Sweden based Architect Faran Lodhi of Algo & Big has conceived plans to create Winderland - first forest healing resort where sea desert & forest are together in Sonmiani Winder, Balochistan, that is designed to be a "pioneer" of more eco-efficient developments.

First forest healing resort is intended to be built on approx 300 Acres site near the Winder city. It will contain 7,500,000 plants, including numerous species of trees, shrubs and bushes.

Winderland- forest healing resort Reduced infrastructure, preserved nature, minimal footprint, adaptable units, local materials, social variety, community spaces and affordability - are only some of the key design strategies.

Concept of Different Activities

This aerial view of a residential site plan illustrates a central green space with a winding path. The plan includes several houses with dimensions and a scale bar. The central green space is a large, irregularly shaped area with a winding path that connects the houses. The houses are arranged around the central green space, with some having dimensions like 16.00, 10.35, 10.20, 9.00, 7.60, and 9.00. The scale bar at the bottom left indicates a distance of 0 to 20 units. The plan also shows a parking area with several cars parked along a curved road on the right side. The overall layout is designed to provide a central green space for recreation and a winding path for walking and cycling.
