

ECU TRAINING & SERVICE HUB

BHADRA ELECTRONICS

ECU TRAINING

1. Our Training course duration is 1 month.
2. Car Scanning/Fault code read & solving the problem case for clear problem.
3. Preparing data sheets for ECU pin voltage.
4. ECU tuning using KTAG for read and write.
5. Basic training for EPS-BCM-SRS-ABS-Immobilizer-Meter.
6. Airbag crash program/Reset Airbag training
7. Sensor signal testing using DSO
8. Soldering Training on SMD chip level .
9. Fuel Injection Coding / Testing using.
10. Key Programming for ECU/BCM/IMMO.
11. Testing Driver IC using voltage data sheets
12. Basic training skills for marketing process.
13. Providing data ECU for Indian cars.
14. We provides ECU service guide book at the end of training.
15. We provides ISO 9001:2015 certificate for the students at the end of training.
16. Training charges 55,000/-

Why we need this Course?

Practical / theoretical course of programming and remapping of the car ECU. The course program includes practical exercises on the use of software dedicated to the programming Hardware service and remapping of the EPROM memories of the car ECU.

Minimum Required Qualification:
B.Tech/Diploma/ ITI /
Automobile Techicians - Electrican.

Course program !!

The course program includes practical exercises on the use of software dedicated to the programming and remapping of the EPROM memories of the car ECU like Bosch ME7.xx, ME9.xx, MED9.xx, MED17.xx and others Marelli and Siemens families, BDM pseudo-serial interface: operating technique EDC17, MED17, Tri Core CPU and new generations.

ABOUT US

Well experienced in Embedded Technology and started the leading company in 2019 by providing premium quality service for Automotive Embedded ECU Technology Training.

I am Deepak Shivarudrappa, My job is my passion. All my life is linked to the mechanics and electronics that surrounds me, for this reason I've decided to share everything what I know in the world of remapping of a control unit in cars and Embedded Project Training.

Company Services

ECU Training & Service

Get our reliable training and speedy services for Car ECU's

Mileage correction

Remapping of HEX data for EEPROM using UPA 1.3 Programmer

Key Programming

Smart key programming and transponder cloning using X-horse and Xpad 2 services.

WHAT IS AN ECU MODULE?

The car want to start or does not react when the accelerator pedal is pressed? Then there may be problems with the ECU. The ECU uses various components such as connectors with a printed circuit board is therefore also sensitive to defects and malfunctions. We offers the possibility to have an ECU repairing instead of buying new one.

Addressing to Students !!

who wants to learn this skill, As professionals to the automotive sector, to become expert car tuning knowledge and to the ECU tuning processors who intend to learn techniques of remapping of electronic control units for cars.
