A Poem about FLAAA

A sustainable way of living that many do commend. FLAAA homes are built from shipping containers so grand, and offer a unique lifestyle that's truly in demand.

With limited space, you must make it count, And be creative with every inch you mount.

But with some thought and a little bit of flair, you can make a container home that's truly rare.

From floor to ceiling, you have to be smart, And think about every nook, cranny, and part.

But with clever design and a little bit of luck, You can create a home that's cozy and snug.

FLAAA homes offer a minimalistic way of life, And leave behind the burden of excess and strife.

FLAAA

Alternative Affordable Architecture

They're eco-friendly and sustainable, that's for sure, And many homeowners find them to be quite pure.

From urban cities to the countryside, FLAAA homes can be found far and wide.

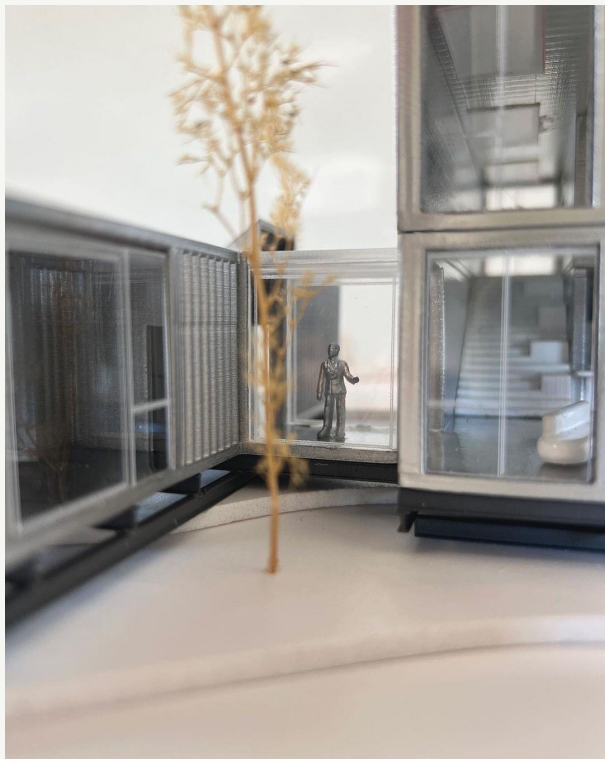

And with each passing year, they only grow in fame, A unique way of living that's both joyful and sane.

So if you're looking for a way to live outside the norm, Consider container home living, it's truly a form.

A way of life that's both charming and new, And one that's sustainable and eco-friendly too.

FLAAA

**Alternative
Affordable
Architecture**

FLAAA is about more than just providing homes; its purpose is providing alternative & affordable lifestyle solutions to facilitate **FLAAA** living.

This includes everything from tiny homes and converted shipping containers designed to give you a space to unwind, to the best and most sustainable ancillary items for your **FLAAA** lifestyle.

Your home should be your personal sanctuary. It recharges you spiritually, emotionally and physically. With it becoming increasingly difficult to fully rejuvenate in many modern residencies in the routine of work and connecting, we've proudly built our supply chain around bringing you the comfort and access to sustainable FLAAA living you've been waiting for.

Visuals

Get a first-person view of how we can make your unique space to disconnect from the world and discover your true potential. Our bespoke shipping container conversions are designed and built with great care to be perfect for you.

Home From Home

Finding your place in the world is something people can spend their entire lives longing for. A place to sit on a warm summer evening with your loved ones and take in the beauty of the natural world around you, to find somewhere you belong.

At **FLAAA** we want to help you find your paradise. We want to give you a slice of home, with all the comforts included, wherever you want it.

Maximise Space

Creating beautiful spaces using refurbished storage containers comes with obvious challenges. Maximising functionality while maintaining space being chief among them.

To get around this issue, our design team has to come up with intelligent solutions. We provide everything you need for modern living, but hide it away ready for when you need it. This gives you the space to calm your mind and body and truly disconnect.

Our bespoke shipping container conversions offer a life with space and total freedom to do with it what you will.

Natural Light

People today are becoming more and more aware of the importance sunlight can have on their mood. Days in front of screens with blinds drawn see a huge decrease in productivity and mental well-being. Now more than ever, humans can see how much they need natural light.

We create comfortable places, deeply connected to the warmth of the outdoors by maximising the availability of natural light. Through sleek windows, glass doors, and sky-lights we create spaces to not only improve access, but complement the wonder natural light can bring.

Independence

For thousands of years, people have strived for independence, a way to take full autonomy of their own lives. **FLAAA** provides a solution.

Our bespoke shipping container conversions are totally portable. Don't like the view? Move it. Is the sun not quite right? Move it. You can take your slice of luxury wherever you want. Freedom doesn't have to come at the cost of comfort.

Shipping Container Design Concept

At FLAAA we champion convenient, flexible ways for people to reconnect with nature and take better care of their own mental well-being, all in an affordable, sustainable environment.

Sustainable Solutions

The ongoing climate crisis is the largest threat our planet has ever faced. Without a change to the way we think as a society, we're in danger of damaging the planet beyond repair

The UK's green revolution is built into the fabric of **FLAAA**. Sustainability is key in every stage of our shipping container design concept, from solar power to the sustainable materials used to furnish our containers.

Flexibility

The beauty of the **FLAAA** lifestyle is that it shapes to your preference. However you want to get **FLAAA** is the right way to do it

Our shipping container design concepts are made to be totally flexible, both in location and use.

Escapism

The modern world is so full of distractions that many find it impossible to switch off. Being 'on' all day every day is having a serious effect on the mental well-being of many people around the world.

Your reconditioned shipping container can go anywhere you can have it; at the end of your garden, overlooking the ocean, even in a field. Anywhere you want your container is the right place for it. Disconnect from the mundane and discover the world around you.

Shipping Container Design Ideas

Our Approach

We use a variety of design techniques to help you create the ideal space to take control of your mental well-being and find inspiration in nature.

Zen

The climate of the world today is chaotic. Constant barrages of bad news and tragic events that are beamed straight onto our phones have led many to feel a need to branch out, to find more spiritual ways of living.

When coming up with our shipping container design ideas, **FLAAA** follows the fundamentals of ZEN philosophy.

ZEN puts a strong emphasis on simplicity and subtlety, less is more. It places importance in minimal waste, minimal logos and a focus on local produce.

Maximise Light & Space

The average Brit spends around 90% of their time indoors cut off from natural light. We need natural light to function as human beings, as it's key to increasing productivity, happiness and boosting our physical and psychological well being.

FLAAA shipping container design ideas put emphasis on maximising natural light as well as finding intelligent solutions to ensure you have all the space you need.

Multi-Use Furniture

FLAAA dedicates a lot of time into perfecting our shipping container design ideas. We emphasise intelligent concepts that blend functionality with making the most of the space you have.

Through ingenuitive methods we can fit in beds or tables that easily store away or can be used as other things entirely. This increases functionality without taking away from the floor space and natural light

About Founder of FLAAA

Faran Lodhi

FLAAA
**Alternative
Affordable
Architecture**

He established his Architecture & Design Practice in London in 2000.

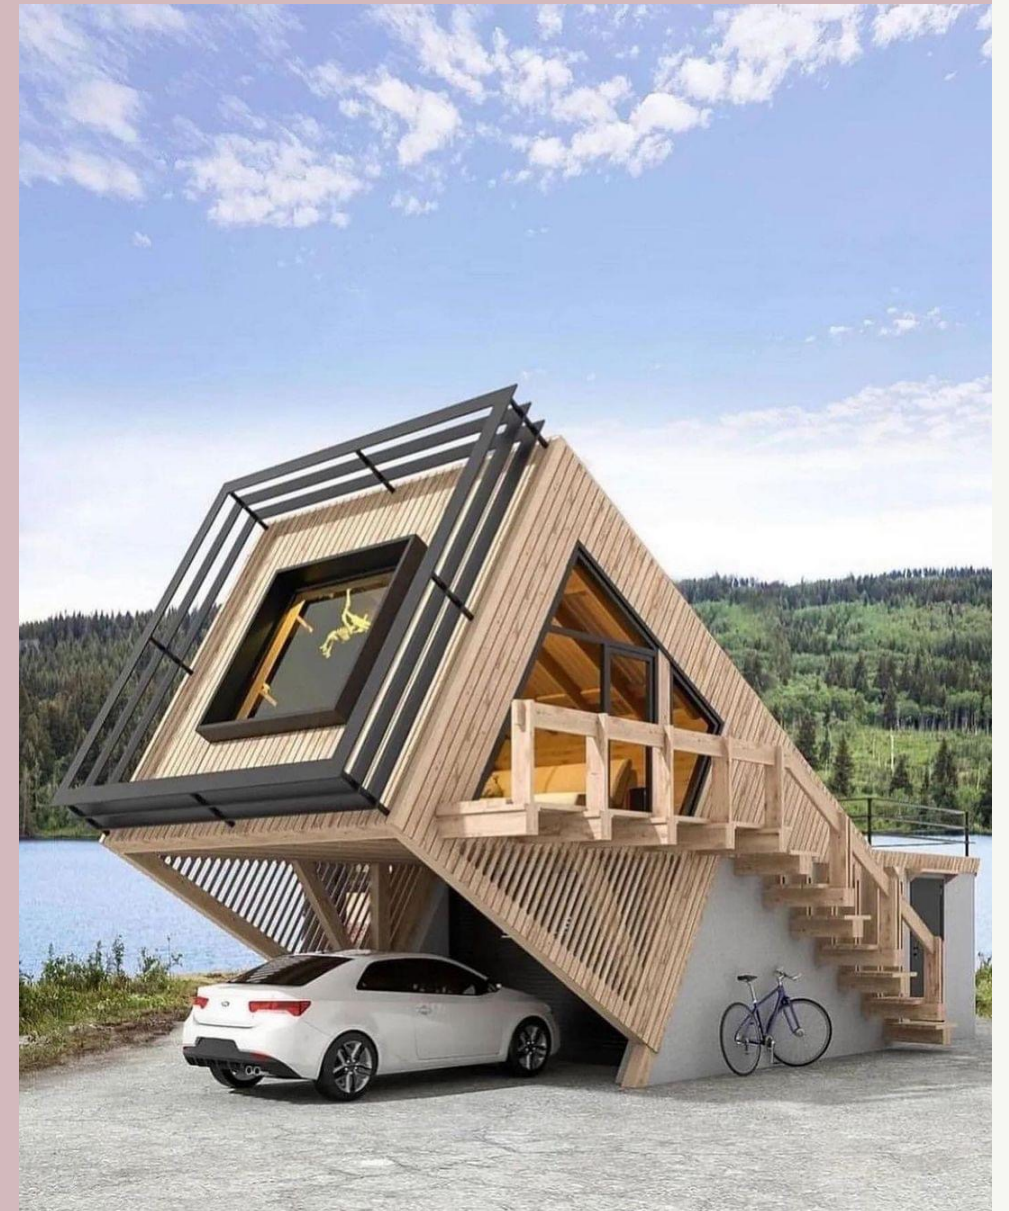

He was awarded a Bachelor Degree with Distinction in Architecture from National College of Arts, Lahore, Studied Masters from Bartlett School of Architecture, London UK and MA in Design Studies (MADS) from Central Saint Martins, London UK

“At the age of six I realised my life mission.

I have the freedom and cultural autonomy to understand and work with diverse cultures. As these cultural differences disappear and we become one world, I analysed and dissect everything from a global perspective instead of local or regional one. I have learned that the world is a vast, complex farrago beauty, and that the idea of an “international style” is an antiquated one. The world has layer upon layers of style that are not regional but, rather, hybrids of cultures, races, creeds and values. I see the world as if I were from another planet-observing, perceiving, engaging and contributing.” Faran Lodhi
