ABOUT US

The Fire Safety Foundation, Inc. will provide engaging educational materials to learning centers, schools, senior centers and churches. The materials developed may include, but are not limited to, brochures, coloring books, and escape routes materials. All materials will be developed by board members and volunteers of the organization. Fire Safety Foundation, Inc. will own the creative rights to all works created. The firefighters will also be available to give a presentation during the time of material distribution. All materials presented will discuss the dangers of fire prevention, and how to handle emergencies. Fire Safety Foundation, Inc. will not charge a fee for this program. THE FIRE SAFETY FOUNDATIONS MISSION IS STRICTLY FOR PROMOTING FIRE SAFETY EDUCATION FOR ALL AGES. WE DO NOT REPRESENT ANY FIREFIGHTERS OR FIRE DEPARTMENTS. MANY THANKS FOR PAST AND CONTINUED SUPPORT !!!

OVERVIEW

1. To promote fire prevention through educational endeavors in the community.
2. To support scientific research and study involving fighting fires, preventing fires, and/or improving the ability of fire fighters to perform their duties.
3. To make distributions of assets to organizations that qualify as exempt organizations under section 501 (c3) of the Code in furtherance of the purposes set forth herein.

TAX ID: 84-4495649

1. If you smoke, smoke outside. Provide smokers with large, deep, sturdy ashtrays. Wet cigarette butts and ashes before throwing them out or bury them in sand. Never smoke in bed. Never smoke if oxygen is used in the home.
2. Give space heaters space. Keep them at least 3 feet (1 meter) away from anything that can burn—including you. Shut off and unplug heaters when you leave your home, or go to bed. Always plug space heaters directly into a wall outlet, and never into an extension cord or power strip.
3. Stay in the kitchen when frying food. If you leave the kitchen, even for a short time, turn off the burner. Use a timer when cooking. If you are cooking on the stove-top and leave the room, take a timer, oven mitt, or wooden spoon as a reminder that you have something cooking. If a pan of food catches fire, slide a lid over it and turn off the burner. Don't cook if you are drowsy from alcohol or medication. Do not cook when taking new medication until you know how it will affect you. Wear tight-fitting or short sleeves when cooking. Use oven mitts to handle hot pans. Use lightweight manageable pans.
 4. If your clothes catch fire: stop, drop, and roll.
Stop (don't run), drop gently to the ground, and cover your face with your hands. Roll over and over or back and forth to put out the fire. If you cannot drop and roll, keep a blanket or towel nearby to smother flames. If you use a wheelchair, scooter, or other device and are able to get to the floor, lock the device first before getting out and then roll until the flames are out. If you are a bystander, consider grabbing a rug, blanket, or fire blanket to help extinguish the flames. Use cool water for 3-5 minutes to cool the burn. Get medical help right away.
5. Smoke alarms save lives. Have smoke alarms installed on every level of your home, inside each bedroom, and outside each sleeping area. For the best protection, make sure the alarms are interconnected so when one sounds, they all sound. Have someone test your smoke alarms once a month by pushing the test button. Make sure everyone in your home can hear the smoke alarms. Replace all alarms that are 10 years old or older. If you are hard of hearing or remove your hearing aids to sleep, consider purchasing a strobe alarm and/or bed shaker. Install carbon monoxide alarms outside each sleeping area and on every level of the home.
6. Plan and practice your escape from fire and smoke. If possible, plan two ways out of every room in your home and two ways out of your home. Make sure windows and doors open easily. If the smoke alarm sounds, get outside and stay outside.
7. Know your local emergency number. Your emergency number may be 9-1-1 or the fire department's phone number. Once you have escaped a fire, call the fire department from a neighbor's phone or a cell phone. In case of a medical emergency, have other emergency contact numbers (neighbor, family member) near the phone to call for assistance while waiting for first responders to arrive.
8. Plan your escape around your abilities. Have a land line telephone or a cell phone with a charger near your bed and post the local emergency number nearby in case you are trapped by smoke or fire. Consider subscribing to a medical alert system, which will provide you with a button you wear around your neck or wrist. If you have an emergency, just push the button and the service will send emergency responders. Have other necessary items near your bed, such as medications, glasses, wheel chair, walker, scooter, or cane. Keep a flashlight and a whistle near your bed to signal for help.
