

# **\*\*\*NOTICE\*\*\***

---

**FOR THE 2020 FISHING SEASON THE  
FOLLOWING SPECIES ARE STRICTLY  
CATCH & RELEASE ONLY**

**LARGEMOUTH BASS (All Sizes)**

**HYBRID BLUEGILL, BLUEGILL, & REDEAR  
(9-1/2" and LONGER)**

To ensure the lake continues to produce quality sized panfish we are implementing a catch and release policy for all bluegill, hybrid bluegill, and redear sunfish that are 9-1/2" in length and longer. See photos posted for a representation of each species and what to look for when identifying them. We only have 2 acres of rather shallow water to work with. Overharvest of large, breeding class panfish can greatly affect our small body of water in very short order. If in doubt, please let it go!

Largemouth bass of all sizes are to be catch and release only for 2020 unless posted otherwise during the year.

Anyone found to be in possession of the above species will be subject to disciplinary action. Repeat offenders may be subject to expulsion from the club and/or refusal of future membership.

Please remember to sign-in and sign-out, logging your catch for the day. Thanks for your cooperation and enjoy your day!
