

Our Approach

We offer a comprehensive consulting service that is tailor-made for you. We help identify gaps and opportunities, provide assistance in times of need, and help implement your strategic plans. That's how we ensure your success.

Overview

Red Dragon Consulting assists various governments and organizations in many different roles. RDC has delivered advanced planning, response planning, flood response planning, wildfire communications, operational response procedures, gap analysis, and evacuation plans. RDC also has provided emergency programs, mitigation strategies and risk assessments.

To deliver resiliency and mitigation projects, we create a project team of qualified professionals.

Red Dragon Consulting is a provincially qualified contractor for Public Safety Canada and Emergency Management BC for 2019 to 2024., and a certified Incident Command System Instructor.

Our Experience

Paul Edmonds is the principal consultant and founder of Red Dragon Consulting (RDC). He has held recent leadership roles in British Columbia for emergency management, floods, wildfires, landslides and recovery operations, and has more than two decades experience in the UK emergency management industry. Paul has a significant background in consequence management, risk assessment, as well as emergency planning and training. He has commanded multi-agency operations, national and international incidents, and served as national lead for incident management and flood risk strategy, chair and member on a variety of regional and national groups and boards.

Core Values

We respect the land and the rights of Indigenous peoples and conduct ourselves with integrity and focus on ethical business practices. RDC is committed to setting high standards in the advice and services we provide. We always strive to innovate, and to reach or exceed best practices.

Services

Service	Description
<p>Hazard and Risk Assessment</p> <p>Risk Assessment Reports</p> <p>Vulnerability Assessment</p> <p>Industry Best Practice Gap Analysis Tool</p> <p>Pier Review</p> <p>Strategic Risk Assessment</p> <p>Mitigation Assessment</p> <p>Industrial and Commercial Risk Assessment and Planning</p>	<p>We use decades of knowledge gained when our principal, who acted as a Chair for a Police Risk Assessment multi agency group producing comprehensive HRVA's, including Counter Terrorism initiatives in the UK. Paul's group developed UK best practice and employs those skills here in Canada, utilizing HRVA standards from BC and across North America.</p> <p>Paul's was also a lead for Incident and Flood Risk Strategy, and his teams produced strategic risk assessments with all hazard mitigation plans to provide detailed evidence for risk management. Utilizing our team enhances the product to ensure a comprehensive holistic risk assessment.</p>
<p>Emergency Program Audit & Development</p> <p>Emergency and Recovery Plans</p> <p>Flood Response Plans</p> <p>Developing Custom Procedures</p> <p>Evacuation Route Plans</p> <p>Environmental Planning & Response Plans</p> <p>All Grant Applications UBCM, Provincial and Federal</p> <p>Wildfire (via Frontline Operations Group)</p>	<p>All our plans follow the client's objectives and international standards/best practice to deliver "layered" plans and procedures.</p> <p>This enables interoperability to share priorities and knowledge to activate the plan through flowcharts, aid memoirs and checklists, while providing reference material for those who require additional knowledge in all stages of a response.</p> <p>We deliver solutions that you need utilising grant funding whenever possible.</p>
<p>EOC Plans & Procedures, Implementation</p> <p>Emergency Preparedness, Response and Recovery</p> <p>Training and Hands-on Exercises</p> <p>Incident Command System Training</p>	<p>We utilize past, current practices and embrace future technology to fit the EOC to the organizational needs.</p> <p>Training and exercises range from awareness to complex multi-site and multi- team events.</p>
<p>Emergency Operations Centre (EOC)</p> <p>Incident Management Team deployment</p> <p>Director, Liaison, Advance Planning</p>	<p>Our Principal is a Association of Chief of Police Officers Strategic Incident Commander and ICS trained. We have the ability through a likeminded group of qualified professionals to provide an Incident Management Team.</p> <p>Resources are dependent on location and availability.</p>

Services

Service	Description
Flood Risk Engineering Oversight Oversight Specialist Project Management Flood Risk Assessment	In a previous career our principal managed multi-disciplinary engineering teams, this was noted by the province during response activities in 2018. We successfully put in place innovative ways to provide information for decision making through technology and professional engineer strike teams to assess trigger points during the South Okanagan floods. Such experience was also incorporated into the Boundary Flood Recovery Disaster Mitigation Adaption Grant that was successfully awarded at \$53M. RDC continues to provide detailed flood risk assessments.
Industrial Preparedness and Assessments Site Emergency Preparedness/Mitigation Assessments (visual and documentation) Resilience inspections Contingency planning, inland, pipeline, and marine spills	Our principal's experience includes, regulatory inspector for over 15 years for industrial sites, chair of an energy sector preparedness group , and a qualified Her Majesties On Shore Commander. He inspected and audited industrial complex's , Ports and Government Plans, response to major disasters (including international), risk assessments, plans and
Incident Reviews After Action Report Facilitation (comprehensive analysis)	Group facilitation and after-action reporting is based on police standards and international practice to produce detailed reports which are prioritized, themed at a strategic level as well as including the operational methods to ensure issues are incorporated into action plans and implemented. We design the event around your desired outcomes.
Business Continuity	The identification and inter-dependencies internally and externally are our priority. Business continuity leads to the resilience of your organization to face day to day and those unforeseen events. Dependent on your requirements we deliver simple to complex business continuity plans.
Communications (for Emergencies) Media Training (for Emergencies)	Information is key before, during and after emergencies and we can provide specialist knowledge, utilizing media professionals to train your staff as well as emergency communication plans.
