

## Transit Series

The Transit Series beam seating is perfect for any location. The seats come with a steel beam and aluminum arms and legs. The foot glides allow for the adjustment of beam seat height and floor leveling. The polyurethane seat and back pads are available in almost any color. The seat and back can also be upholstered in fabric, leather, or vinyl.

**D/O**

The Transit Series can come with arms between each chair, arms at only the ends of the chair, or no arms.

The Transit Series arms and legs are finished with a double layer powder coat. Back-to-back brackets are also available for stationing chairs back-to-back.

The Transit Series can come with different types of power plug-in options to accommodate different countries or connectors. The one shown on the right is for US or EU and USB.
