In order to protect the personal data of relevant individuals, those within our business who must process data as part of their role have been made aware of our policies on data protection.

We have also appointed employees with responsibility for reviewing and auditing our data protection systems.

## **9. Lawful bases of processing**

We acknowledge that processing may only be carried out where a lawful basis for that processing exists and we have assigned a lawful basis against each processing activity.

Where no other lawful basis applies, we may seek to rely on the employee's consent to process data.

However, we recognise the high standard attached to its use. We understand that consent must be freely given, specific, informed and unambiguous. Where consent is to be sought, we will do so on a specific and individual basis where appropriate. Employees will be given clear instructions on the desired processing activity, informed of the consequences of their consent and of their clear right to withdraw consent at any time.

## **10. Access to data**

As stated above, employees have a right to access the personal data that we hold on them. To exercise this right, employees should make a subject access request. We will comply with the request without delay and within one month unless, in accordance with legislation, we decide that an extension is required. ## **12. Data security**

All our employees are aware that hard copy personal information should be kept in a locked filing cabinet, drawer, or safe.

Employees are aware of their roles and responsibilities when their role involves the processing of data. All employees are instructed to store files or written information of a confidential nature in a secure manner, so they are only accessed by people who have a need and a right to access them and to ensure that screen locks are implemented on all PCs, laptops, etc when unattended. No files or written information of a confidential nature are to be left where they can be read by unauthorised people.

Where data is computerised, it should be coded, encrypted or password protected both on a local hard drive and on a network drive that is regularly backed up. If a copy is kept on removable storage media, that media must itself be kept in a locked filing cabinet, drawer, or safe.

Employees must always use the passwords provided to access the computer system and not abuse them by passing them on to people who should not have them.

Personal data relating to employees should not be kept or transported on laptops, USB sticks, or similar devices, unless prior authorisation has been received. Where personal data is recorded on any such device it should be protected by:

- ensuring that data is recorded on such devices only where absolutely necessary
- using an encrypted system — a folder should be created to store the files that need extra protection and all files created or moved to this folder should be automatically encrypted
- ensuring that laptops or USB drives are not left where they can be stolen.
