

Part-time GameKeepers

Passionate about Hunting, Outdoors, Shooting, People, Sharing your knowledge and experience? What to learn new things and shepherd individuals into the source and want to get paid for it?

A gamekeeper is tasked with the management and preservation of wildlife within a private or public estate. Their primary role centers on fostering a balanced environment that supports both game and non-game species, ensuring the land's ecological and recreational value is maintained year-round. Gamekeepers are expected to possess a deep understanding of wildlife management, habitat conservation, and the ethical considerations of hunting and conservation practices.

- Primary missions:
 - **Guiding hunts and overseeing sporting activities**
 - **Wildlife population management**
 - **Habitat conservation**
 - **Poaching prevention**

A gamekeeper serves as the steward of the land's natural resources, expertly balancing the needs of wildlife with the recreational pursuits of hunting and wildlife observation. This role is crucial for the conservation of the estate's ecological richness and for ensuring sustainable land use practices.

Gamekeeper **duties and responsibilities**

- Monitor and manage the health and diversity of wildlife populations on the estate.
- Responsible for guiding and providing instruction for the beginner to advanced shooter in the following areas: - Sporting Clay
- Requires moving supplies to multiple estate venues and operating estate vehicle or ranger SKILLS
- Maintain and enhance the natural habitats to support various species and ecological balance.
- Organize and oversee hunting activities for the employer and their guests, ensuring they comply with legal and ethical standards.
- Patrol the estate to prevent poaching and ensure the security of wildlife and property.
- Maintain estate boundaries, pathways, and signage to promote safety and proper use of the land.
- Collaborate with environmental agencies to align estate management practices with conservation laws.

- Keep detailed records of wildlife activities and environmental changes to inform estate management.
- Train and supervise any assistant gamekeepers or seasonal staff to ensure consistent care and management of the estate.
- Manage the estate's woodland areas, including the planting and cutting of trees, to maintain a sustainable environment.
- Implement pest control measures to protect wildlife and vegetation health.
- Assist in the management of water bodies on the estate, such as lakes or rivers, to promote a healthy aquatic ecosystem.
- Provide support during the estate's events, ensuring that all activities are conducted in harmony with wildlife and habitat conservation.
