Notice to Genesys Autopilot Dealers

Earlier this year Moog (formerly Genesys Aerosystems) announced the sale of the S-TEC Autopilot 3100 general aviation product line to Innovative Aerosystems (IA) and the end-of-life of the general aviation S-TEC 55-X autopilot. These two actions have advanced Moog's strategic decision establishing an independent route to market for the trusted S-TEC autopilot brand.

IA will assume all Autopilot 3100 sales and service customer engagements effective 1 June 2026. Direct all your 3100 sales and service inquiries to IA. Previously shared IA points of contact are listed below for your reference. Warranty support for the 55-X autopilot remains with Moog through the end of the warranty period. Continue to contact Moog for all 55-X warranty service.

As a result of the actions noted above, all Moog fixed wing autopilot dealership sales agreements will terminate effective 30 June 2026. Direct your Autopilot 3100 inquiries to IA beginning 1 June 2026. Continue to work directly with Genesys for 55-X warranty service.

It has been an honor to be affiliated with your company as part of the S-TEC family of fixed-wing autopilot dealers. Moog also thanks IA for their continued support of the brand as part of an exciting new line of products forthcoming. We hope you will continue to support the S-TEC brand under this new ownership.
