

Fifty Documented Indigenous Lineages from Ots-Toch, Catoneras, and Abenaki Devoe Families to Marion Bowman

This document presents fifty academically supportable genealogical lineages of Indigenous descent leading to Marion Bowman, daughter of Jesse Bowman and Marion Dunham. These lines trace primarily to two 17th-century women: **Ots-Toch**, a Mohawk wife of Cornelis Van Slyck, directly documented in Dutch and Mohawk records; and **Catoneras**, a Munsee–Canarsee woman identified in Dutch land petitions.

Each lineage is substantiated through Dutch Reformed church registers, wills, and land deeds, with reinforcement from peer-reviewed genealogies, mission records, and publications of the New York Genealogical and Biographical Society. This remains a living document, updated as new archival details are uncovered.

- **Confirmed lines (28):** Rock-solid, supported by DR records, deeds, or multiple genealogical authorities.
- **Documented/Secondary lines (15):** Well-documented families with known Indigenous connections but without a single definitive record for that exact path.
- **Provisional lines (7):** Plausible but unproven, relying on debated or circumstantial evidence.

By cultural origin, the fifty lines distribute as follows:

- **Iroquoian (Mohawk) — 21 lines:** Core Ots-Toch → Van Slyck → Van Antwerp/Wemp/Van Olinda pathways, plus collateral Groot, Van Den Bergh, Van Ness, and Fonda/Van Buren unions.
- **Algonquian (Munsee, Mahican, Abenaki, Wappinger) — 17 lines:** Catoneras → Storm, Van Tassel, Conklin, and DeVoe; Schaghticoke Mahican ties; DeVoe connections to Odanak (Obomsawin, Nolin, Panadis); and one provisional Vermont Bowman–Abenaki line.
- **Combined (both traditions) — 12 lines:** Intersections of Mohawk and Algonquian descent, especially the union of Winant Van Antwerp (Ots-Toch line) and Hester Ann DeVoe (Catoneras/DeVoe line), which concentrated multiple Indigenous ancestries.

Together, these lines reveal an unusual pattern: rather than one or two Indigenous connections, as is typical in Dutch-descended families of New Netherland, our family shows a near-even balance of Mohawk and Munsee/Mahican/Abenaki ancestry. These convergences, centered on Schaghticoke and surrounding Hudson–Mohawk communities, underscore the depth and persistence of Indigenous kinship within our lineage.
