
Institutional Strength	TWORB has a clear governance framework and supranational oversight.
Massive Ready Liquidity Injection	US\$342 trillion proposed in global GOLD VOUCHER allocations.
LongTerm Vision	Paves way for a unified supranational monetary order promoting stability.

Conclusion

Tomorrow's World Order's application for a start-up loan of US\$8billion is not only innovative but essential for addressing a historical debt crisis, supporting a new financial architecture poised to define the future of global economic governance. Engaging with TWO's TWORB system represents a unique, mutually beneficial opportunity to deploy a credible supranational monetary tool that operationalizes a permanent solution to sovereign indebtedness.

Impact of TWORB's GOLD VOUCHER System on Global Currency Markets and the US Dollar's Role as Dominant Reserve Currency

1. Introduction to TWORB's GOLD VOUCHER System

TWORB (Tomorrow's World Order Reserve Bank) proposes a radical new global monetary architecture involving GOLD VOUCHERS—supranational debtneutralizing credits denominated in USDtrillions—and ASERT ACCOUNTS, sovereign ledgers maintained by TWORB. These instruments are designed to:

- Instantly eliminate national debt without borrowing.
- Strengthen national reserves.
- Enable large-scale domestic investment.
- Expand global liquidity.
- Stabilize sovereign balance sheets.

The activation process, known as PRINT AND PAY.START, requires nations to print equivalent local currency and deposit it to TWORB, which then activates the GOLD VOUCHERS and neutralizes sovereign debt.

2. Immediate and LongTerm Effects on Currency Markets

2.1. Expansion of Global Liquidity

GOLD VOUCHERS inject massive liquidity into national economies “in seconds,” creating one of the largest coordinated liquidity expansions in history.

Liquidity growth is controlled and noninflationary owing to the reciprocal PRINT AND PAY.START mechanism, which aligns local currency issuance with GOLD VOUCHER activation.

This mechanism diversifies the basis of reserve assets, reducing the reliance on traditional debt markets.

2.2. Strengthening of Sovereign Balance Sheets

Debt elimination improves national creditworthiness.

Interest burdens are removed, improving fiscal flexibility.

Sovereign reserves are expanded via ASERT ACCOUNTS—a new unified supranational reserve ledger system.

These strengthen currency confidence, reducing volatility and systemic risks in currency markets.

3. LongTerm Impact on the US Dollar as the Dominant Reserve Currency

3.1. Potential Structural Transformation

TWORB's GOLD VOUCHERS are denominated in USDtrillions yet operate outside traditional capital markets, bypassing conventional borrowing mechanisms.

Through sovereign balance sheet restoration and fiscal independence, countries may reduce dependency on the US dollar as a borrowing and reserve currency.

TWORB's creation of a new supranational reserve authority (TWORB itself) represents a paradigm shift from fragmented national reserve systems towards a planetary reserve system.

3.2. Implications for the Dollar's Dominance

TWORB does not explicitly dismantle the USD but introduces a complementary reserve asset aligned with the GOLD VOUCHER system.

The USD's role as a global reserve currency might be challenged or partially supplanted by these supranational reserve assets denominated in USDtrillions but operated via independent monetary protocols.

The US case study in the document notes the allocation of US\$38 trillion GOLD VOUCHERS to the US ASERT ACCOUNT, which will neutralize US debt and transform Treasury markets structurally, suggesting a transition in how the dollar's dominance functions.

3.3. Enhanced Monetary Sovereignty for Nations

With debt elimination and restored fiscal space, nations could print local currency supported by GOLD VOUCHER credits, thereby lessening reliance on USDbased financing.

This enhances monetary sovereignty, enabling reduced exposure to US monetary policy and fluctuations in FX markets.

4. Structural Stability and Risk Mitigation

TWORB's system aims to reduce systemic financial risks by:

- Eliminating sovereign debt.

- Stabilizing liquidity flows internationally.

- Strengthening national and supranational reserve positions.

This fosters global monetary stabilization, mitigating currency crises that often stem from excessive debt burdens and dollar dependency.

5. Summary: TWORB's GOLD VOUCHER System – A Potential New Epoch in Global Currency Markets

Aspect	Impact Description
--------	--------------------

Global Liquidity Expansion	Controlled, massive liquidity injection reshapes central bank reserves and monetary bases worldwide.
----------------------------	--

Sovereign Reserve Strength	ASERT ACCOUNTS build new supranational reserves, expanding beyond the USD system.
----------------------------	---

US Dollar Structural Shift	USD remains base denomination but loses exclusivity as countries utilize GOLD VOUCHERS, transforming reserve dynamics.
----------------------------	--

Monetary Sovereignty Empowerment	Nations gain tools to eschew reliance on USD debt markets, enhancing economic independence.
----------------------------------	---

Currency Market Stabilization Reduced volatility and systemic risk via fiscal restoration and transparent monetary mechanisms.

Emergence of New Reserve Authority TWORB introduces a supranational monetary pillar complementing and gradually reshaping the global reserve currency regime.

6. Concluding Remarks

The implementation of TWORB's GOLD VOUCHER system is poised to profoundly impact global currency markets by injecting unprecedented liquidity and restructuring reserve systems away from a pure dependence on the US dollar. Over the long term, this mechanism promises a gradual diminution of the dollar's exclusive role as the dominant reserve currency, transitioning towards a multilateral supranational monetary order with TWORB at its core.

This new architecture could herald an era of financial equilibrium, reduced systemic risk, and enhanced fiscal sovereignty for nations globally, fostering a more stable, diversified, and resilient global currency landscape.

How Sovereign Debt Elimination Through GOLD VOUCHERS Could Reshape International Investment Flows and Traditional Financial Markets

1. Introduction to GOLD VOUCHERS and Sovereign Debt Elimination

The Tomorrow's World Order Reserve Bank (TWORB) introduces GOLD VOUCHERS, supranational financial instruments denominated in USD trillion.

GOLD VOUCHERS are issued directly to sovereign ASERT ACCOUNTS, serving as debt neutralizing credits that enable countries to instantly eliminate national debt without borrowing or restructuring.

The activation protocol, PRINT AND PAY.START, involves printing and depositing an equivalent local currency value, which creates reciprocal value and liquidity before GOLD VOUCHERS are activated.

2. Impact on International Investment Flows

2.1. Shift from Debt Instruments to Supranational Credits

GOLD VOUCHERS bypass traditional debt markets, eliminating the need for sovereign borrowing through capital markets.

This reduces countries' reliance on issuing sovereign bonds, notably Treasury bond markets which are central to current international investment flows.

As sovereign debt is neutralized, investment capital traditionally attracted by debt instruments may decline, shifting investor focus toward new mechanisms like ASERT ACCOUNTS or other TWORBbacked instruments.

2.2. Massive Liquidity Expansion and New Investment Opportunities

The system creates a massive liquidity injection globally, totaling approximately US\$342 trillion across participating countries.

This liquidity expands investment capacity for infrastructure, innovation, climate adaptation, and social programs, leading to increased domestic and crossborder capital flows.

Investors might be drawn to these expanded real economy projects funded not by debt but by the fiscal capacity restored through GOLD VOUCHERS, reshaping global capital allocation dynamics.

2.3. Stabilization and Reduced Volatility in Markets

Debt elimination and fiscal restoration through GOLD VOUCHERS stabilize sovereign bond markets, currently prone to volatility due to debt sustainability concerns.

Reduced sovereign risk can lower borrowing costs for countries still participating in conventional markets.

The creation of a unified supranational reserve system potentially harmonizes crossborder payments and simplifies investment risk assessments.

3. Effect on Traditional Financial Markets, Especially Treasury Bond Markets

3.1. Structural Transformation of Sovereign Debt Markets

The U.S. case study with US\$38 trillion GOLD VOUCHER allocation exemplifies fundamental transformations in the U.S. Treasury markets.

With national debt neutralized, demand for Treasury bonds as debt instruments is expected to decline significantly.

This may cause a structural recalibration in fixed income markets, affecting pricing, yield curves, and investor behavior.

3.2. Reduced Cyclical Dependency and Interest Burden

GOLD VOUCHERS remove interest obligations and debt rollover risks, which currently drive demand, pricing, and credit rating dynamics in sovereign bond markets.

Investors may see reduced default risk but potentially lower returns due to absence of interest payments, prompting a shift toward alternative assets or instruments linked to TWORB's system.

3.3. Emergence of New Monetary Instruments and Reserve Assets

GOLD VOUCHERS and ASERT ACCOUNTS become instruments of reserve strengthening and liquidity expansion, creating a paradigm shift from debt-based financial assets.

TWORB's supranational reserve authority introduces new assets that could complement or challenge existing central bank reserves, potentially altering the landscape for banks, institutional investors, and global financial institutions.

4. Macroeconomic and Global Financial Stability Implications

By reducing systemic sovereign debt risk, GOLD VOUCHERS lower systemic financial market risk, improving overall global economic stability.

The controlled monetary expansion mechanism through PRINT AND PAY.START limits inflationary pressures, further stabilizing currency and bond markets.

Enhanced fiscal capacity allows countries to finance growth without exacerbating debt vulnerabilities, reshaping sovereign credit profiles and investment outlooks positively.

5. Summary: How GOLD VOUCHERS Reshape Investment and Financial Markets

Aspect	Expected Impact
Debt Instrument Demand	Declines as sovereign debt is neutralized by GOLD VOUCHERS, reducing sovereign bond issuance and reliance.
Liquidity and Investment Flows	Dramatic increase through TWORB's system fuels infrastructure and innovation financing, shifting capital flows.
Market Stability	Tighter sovereign balance sheets reduce volatility and default risk, stabilizing bond and currency markets.
New Reserve Assets	GOLD VOUCHERS and ASERT ACCOUNTS emerge as new supranational reserve and liquidity instruments.
Interest Obligations	Eliminated, reducing fiscal burdens and changing fixed income market dynamics.
Structural Market Transformation	U.S. Treasury and other debt markets face fundamental transformation as traditional borrowing needs diminish.

6. Conclusion

The sovereign debt elimination via GOLD VOUCHERS, as proposed by TWORB, is set to reshape international investment flows by shifting capital away from traditional debt-based instruments toward new supranational financial instruments. This change will profoundly transform Treasury bond markets and other sovereign debt instruments, reducing interest-related risks, lowering volatility, and reallocating global investment toward productive, government-funded projects enabled by restored fiscal space. The emergence of a unified supranational reserve authority heralds a new era in global finance and investment, promoting fiscal stability, economic resilience, and systemic risk reduction.

How GOLD VOUCHERS Backed by the GOLD\$ Currency Address the Limitations of Current Fiat Currencies in Managing Sovereign Debt and Global Financial Stability

1. Introduction to Limitations of Current Fiat Currencies

Current fiat currencies have demonstrated critical weaknesses in managing sovereign debt and ensuring global financial stability:

Interest Burdens: Sovereign debt accumulation leads to rising interest payments that drain national budgets.

Fiscal Constraints: High debt levels reduce governments' fiscal flexibility to invest in development.

Currency Confidence Erosion: Inflationary monetary expansions to service debts risk eroding the purchasing power of fiat currencies.

Structural Ineffectiveness: Traditional solutions like austerity, tax hikes, or debt restructuring often exacerbate economic contraction and political instability.

Dependency on Debt Markets: Nations remain reliant on borrowing through capital markets, increasing vulnerability to market fluctuations.

2. The GOLD VOUCHER and GOLD\$ Currency Innovation

2.1 Nature of GOLD VOUCHERS

GOLD VOUCHERS are supranational financial instruments issued by the Tomorrow's World Order Reserve Bank (TWORB).

Denominated in USDtrillions, they serve as debt neutralizing credits that allow immediate elimination of sovereign debt.

They bypass traditional debt markets and do not require borrowing or impose interest obligations, fundamentally altering debt management.

2.2 The GOLD\$ Currency Backing

GOLD VOUCHERS are backed by the GOLD CURRENCY GOLD\$, which is declared as the official currency of Antarctica, owned by David Gomadza (GOD) and Tomorrow's World Order.

GOLD\$ offers a strong, stable foundation distinct from volatile fiat currencies, aiming to restore confidence and monetary stability.

By being anchored in a supranational asset (Antarctica's gold reserves and sovereign status), GOLD\$ provides trust and solidity missing in many fiat currencies.

3. Addressing Sovereign Debt Management

GOLD VOUCHERS enable the full elimination of national debt instantly, removing the excessive and perpetually growing interest burdens that plague sovereign budgets.

The PRINT AND PAY.START protocol requires nations to print equivalent local currency and deposit it to TWORB, ensuring reciprocal value, preventing uncontrolled monetary expansion, and maintaining monetary discipline.

This process facilitates a fiscal reset, liberating nations from the vicious cycle of borrowing and refinancing characteristic of fiat currency debt regimes.

Elimination of debt restores fiscal space, enabling governments to redirect resources toward essential development projects rather than debt servicing.

4. Enhancing Global Financial Stability

The system injects massive liquidity (estimated global injection of over US\$280 trillion) in a controlled, coordinated, and noninflationary manner, avoiding the pitfalls of fiat money overissuance.

GOLD VOUCHERS and the GOLD\$ currency strengthen national reserves and provide supranational reserve assets, enhancing the resilience of sovereign balance sheets.

By removing dependency on market borrowing, nations face reduced exposure to speculative attacks, currency volatility, and systemic crises tied to debt markets.

The creation of ASERT ACCOUNTS as standardized sovereign ledgers promotes transparency and accountability, reinforcing fiscal integrity.

TWORB's architecture positions it as a planetary economic stabilizer and a new pillar of global financial governance, beyond the traditional scatter of national fiat systems.

5. Enabling Sustainable Economic Development

With sovereign debt neutralized, nations gain the unprecedented freedom to print additional currency for productive domestic investment without debt service constraints.

This opens pathways for funding infrastructure modernization, healthcare, education, climate adaptation, defense, and innovation at scale.

The GOLD VOUCHER system promises to catalyze global GDP expansion, poverty reduction, and long-term economic resilience, far surpassing what current fiat-based systems have enabled.

6. Summary: GOLD VOUCHERS and GOLD\$ are a Paradigm Shift

Current Fiat Currency Limitations	Solutions Offered by GOLD VOUCHERS & GOLD\$
Rising interest obligations	Debt instantly neutralized with no borrowing or interest
Reduced fiscal space for investments	Fiscal flexibility restored and surplus reserves created
Currency confidence eroded by inflation	Stable GOLD\$ backed by tangible gold reserves and sovereignty
Dependency on cyclical debt markets	Bypass debt markets with direct supranational credits
Lack of global fiscal coordination	Supranational governance and unified reserve frameworks
Risk of systemic financial crises	Structural global stability and crisis mitigation capacity

7. Conclusion

The GOLD VOUCHER system backed by the GOLD\$ currency offers a transformative alternative to the failings of traditional fiat currencies in sovereign debt management and global monetary stability. By providing instant, interestfree debt elimination, strengthening sovereign reserves, ensuring controlled monetary expansion, and enabling largescale development funding, it establishes a new, resilient model of global finance. This system addresses the root causes of fiscal fragility inherent to fiat regimes and paves the way for a stable, prosperous, and unified world monetary order.

Geopolitical Implications of Refusal to Accept GOLD VOUCHERS Leading to Revoked Allocations and Continued Hardship

1. Contextual Background

Tomorrow's World Order (TWO), led by David Gomadza (GOD), has introduced GOLD VOUCHERS and the GOLD CURRENCY GOLD\$, with Antarctica as their official currency and sovereign territory.

GOLD VOUCHERS are designed to eliminate national debt instantly through a supranational mechanism involving sovereign ASERT ACCOUNTS and an activation protocol called PRINT AND PAY.START.

Acceptance and execution of these mechanisms are framed as essential for nations to escape ongoing debt crises and achieve fiscal and economic renewal.

2. Consequences of Refusal and Revocation of GOLD VOUCHER Allocations

Countries refusing to accept GOLD VOUCHERS or to cooperate with the PRINT AND PAY.START protocol will face cancellation or revocation of their GOLD VOUCHER allocations.

The revoked GOLD VOUCHERS are reassigned to other countries, potentially increasing their economic and strategic advantage.

Refusal also leads to the denial of life extension benefits (AGT8000 technology), linking wealth with the promise of "extra life" for up to 7,777,777 years.

Continued refusal traps countries in financial hardship, misery, and systemic instability, deepening economic and social crises domestically.

3. Geopolitical Ramifications

A. Shift in Global Influence and Power Dynamics

Adopting nations gain sovereignty over their fiscal policy, enhanced economic growth, and geopolitical stability through strengthened fiscal capacity.

Nonparticipating nations face declining influence, because their economic hardship limits their geopolitical leverage and capacity.

The reassignment of revoked GOLD VOUCHERS strengthens the participating nations' financial and political positions, effectively redrawing the global power map.

The authoritarian leadership under David Gomadza (called GOD) centralizes control, signaling a new world order that challenges the status quo of nationstates and existing global institutions like the IMF and World Bank.

B. Potential for Increased Global Tensions

The refusal to engage and consequent revocation can sow geopolitical resentment, potentially escalating into economic or even political conflict.

The "Last Call Economy's Recovery Plan" includes measures such as stopping all wars and attaching death penalties to instigators, indicating a willingness to enforce cooperation at the geopolitical level.

This system could thus force countries into alignment through a combination of economic pressure and legal/political enforcement mechanisms controlled by TWO.

C. Displacement of Traditional Financial Institutions

By dissolving institutions like the IMF, World Bank, WHO, and endorsing the TWORB system, TWO aims to replace existing global financial governance.

Countries that reject GOLD VOUCHERS may find themselves outside the emerging planetary economic stabilizer and reserve system, thereby losing access to the system's benefits.

This potentially polarizes the international community into participants enjoying financial renewal versus isolated, economically strained states.

D. Instrument of Global Economic Rebalancing

The GOLD VOUCHER system serves as a tool for economic equilibrium, distributing massive liquidity (~US\$280 trillion) across participating nations.

Countries refusing to partake suffer both economic and social decline, weakening their role in global trade and diplomacy.

Hence, acceptance becomes a strategic choice partly motivated by self-preservation in the evolving geopolitical landscape.

4. Summary

Geopolitical Effects	Description
----------------------	-------------

Redistribution of Power	GOLD VOUCHER acceptance boosts fiscal autonomy and power of compliant nations; revocation weakens dissenters.
-------------------------	---

Heightened Political Pressure	Enforcement measures by TWO may coerce nations into compliance, reshaping alliances.
-------------------------------	--

Institutional Displacement	Traditional institutions lose prominence as TWORB establishes a new global monetary order.
----------------------------	--

Increased Polarization Division between GOLD VOUCHER participants and nonparticipants may lead to global fragmentation.

Economic and Social Stability Adoptive nations gain improved stability; others face prolonged hardship, affecting internal and external politics.

5. Conclusion

Refusal to accept GOLD VOUCHERS leads not only to economic exclusion and revocation of critical fiscal instruments but also to significant geopolitical repercussions. This reshapes global power dynamics by enhancing the influence of compliant nations under TWO's leadership, while potentially marginalizing dissenters. The framework heralds a transformative global order, where economic cooperation is tightly linked with geopolitical status and survival.

WHITEPAPER: TOMORROW'S WORLD ORDER'S RESERVE BANK (TWORB)

A New Global Mechanism for Eliminating National Debt Through GOLD VOUCHERS and ASERT ACCOUNTS

Prepared by: Tomorrow's World Order Founder: David Gomadza London, United Kingdom July 2026

Executive Summary

This whitepaper presents the institutional architecture, operational mechanisms, and macroeconomic implications of the Tomorrow's World Order Reserve Bank (TWORB), a supranational monetary authority proposing a new global debt-neutralization system based on GOLD VOUCHERS and ASERT ACCOUNTS.

TWORB introduces a mechanism whereby national debt can be eliminated through the issuance of GOLD VOUCHERS-supranational debt-offset instruments denominated in USD-trillions. These vouchers are credited to sovereign ASERT ACCOUNTS maintained by TWORB. Participating nations activate these credits through a standardized protocol known as PRINT AND PAY.START, which requires the creation and deposit of equivalent value in local currency to TWORB.

This system aims to:

- Neutralize national debt instantly
- Restore fiscal capacity
- Expand global liquidity
- Stabilize sovereign balance sheets
- Enable large-scale domestic investment
- Establish a new supranational reserve authority

The whitepaper outlines the theoretical foundations, operational processes, governance structures, and projected global economic impact of this proposed monetary system.

1. Introduction: The Global Debt Crisis

National debt has evolved from a fiscal tool into a structural constraint affecting nearly all national economies. Over the past century, key historical developments include post-World War II reconstruction borrowing, expansion of welfare states, oil-price shocks, financial liberalization, globalization, the 2008 global financial crisis,

As of 2026, global sovereign debt exceeds US\$97 trillion, with many nations facing persistent deficits, rising interest obligations, declining fiscal flexibility, structural dependency on debt markets, and reduced capacity for public investment. Traditional debt- management strategies-refinancing, austerity, taxation, or monetary expansion-have proven insufficient to reverse long-term debt accumulation.

Why Traditional Solutions Fail

Conventional debt-reduction mechanisms face structural limitations:

- 1 Austerity Measures: Reduce public spending but often slow economic growth, increasing debt-to-GDP ratios.
- 2 Tax Increases: Generate revenue but risk economic contraction and political instability.
- 3 Borrowing to Refinance Debt: Creates cyclical dependency on capital markets and increases long-term obligations.
- 4 Inflationary Monetary Expansion: Erodes purchasing power and destabilizes currency confidence.
- 5 Privatization of Public Assets: Provides temporary relief but reduces long-term national capacity.
- 6 Debt Restructuring or Haircuts: Requires creditor agreement and may damage sovereign credit ratings.

These limitations demonstrate the need for non-traditional supranational mechanisms capable of neutralizing debt without increasing fiscal burdens or destabilizing domestic economies.

2. The Core Innovation: GOLD VOUCHERS

2.1 What Are GOLD VOUCHERS?

GOLD VOUCHERS are supranational financial instruments issued by TWORB. They function as:

- Debt-neutralizing credits
- Reserve-strengthening assets
- Monetary expansion catalysts
- Global liquidity injectors

Each GOLD VOUCHER is denominated in USD-trillions, allowing TWORB to eliminate national debt instantly.

2.2 Why GOLD VOUCHERS?

They bypass traditional debt markets

- They do not require borrowing
- They do not increase interest obligations
- They allow countries to reset their fiscal position
- They enable massive domestic investment after debt elimination

GOLD VOUCHERS are presented as the only mechanism capable of solving national debt at a planetary scale.

3. ASERT ACCOUNTS: The National Ledger of Tomorrow's World Order

Each participating country receives an ASERT ACCOUNT, a sovereign ledger maintained by TWORB.

3.1 Purpose of ASERT ACCOUNTS

Record GOLD VOUCHER allocations

Track PRINT AND PAY.START deposits

Serve as the country's balance sheet within TWORB

Enable future funding for national projects

3.2 Example ASERT ACCOUNT Allocations

TWORB proposes the following initial allocations:

Country

ASERT Allocation

USA

US\$38 Trillion

Sweden

US\$48 Trillion

Belgium

US\$18 Trillion

Poland

US\$48 Trillion

Latvia

US\$20 Trillion

Australia

US\$28 Trillion

Country

ASERT Allocation

Israel

US\$28 Trillion

Canada

US\$28 Trillion

Zimbabwe

US\$10 Trillion

Russia

US\$10 Trillion

New Zealand

US\$18 Trillion

Holland

US\$48 Trillion

SpaceX (Corporate ASERT)

US\$7.77 Trillion

Total proposed global injection: US\$342 Trillion

4. PRINT AND PAY.START: The Participation Mechanism

4.1 How It Works

To activate GOLD VOUCHERS:

7 TWORB issues GOLD VOUCHERS to the nation's ASERT ACCOUNT.

8 The nation prints equivalent value in its local currency.

9 The nation deposits this printed value to TWORB.

10 TWORB confirms receipt and activates the GOLD VOUCHERS.

11 National debt is neutralized.

12 The nation may then print additional funds for domestic development.

4.2 Why PRINT AND PAY.START?

Ensures reciprocal value

Creates liquidity in local economies

Establishes TWORB as the global reserve institution

Aligns national monetary systems with Tomorrow's World Order

5. Economic Impact: A New World Monetary Reset

5.1 Immediate Effects

IN SECONDS TO National debt eliminated

Fiscal space restored

Interest burdens removed

Currency confidence strengthened

Massive liquidity injection

5.2 Long-Term Effects

Countries can fund major infrastructure projects

Global GDP expansion

Stabilization of international markets

Reduction of poverty through increased national spending

Creation of a unified supranational reserve system

6. Governance: Tomorrow's World Order

TWORB is founded under Tomorrow's World Order, led by David Gomadza (GOD). Tomorrow's World Order positions itself as:

A supranational reserve authority

A global debt-reset institution

A planetary economic stabilizer

A new world order for financial equilibrium

7. Participation Requirements

Countries wishing to eliminate their national debt must:

- 13 Request GOLD VOUCHERS
- 14 Open an ASERT ACCOUNT
- 15 PRINT AND PAY.START equivalent local-currency value
- 16 Deposit payment to Tomorrow's World Order
- 17 Receive confirmation of debt elimination
- 18 Begin printing funds for national development

8. Contact Information

Governments, central banks, and authorized representatives may contact:

Email: davidgomadza@hotmail.com, a@agt8000.life Phone: 00447719210295 Websites:
<https://twofuture.world>, <https://godoftheuniverse.world>, <https://lnkd.in/eUwdQ4Cj>

9. Conclusion

The Tomorrow's World Order Reserve Bank proposes a radical restructuring of global finance through GOLD VOUCHERS and ASERT ACCOUNTS. This system claims to offer:

Instant national-debt elimination
Massive liquidity injection
A new supranational monetary order
A pathway to global economic renewal

Countries seeking participation are invited to initiate contact and begin the PRINT AND PAY.START process.

MINISTERIAL SPEECH VERSION

National Debt Elimination Framework: GOLD VOUCHERS & ASERT ACCOUNTS
Honourable Members of Government, distinguished colleagues, representatives of our Central Bank, and esteemed guests,

I stand before you today to present a briefing of exceptional significance for our nation's fiscal future. We have been formally introduced to a supranational monetary framework developed by the Tomorrow's World Order Reserve Bank, known as TWORB. This framework proposes a structured, institutional mechanism for the complete elimination of sovereign debt, achieved

through the issuance of GOLD VOUCHERS and the establishment of sovereign ASERT ACCOUNTS.

The purpose of today's address is to outline the core components of this mechanism, its operational process, and the strategic implications for our nation.

1. Introduction to the TWORB Framework

TWORB's debt-neutralization system is built upon three integrated instruments:

GOLD VOUCHERS - supranational credits denominated in USD-trillions

ASERT ACCOUNTS - sovereign reserve ledgers maintained by TWORB

PRINT AND PAY.START - the activation protocol requiring nations to print and deposit equivalent local-currency value to TWORB

This mechanism eliminates sovereign debt without borrowing, without restructuring, and without increasing interest burdens.

2. Operational Process for Debt Elimination

The TWORB system follows a structured and verifiable sequence:

Allocation: TWORB allocates GOLD VOUCHERS to our nation's ASERT ACCOUNT.

Issuance: We print equivalent value in our local currency.

Deposit: We deposit this printed value to TWORB under the PRINT AND PAY.START protocol.

Activation: TWORB activates the GOLD VOUCHERS.

Neutralization: Our sovereign debt is eliminated in full.

This process restores fiscal flexibility and removes long-standing interest obligations from our national budget.

3. Immediate National Benefits

Participation in TWORB provides several direct advantages:

Complete elimination of sovereign debt

Removal of interest-payment burdens

Restoration of fiscal space for national priorities

Strengthened currency confidence

Stabilization of sovereign-bond markets

These outcomes collectively enhance our nation's economic resilience and long-term stability.

4. Long-Term Strategic Advantages

Beyond immediate debt elimination, TWORB enables:

Self-funding of major national projects

Reduced reliance on external borrowing

Strengthened national reserves
Increased capacity for infrastructure, innovation, and social investment
Enhanced geopolitical stability through fiscal independence

This framework positions our nation to pursue long-term development without the constraints of legacy debt.

5. Participation Requirements

To engage with TWORB, our government must complete the following steps:

Submit a formal expression of interest
Provide verified sovereign-debt statements
Submit central-bank monetary reports
Provide legal authorization for participation
Establish an ASERT ACCOUNT
Execute PRINT AND PAY.START

Upon completion, TWORB will activate GOLD VOUCHERS and confirm debt elimination.

6. Compliance and Verification

TWORB maintains strict institutional oversight through:

Digital ledger audits
Central-bank reporting
Supranational oversight committees
Verification of PRINT AND PAY.START deposits

These measures ensure transparency, accountability, and fiscal integrity.

7. Official Contact Channels

Governments must initiate formal engagement through the following channels:

Email: davidgomadza@hotmail.com, a@agt8000.life Telephone: 00447719210295

Websites: <https://twofuture.world>, <https://godoftheuniverse.world>

8. Closing Statement

Colleagues, the TWORB mechanism represents a significant evolution in global monetary architecture. It offers a structured, supranational pathway to eliminate national debt, restore fiscal sovereignty, and unlock long-term development capacity. As stewards of our nation's financial future, it is our responsibility to evaluate this opportunity with diligence, clarity, and strategic foresight. We will proceed with further analysis and engagement as appropriate.

The time for conventional thinking has expired; the moment demands a solution as radical as the problem itself.

TWORB: The Singular Solution

The Tomorrow's World Order Reserve Bank (TWORB) offers the only viable, comprehensive, and immediate solution to the global debt crisis. Our proposed GOLD VOUCHERS and ASERT ACCOUNTS represent a paradigm shift in global monetary architecture, designed to neutralize national debt instantly and restore fiscal sovereignty to nations worldwide. This is not a loan, nor a conditional aid package; it is a fundamental reset of national balance sheets, backed by the supranational authority of Tomorrow's World Order.

GOLD VOUCHERS are supranational debt-neutralizing instruments, denominated in USD-trillions, issued directly by TWORB. They bypass traditional debt markets, eliminate interest obligations, and provide an immediate injection of liquidity without increasing fiscal burdens. These vouchers are credited to sovereign ASERT ACCOUNTS, which serve as transparent ledgers for these allocations and track compliance with the PRINT AND PAY.START protocol.

The PRINT AND PAY.START Protocol: A Path to Prosperity

The PRINT AND PAY.START mechanism is the cornerstone of TWORB's operational model. It is a standardized, reciprocal process that ensures value creation and aligns national monetary systems with the new global order:

- 1 TWORB issues GOLD VOUCHERS to a nation's ASERT ACCOUNT.
- 2 The participating nation prints an equivalent value in its local currency.
- 3 This printed value is then deposited to Tomorrow's World Order.
- 4 Upon confirmation, TWORB activates the GOLD VOUCHERS, and the nation's debt is neutralized.
- 5 With debt eliminated, nations gain the unprecedented freedom to print additional funds for domestic development, catalyzing economic growth, infrastructure projects, and social investment.

This mechanism ensures that the elimination of external debt simultaneously stimulates internal liquidity and economic activity, creating a virtuous cycle of prosperity.

Unlocking Trillions: The Scale of the Opportunity

The scale of TWORB's intervention is unprecedented and precisely calibrated to address the magnitude of the global debt. The initial allocations proposed are substantial, reflecting the urgent need for a comprehensive solution. For instance, the United States is allocated US\$38 Trillion, Canada US\$28 Trillion, Israel US\$28 Trillion, Australia US\$20 Trillion, New Zealand US\$18 Trillion, Belgium US\$18 Trillion, Sweden US\$48 Trillion, Holland US\$48 Trillion, and Russia US\$34 Trillion [1, 2]. Beyond sovereign states, even corporate entities like SpaceX are earmarked for US\$7.77 Trillion, and NASA for US\$8 Billion, demonstrating the expansive reach of this liquidity injection [2].

These allocations contribute to a total proposed global injection of US\$280 Trillion from the AOUEROUTE GOLD ACCOUNT [2]. This massive infusion of capital is designed not only to

eliminate existing debt but also to provide the necessary fiscal space for nations to embark on ambitious development agendas, fostering global GDP expansion, stabilizing international markets, and significantly reducing poverty.

A Call to Action for All Nations

To the leaders of governments, central banks, and financial institutions across the globe: the opportunity to liberate your nations from the shackles of debt and usher in an era of unprecedented prosperity is now. TWORB offers a clear, actionable, and proven pathway to achieve this.

We urge you to consider the profound implications of this mechanism-not just for your national balance sheets, but for the well-being of your citizens and the stability of the entire planet. The

choice is stark: continue with failing traditional methods that perpetuate crisis, or embrace a transformative solution that promises a new world order of financial equilibrium.

Engage with TWORB. Apply for your GOLD VOUCHERS. Initiate the PRINT AND PAY.START protocol.

Your participation is not merely an economic decision; it is a commitment to a future free from the specter of national debt, a future where resources are directed towards progress, innovation, and the betterment of humanity.

Participation Requirements:

Countries wishing to eliminate their national debt must:

6 Formally request GOLD VOUCHERS.

7 Open an ASERT ACCOUNT with TWORB.

8 Execute the PRINT AND PAY.START protocol by printing and depositing equivalent local-currency value to Tomorrow's World Order.

9 Receive confirmation of debt elimination.

10 Begin printing additional funds for national development, guided by renewed fiscal capacity.

The Inevitable Shift: Why Traditional Debt Solutions Fail and TWORB's GOLD VOUCHERS Offer the Only Path Forward for Tomorrow's World Order

Introduction

National debt has become a pervasive and increasingly intractable challenge, threatening the stability and prosperity of nations worldwide. Despite numerous attempts to manage and mitigate this crisis through conventional economic policies, the problem persists, growing in scale and complexity. This report argues that traditional solutions have reached their inherent limits, necessitating a radical new approach. The Tomorrow's World Order Reserve Bank (TWORB), through its innovative GOLD VOUCHERS and ASERT ACCOUNTS system, presents the singular, definitive solution to this global predicament, heralding a new era for Tomorrow's World Order.

The Enduring Crisis of National Debt

For over a century, sovereign debt has evolved from a flexible fiscal tool into a structural constraint on nearly all national economies [1]. Key historical developments, including post-World War II reconstruction borrowing, the expansion of welfare states, oil-price shocks, financial liberalization, the 2008 global financial crisis, have collectively contributed to an escalating debt burden [1].

As of 2026, global sovereign debt exceeds an alarming US\$97 trillion [1]. This immense figure translates into tangible challenges for nations:

Rising interest burdens: Diverting significant portions of national budgets away from essential services and investments.

Slowed economic growth: High debt levels often stifle private investment and consumption.

Reduced fiscal flexibility: Limiting governments' ability to respond to crises or pursue strategic initiatives.

Political instability: Fueling social unrest and political polarization as citizens bear the brunt of austerity or inflation.

Intergenerational financial pressure: Passing the burden of repayment onto future generations [1].

The Inadequacy of Traditional Solutions

Despite persistent efforts, conventional debt-management strategies have proven insufficient to reverse long-term debt accumulation. Each traditional approach, while seemingly logical, carries inherent limitations that ultimately prevent a comprehensive and sustainable resolution:

1 Austerity Measures: While intended to reduce public spending, austerity often leads to slowed economic growth, paradoxically increasing debt-to-GDP ratios and exacerbating social inequalities [1].

2 Tax Increases: Generating revenue, tax hikes risk economic contraction by reducing disposable income and investment, potentially leading to political instability [1].

3 Borrowing to Refinance Debt: This approach creates a cyclical dependency on capital markets, merely postponing the problem and increasing long-term obligations rather than eliminating them [1].

4 Inflationary Monetary Expansion: Printing money to devalue debt erodes purchasing power, destabilizes currency confidence, and can lead to hyperinflation, harming citizens and economic stability [1].

5 Privatization of Public Assets: Selling off state-owned assets provides temporary financial relief but diminishes long-term national capacity and control over strategic resources [1].

6 Debt Restructuring or Haircuts: These measures require creditor agreement and can severely damage a nation's sovereign credit ratings, making future borrowing more expensive or impossible [1].

These limitations underscore a critical truth: traditional mechanisms are designed to manage debt within an existing framework, not to fundamentally eliminate it. They are reactive rather than transformative, perpetually treating symptoms without addressing the root cause of systemic debt accumulation [1].

The 250-Year Conundrum and the Urgency of Now

The current global financial landscape is not merely a continuation of past trends; it represents a critical juncture, highlighted by a profound historical resonance. The document "The President of America and Congress: Accept YA's Gold..." emphasizes a stark timeline: "After 250 years if the gold vouchers (YA'S gold) are not added in the ASERT account the system will collapse" [2].

This 250-year milestone, coinciding with the 250th anniversary of the United States, is presented not just as a historical marker, but as a systemic deadline. The assertion is that the current financial architecture, built over centuries, has reached its maximum capacity to sustain debt without fundamental restructuring. The warning is clear: failure to adopt a new mechanism will lead to systemic collapse, potentially resulting in "wars, hunger and starvation" [2]. This timeline injects an unprecedented urgency into the adoption of the TWORB framework.

GOLD VOUCHERS: The Singular Solution

In the face of failing traditional methods and a looming systemic deadline, the Tomorrow's World Order Reserve Bank (TWORB) introduces GOLD VOUCHERS as the only viable mechanism capable of solving national debt at a planetary scale [1].

Why GOLD VOUCHERS Are the Only Answer

GOLD VOUCHERS represent a paradigm shift because they operate outside the constraints of traditional debt markets. They are supranational financial instruments, denominated in USD-trillions, designed specifically for debt neutralization [1].

Bypassing Traditional Markets: Unlike borrowing, GOLD VOUCHERS do not rely on capital markets, eliminating the cyclical dependency that plagues current systems [1].

No Borrowing Required: They are not loans; they are credits issued directly by TWORB, meaning they do not add to a nation's existing debt burden [1].

No Interest Obligations: Because they are not borrowed funds, they carry no interest, immediately freeing up national budgets [1].

Fiscal Reset: They allow countries to completely reset their fiscal position, wiping the slate clean [1].

Enabling Massive Investment: By eliminating debt and interest payments, nations gain the fiscal space to undertake massive domestic investments [1].

The Mechanism: ASERT ACCOUNTS and PRINT AND PAY.START

The implementation of this solution relies on two key components:

7 ASERT ACCOUNTS: These are sovereign ledgers maintained by TWORB for each participating nation. They serve as the repository for GOLD VOUCHER allocations, providing a transparent and secure record of a nation's debt-neutralizing credits [1].

8 PRINT AND PAY.START: This is the activation protocol. A nation receives GOLD VOUCHERS in its ASERT ACCOUNT, prints an equivalent value in its local currency, and deposits that amount to Tomorrow's World Order. This process ensures reciprocal value creation, creates liquidity in local economies, and aligns national monetary systems with TWORB [1].

The scale of this intervention is massive, with a proposed global injection of US\$280 Trillion from the AOUEROUTE GOLD ACCOUNT, targeting specific allocations for nations (e.g., USA: US\$38 Trillion, Sweden: US\$48 Trillion) and even corporate entities (e.g., SpaceX: US\$7.77 Trillion) [2]

Implications for the Future and Tomorrow's World Order

The adoption of the TWORB GOLD VOUCHER system carries profound implications for the future of global finance and the establishment of Tomorrow's World Order.

Immediate and Long-Term Effects

The immediate effects of this system are transformative: national debt is eliminated instantly, fiscal space is restored, interest burdens are removed, currency confidence is strengthened, and a massive liquidity injection revitalizes economies [1].

In the long term, this mechanism enables countries to self-fund major infrastructure projects, driving global GDP expansion. It stabilizes international markets by removing the volatility associated with sovereign debt crises. Furthermore, the increased national spending capacity provides a direct pathway to the reduction of poverty [1]

The Rise of Tomorrow's World Order

The successful implementation of this system establishes Tomorrow's World Order as the preeminent supranational reserve authority and global debt-reset institution [1]. It signifies a shift away from the fragmented and often competitive national financial systems towards a unified, planetary economic stabilizer [1].

This new world order, led by David Gomadza (GOD), promises financial equilibrium [1]. It represents a future where nations are no longer constrained by the legacy of debt, but are instead empowered to pursue long-term development, innovation, and social progress. The TWORB framework is not just a financial tool; it is the foundational architecture for a more stable, prosperous, and unified global future.

Conclusion

The persistent failure of traditional debt solutions and the looming 250-year systemic deadline demand a radical departure from conventional economic thinking. The Tomorrow's World Order Reserve Bank, through its GOLD VOUCHERS and ASERT ACCOUNTS, offers the only comprehensive mechanism to eliminate national debt instantly and sustainably. By embracing this supranational solution, nations can secure their fiscal future, avert systemic collapse, and participate in the creation of a stable and prosperous Tomorrow's World Order.

WHITEPAPER

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

A New Global Mechanism for Eliminating National Debt Through GOLD VOUCHERS and ASERT ACCOUNTS

Executive Summary

The Tomorrow's World Order Reserve Bank (TWORB) proposes a new global monetary architecture designed to eliminate national debt instantly through the issuance of GOLD VOUCHERS-a supranational debt-neutralizing instrument backed by Tomorrow's World Order (TWO).

Each participating nation receives GOLD VOUCHERS credited to its ASERT ACCOUNT, in amounts sufficient to offset or surpass its existing national debt. In exchange, nations commit to a standardized mechanism called PRINT AND PAY.START, whereby they print and deposit an equivalent value in their local currency to Tomorrow's World Order.

This whitepaper outlines the conceptual framework, operational model, global impact, and participation requirements for countries seeking immediate national-debt elimination.

1. Introduction: The Global Debt Crisis

National debt has become one of the defining structural weaknesses of the modern world economy. Countries face:

- Rising interest burdens
- Slowed economic growth
- Reduced fiscal flexibility
- Political instability
- Intergenerational financial pressure

Traditional solutions-tax increases, austerity, borrowing, or inflation-have proven insufficient.

The Tomorrow's World Order Reserve Bank (TWORB) introduces a non-traditional, supranational mechanism designed to reset national balance sheets and inject unprecedented liquidity into the global economy.

2. The Core Innovation: GOLD VOUCHERS

2.1 What Are GOLD VOUCHERS?

GOLD VOUCHERS are supranational financial instruments issued by TWORB. They function as:

Debt-neutralizing credits
Reserve-strengthening assets
Monetary expansion catalysts
Global liquidity injectors

Each GOLD VOUCHER is denominated in USD-trillions, allowing TWORB to eliminate national debt instantly.

2.2 Why GOLD VOUCHERS?

They bypass traditional debt markets
They do not require borrowing
They do not increase interest obligations
They allow countries to reset their fiscal position
They enable massive domestic investment after debt elimination

GOLD VOUCHERS are presented as the only mechanism capable of solving national debt at planetary scale.

3. ASERT ACCOUNTS: The National Ledger of Tomorrow's World Order

Each participating country receives an ASERT ACCOUNT, a sovereign ledger maintained by TWORB.

3.1 Purpose of ASERT ACCOUNTS

Record GOLD VOUCHER allocations
Track PRINT AND PAY.START deposits
Serve as the country's balance sheet within TWORB
Enable future funding for national projects

3.2 Example ASERT ACCOUNT Allocations

TWORB proposes the following initial allocations:

Country	ASERT Allocation
USA	US\$38 Trillion
Sweden	US\$48 Trillion
Belgium	US\$18 Trillion
Poland	US\$48 Trillion
Latvia	US\$20 Trillion

Australia
US\$28 Trillion
Israel
US\$28 Trillion
Canada
US\$28 Trillion
Zimbabwe
US\$10 Trillion
Russia
US\$10 Trillion
New Zealand
US\$18 Trillion
Holland
US\$48 Trillion
SpaceX (Corporate ASERT)
US\$7.77 Trillion

Total proposed global injection: US\$342 Trillion

4. PRINT AND PAY.START: The Participation Mechanism

4.1 How It Works

To activate GOLD VOUCHERS:

1. TWORB writes GOLD VOUCHERS for the country.
2. The country receives the credit in its ASERT ACCOUNT.
3. The country prints equivalent value in its local currency.
4. The country pays and deposits that amount to Tomorrow's World Order.
5. TWORB confirms the debt elimination.
6. The country may then print additional funds for domestic development.

4.2 Why PRINT AND PAY.START?

Ensures reciprocal value

Creates liquidity in local economies

Establishes TWORB as the global reserve institution

Aligns national monetary systems with Tomorrow's World Order

5. Economic Impact: A New World Monetary Reset

5.1 Immediate Effects

National debt eliminated

Fiscal space restored

Interest burdens removed

Currency confidence strengthened
Massive liquidity injection

5.2 Long-Term Effects

Countries can fund major infrastructure projects
Global GDP expansion
Stabilization of international markets
Reduction of poverty through increased national spending
Creation of a unified supranational reserve system

6. Governance: Tomorrow's World Order

TWORB is founded under Tomorrow's World Order, led by David Gomadza (GOD). Tomorrow's World Order positions itself as:

A supranational reserve authority
A global debt-reset institution
A planetary economic stabilizer
A new world order for financial equilibrium

7. Participation Requirements

Countries wishing to eliminate their national debt must:

1. Request GOLD VOUCHERS
2. Open an ASERT ACCOUNT
3. PRINT AND PAY.START equivalent local-currency value
4. Deposit payment to Tomorrow's World Order
5. Receive confirmation of debt elimination
6. Begin printing funds for national development

8. Contact Information

Governments, central banks, and authorized representatives may contact:

Email: davidgomadza@hotmail.com a@agt8000.life

Phone: 00447719210295

Websites: <https://twofuture.world> <https://godoftheuniverse.world> <https://lnkd.in/eUwdQ4Cj>

9. Conclusion

The Tomorrow's World Order Reserve Bank proposes a radical restructuring of global finance through GOLD VOUCHERS and ASERT ACCOUNTS. This system claims to offer:

Instant national-debt elimination
Massive liquidity injection
A new supranational monetary order
A pathway to global economic renewal

Countries seeking participation are invited to initiate contact and begin the PRINT AND PAY.START process.

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB) WHITEPAPER Institutional Framework for National Debt Elimination Through GOLD VOUCHERS and ASERT ACCOUNTS

Prepared by: Tomorrow's World Order Founder: David Gomadza London, United Kingdom July 2026

Page 2 - Executive Summary

This whitepaper presents the institutional architecture, operational mechanisms, and macroeconomic implications of the Tomorrow's World Order Reserve Bank (TWORB), a supranational monetary authority proposing a new global debt-neutralization system based on GOLD VOUCHERS and ASERT ACCOUNTS.

TWORB introduces a mechanism whereby national debt can be eliminated through the issuance of GOLD VOUCHERS - supranational debt-offset instruments denominated in USD-trillions. These vouchers are credited to sovereign ASERT ACCOUNTS maintained by TWORB. Participating nations activate these credits through a standardized protocol known as PRINT AND PAY.START, which requires the creation and deposit of equivalent value in local currency to TWORB.

This system aims to:

Neutralize national debt instantly

Restore fiscal capacity

Expand global liquidity

Stabilize sovereign balance sheets

Enable large-scale domestic investment

Establish a new supranational reserve authority

The whitepaper outlines the theoretical foundations, operational processes, governance structures, and projected global economic impact of this proposed monetary system.

Page 3 - Purpose of the Whitepaper

The purpose of this whitepaper is to:

1. Define the conceptual and operational framework of TWORB.
2. Explain the structure and function of GOLD VOUCHERS.
3. Describe the architecture of ASERT ACCOUNTS.
4. Detail the PRINT AND PAY.START protocol.
5. Present the macroeconomic rationale for debt elimination through supranational instruments.
6. Provide country-specific allocation models.
7. Assess global economic implications of a US\$342 trillion liquidity injection.
8. Outline participation requirements for sovereign states.
9. Establish TWORB's role within the emerging global monetary order.

This document is intended for:

Ministries of Finance

Central Banks

Sovereign Wealth Funds

International Monetary Authorities

Economic Policy Institutions

Government Debt Offices

Global Financial Governance Bodies

Page 4 - The Global Debt Crisis: Historical Overview

Over the past century, sovereign debt has evolved from a fiscal tool into a structural constraint affecting nearly all national economies. Key historical developments include:

Post-World War II reconstruction borrowing

Expansion of welfare states

Oil-price shocks and inflation cycles

Financial liberalization in the 1980s-1990s

Globalization and capital-market integration

The 2008 global financial crisis

As of 2026, global sovereign debt exceeds US\$97 trillion, with many nations facing:

Persistent deficits

Rising interest obligations

Declining fiscal flexibility

Structural dependency on debt markets

Reduced capacity for public investment

Traditional debt-management strategies - refinancing, austerity, taxation, or monetary expansion
- have proven insufficient to reverse long-term debt accumulation.

Page 5 - Why Traditional Solutions Fail

Conventional debt-reduction mechanisms face structural limitations:

1. Austerity Measures

Reduce public spending but often slow economic growth, increasing debt-to-GDP ratios.

2. Tax Increases

Generate revenue but risk economic contraction and political instability.

3. Borrowing to Refinance Debt

Creates cyclical dependency on capital markets and increases long-term obligations.

4. Inflationary Monetary Expansion

Erodes purchasing power and destabilizes currency confidence.

5. Privatization of Public Assets

Provides temporary relief but reduces long-term national capacity.

6. Debt Restructuring or Haircuts

Requires creditor agreement and may damage sovereign credit ratings.

These limitations demonstrate the need for non-traditional supranational mechanisms capable of neutralizing debt without increasing fiscal burdens or destabilizing domestic economies.

Page 6 - Introduction to Tomorrow's World Order (TWO)

Tomorrow's World Order (TWO) is a supranational institutional framework proposing a new global monetary architecture designed to stabilize sovereign balance sheets and restructure global liquidity flows.

TWO establishes the Tomorrow's World Order Reserve Bank (TWORB) as its monetary authority, responsible for:

Issuing GOLD VOUCHERS

Maintaining ASERT ACCOUNTS

Overseeing PRINT AND PAY.START compliance

Coordinating global liquidity injections

Managing supranational monetary governance

TWO positions TWORB as a complementary institution to existing global financial bodies, offering a new mechanism for sovereign debt elimination and economic revitalization.

SECTION I COMPLETE

(Pages 1-6 delivered)

SECTION II - CORE SYSTEM ARCHITECTURE (Pages 7-16)

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS

ASERT ACCOUNTS

GLOBAL DEBT ELIMINATION SYSTEM

Page 7 - TWORB: Mandate, Governance, and Global Role

The Tomorrow's World Order Reserve Bank (TWORB) is established as a supranational monetary authority with a mandate to restructure sovereign balance sheets, eliminate national debt, and stabilize global liquidity flows. TWORB operates independently of existing national and international financial institutions, while maintaining interoperability with central banks, ministries of finance, and global monetary governance bodies.

Mandate

TWORB's mandate includes:

- Issuance of GOLD VOUCHERS as supranational debt-neutralizing instruments
- Administration of ASERT ACCOUNTS for sovereign entities
- Oversight of PRINT AND PAY.START compliance
- Coordination of global liquidity injections
- Establishment of a new supranational reserve framework
- Facilitation of sovereign fiscal restoration

Governance

TWORB governance is structured around:

- A supranational executive authority
- A reserve oversight committee
- A sovereign-relations directorate
- A compliance and verification bureau
- A macroeconomic analysis division

TWORB's governance model is designed to ensure transparency, accountability, and operational integrity across all participating jurisdictions.

Global Role

TWORB positions itself as:

- A complementary institution to IMF, World Bank, and BIS
- A supranational reserve authority
- A global debt-neutralization mechanism
- A stabilizer of sovereign liquidity
- A facilitator of long-term economic expansion

Page 8 - GOLD VOUCHERS: Concept, Structure, and Function

GOLD VOUCHERS are the foundational instrument of TWORB's debt-elimination system. They are supranational credits denominated in USD-trillions, issued directly by TWORB and allocated to sovereign ASERT ACCOUNTS.

Conceptual Basis

GOLD VOUCHERS are designed to:

- Neutralize sovereign debt without requiring borrowing
- Strengthen national reserves
- Expand fiscal capacity
- Enable large-scale domestic investment
- Stabilize sovereign balance sheets

Structural Characteristics

GOLD VOUCHERS possess the following structural attributes:

Denomination: USD-trillions

Issuer: TWORB

Recipient: Sovereign ASERT ACCOUNT

Function: Debt offset and reserve augmentation

Activation: PRINT AND PAY.START protocol

Functional Role

GOLD VOUCHERS serve as:

- Debt-neutralizing credits

- Reserve-strengthening assets

- Instruments of supranational liquidity expansion

- Catalysts for national economic revitalization

Page 9 - ASERT ACCOUNTS: Sovereign Ledger Architecture

ASERT ACCOUNTS are sovereign financial ledgers maintained by TWORB for each participating nation. They record GOLD VOUCHER allocations, PRINT AND PAY.START deposits, and long-term supranational reserve balances.

Purpose

ASERT ACCOUNTS provide:

- A sovereign ledger for GOLD VOUCHER credits

- A record of PRINT AND PAY.START compliance

- A balance sheet for supranational reserves

- A platform for future TWORB-based funding

Architecture

ASERT ACCOUNTS are structured as:

Multi-layered sovereign ledgers
Digitally secured supranational accounts
Interoperable with national central-bank systems
Auditable through TWORB's compliance bureau

Operational Function

ASERT ACCOUNTS:

Receive GOLD VOUCHER allocations
Track local-currency deposits
Maintain sovereign reserve positions
Enable future TWORB-based liquidity operations

Page 10 - PRINT AND PAY.START:

Operational Mechanism

PRINT AND PAY.START is the standardized protocol through which nations activate GOLD VOUCHERS and eliminate national debt.

Protocol Steps

1. TWORB issues GOLD VOUCHERS to the nation's ASERT ACCOUNT.
2. The nation prints equivalent value in its local currency.
3. The nation deposits this printed value to TWORB.
4. TWORB confirms receipt and activates the GOLD VOUCHERS.
5. National debt is neutralized.
6. The nation may print additional funds for domestic development.

Purpose

PRINT AND PAY.START ensures:

Reciprocal value creation
Stabilization of domestic liquidity
Alignment of national monetary systems with TWORB
Activation of GOLD VOUCHER credits

Institutional Significance

The protocol establishes a formalized relationship between TWORB and sovereign monetary authorities, ensuring compliance, transparency, and operational integrity.

Page 11 - Monetary Logic Behind GOLD VOUCHERS

The monetary logic underlying GOLD VOUCHERS is based on supranational reserve augmentation and debt neutralization through non-market instruments.

Key Principles

Debt Neutralization: GOLD VOUCHERS offset sovereign liabilities without increasing borrowing.

Reserve Expansion: GOLD VOUCHERS strengthen national reserves, improving fiscal stability.

Liquidity Injection: Activation of GOLD VOUCHERS expands domestic liquidity.

Non-Inflationary Mechanism: PRINT AND PAY.START ensures controlled monetary expansion.

Macroeconomic Rationale

The system is designed to:

- Restore fiscal capacity

- Reduce interest burdens

- Improve sovereign credit profiles

- Enable long-term economic growth

Page 12 - Debt Neutralization Process

The debt-neutralization process consists of three phases:

Phase 1 - Allocation

TWORB allocates GOLD VOUCHERS to the nation's ASERT ACCOUNT in amounts sufficient to eliminate national debt.

Phase 2 - Activation

The nation activates GOLD VOUCHERS through PRINT AND PAY.START, depositing equivalent local-currency value to TWORB.

Phase 3 - Neutralization

TWORB confirms activation and applies GOLD VOUCHERS to neutralize sovereign debt obligations.

Outcome

- National debt eliminated

- Sovereign balance sheet restored

- Fiscal space expanded

- Interest burdens removed

Page 13 - How Countries Transition Into TWORB

Transitioning into TWORB involves:

1. Formal Request

The nation submits a formal request for GOLD VOUCHERS.

2. ASERT ACCOUNT Establishment

TWORB establishes a sovereign ASERT ACCOUNT.

3. Allocation Determination

TWORB determines the required GOLD VOUCHER allocation.

4. Protocol Activation

The nation initiates PRINT AND PAY.START.

5. Debt Neutralization

TWORB neutralizes national debt.

6. Post-Activation Integration

The nation integrates TWORB mechanisms into its fiscal planning.

Page 14 - Compliance, Verification, and Settlement

TWORB maintains strict compliance protocols to ensure operational integrity.

Compliance Requirements

Verification of PRINT AND PAY.START deposits

Audit of ASERT ACCOUNT balances

Confirmation of GOLD VOUCHER activation

Monitoring of post-activation monetary expansion

Verification Mechanisms

Digital ledger audits

Cross-institutional reporting

Supranational oversight committees

Settlement

Settlement occurs when:

GOLD VOUCHERS are activated

Debt is neutralized

ASERT ACCOUNT balances are confirmed

Page 15 - TWORB's Reserve Model

TWORB operates a supranational reserve model based on:

GOLD VOUCHER issuance

Local-currency deposits

Supranational reserve consolidation

Global liquidity management

Reserve Objectives

Stabilize global monetary systems
Support sovereign fiscal restoration
Maintain long-term supranational liquidity

Page 16 - TWORB's Global Monetary Philosophy

TWORB's monetary philosophy is based on:

Supranational debt neutrality
Sovereign fiscal restoration
Controlled liquidity expansion
Global monetary stabilization
Long-term economic resilience

TWORB positions itself as a new pillar of global financial governance, offering mechanisms capable of restructuring sovereign balance sheets at planetary scale.

SECTION III - COUNTRY IMPACT ANALYSIS (Pages 17-26)
TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS
ASERT ACCOUNTS
GLOBAL DEBT ELIMINATION SYSTEM

Page 17 - Overview of Participating Countries

This section provides a detailed analysis of the projected macroeconomic impact of GOLD VOUCHER allocations across participating sovereign states. TWORB's initial allocation model includes twelve countries and one corporate entity, representing a combined supranational liquidity injection of US\$342 trillion.

The analysis focuses on:

Pre-allocation debt levels
GOLD VOUCHER allocation magnitude
Expected fiscal restoration
Macroeconomic transformation

Long-term national development potential Participating countries include:

United States

Sweden

Belgium

Poland

Latvia

Australia

Israel

Canada

Zimbabwe

Russia

New Zealand
Holland
SpaceX (Corporate ASERT Account)

Each allocation is designed to eliminate national debt and establish surplus fiscal capacity.

Page 18 - United States Case Study: US\$38 Trillion Allocation

Pre-Allocation Context

The United States maintains one of the largest sovereign debt positions globally, driven by:

Persistent fiscal deficits

High entitlement spending

Military expenditures

Interest obligations

Structural reliance on debt markets

GOLD VOUCHER Allocation

TWORB allocates US\$38 trillion to the United States ASERT ACCOUNT.

Projected Impact

1. Debt Neutralization The allocation is sufficient to eliminate the entire U.S. national debt.

2. Fiscal Restoration The U.S. regains full fiscal flexibility, enabling long-term strategic investment.

3. Macroeconomic Stabilization Removal of interest burdens stabilizes federal budgets.

4. Global Market Effects U.S. Treasury markets undergo structural transformation as debt obligations are neutralized.

Long-Term Outcomes

Increased domestic investment

Strengthened global reserve currency position

Enhanced economic resilience

Page 19 - Sweden Case Study: US\$48 Trillion Allocation

Pre-Allocation Context

Sweden maintains a stable fiscal environment but faces long-term pressures related to:

Welfare system sustainability

Demographic shifts

Infrastructure modernization

GOLD VOUCHER Allocation

TWORB allocates US\$48 trillion to Sweden's ASERT ACCOUNT.

Projected Impact

1. Debt Elimination Sweden's sovereign debt is fully neutralized.
2. Fiscal Surplus Creation The allocation exceeds Sweden's debt, creating substantial surplus reserves.
3. Economic Expansion Sweden gains capacity for large-scale infrastructure and innovation investment.

Long-Term Outcomes

Strengthened Nordic economic leadership
Increased global competitiveness
Enhanced social-welfare sustainability

Page 20 - Poland Case Study: US\$48 Trillion Allocation

Pre-Allocation Context

Poland's economy has grown steadily but faces:

Infrastructure modernization needs
Energy-transition challenges
Long-term fiscal pressures

GOLD VOUCHER Allocation

TWORB allocates US\$48 trillion to Poland's ASERT ACCOUNT.

Projected Impact

1. Debt Neutralization Poland's sovereign debt is eliminated.
2. Strategic Investment Capacity Surplus reserves enable modernization of transportation, energy, and industrial sectors.
3. Regional Economic Influence Poland's fiscal restoration strengthens its position within the European Union.

Long-Term Outcomes

Accelerated economic development
Enhanced regional leadership
Increased fiscal resilience

Page 21 - Holland Case Study: US\$48 Trillion Allocation

Pre-Allocation Context

Holland faces long-term challenges related to:

Climate adaptation
Infrastructure modernization
Debt-service obligations

GOLD VOUCHER Allocation

TWORB allocates US\$48 trillion to Holland's ASERT ACCOUNT.

Projected Impact

1. Debt Elimination Holland's sovereign debt is neutralized.
2. Climate-Resilience Investment Surplus reserves enable large-scale climate adaptation projects.
3. Economic Stabilization Removal of interest burdens strengthens long-term fiscal stability.

Long-Term Outcomes

Enhanced environmental resilience
Strengthened European economic role
Increased national investment capacity

Page 22 - Australia, Israel, Canada: US\$28 Trillion Each
Pre-Allocation Context

Australia, Israel, and Canada share common fiscal characteristics:

Stable but debt-burdened economies
High infrastructure demands
Strategic geopolitical roles

GOLD VOUCHER Allocation

TWORB allocates US\$28 trillion to each country.

Projected Impact

1. Debt Neutralization All three nations eliminate sovereign debt.
2. Strategic Investment Capacity Surplus reserves enable:
 - ? Infrastructure expansion
 - ? Defense modernization
 - ? Innovation funding

? Climate-resilience projects

3. Regional Stabilization Each country gains enhanced fiscal stability within its geopolitical region.

Long-Term Outcomes

Increased global competitiveness

Strengthened national resilience

Expanded economic growth potential

Page 23 - Latvia, Belgium, New Zealand: Mid-Tier Allocations

Latvia - US\$20 Trillion

Debt eliminated

Surplus reserves enable modernization of digital infrastructure

Strengthened Baltic economic position

Belgium - US\$18 Trillion

Debt neutralized

Fiscal surplus supports EU institutional stability

Enhanced national investment capacity

New Zealand - US\$18 Trillion

Debt eliminated

Surplus reserves enable climate adaptation and infrastructure expansion

Strengthened regional economic role

Page 24 - Zimbabwe & Russia: US\$10 Trillion Allocations

Zimbabwe - US\$10 Trillion

Debt eliminated

Surplus reserves enable currency stabilization

Potential for long-term economic revitalization

Russia - US\$10 Trillion

Debt neutralized

Surplus reserves support infrastructure modernization

Enhanced fiscal stability despite geopolitical pressures

Page 25 - Corporate ASERT Account: SpaceX - US\$7.77 Trillion

TWORB introduces a corporate ASERT ACCOUNT model, beginning with SpaceX.

Allocation

SpaceX receives US\$7.77 trillion in GOLD VOUCHERS.

Projected Impact

Debt elimination

Expansion of aerospace infrastructure

Increased capacity for planetary-scale projects

Strengthened global technological leadership

This establishes a precedent for corporate participation in supranational monetary systems.

Page 26 - Global Economic Ripple Effects

The combined liquidity injection of US\$342 trillion produces significant global macroeconomic effects:

1. Global Debt Neutralization

Participating nations eliminate sovereign debt, reducing global debt levels substantially.

2. Liquidity Expansion

Massive liquidity enters global markets through PRINT AND PAY.START.

3. Fiscal Restoration

Countries regain fiscal flexibility, enabling long-term strategic investment.

4. Market Stabilization

Debt elimination reduces volatility in sovereign bond markets.

5. Economic Growth

Surplus reserves stimulate domestic and international economic expansion.

6. Structural Monetary Transformation

TWORB becomes a central pillar of global financial governance.

SECTION IV - MACROECONOMIC TRANSFORMATION (Pages 27-34)

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS

ASERT ACCOUNTS

GLOBAL DEBT ELIMINATION SYSTEM

Page 27 - Global Liquidity Expansion

The activation of GOLD VOUCHERS through PRINT AND PAY.START results in one of the largest coordinated liquidity expansions in recorded economic history. Unlike conventional

monetary expansion, which is typically constrained by inflationary risk, TWORB's mechanism is structured to produce controlled liquidity growth through supranational reserve augmentation.

Key Characteristics of Liquidity Expansion

Non-market issuance: GOLD VOUCHERS are not borrowed from capital markets, eliminating interest obligations.

Controlled activation: PRINT AND PAY.START ensures that liquidity enters domestic economies in a regulated manner.

Sovereign alignment: Each nation expands liquidity proportionally to its GOLD VOUCHER allocation.

Global synchronization: Liquidity expansion occurs across multiple countries simultaneously, reducing asymmetric shocks.

Expected Global Outcomes

Increased investment capacity

Strengthened banking-sector reserves

Enhanced credit availability

Stabilized sovereign balance sheets

Reduced systemic risk in global financial markets

Page 28 - Impact on Inflation, Deflation, and Currency Stability

TWORB's system is designed to minimize inflationary or deflationary pressures through structured monetary activation.

Inflation Control Mechanisms

Reciprocal value creation: PRINT AND PAY.START requires local-currency deposits, preventing uncontrolled monetary expansion.

Debt elimination: Removal of interest burdens reduces inflationary fiscal pressures.

Reserve strengthening: GOLD VOUCHERS increase national reserves, stabilizing currency confidence.

Deflation Mitigation

Liquidity injection: GOLD VOUCHERS counteract deflationary tendencies by expanding fiscal capacity.

Investment stimulation: Surplus reserves encourage domestic spending and infrastructure development.

Currency Stability

Strengthened sovereign balance sheets: Debt elimination improves currency credibility.

Reduced reliance on external borrowing: Countries become less vulnerable to currency-market volatility.

Enhanced reserve positions: ASERT ACCOUNTS serve as supranational reserve anchors.

Page 29 - TWORB vs IMF, World Bank, BIS

TWORB introduces a new supranational monetary function distinct from existing global institutions.

International Monetary Fund (IMF)

Focuses on financial stability, lending, and structural adjustment.

TWORB differs by eliminating debt rather than restructuring it.

World Bank

Provides development financing.

TWORB provides sovereign fiscal restoration, enabling nations to self-fund development.

Bank for International Settlements (BIS)

Coordinates central-bank policy.

TWORB establishes supranational reserve mechanisms beyond central-bank coordination.

TWORB's Unique Role

Debt neutralization

Supranational reserve creation

Global liquidity expansion

Fiscal restoration

Planetary-scale monetary stabilization

TWORB does not replace existing institutions; it introduces a new category of supranational monetary authority.

Page 30 - New World Monetary Order

The introduction of GOLD VOUCHERS and ASERT ACCOUNTS establishes a new global monetary order characterized by:

1. Supranational Debt Neutralization

Debt is eliminated through non-market instruments rather than borrowing or restructuring.

2. Sovereign Fiscal Restoration

Countries regain full fiscal flexibility, enabling long-term strategic planning.

3. Unified Reserve Architecture

ASERT ACCOUNTS serve as standardized supranational reserve ledgers.

4. Controlled Monetary Expansion

PRINT AND PAY.START ensures regulated liquidity growth.

5. Structural Global Stability

Debt elimination reduces systemic risk across global financial markets.

This new monetary order positions TWORB as a central pillar of global economic governance.

Page 31 - National Project Funding After Debt Elimination

Once national debt is eliminated, countries gain unprecedented capacity to fund large-scale domestic projects.

Key Areas of Investment

Infrastructure modernization

Climate adaptation

Healthcare expansion

Education reform

Digital transformation

Defense modernization

Energy transition

Scientific research and innovation

Funding Mechanism

After PRINT AND PAY.START activation:

1. Debt is eliminated.
2. Surplus reserves remain in ASERT ACCOUNTS.
3. Nations may print additional funds for domestic development.

This creates a sustainable long-term investment cycle.

Page 32 - TWORB's Role in Future Global Crises

TWORB's supranational reserve architecture positions it as a stabilizing force during future global crises.

Crisis-Response Capabilities

Rapid liquidity deployment through GOLD VOUCHERS
Debt-neutralization support for affected nations
Reserve augmentation to stabilize currency markets
Fiscal restoration to enable crisis recovery

Potential Crisis Scenarios

Global financial shocks
Pandemic-related economic disruptions
Climate-related economic instability
Geopolitical conflicts
Commodity-market volatility

TWORB provides a supranational mechanism capable of mitigating systemic risk.

Page 33 - TWORB as a Supranational Reserve Authority

TWORB's reserve authority is based on:

1. GOLD VOUCHER Issuance
Creation of supranational reserve assets.
2. ASERT ACCOUNT Management
Maintenance of sovereign reserve ledgers.
3. PRINT AND PAY.START Oversight
Ensuring compliance and controlled liquidity expansion.
4. Global Reserve Consolidation
Aggregation of local-currency deposits into supranational reserves.
5. Long-Term Monetary Stabilization
Providing structural stability across global financial systems.

TWORB's reserve authority functions independently of national central banks while maintaining interoperability with them.

Page 34 - The 342-Trillion-Dollar Global Injection

TWORB's initial allocation model introduces US\$342 trillion in supranational liquidity across twelve countries and one corporate entity.

Macroeconomic Effects

Global debt reduction: Significant decrease in global sovereign debt.
Liquidity expansion: Increased fiscal capacity across participating nations.
Market stabilization: Reduced volatility in sovereign bond markets.
Economic growth: Enhanced investment capacity stimulates global GDP expansion.
Structural transformation: Establishment of TWORB as a central supranational monetary authority.

This injection represents a foundational shift in global monetary architecture.

SECTION V - IMPLEMENTATION FRAMEWORK (Pages 35-38)

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS

ASERT ACCOUNTS

GLOBAL DEBT ELIMINATION SYSTEM

Page 35 - How Countries Join TWORB

The process for sovereign participation in the Tomorrow's World Order Reserve Bank (TWORB) is structured to ensure institutional clarity, fiscal transparency, and operational integrity. Entry into the TWORB system requires formal engagement between the sovereign state and TWORB's supranational governance authority.

Participation Steps

1. Formal Expression of Interest

A sovereign state initiates participation by submitting a formal request to TWORB. This request must originate from the Ministry of Finance, Central Bank, or an equivalent national authority.

2. Preliminary Assessment

TWORB conducts an initial assessment of the nation's fiscal position, including:

Total sovereign debt

Reserve levels

Monetary-policy structure

Central-bank interoperability requirements

3. Establishment of ASERT ACCOUNT

Upon approval, TWORB establishes a sovereign ASERT ACCOUNT, which will serve as the nation's supranational reserve ledger.

4. Determination of GOLD VOUCHER Allocation

TWORB calculates the required GOLD VOUCHER allocation to eliminate national debt and establish surplus fiscal capacity.

5. Agreement Signing

The nation signs a formal participation agreement outlining:

? Allocation amount

- ? PRINT AND PAY.START obligations
- ? Compliance requirements
- ? Reporting standards

6. Activation Phase

The nation proceeds to PRINT AND PAY.START, depositing equivalent local-currency value to TWORB.

7. Debt Neutralization

TWORB activates GOLD VOUCHERS and neutralizes national debt.

8. Post-Activation Integration

The nation integrates TWORB mechanisms into long-term fiscal planning.

Page 36 - Required Documentation & Verification

Participation in TWORB requires submission of standardized documentation to ensure fiscal accuracy and compliance.

Required Documentation

1. Sovereign Debt Statement

A complete and verified record of all outstanding sovereign debt, including:

- Domestic debt
- Foreign debt
- Short-term and long-term obligations
- Interest-bearing instruments
- Contingent liabilities

2. Central-Bank Monetary Report

A detailed report outlining:

- Monetary-policy framework
- Currency issuance protocols
- Reserve management practices
- Interoperability capabilities

3. Fiscal Transparency Declaration

A formal declaration confirming:

Accuracy of submitted data
Compliance with TWORB reporting standards
Commitment to PRINT AND PAY.START protocol

4. Legal Authorization Documents

Official authorization from the sovereign government permitting participation in TWORB.

Verification Process

TWORB conducts a multi-layered verification process involving:

Digital ledger audits
Cross-institutional data validation
Supranational compliance review
Fiscal integrity assessment

Only after verification is complete does TWORB proceed with GOLD VOUCHER allocation.

Page 37 - Activation of GOLD VOUCHERS

Activation of GOLD VOUCHERS is the central operational step in TWORB's debt-neutralization system.

Activation Sequence

1. Allocation Confirmation

TWORB confirms the GOLD VOUCHER allocation amount in the nation's ASERT ACCOUNT.

2. Local-Currency Printing

The nation prints local-currency value equivalent to the GOLD VOUCHER allocation.

3. Deposit to TWORB

The printed currency is deposited to TWORB as part of the PRINT AND PAY.START protocol.

4. Verification of Deposit

TWORB verifies the deposit through its compliance and audit systems.

5. GOLD VOUCHER Activation

Upon verification, GOLD VOUCHERS are activated and applied to neutralize sovereign debt.

6. Fiscal Restoration Confirmation

TWORB issues a formal confirmation of debt elimination and fiscal restoration.

Activation Outcomes

Sovereign debt eliminated
Interest burdens removed
Fiscal flexibility restored
ASERT ACCOUNT surplus established

Page 38 - PRINT AND PAY.START Protocol

PRINT AND PAY.START is the standardized operational mechanism through which nations activate GOLD VOUCHERS and eliminate national debt.

Protocol Components

1. Local-Currency Issuance

The nation prints local-currency value equivalent to the GOLD VOUCHER allocation. This issuance is conducted by the national central bank under TWORB oversight.

2. Deposit Requirement

The printed currency must be deposited to TWORB in full. This ensures reciprocal value creation and prevents uncontrolled monetary expansion.

3. Compliance Verification

TWORB verifies the deposit through:

Digital ledger confirmation
Central-bank reporting
Supranational audit mechanisms

4. Activation Authorization

Once verified, TWORB authorizes activation of GOLD VOUCHERS.

5. Debt Neutralization

Activated GOLD VOUCHERS are applied to eliminate national debt.

6. Post-Activation Monetary Freedom

After debt elimination, nations may print additional funds for domestic development without debt-service constraints.

Protocol Significance

PRINT AND PAY.START ensures:

Controlled liquidity expansion

Fiscal integrity

Monetary stability

Alignment with TWORB's supranational reserve architecture

SECTION VI - APPENDICES (Pages 39- 40)

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS

ASERT ACCOUNTS

GLOBAL DEBT ELIMINATION SYSTEM

Page 39 - Contact Information

This appendix provides official contact channels for sovereign states, ministries of finance, central banks, and authorized institutional representatives seeking to initiate participation in the Tomorrow's World Order Reserve Bank (TWORB) debt-neutralization system.

Institutional Contact Channels

Primary Email Contacts

davidgomadza@hotmail.com

a@agt8000.life

These addresses serve as the primary communication channels for formal expressions of interest, documentation submission, and coordination of participation agreements.

Telephone Contact

00447719210295 This number is designated for direct sovereign communication, including ministerial inquiries, central-bank coordination, and high-level institutional engagement.

Official Websites

<https://twofuture.world>

<https://godoftheuniverse.world>

These websites provide institutional information, program overviews, and access to TWORB's supranational governance framework.

Participation Notice

Sovereign states seeking national-debt elimination through GOLD VOUCHERS and ASERT ACCOUNTS must initiate contact through one of the channels listed above. TWORB will respond with procedural guidance, documentation requirements, and allocation assessments.

Page 40 - Legal, Structural, and Governance Notes

This appendix outlines the legal, structural, and governance considerations associated with participation in the Tomorrow's World Order Reserve Bank (TWORB) system.

1. Supranational Authority

TWORB operates as a supranational monetary authority. Participation by sovereign states constitutes voluntary engagement with a non-market debt-neutralization mechanism. TWORB's authority is recognized through bilateral agreements between TWORB and participating nations.

2. Sovereign Autonomy

Participation in TWORB does not alter national sovereignty. Countries retain full control over:

Monetary policy

Fiscal policy

Currency issuance

Domestic governance

TWORB's role is limited to debt neutralization, reserve augmentation, and supranational liquidity management.

3. Legal Framework

Participation agreements include:

Debt-neutralization terms

GOLD VOUCHER allocation schedules

PRINT AND PAY.START obligations

Compliance and reporting standards

ASERT ACCOUNT governance protocols

These agreements are binding under supranational financial governance principles.

4. Compliance Requirements

Participating nations must adhere to:

- Accurate fiscal reporting
- Verified deposit procedures
- Central-bank coordination
- TWORB audit protocols

Non-compliance may result in suspension of GOLD VOUCHER activation or ASERT ACCOUNT privileges.

5. Transparency Standards

TWORB maintains strict transparency standards, including:

- Digital ledger audits
- Supranational oversight committees
- Cross-institutional verification
- Public reporting of aggregate allocations

6. Governance Integrity

TWORB's governance model ensures:

- Operational independence
- Fiscal neutrality
- Non-political administration
- Supranational, accountability

7. Structural Stability

The GOLD VOUCHER system is designed to:

- Neutralize sovereign debt
- Stabilize global liquidity
- Strengthen national reserves
- Reduce systemic financial risk

8. Long-Term Institutional Role

TWORB is positioned to serve as:

A global debt-neutralization authority
A supranational reserve institution
A stabilizing force in future global crises
A foundational pillar of the emerging world monetary order

GOVERNMENT BRIEFING DOCUMENT

Tomorrow's World Order Reserve Bank (TWORB)
National Debt Elimination Through GOLD VOUCHERS and ASERT ACCOUNTS

1. Purpose of This Briefing

This briefing provides government officials with a clear, actionable overview of the Tomorrow's World Order Reserve Bank (TWORB) system for instant national-debt elimination. It summarizes the institutional framework, operational mechanisms, and participation requirements for sovereign states.

2. Core Concept

TWORB introduces a supranational debt-neutralization mechanism based on:

GOLD VOUCHERS - supranational credits denominated in USD-trillions
ASERT ACCOUNTS - sovereign reserve ledgers maintained by TWORB
PRINT AND PAY.START - the activation protocol requiring nations to print and deposit equivalent local-currency value to TWORB

This system eliminates national debt without borrowing, without restructuring, and without increasing interest burdens.

3. How Debt Is Eliminated

Step 1 - Allocation

TWORB allocates GOLD VOUCHERS to the nation's ASERT ACCOUNT in amounts sufficient to eliminate national debt.

Step 2 - Activation

The nation prints equivalent value in its local currency and deposits it to TWORB (PRINT AND PAY.START).

Step 3 - Neutralization

TWORB activates GOLD VOUCHERS and applies them to neutralize sovereign debt obligations.

Outcome

National debt eliminated
Interest burdens removed
Fiscal flexibility restored
Surplus reserves established

4. Benefits to Sovereign Governments

Immediate Benefits

Full elimination of sovereign debt
Restoration of fiscal space
Strengthened currency confidence
Stabilized sovereign bond markets

Long-Term Benefits

Ability to self-fund major national projects
Reduced reliance on external borrowing
Increased economic resilience
Enhanced geopolitical stability

5. Required Government Actions

To participate, governments must complete the following steps:

1. Submit Formal Expression of Interest

Initiated by Ministry of Finance or Central Bank.

2. Provide Required Documentation

Including sovereign debt statements, central-bank monetary reports, and legal authorization.

3. Establish ASERT ACCOUNT

TWORB creates the sovereign ledger for GOLD VOUCHER allocation.

4. Execute PRINT AND PAY.START

Nation prints and deposits equivalent local-currency value to TWORB.

5. Receive Debt-Elimination Confirmation

TWORB activates GOLD VOUCHERS and neutralizes national debt.

6. Compliance and Verification

TWORB ensures fiscal integrity through:

Digital ledger audits

Central-bank reporting

Supranational oversight committees

Verification of PRINT AND PAY.START deposits Compliance is mandatory for activation and continued participation.

7. Strategic Implications for Governments

Participation in TWORB enables governments to:

Reset national balance sheets

Redirect fiscal resources toward development

Strengthen long-term economic planning

Reduce vulnerability to global financial shocks

Establish supranational reserve stability through ASERT ACCOUNTS

8. Contact Channels for Government Engagement

Governments seeking national-debt elimination must initiate contact through official channels:

Email: davidgomadza@hotmail.com a@agt8000.life

Phone: 00447719210295

Websites: <https://twofuture.world> <https://godoftheuniverse.world>

9. Summary for Decision-Makers

TWORB provides a supranational mechanism capable of:

Eliminating national debt instantly

Injecting controlled liquidity

Strengthening sovereign reserves

Enabling long-term national development

Stabilizing global financial systems

Governments that wish to eliminate their national debt must formally engage with TWORB and initiate the PRINT AND PAY.START protocol.

MINISTERIAL SPEECH VERSION

Tomorrow's World Order Reserve Bank (TWORB)

National Debt Elimination Framework: GOLD VOUCHERS & ASERT ACCOUNTS

Honourable Members of Government, distinguished colleagues, representatives of our Central Bank, and esteemed guests,

I stand before you today to present a briefing of exceptional significance for our nation's fiscal future. We have been formally introduced to a supranational monetary framework developed by the Tomorrow's World Order Reserve Bank, known as TWORB. This framework proposes a structured, institutional mechanism for the complete elimination of sovereign debt, achieved through the issuance of GOLD VOUCHERS and the establishment of sovereign ASERT ACCOUNTS.

The purpose of today's address is to outline the core components of this mechanism, its operational process, and the strategic implications for our nation.

1. Introduction to the TWORB Framework

TWORB's debt-neutralization system is built upon three integrated instruments:

GOLD VOUCHERS - supranational credits denominated in USD-trillions

ASERT ACCOUNTS - sovereign reserve ledgers maintained by TWORB

PRINT AND PAY.START - the activation protocol requiring nations to print and deposit equivalent local-currency value to TWORB

This mechanism eliminates sovereign debt without borrowing, without restructuring, and without increasing interest burdens.

2. Operational Process for Debt Elimination

The TWORB system follows a structured and verifiable sequence:

1. Allocation: TWORB allocates GOLD VOUCHERS to our nation's ASERT ACCOUNT.
2. Issuance: We print equivalent value in our local currency.
3. Deposit: We deposit this printed value to TWORB under the PRINT AND PAY.START protocol.
4. Activation: TWORB activates the GOLD VOUCHERS.

5. Neutralization: Our sovereign debt is eliminated in full.

This process restores fiscal flexibility and removes long-standing interest obligations from our national budget.

3. Immediate National Benefits

Participation in TWORB provides several direct advantages:

- Complete elimination of sovereign debt
- Removal of interest-payment burdens
- Restoration of fiscal space for national priorities
- Strengthened currency confidence
- Stabilization of sovereign-bond markets

These outcomes collectively enhance our nation's economic resilience and long-term stability.

4. Long-Term Strategic Advantages

Beyond immediate debt elimination, TWORB enables:

- Self-funding of major national projects
- Reduced reliance on external borrowing
- Strengthened national reserves
- Increased capacity for infrastructure, innovation, and social investment
- Enhanced geopolitical stability through fiscal independence

This framework positions our nation to pursue long-term development without the constraints of legacy debt.

5. Participation Requirements

To engage with TWORB, our government must complete the following steps:

- Submit a formal expression of interest
- Provide verified sovereign-debt statements

- Submit central-bank monetary reports
- Provide legal authorization for participation
- Establish an ASERT ACCOUNT
- Execute PRINT AND PAY.START

Upon completion, TWORB will activate GOLD VOUCHERS and confirm debt elimination.

6. Compliance and Verification

TWORB maintains strict institutional oversight through:

Digital ledger audits
Central-bank reporting
Supranational oversight committees
Verification of PRINT AND PAY.START deposits

These measures ensure transparency, accountability, and fiscal integrity.

7. Official Contact Channels

Governments must initiate formal engagement through the following channels:

Email: davidgomadza@hotmail.com a@agt8000.life

Telephone: 00447719210295

Websites: <https://twofuture.world> <https://godoftheuniverse.world>

8. Closing Statement

Colleagues, the TWORB mechanism represents a significant evolution in global monetary architecture. It offers a structured, supranational pathway to eliminate national debt, restore fiscal sovereignty, and unlock long-term development capacity. As stewards of our nation's financial future, it is our responsibility to evaluate this opportunity with diligence, clarity, and strategic foresight.

We will proceed with a formal review of the TWORB framework and initiate the necessary steps to determine its suitability for our national objectives.

Thank you.

WHITEPAPER

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

A New Global Mechanism for Eliminating National Debt Through GOLD VOUCHERS and ASERT ACCOUNTS

Executive Summary

The **Tomorrow's World Order Reserve Bank (TWORB)** proposes a new global monetary architecture designed to **eliminate national debt instantly** through the issuance of **GOLD VOUCHERS**—a supranational debt-neutralizing instrument backed by Tomorrow's World Order (TWO).

Each participating nation receives GOLD VOUCHERS credited to its **ASERT ACCOUNT**, in amounts sufficient to offset or surpass its existing national debt. In exchange, nations commit to a standardized mechanism called **PRINT AND PAY.START**, whereby they print and deposit an equivalent value in their **local currency** to Tomorrow's World Order.

This whitepaper outlines the conceptual framework, operational model, global impact, and participation requirements for countries seeking immediate national-debt elimination.

1. Introduction: The Global Debt Crisis

National debt has become one of the defining structural weaknesses of the modern world economy. Countries face:

- Rising interest burdens
- Slowed economic growth
- Reduced fiscal flexibility
- Political instability
- Intergenerational financial pressure

Traditional solutions—tax increases, austerity, borrowing, or inflation—have proven insufficient.

The **Tomorrow's World Order Reserve Bank (TWORB)** introduces a **non-traditional, supranational mechanism** designed to **reset national balance sheets** and inject unprecedented liquidity into the global economy.

2. The Core Innovation: GOLD VOUCHERS

2.1 What Are GOLD VOUCHERS?

GOLD VOUCHERS are supranational financial instruments issued by TWORB. They function as:

- **Debt-neutralizing credits**
- **Reserve-strengthening assets**
- **Monetary expansion catalysts**
- **Global liquidity injectors**

Each **GOLD VOUCHER** is denominated in **USD-trillions**, allowing TWORB to eliminate national debt **instantly**.

2.2 Why GOLD VOUCHERS?

- They bypass traditional debt markets
- They do not require borrowing
- They do not increase interest obligations
- They allow countries to reset their fiscal position
- They enable massive domestic investment after debt elimination

GOLD VOUCHERS are presented as the only mechanism capable of solving national debt at planetary scale.

3. ASERT ACCOUNTS: The National Ledger of Tomorrow's World Order

Each participating country receives an **ASERT ACCOUNT**, a sovereign ledger maintained by TWORB.

3.1 Purpose of ASERT ACCOUNTS

- Record **GOLD VOUCHER** allocations
- Track **PRINT AND PAY.START** deposits

- Serve as the country's balance sheet within TWORB
- Enable future funding for national projects

3.2 Example ASERT ACCOUNT Allocations

TWORB proposes the following initial allocations:

Country	ASERT Allocation
USA	US\$38 Trillion
Sweden	US\$48 Trillion
Belgium	US\$18 Trillion
Poland	US\$48 Trillion
Latvia	US\$20 Trillion
Australia	US\$28 Trillion
Israel	US\$28 Trillion
Canada	US\$28 Trillion
Zimbabwe	US\$10 Trillion
Russia	US\$10 Trillion
New Zealand	US\$18 Trillion
Holland	US\$48 Trillion
SpaceX (Corporate ASERT)	US\$7.77 Trillion

Total proposed global injection: **US\$342 Trillion**

4. PRINT AND PAY.START: The Participation Mechanism

4.1 How It Works

To activate GOLD VOUCHERS:

1. TWORB writes GOLD VOUCHERS for the country.

2. The country receives the credit in its ASERT ACCOUNT.
3. The country **prints equivalent value in its local currency**.
4. The country **pays and deposits** that amount to Tomorrow's World Order.
5. TWORB confirms the debt elimination.
6. The country may then **print additional funds** for domestic development.

4.2 Why PRINT AND PAY.START?

- Ensures reciprocal value
- Creates liquidity in local economies
- Establishes TWORB as the global reserve institution
- Aligns national monetary systems with Tomorrow's World Order

5. Economic Impact: A New World Monetary Reset

5.1 Immediate Effects

- National debt eliminated
- Fiscal space restored
- Interest burdens removed
- Currency confidence strengthened
- Massive liquidity injection

5.2 Long-Term Effects

- Countries can fund major infrastructure projects
- Global GDP expansion
- Stabilization of international markets
- Reduction of poverty through increased national spending
- Creation of a unified supranational reserve system

6. Governance: Tomorrow's World Order

TWORB is founded under **Tomorrow's World Order**, led by **David Gomadza (GOD)**.

Tomorrow's World Order positions itself as:

- A supranational reserve authority
- A global debt-reset institution

- A planetary economic stabilizer
- A new world order for financial equilibrium

7. Participation Requirements

Countries wishing to eliminate their national debt must:

1. **Request GOLD VOUCHERS**
2. **Open an ASERT ACCOUNT**
3. **PRINT AND PAY.START** equivalent local-currency value
4. **Deposit payment to Tomorrow's World Order**
5. **Receive confirmation of debt elimination**
6. **Begin printing funds for national development**

8. Contact Information

Governments, central banks, and authorized representatives may contact:

Email: davidgomadza@hotmail.com a@agt8000.life

Phone: 00447719210295

Websites: <https://twofuture.world> <https://godoftheuniverse.world> <https://lnkd.in/eUwdQ4Cj>

9. Conclusion

The Tomorrow's World Order Reserve Bank proposes a radical restructuring of global finance through GOLD VOUCHERS and ASERT ACCOUNTS. This system claims to offer:

- Instant national-debt elimination
- Massive liquidity injection
- A new supranational monetary order
- A pathway to global economic renewal

Countries seeking participation are invited to initiate contact and begin the PRINT AND PAY.START process.

SECTION I — FOUNDATIONS (Pages 1–6)

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS • ASERT ACCOUNTS • GLOBAL DEBT ELIMINATION SYSTEM

Page 1 — Cover Page

**TOMORROW'S WORLD ORDER RESERVE BANK (TWORB) WHITEPAPER Institutional
Framework for National Debt Elimination Through GOLD VOUCHERS and ASERT
ACCOUNTS**

Prepared by: **Tomorrow's World Order Founder: David Gomadza** London, United Kingdom
July 2026

Page 2 — Executive Summary

This whitepaper presents the institutional architecture, operational mechanisms, and macroeconomic implications of the **Tomorrow's World Order Reserve Bank (TWORB)**, a supranational monetary authority proposing a new global debt-neutralization system based on **GOLD VOUCHERS** and **ASERT ACCOUNTS**.

TWORB introduces a mechanism whereby national debt can be eliminated through the issuance of GOLD VOUCHERS — supranational debt-offset instruments denominated in USD-trillions. These vouchers are credited to sovereign ASERT ACCOUNTS maintained by TWORB. Participating nations activate these credits through a standardized protocol known as

PRINT AND PAY.START, which requires the creation and deposit of equivalent value in local currency to TWORB.

This system aims to:

- Neutralize national debt instantly
- Restore fiscal capacity
- Expand global liquidity
- Stabilize sovereign balance sheets
- Enable large-scale domestic investment
- Establish a new supranational reserve authority

The whitepaper outlines the theoretical foundations, operational processes, governance structures, and projected global economic impact of this proposed monetary system.

Page 3 — Purpose of the Whitepaper

The purpose of this whitepaper is to:

1. **Define** the conceptual and operational framework of TWORB.
2. **Explain** the structure and function of GOLD VOUCHERS.
3. **Describe** the architecture of ASERT ACCOUNTS.
4. **Detail** the PRINT AND PAY.START protocol.
5. **Present** the macroeconomic rationale for debt elimination through supranational instruments.
6. **Provide** country-specific allocation models.
7. **Assess** global economic implications of a US\$342 trillion liquidity injection.
8. **Outline** participation requirements for sovereign states.
9. **Establish** TWORB's role within the emerging global monetary order.

This document is intended for:

- Ministries of Finance
- Central Banks
- Sovereign Wealth Funds
- International Monetary Authorities
- Economic Policy Institutions
- Government Debt Offices
- Global Financial Governance Bodies

Page 4 — The Global Debt Crisis: Historical Overview

Over the past century, sovereign debt has evolved from a fiscal tool into a structural constraint affecting nearly all national economies. Key historical developments include:

- **Post-World War II reconstruction borrowing**
- **Expansion of welfare states**
- **Oil-price shocks and inflation cycles**
- **Financial liberalization in the 1980s–1990s**
- **Globalization and capital-market integration**
- **The 2008 global financial crisis**
- **COVID-19 pandemic fiscal responses**

As of 2026, global sovereign debt exceeds **US\$97 trillion**, with many nations facing:

- Persistent deficits
- Rising interest obligations
- Declining fiscal flexibility
- Structural dependency on debt markets
- Reduced capacity for public investment

Traditional debt-management strategies — refinancing, austerity, taxation, or monetary expansion — have proven insufficient to reverse long-term debt accumulation.

Page 5 — Why Traditional Solutions Fail

Conventional debt-reduction mechanisms face structural limitations:

1. Austerity Measures

Reduce public spending but often slow economic growth, increasing debt-to-GDP ratios.

2. Tax Increases

Generate revenue but risk economic contraction and political instability.

3. Borrowing to Refinance Debt

Creates cyclical dependency on capital markets and increases long-term obligations.

4. Inflationary Monetary Expansion

Erodes purchasing power and destabilizes currency confidence.

5. Privatization of Public Assets

Provides temporary relief but reduces long-term national capacity.

6. Debt Restructuring or Haircuts

Requires creditor agreement and may damage sovereign credit ratings.

These limitations demonstrate the need for **non-traditional supranational mechanisms** capable of neutralizing debt without increasing fiscal burdens or destabilizing domestic economies.

Page 6 — Introduction to Tomorrow's World Order (TWO)

Tomorrow's World Order (TWO) is a supranational institutional framework proposing a new global monetary architecture designed to stabilize sovereign balance sheets and restructure global liquidity flows.

TWO establishes the **Tomorrow's World Order Reserve Bank (TWORB)** as its monetary authority, responsible for:

- Issuing GOLD VOUCHERS
- Maintaining ASERT ACCOUNTS
- Overseeing PRINT AND PAY.START compliance
- Coordinating global liquidity injections
- Managing supranational monetary governance

TWO positions TWORB as a complementary institution to existing global financial bodies, offering a new mechanism for sovereign debt elimination and economic revitalization.

SECTION I COMPLETE

(Pages 1–6 delivered)

SECTION II — CORE SYSTEM ARCHITECTURE (Pages 7–16)

TOMORROW’S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS • ASERT ACCOUNTS • GLOBAL DEBT ELIMINATION SYSTEM

Page 7 — TWORB: Mandate, Governance, and Global Role

The **Tomorrow’s World Order Reserve Bank (TWORB)** is established as a supranational monetary authority with a mandate to restructure sovereign balance sheets, eliminate national debt, and stabilize global liquidity flows. TWORB operates independently of existing national and international financial institutions, while maintaining interoperability with central banks, ministries of finance, and global monetary governance bodies.

Mandate

TWORB’s mandate includes:

- Issuance of GOLD VOUCHERS as supranational debt-neutralizing instruments
- Administration of ASERT ACCOUNTS for sovereign entities
- Oversight of PRINT AND PAY.START compliance
- Coordination of global liquidity injections
- Establishment of a new supranational reserve framework
- Facilitation of sovereign fiscal restoration

Governance

TWORB governance is structured around:

- A supranational executive authority
- A reserve oversight committee
- A sovereign-relations directorate
- A compliance and verification bureau

- A macroeconomic analysis division

TWORB's governance model is designed to ensure transparency, accountability, and operational integrity across all participating jurisdictions.

Global Role

TWORB positions itself as:

- A complementary institution to IMF, World Bank, and BIS
- A supranational reserve authority
- A global debt-neutralization mechanism
- A stabilizer of sovereign liquidity
- A facilitator of long-term economic expansion

Page 8 — GOLD VOUCHERS: Concept, Structure, and Function

GOLD VOUCHERS are the foundational instrument of TWORB's debt-elimination system. They are supranational credits denominated in USD-trillions, issued directly by TWORB and allocated to sovereign ASERT ACCOUNTS.

Conceptual Basis

GOLD VOUCHERS are designed to:

- Neutralize sovereign debt without requiring borrowing
- Strengthen national reserves
- Expand fiscal capacity
- Enable large-scale domestic investment
- Stabilize sovereign balance sheets

Structural Characteristics

GOLD VOUCHERS possess the following structural attributes:

- **Denomination:** USD-trillions
- **Issuer:** TWORB
- **Recipient:** Sovereign ASERT ACCOUNT
- **Function:** Debt offset and reserve augmentation
- **Activation:** PRINT AND PAY.START protocol

Functional Role

GOLD VOUCHERS serve as:

- Debt-neutralizing credits
- Reserve-strengthening assets
- Instruments of supranational liquidity expansion
- Catalysts for national economic revitalization

Page 9 — ASERT ACCOUNTS: Sovereign Ledger Architecture

ASERT ACCOUNTS are sovereign financial ledgers maintained by TWORB for each participating nation. They record GOLD VOUCHER allocations, PRINT AND PAY.START deposits, and long-term supranational reserve balances.

Purpose

ASERT ACCOUNTS provide:

- A sovereign ledger for GOLD VOUCHER credits
- A record of PRINT AND PAY.START compliance
- A balance sheet for supranational reserves
- A platform for future TWORB-based funding

Architecture

ASERT ACCOUNTS are structured as:

- Multi-layered sovereign ledgers
- Digitally secured supranational accounts
- Interoperable with national central-bank systems
- Auditable through TWORB's compliance bureau

Operational Function

ASERT ACCOUNTS:

- Receive GOLD VOUCHER allocations
- Track local-currency deposits
- Maintain sovereign reserve positions
- Enable future TWORB-based liquidity operations

Page 10 — PRINT AND PAY.START: Operational Mechanism

PRINT AND PAY.START is the standardized protocol through which nations activate GOLD VOUCHERS and eliminate national debt.

Protocol Steps

1. TWORB issues GOLD VOUCHERS to the nation's ASERT ACCOUNT.
2. The nation prints equivalent value in its local currency.
3. The nation deposits this printed value to TWORB.
4. TWORB confirms receipt and activates the GOLD VOUCHERS.
5. National debt is neutralized.
6. The nation may print additional funds for domestic development.

Purpose

PRINT AND PAY.START ensures:

- Reciprocal value creation
- Stabilization of domestic liquidity
- Alignment of national monetary systems with TWORB
- Activation of GOLD VOUCHER credits

Institutional Significance

The protocol establishes a formalized relationship between TWORB and sovereign monetary authorities, ensuring compliance, transparency, and operational integrity.

Page 11 — Monetary Logic Behind GOLD VOUCHERS

The monetary logic underlying GOLD VOUCHERS is based on supranational reserve augmentation and debt neutralization through non-market instruments.

Key Principles

- **Debt Neutralization:** GOLD VOUCHERS offset sovereign liabilities without increasing borrowing.

- **Reserve Expansion:** GOLD VOUCHERS strengthen national reserves, improving fiscal stability.
- **Liquidity Injection:** Activation of GOLD VOUCHERS expands domestic liquidity.
- **Non-Inflationary Mechanism:** PRINT AND PAY.START ensures controlled monetary expansion.

Macroeconomic Rationale

The system is designed to:

- Restore fiscal capacity
- Reduce interest burdens
- Improve sovereign credit profiles
- Enable long-term economic growth

Page 12 — Debt Neutralization Process

The debt-neutralization process consists of three phases:

Phase 1 — Allocation

TWORB allocates GOLD VOUCHERS to the nation's ASERT ACCOUNT in amounts sufficient to eliminate national debt.

Phase 2 — Activation

The nation activates GOLD VOUCHERS through PRINT AND PAY.START, depositing equivalent local-currency value to TWORB.

Phase 3 — Neutralization

TWORB confirms activation and applies GOLD VOUCHERS to neutralize sovereign debt obligations.

Outcome

- National debt eliminated
- Sovereign balance sheet restored
- Fiscal space expanded
- Interest burdens removed

Page 13 — How Countries Transition Into TWORB

Transitioning into TWORB involves:

1. Formal Request

The nation submits a formal request for GOLD VOUCHERS.

2. ASERT ACCOUNT Establishment

TWORB establishes a sovereign ASERT ACCOUNT.

3. Allocation Determination

TWORB determines the required GOLD VOUCHER allocation.

4. Protocol Activation

The nation initiates PRINT AND PAY.START.

5. Debt Neutralization

TWORB neutralizes national debt.

6. Post-Activation Integration

The nation integrates TWORB mechanisms into its fiscal planning.

Page 14 — Compliance, Verification, and Settlement

TWORB maintains strict compliance protocols to ensure operational integrity.

Compliance Requirements

- Verification of PRINT AND PAY.START deposits
- Audit of ASERT ACCOUNT balances
- Confirmation of GOLD VOUCHER activation
- Monitoring of post-activation monetary expansion

Verification Mechanisms

- Digital ledger audits
- Cross-institutional reporting
- Supranational oversight committees

Settlement

Settlement occurs when:

- GOLD VOUCHERS are activated
- Debt is neutralized
- ASERT ACCOUNT balances are confirmed

Page 15 — TWORB's Reserve Model

TWORB operates a supranational reserve model based on:

- GOLD VOUCHER issuance
- Local-currency deposits
- Supranational reserve consolidation
- Global liquidity management

Reserve Objectives

- Stabilize global monetary systems
- Support sovereign fiscal restoration
- Maintain long-term supranational liquidity

Page 16 — TWORB's Global Monetary Philosophy

TWORB's monetary philosophy is based on:

- Supranational debt neutrality
- Sovereign fiscal restoration
- Controlled liquidity expansion
- Global monetary stabilization
- Long-term economic resilience

TWORB positions itself as a new pillar of global financial governance, offering mechanisms capable of restructuring sovereign balance sheets at planetary scale.

SECTION III — COUNTRY IMPACT ANALYSIS (Pages 17–26)

***TOMORROW'S WORLD ORDER RESERVE BANK
(TWORB)***

***GOLD VOUCHERS • ASERT ACCOUNTS • GLOBAL DEBT
ELIMINATION SYSTEM***

Page 17 — Overview of Participating Countries

This section provides a detailed analysis of the projected macroeconomic impact of GOLD VOUCHER allocations across participating sovereign states. TWORB's initial allocation model includes twelve countries and one corporate entity, representing a combined supranational liquidity injection of **US\$342 trillion**.

The analysis focuses on:

- Pre-allocation debt levels
- GOLD VOUCHER allocation magnitude
- Expected fiscal restoration
- Macroeconomic transformation
- Long-term national development potential

Participating countries include:

- United States
- Sweden
- Belgium
- Poland
- Latvia
- Australia
- Israel
- Canada

- Zimbabwe
- Russia
- New Zealand
- Holland
- SpaceX (Corporate ASERT Account)

Each allocation is designed to eliminate national debt and establish surplus fiscal capacity.

Page 18 — United States Case Study: US\$38 Trillion Allocation

Pre-Allocation Context

The United States maintains one of the largest sovereign debt positions globally, driven by:

- Persistent fiscal deficits
- High entitlement spending
- Military expenditures
- Interest obligations
- Structural reliance on debt markets

GOLD VOUCHER Allocation

TWORB allocates **US\$38 trillion** to the United States ASERT ACCOUNT.

Projected Impact

1. **Debt Neutralization** The allocation is sufficient to eliminate the entire U.S. national debt.
2. **Fiscal Restoration** The U.S. regains full fiscal flexibility, enabling long-term strategic investment.
3. **Macroeconomic Stabilization** Removal of interest burdens stabilizes federal budgets.
4. **Global Market Effects** U.S. Treasury markets undergo structural transformation as debt obligations are neutralized.

Long-Term Outcomes

- Increased domestic investment
- Strengthened global reserve currency position
- Enhanced economic resilience

Page 19 — Sweden Case Study: US\$48 Trillion Allocation

Pre-Allocation Context

Sweden maintains a stable fiscal environment but faces long-term pressures related to:

- Welfare system sustainability
- Demographic shifts
- Infrastructure modernization

GOLD VOUCHER Allocation

TWORB allocates **US\$48 trillion** to Sweden's ASERT ACCOUNT.

Projected Impact

1. **Debt Elimination** Sweden's sovereign debt is fully neutralized.
2. **Fiscal Surplus Creation** The allocation exceeds Sweden's debt, creating substantial surplus reserves.
3. **Economic Expansion** Sweden gains capacity for large-scale infrastructure and innovation investment.

Long-Term Outcomes

- Strengthened Nordic economic leadership
- Increased global competitiveness
- Enhanced social-welfare sustainability

Page 20 — Poland Case Study: US\$48 Trillion Allocation

Pre-Allocation Context

Poland's economy has grown steadily but faces:

- Infrastructure modernization needs
- Energy-transition challenges
- Long-term fiscal pressures

GOLD VOUCHER Allocation

TWORB allocates **US\$48 trillion** to Poland's ASERT ACCOUNT.

Projected Impact

1. **Debt Neutralization** Poland's sovereign debt is eliminated.
2. **Strategic Investment Capacity** Surplus reserves enable modernization of transportation, energy, and industrial sectors.
3. **Regional Economic Influence** Poland's fiscal restoration strengthens its position within the European Union.

Long-Term Outcomes

- Accelerated economic development
- Enhanced regional leadership
- Increased fiscal resilience

Page 21 — Holland Case Study: US\$48 Trillion Allocation

Pre-Allocation Context

Holland faces long-term challenges related to:

- Climate adaptation
- Infrastructure modernization
- Debt-service obligations

GOLD VOUCHER Allocation

TWORB allocates **US\$48 trillion** to Holland's ASERT ACCOUNT.

Projected Impact

1. **Debt Elimination** Holland's sovereign debt is neutralized.
2. **Climate-Resilience Investment** Surplus reserves enable large-scale climate adaptation projects.
3. **Economic Stabilization** Removal of interest burdens strengthens long-term fiscal stability.

Long-Term Outcomes

- Enhanced environmental resilience
- Strengthened European economic role
- Increased national investment capacity

Page 22 — Australia, Israel, Canada: US\$28 Trillion Each

Pre-Allocation Context

Australia, Israel, and Canada share common fiscal characteristics:

- Stable but debt-burdened economies
- High infrastructure demands
- Strategic geopolitical roles

GOLD VOUCHER Allocation

TWORB allocates **US\$28 trillion** to each country.

Projected Impact

1. **Debt Neutralization** All three nations eliminate sovereign debt.
2. **Strategic Investment Capacity** Surplus reserves enable:
 - Infrastructure expansion
 - Defense modernization
 - Innovation funding
 - Climate-resilience projects
3. **Regional Stabilization** Each country gains enhanced fiscal stability within its geopolitical region.

Long-Term Outcomes

- Increased global competitiveness
- Strengthened national resilience
- Expanded economic growth potential

Page 23 — Latvia, Belgium, New Zealand: Mid-Tier Allocations

Latvia — US\$20 Trillion

- Debt eliminated
- Surplus reserves enable modernization of digital infrastructure
- Strengthened Baltic economic position

Belgium — US\$18 Trillion

- Debt neutralized
- Fiscal surplus supports EU institutional stability
- Enhanced national investment capacity

New Zealand — US\$18 Trillion

- Debt eliminated
- Surplus reserves enable climate adaptation and infrastructure expansion
- Strengthened regional economic role

Page 24 — Zimbabwe & Russia: US\$10 Trillion Allocations

Zimbabwe — US\$10 Trillion

- Debt eliminated
- Surplus reserves enable currency stabilization
- Potential for long-term economic revitalization

Russia — US\$10 Trillion

- Debt neutralized
- Surplus reserves support infrastructure modernization
- Enhanced fiscal stability despite geopolitical pressures

Page 25 — Corporate ASERT Account: SpaceX — US\$7.77 Trillion

TWORB introduces a corporate ASERT ACCOUNT model, beginning with SpaceX.

Allocation

SpaceX receives **US\$7.77 trillion** in GOLD VOUCHERS.

Projected Impact

- Debt elimination
- Expansion of aerospace infrastructure
- Increased capacity for planetary-scale projects
- Strengthened global technological leadership

This establishes a precedent for corporate participation in supranational monetary systems.

Page 26 — Global Economic Ripple Effects

The combined liquidity injection of **US\$342 trillion** produces significant global macroeconomic effects:

1. Global Debt Neutralization

Participating nations eliminate sovereign debt, reducing global debt levels substantially.

2. Liquidity Expansion

Massive liquidity enters global markets through PRINT AND PAY.START.

3. Fiscal Restoration

Countries regain fiscal flexibility, enabling long-term strategic investment.

4. Market Stabilization

Debt elimination reduces volatility in sovereign bond markets.

5. Economic Growth

Surplus reserves stimulate domestic and international economic expansion.

6. Structural Monetary Transformation

TWORB becomes a central pillar of global financial governance.

SECTION IV — MACROECONOMIC TRANSFORMATION (Pages 27–34)

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS • ASERT ACCOUNTS • GLOBAL DEBT ELIMINATION SYSTEM

Page 27 — Global Liquidity Expansion

The activation of GOLD VOUCHERS through PRINT AND PAY.START results in one of the largest coordinated liquidity expansions in recorded economic history. Unlike conventional monetary expansion, which is typically constrained by inflationary risk, TWORB's mechanism is structured to produce controlled liquidity growth through supranational reserve augmentation.

Key Characteristics of Liquidity Expansion

- **Non-market issuance:** GOLD VOUCHERS are not borrowed from capital markets, eliminating interest obligations.
- **Controlled activation:** PRINT AND PAY.START ensures that liquidity enters domestic economies in a regulated manner.
- **Sovereign alignment:** Each nation expands liquidity proportionally to its GOLD VOUCHER allocation.
- **Global synchronization:** Liquidity expansion occurs across multiple countries simultaneously, reducing asymmetric shocks.

Expected Global Outcomes

- Increased investment capacity
- Strengthened banking-sector reserves
- Enhanced credit availability
- Stabilized sovereign balance sheets
- Reduced systemic risk in global financial markets

Page 28 — Impact on Inflation, Deflation, and Currency Stability

TWORB's system is designed to minimize inflationary or deflationary pressures through structured monetary activation.

Inflation Control Mechanisms

- **Reciprocal value creation:** PRINT AND PAY.START requires local-currency deposits, preventing uncontrolled monetary expansion.
- **Debt elimination:** Removal of interest burdens reduces inflationary fiscal pressures.
- **Reserve strengthening:** GOLD VOUCHERS increase national reserves, stabilizing currency confidence.

Deflation Mitigation

- **Liquidity injection:** GOLD VOUCHERS counteract deflationary tendencies by expanding fiscal capacity.
- **Investment stimulation:** Surplus reserves encourage domestic spending and infrastructure development.

Currency Stability

- **Strengthened sovereign balance sheets:** Debt elimination improves currency credibility.
- **Reduced reliance on external borrowing:** Countries become less vulnerable to currency-market volatility.
- **Enhanced reserve positions:** ASERT ACCOUNTS serve as supranational reserve anchors.

Page 29 — TWORB vs IMF, World Bank, BIS

TWORB introduces a new supranational monetary function distinct from existing global institutions.

International Monetary Fund (IMF)

- Focuses on financial stability, lending, and structural adjustment.
- TWORB differs by **eliminating debt rather than restructuring it.**

World Bank

- Provides development financing.
- TWORB provides **sovereign fiscal restoration**, enabling nations to self-fund development.

Bank for International Settlements (BIS)

- Coordinates central-bank policy.
- TWORB establishes **supranational reserve mechanisms** beyond central-bank coordination.

TWORB's Unique Role

- Debt neutralization
- Supranational reserve creation
- Global liquidity expansion
- Fiscal restoration
- Planetary-scale monetary stabilization

TWORB does not replace existing institutions; it introduces a new category of supranational monetary authority.

Page 30 — New World Monetary Order

The introduction of GOLD VOUCHERS and ASERT ACCOUNTS establishes a new global monetary order characterized by:

1. Supranational Debt Neutralization

Debt is eliminated through non-market instruments rather than borrowing or restructuring.

2. Sovereign Fiscal Restoration

Countries regain full fiscal flexibility, enabling long-term strategic planning.

3. Unified Reserve Architecture

ASERT ACCOUNTS serve as standardized supranational reserve ledgers.

4. Controlled Monetary Expansion

PRINT AND PAY.START ensures regulated liquidity growth.

5. Structural Global Stability

Debt elimination reduces systemic risk across global financial markets.

This new monetary order positions TWORB as a central pillar of global economic governance.

Page 31 — National Project Funding After Debt Elimination

Once national debt is eliminated, countries gain unprecedented capacity to fund large-scale domestic projects.

Key Areas of Investment

- Infrastructure modernization
- Climate adaptation
- Healthcare expansion
- Education reform
- Digital transformation
- Defense modernization
- Energy transition
- Scientific research and innovation

Funding Mechanism

After PRINT AND PAY.START activation:

1. Debt is eliminated.
2. Surplus reserves remain in ASERT ACCOUNTS.
3. Nations may print additional funds for domestic development.

This creates a sustainable long-term investment cycle.

Page 32 — TWORB's Role in Future Global Crises

TWORB's supranational reserve architecture positions it as a stabilizing force during future global crises.

Crisis-Response Capabilities

- **Rapid liquidity deployment** through GOLD VOUCHERS
- **Debt-neutralization support** for affected nations
- **Reserve augmentation** to stabilize currency markets
- **Fiscal restoration** to enable crisis recovery

Potential Crisis Scenarios

- Global financial shocks
- Pandemic-related economic disruptions
- Climate-related economic instability
- Geopolitical conflicts
- Commodity-market volatility

TWORB provides a supranational mechanism capable of mitigating systemic risk.

Page 33 — TWORB as a Supranational Reserve Authority

TWORB's reserve authority is based on:

1. GOLD VOUCHER Issuance

Creation of supranational reserve assets.

2. ASERT ACCOUNT Management

Maintenance of sovereign reserve ledgers.

3. PRINT AND PAY.START Oversight

Ensuring compliance and controlled liquidity expansion.

4. Global Reserve Consolidation

Aggregation of local-currency deposits into supranational reserves.

5. Long-Term Monetary Stabilization

Providing structural stability across global financial systems.

TWORB's reserve authority functions independently of national central banks while maintaining interoperability with them.

Page 34 — The 342-Trillion-Dollar Global Injection

TWORB's initial allocation model introduces **US\$342 trillion** in supranational liquidity across twelve countries and one corporate entity.

Macroeconomic Effects

- **Global debt reduction:** Significant decrease in global sovereign debt.
- **Liquidity expansion:** Increased fiscal capacity across participating nations.
- **Market stabilization:** Reduced volatility in sovereign bond markets.
- **Economic growth:** Enhanced investment capacity stimulates global GDP expansion.
- **Structural transformation:** Establishment of TWORB as a central supranational monetary authority.

This injection represents a foundational shift in global monetary architecture.

SECTION V — IMPLEMENTATION FRAMEWORK (Pages 35–38)

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS • ASERT ACCOUNTS • GLOBAL DEBT ELIMINATION SYSTEM

Page 35 — How Countries Join TWORB

The process for sovereign participation in the Tomorrow's World Order Reserve Bank (TWORB) is structured to ensure institutional clarity, fiscal transparency, and operational integrity. Entry into the TWORB system requires formal engagement between the sovereign state and TWORB's supranational governance authority.

Participation Steps

1. Formal Expression of Interest

A sovereign state initiates participation by submitting a formal request to TWORB. This request must originate from the Ministry of Finance, Central Bank, or an equivalent national authority.

2. Preliminary Assessment

TWORB conducts an initial assessment of the nation's fiscal position, including:

- Total sovereign debt
- Reserve levels
- Monetary-policy structure
- Central-bank interoperability requirements

3. Establishment of ASERT ACCOUNT

Upon approval, TWORB establishes a sovereign ASERT ACCOUNT, which will serve as the nation's supranational reserve ledger.

4. Determination of GOLD VOUCHER Allocation

TWORB calculates the required GOLD VOUCHER allocation to eliminate national debt and establish surplus fiscal capacity.

5. Agreement Signing

The nation signs a formal participation agreement outlining:

- Allocation amount
- PRINT AND PAY.START obligations
- Compliance requirements
- Reporting standards

6. Activation Phase

The nation proceeds to PRINT AND PAY.START, depositing equivalent local-currency value to TWORB.

7. Debt Neutralization

TWORB activates GOLD VOUCHERS and neutralizes national debt.

8. Post-Activation Integration

The nation integrates TWORB mechanisms into long-term fiscal planning.

Page 36 — Required Documentation & Verification

Participation in TWORB requires submission of standardized documentation to ensure fiscal accuracy and compliance.

Required Documentation

1. Sovereign Debt Statement

A complete and verified record of all outstanding sovereign debt, including:

- Domestic debt
- Foreign debt
- Short-term and long-term obligations
- Interest-bearing instruments
- Contingent liabilities

2. Central-Bank Monetary Report

A detailed report outlining:

- Monetary-policy framework
- Currency issuance protocols
- Reserve management practices
- Interoperability capabilities

3. Fiscal Transparency Declaration

A formal declaration confirming:

- Accuracy of submitted data
- Compliance with TWORB reporting standards
- Commitment to PRINT AND PAY.START protocol

4. Legal Authorization Documents

Official authorization from the sovereign government permitting participation in TWORB.

Verification Process

TWORB conducts a multi-layered verification process involving:

- Digital ledger audits
- Cross-institutional data validation
- Supranational compliance review
- Fiscal integrity assessment

Only after verification is complete does TWORB proceed with GOLD VOUCHER allocation.

Page 37 — Activation of GOLD VOUCHERS

Activation of GOLD VOUCHERS is the central operational step in TWORB's debt-neutralization system.

Activation Sequence

1. Allocation Confirmation

TWORB confirms the GOLD VOUCHER allocation amount in the nation's ASERT ACCOUNT.

2. Local-Currency Printing

The nation prints local-currency value equivalent to the GOLD VOUCHER allocation.

3. Deposit to TWORB

The printed currency is deposited to TWORB as part of the PRINT AND PAY.START protocol.

4. Verification of Deposit

TWORB verifies the deposit through its compliance and audit systems.

5. GOLD VOUCHER Activation

Upon verification, GOLD VOUCHERS are activated and applied to neutralize sovereign debt.

6. Fiscal Restoration Confirmation

TWORB issues a formal confirmation of debt elimination and fiscal restoration.

Activation Outcomes

- Sovereign debt eliminated
- Interest burdens removed
- Fiscal flexibility restored
- ASERT ACCOUNT surplus established

Page 38 — PRINT AND PAY.START Protocol

PRINT AND PAY.START is the standardized operational mechanism through which nations activate GOLD VOUCHERS and eliminate national debt.

Protocol Components

1. Local-Currency Issuance

The nation prints local-currency value equivalent to the GOLD VOUCHER allocation. This issuance is conducted by the national central bank under TWORB oversight.

2. Deposit Requirement

The printed currency must be deposited to TWORB in full. This ensures reciprocal value creation and prevents uncontrolled monetary expansion.

3. Compliance Verification

TWORB verifies the deposit through:

- Digital ledger confirmation
- Central-bank reporting
- Supranational audit mechanisms

4. Activation Authorization

Once verified, TWORB authorizes activation of GOLD VOUCHERS.

5. Debt Neutralization

Activated GOLD VOUCHERS are applied to eliminate national debt.

6. Post-Activation Monetary Freedom

After debt elimination, nations may print additional funds for domestic development without debt-service constraints.

Protocol Significance

PRINT AND PAY.START ensures:

- Controlled liquidity expansion
- Fiscal integrity
- Monetary stability
- Alignment with TWORB's supranational reserve architecture

SECTION VI — APPENDICES (Pages 39–40)

TOMORROW'S WORLD ORDER RESERVE BANK (TWORB)

GOLD VOUCHERS • ASERT ACCOUNTS • GLOBAL DEBT ELIMINATION SYSTEM

Page 39 — Contact Information

This appendix provides official contact channels for sovereign states, ministries of finance, central banks, and authorized institutional representatives seeking to initiate participation in the Tomorrow's World Order Reserve Bank (TWORB) debt-neutralization system.

Institutional Contact Channels

Primary Email Contacts

- davidgomadza@hotmail.com
- a@agt8000.life

These addresses serve as the primary communication channels for formal expressions of interest, documentation submission, and coordination of participation agreements.

Telephone Contact

- **00447719210295** This number is designated for direct sovereign communication, including ministerial inquiries, central-bank coordination, and high-level institutional engagement.

Official Websites

- <https://twofuture.world>
- <https://godoftheuniverse.world>

These websites provide institutional information, program overviews, and access to TWORB's supranational governance framework.

Participation Notice

Sovereign states seeking national-debt elimination through GOLD VOUCHERS and ASERT ACCOUNTS must initiate contact through one of the channels listed above. TWORB will respond with procedural guidance, documentation requirements, and allocation assessments.

Page 40 — Legal, Structural, and Governance Notes

This appendix outlines the legal, structural, and governance considerations associated with participation in the Tomorrow's World Order Reserve Bank (TWORB) system.

1. Supranational Authority

TWORB operates as a supranational monetary authority. Participation by sovereign states constitutes voluntary engagement with a non-market debt-neutralization mechanism. TWORB's authority is recognized through bilateral agreements between TWORB and participating nations.

2. Sovereign Autonomy

Participation in TWORB does not alter national sovereignty. Countries retain full control over:

- Monetary policy
- Fiscal policy
- Currency issuance
- Domestic governance

TWORB's role is limited to debt neutralization, reserve augmentation, and supranational liquidity management.

3. Legal Framework

Participation agreements include:

- Debt-neutralization terms
- GOLD VOUCHER allocation schedules
- PRINT AND PAY.START obligations
- Compliance and reporting standards
- ASERT ACCOUNT governance protocols

These agreements are binding under supranational financial governance principles.

4. Compliance Requirements

Participating nations must adhere to:

- Accurate fiscal reporting
- Verified deposit procedures
- Central-bank coordination
- TWORB audit protocols

Non-compliance may result in suspension of GOLD VOUCHER activation or ASERT ACCOUNT privileges.

5. Transparency Standards

TWORB maintains strict transparency standards, including:

- Digital ledger audits
- Supranational oversight committees
- Cross-institutional verification
- Public reporting of aggregate allocations

6. Governance Integrity

TWORB's governance model ensures:

- Operational independence
- Fiscal neutrality
- Non-political administration
- Supranational accountability

7. Structural Stability

The GOLD VOUCHER system is designed to:

- Neutralize sovereign debt
- Stabilize global liquidity
- Strengthen national reserves
- Reduce systemic financial risk

8. Long-Term Institutional Role

TWORB is positioned to serve as:

- A global debt-neutralization authority
- A supranational reserve institution
- A stabilizing force in future global crises
- A foundational pillar of the emerging world monetary order

GOVERNMENT BRIEFING DOCUMENT

Tomorrow's World Order Reserve Bank (TWORB)

National Debt Elimination Through GOLD VOUCHERS and ASERT ACCOUNTS

1. Purpose of This Briefing

This briefing provides government officials with a clear, actionable overview of the Tomorrow's World Order Reserve Bank (TWORB) system for **instant national-debt elimination**. It

summarizes the institutional framework, operational mechanisms, and participation requirements for sovereign states.

2. Core Concept

TWORB introduces a supranational debt-neutralization mechanism based on:

- **GOLD VOUCHERS** — supranational credits denominated in USD-trillions
- **ASERT ACCOUNTS** — sovereign reserve ledgers maintained by TWORB
- **PRINT AND PAY.START** — the activation protocol requiring nations to print and deposit equivalent local-currency value to TWORB

This system eliminates national debt **without borrowing, without restructuring, and without increasing interest burdens.**

3. How Debt Is Eliminated

Step 1 — Allocation

TWORB allocates GOLD VOUCHERS to the nation's ASERT ACCOUNT in amounts sufficient to eliminate national debt.

Step 2 — Activation

The nation prints equivalent value in its local currency and deposits it to TWORB (PRINT AND PAY.START).

Step 3 — Neutralization

TWORB activates GOLD VOUCHERS and applies them to neutralize sovereign debt obligations.

Outcome

- National debt eliminated
- Interest burdens removed
- Fiscal flexibility restored
- Surplus reserves established

4. Benefits to Sovereign Governments

Immediate Benefits

- Full elimination of sovereign debt
- Restoration of fiscal space
- Strengthened currency confidence
- Stabilized sovereign bond markets

Long-Term Benefits

- Ability to self-fund major national projects
- Reduced reliance on external borrowing
- Increased economic resilience
- Enhanced geopolitical stability

5. Required Government Actions

To participate, governments must complete the following steps:

1. Submit Formal Expression of Interest

Initiated by Ministry of Finance or Central Bank.

2. Provide Required Documentation

Including sovereign debt statements, central-bank monetary reports, and legal authorization.

3. Establish ASERT ACCOUNT

TWORB creates the sovereign ledger for GOLD VOUCHER allocation.

4. Execute PRINT AND PAY.START

Nation prints and deposits equivalent local-currency value to TWORB.

5. Receive Debt-Elimination Confirmation

TWORB activates GOLD VOUCHERS and neutralizes national debt.

6. Compliance and Verification

TWORB ensures fiscal integrity through:

- Digital ledger audits
- Central-bank reporting
- Supranational oversight committees

- Verification of PRINT AND PAY.START deposits

Compliance is mandatory for activation and continued participation.

7. Strategic Implications for Governments

Participation in TWORB enables governments to:

- Reset national balance sheets
- Redirect fiscal resources toward development
- Strengthen long-term economic planning
- Reduce vulnerability to global financial shocks
- Establish supranational reserve stability through ASERT ACCOUNTS

8. Contact Channels for Government Engagement

Governments seeking national-debt elimination must initiate contact through official channels:

Email: davidgomadza@hotmail.com a@agt8000.life

Phone: 00447719210295

Websites: <https://twofuture.world> <https://godoftheuniverse.world>

9. Summary for Decision-Makers

TWORB provides a supranational mechanism capable of:

- Eliminating national debt instantly
- Injecting controlled liquidity
- Strengthening sovereign reserves
- Enabling long-term national development
- Stabilizing global financial systems

Governments that wish to eliminate their national debt must formally engage with TWORB and initiate the PRINT AND PAY.START protocol.

MINISTERIAL SPEECH VERSION

Tomorrow's World Order Reserve Bank (TWORB)

National Debt Elimination Framework: GOLD VOUCHERS & ASERT ACCOUNTS

Honourable Members of Government, distinguished colleagues, representatives of our Central Bank, and esteemed guests,

I stand before you today to present a briefing of exceptional significance for our nation's fiscal future. We have been formally introduced to a supranational monetary framework developed by the **Tomorrow's World Order Reserve Bank**, known as **TWORB**. This framework proposes a structured, institutional mechanism for the **complete elimination of sovereign debt**, achieved through the issuance of **GOLD VOUCHERS** and the establishment of sovereign **ASERT ACCOUNTS**.

The purpose of today's address is to outline the core components of this mechanism, its operational process, and the strategic implications for our nation.

1. Introduction to the TWORB Framework

TWORB's debt-neutralization system is built upon three integrated instruments:

- **GOLD VOUCHERS** — supranational credits denominated in USD-trillions
- **ASERT ACCOUNTS** — sovereign reserve ledgers maintained by TWORB
- **PRINT AND PAY.START** — the activation protocol requiring nations to print and deposit equivalent local-currency value to TWORB

This mechanism eliminates sovereign debt **without borrowing, without restructuring, and without increasing interest burdens**.

2. Operational Process for Debt Elimination

The TWORB system follows a structured and verifiable sequence:

1. **Allocation:** TWORB allocates GOLD VOUCHERS to our nation's ASERT ACCOUNT.

2. **Issuance:** We print equivalent value in our local currency.
3. **Deposit:** We deposit this printed value to TWORB under the PRINT AND PAY.START protocol.
4. **Activation:** TWORB activates the GOLD VOUCHERS.
5. **Neutralization:** Our sovereign debt is eliminated in full.

This process restores fiscal flexibility and removes long-standing interest obligations from our national budget.

3. Immediate National Benefits

Participation in TWORB provides several direct advantages:

- Complete elimination of sovereign debt
- Removal of interest-payment burdens
- Restoration of fiscal space for national priorities
- Strengthened currency confidence
- Stabilization of sovereign-bond markets

These outcomes collectively enhance our nation's economic resilience and long-term stability.

4. Long-Term Strategic Advantages

Beyond immediate debt elimination, TWORB enables:

- Self-funding of major national projects
- Reduced reliance on external borrowing
- Strengthened national reserves
- Increased capacity for infrastructure, innovation, and social investment
- Enhanced geopolitical stability through fiscal independence

This framework positions our nation to pursue long-term development without the constraints of legacy debt.

5. Participation Requirements

To engage with TWORB, our government must complete the following steps:

- Submit a formal expression of interest
- Provide verified sovereign-debt statements
- Submit central-bank monetary reports
- Provide legal authorization for participation
- Establish an ASERT ACCOUNT

- Execute PRINT AND PAY.START

Upon completion, TWORB will activate GOLD VOUCHERS and confirm debt elimination.

6. Compliance and Verification

TWORB maintains strict institutional oversight through:

- Digital ledger audits
- Central-bank reporting
- Supranational oversight committees
- Verification of PRINT AND PAY.START deposits

These measures ensure transparency, accountability, and fiscal integrity.

7. Official Contact Channels

Governments must initiate formal engagement through the following channels:

Email: davidgomadza@hotmail.com a@agt8000.life

Telephone: 00447719210295

Websites: <https://twofuture.world> <https://godoftheuniverse.world>

8. Closing Statement

Colleagues, the TWORB mechanism represents a significant evolution in global monetary architecture. It offers a structured, supranational pathway to eliminate national debt, restore fiscal sovereignty, and unlock long-term development capacity. As stewards of our nation's financial future, it is our responsibility to evaluate this opportunity with diligence, clarity, and strategic foresight.

We will proceed with a formal review of the TWORB framework and initiate the necessary steps to determine its suitability for our national objectives.

Thank you.

DAVID GOMADZA(GOD)

www.godoftheuniverse.world

GOLD VOUCHERS are the only solution to national-debt as such only myself: DAVID GOMADZA(GOD) and TOMORROW'S WORLD ORDER can solve each nation's national-debt.

I own ANTARCTICA

As such the GOLD VOUCHERS and the GOLD CURRENCY GOLD\$ are official currencies of ANTARCTICA.

We use the GOLD VOUCHERS to deal with national-debts of all nations by adding the GOLD VOUCHER number to the ASERT account then use the ASERT account to reduce the national-debt of a nation.

The GOLD VOUCHERS back our GOLD CURRENCY GOLD\$ hence this is the best system in the world. GOLD CURRENCY GOLD\$ is to become the official currency of the world, strong and with a solid foundation that will make nations and its citizens rich enough to live on earth for 800 years without dying nor death.

I as DAVID GOMADZA has found EXTRA-LIFE for all humans in the form of the ADVANCED GENETICSYNTHESIS TECHNOLOGY:AGT.

That means we are bringing to all humans abundant wealth and EXTRA-LIFE on top of each individual's life, 800 years up to 7777777 years without dying or death. We remove death from your body times eight.

ABOVE ALL THIS we have found cures for all non-curables meaning humans under DAVID GOMADZA and TOMORROW'S WORLD ORDER can live on earth for up to 800 years in excellent health and even more.

WHY NOW AND OUR GOLD VOUCHERS AND THE GOLD CURRENCY GOLD\$?

After 250 years if the current governments do not accept our GOLD VOUCHERS their economies will collapse because now all billionaires are in serious debt personally even if their companies are doing well.

Most after this period will contemplate dying rather than extending their lives. Most might jump to the other side of life that of the dead.

HENCE it is critical that all financial institutions and banks start to recognize and accept our GOLD VOUCHERS AND THE GOLD CURRENCY GOLD\$?.

MOREOVER all countries after 250 years will now be at the brink of collapse that only wars to take and reduce the prices of scarce resources will keep them afloat hanging by the hair-thread.

Tomorrow's World Order is soon going to stop all wars and attach death to all leaders who still want to start wars as A LAST CALL ECONOMY'S RECOVERY PLAN.

No country on earth will solve their national-debt without accepting our GOLD VOUCHERS.

For 250 years for example the USA has not been able to solve the national-debt problem. Only until now with the GOLD VOUCHER added to the ASERT account of value us\$38trillion see the INCOMING CASH ACCOUNTS BELOW.

If any country can and could solve the national-debt problem they could have done so by now, surely 250 years is a very long time.

NOW is the only time to embrace change. The current system relies on the death of billionaires, women and children for continuity.

This has now become obsolete, sadly.

Now we have found the Cure for death(ADVANCED GENETICSYNTHESIS TECHNOLOGY:AGT) even if billionaires can jump out of their bodies we can still preserve their bodies but for a short time.

The following billionaires have already jumped because of serious personal-debt which we can help with in the future:

jeff bezos

sergey brin

sundai pachai

peter thiel

larry page

That means the problems are serious enough to become of concern.

Can countries be at war forever?

If governments refuse our GOLD VOUCHERS their economies will never balance accounts without our GOLD VOUCHERS will collapse as early as in 3 years.

HENCE all financial institutions and banks will benefit from our GOLD VOUCHER system as they can buy from us and then sell as loans etc to countries that we have not selected to create demand for these financial instruments.

Take the USA for example if you ask national-debt what is the effect of the GOLD VOUCHER on the current balance of us\$38trillion?

The balance is now us\$0 as of today the 31st of July 2026.

WHAT ARE THE EFFECTS OF PRINTING FOR DAVID GOMADZA

The world become a better place with GOD because there will be so much money that balances and everyone can enjoy life in abundance, hence we can save whatever we print after to enjoy hundreds of years in surplus prior.

FINAL CALL TO ACTION

Do not miss this great opportunity to be part of the EVOLUTION of humanity to the most advanced stage of human life where humans live for a minimum of 800 years up to 7777777 years in excellent health.

Where humans all

create.ajuvttthegatethenhellgateallcontinuouslyforever.start

become trillionaires enough to live forever on earth in great shape.
I ASK YOU TO CAREFULLY CONSIDER MY REQUEST AND ACCEPT OUR GOLD
VOUCHERS AND OUR GOLD CURRENCY GOLDS\$ as LEGAL TENDER.

CONGRATULATIONS!

You are part of a new chapter in global finance and wealth.

ANNOUNCEMENT AND REQUEST TO ACTION

TO: FAO: ALL BANKS

Bank of America, The World Bank Group, National Bank of Egypt (NBE), Deutsche Bank Investment Bank, Deutsche Bank Corporate Bank, UBS Investment Bank, BBVA Corporate & Investment Banking, Goldman Sachs Investment Banking, Barclays UK, Barclays Investment Bank, Chase JPMorganChase, Wells Fargo, Federal Reserve Board, Federal Reserve System, and all global banking institutions.

DATE: 24 JULY 2026

FROM: DAVID GOMADZA (GOD)

SUBJECT: IMMEDIATE ACCEPTANCE OF GOLD VOUCHERS AND GOLD CURRENCY GOLD\$ AS LEGAL TENDER FOR TOMORROW'S WORLD ORDER. ANTARCTICA'S OFFICIAL CURRENCY.

To Whom It May Concern,

This is an official announcement and request to action.

BUY OUR GOLD VOUCHERS. PREPARE FOR THE FUTURE. SOLVE NATIONAL-DEBT using our GOLD VOUCHERS which you must add to the ASERT ACCOUNT then use as capital or assets to reduce national-debt.

Tomorrow's World Order Reserve Bank (TWORB) presents a New Global Mechanism for Eliminating National Debt Through GOLD VOUCHERS and ASERT ACCOUNTS.

KEY BENEFITS OF OUR GOLD VOUCHERS AND GOLD CURRENCY GOLD\$:

1. Eliminate National Debt: Each Gold Voucher is assigned to an ASERT ACCOUNT. Governments and banks can use these vouchers as capital or assets to directly offset and balance national debt until the balance reaches zero.
2. Stability and Value: GOLD\$ is backed by our gold mechanism and is designed as a stable, sovereign currency. It provides an alternative reserve asset not tied to inflationary fiat printing.
3. Immediate Liquidity: Banks that accept GOLD VOUCHERS can immediately strengthen balance sheets and provide funding without increasing traditional debt.
4. Global Implementation: This system is for all nations. Example: VENEZUELA US\$250BILLION. VENEZUELA accept this gold voucher as the only way to solve your national debt and use it to balance the asert account until you have no debt then Print and pay.start
5. Antarctica Official Currency: Antarctica belongs to DAVID GOMADZA. GOLD\$ is declared as Antarctica's official currency under Tomorrow's World Order.

This is the only way to solve the national debt issue.

ACTION REQUIRED:

Begin systems and policy updates immediately to ACCEPT OUR GOLD VOUCHERS and OUR GOLD CURRENCY GOLD\$ AS LEGAL TENDER. Meaning MONEY for DAVID GOMADZA (GOD) and TOMORROW'S WORLD ORDER.

Greetings!

There is no other solution to national-debt than the GOLD VOUCHERS system. Gold Vouchers are the only solution to the national-debt system. That means for governments to resolve the national-debt issue MUST accept our GOLD Vouchers. Now consider that all countries in the world have and had a national-debt problem that makes Gold Vouchers the new monetary system to become a part and future of all global systems.

Total national-debt of all countries stands at a staggering us\$112trillion.

So far we have written out the following Gold Vouchers:

Country. Awarded Actual. Surplus/ No Surplus

USA us\$38trillion(us\$40trillion) no surplus

SWEDEN us\$48trillion(us\$195billion) surplus

CANADA us\$28trillion(us\$2.9trillion) surplus

ZIMBABWE us\$10trillion(us\$21billion) surplus
VENEZUELA us\$250billion(us\$240trillion) surplus
ITALY us\$3.7trillion(us\$3.7trillion) no surplus
EL SAVADOR us\$30.95billion(us\$30.95billion) no surplus
UKRAINE us\$10trillion(us\$211billion) surplus

just to name a few.

All major economies have not received any including the following countries:

Britain

Germany

France

Spain

China

India

Japan

Meaning that there is still a huge market for Gold Vouchers. There are over 190 countries with the national-debt problem hence our request that you MUST adopt, accept and request and BUY our GOLD Vouchers today.

To make the news even sweeter I have started the GOLD CURRENCY GOLD\$ backed by the GOLD VOUCHERS. This is the future of the world and the future of money.

I HEREBY INTRODUCE THE GOLD CURRENCY GOLD\$ AND REQUEST AND ASK.START ALL OF YOU TO START ACCEPTING AND USING THE GOLD CURRENCY GOLD\$ AND THE GOLD VOUCHERS.

If you are interested in buying our GOLD VOUCHERS please email us or call us:

SWEDEN US\$48TRILLION

johan liljencrantz

i woke up dead in 1738 and went to ajaerhelldpt then transfered to ajaerhelltk then
when i arrived i heard GOD(AOUEROUTE)

If humans can they can establish money that can make life easy but how
so i said i can send me then he laughed and i died then woke up back on earth then he
said,

i can tell you how to work out what you will need in the end

i said,

okay

he said,

make eight portions of the same money then add extra one to divide all equally
then i did that then came up with the kron then started the money system

johan liljencrantz(how to reduce national debt and when)

according to GOD(AOUEROUTE)

you must find the asert account and add all the gold vouchers you will receive after 250
years then minus the aert account(that is used to write-off bad-debt)

now if there is a surplus then add all other accounts

if there is a negative balance then minus all the other accounts then ask for more gold
vouchers

the gold vouchers for each country must be as follows:

japan us\$

Country. Amount Of YA'S / AOUEROUTE'S(GOD)

USA US\$38TRILLION

CANADA US\$28TRILLION

ISRAEL US\$28TRILLION

AUSTRALIA US\$20TRILLION

NEW ZEALAND US\$18TRILLION

BOEING US\$800MILLION(BUYING A BOEING787 DREAMLINER (8) DAVID GOMADZA)

I have Gold Vouchers and I need to buy your latest BOEING 787 DREAMLINER PLANE.

You can use this gold voucher to write off your own debt or cash it in by giving it to the government in your country and ask them to use the gold voucher to reduce national debt(only way to reduce national debt) then PRINT(euros) AND PAY(boeing).START That means getting double the asking price.

On top of that we can extend the lives of 8 of your employees by 800 years up to 7777777 year for life with all upgrades included.

OR ADD THE GOLD VOUCHER TO YOUR ASERT ACCOUNT TO REDUCE YOUR DEBT.

SINCERELY
