

CUSTOM PANELS

A Seamless Look for Every Space

Custom panels create a seamless, built-in look by coordinating with your cabinetry. Ideal for panel-ready appliances, islands, pantry sides, back panels, and custom door fronts.

Appliance Panels

Create a fully integrated look for refrigerators, dishwashers, ice makers, and more.

Island Sides

Create a finished, coordinated look from every angle.

Pantry Sides

Extend the look of cabinetry throughout the space.

Custom Door Fronts

Create a consistent look for specialty applications.

**4-Week
Turnaround**

**6" Minimum /
48" × 96" Maximum**

**Freight Included
in Cost**

Panel-Ready Appliances

Designed to coordinate cabinetry with compatible panel-ready appliances for a fully integrated look.

How It Works

1 Direct Mount vs. Layered Mount

The appliance specifications determine which construction is required.

2 Backer Panel

Fits into or attaches to the appliance mounting frame and provides the base for the spacer and decorative panel.

3 Spacer Panel*

Positions the decorative panel at the required depth.

4 Decorative Panel

The finished custom panel that coordinates with your cabinetry.

Things to Know

- Not every appliance requires a backer or spacer. Requirements vary by appliance specifications.
- Panel-ready appliances typically provide the required panel measurements.
- Do not add backers or spacers unless specified by the appliance manufacturer.
- Backer panel measurements should not be larger than the custom panel.

We do not offer **spacer panels at this time.*

Ordering Your Custom Panel

Check the Appliance Specs

Confirm the manufacturer's panel requirements and finished dimensions.

Select Your Style & Finish

Choose the door style and finish that coordinates with the cabinetry.

Enter Your Panel Measurements

Enter the required dimensions in Dealer Portal for panel, as well as backer panel if applicable.

Recommendation: Verify final measurements after appliance installation before ordering custom panels.
