Trex Select- Pebble Gray

Table of Contents

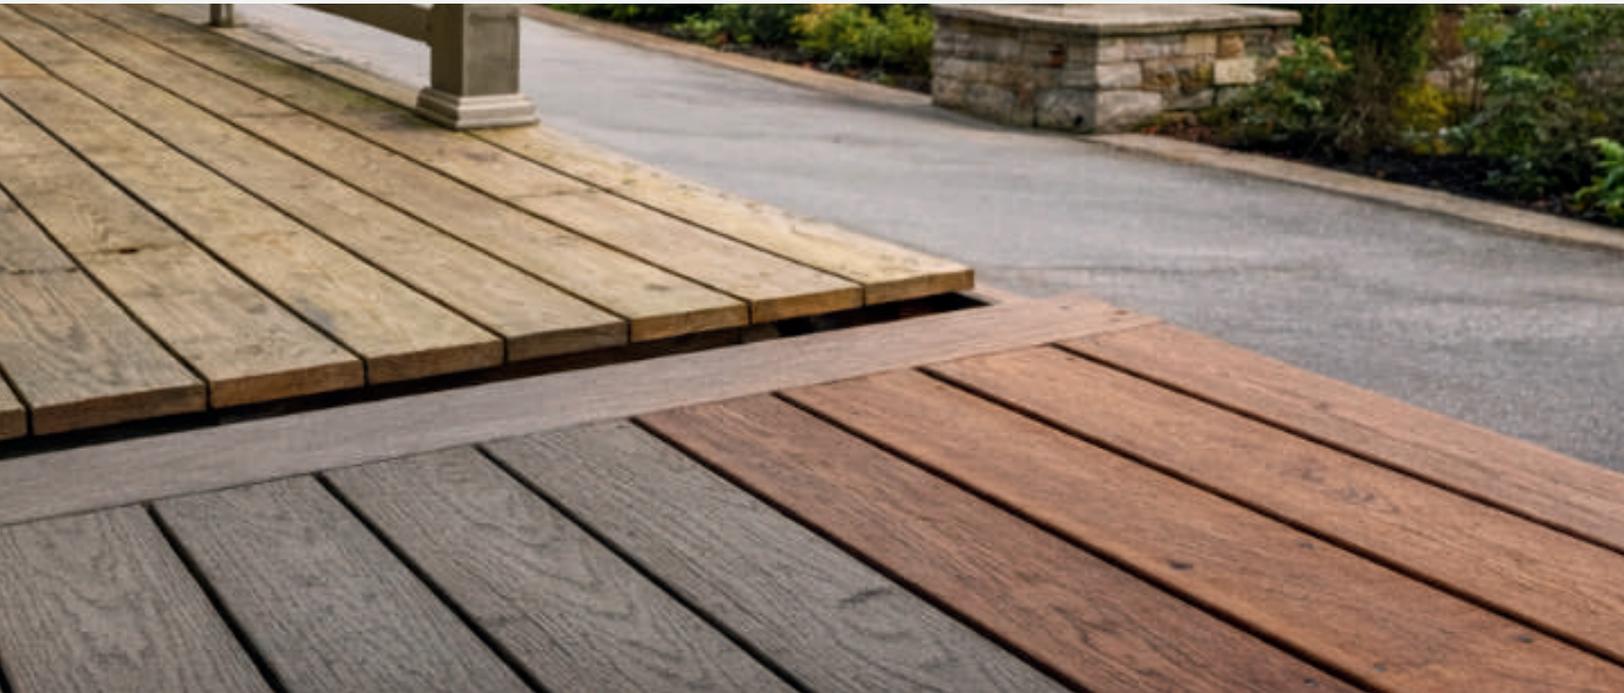

This guide will walk you through deck materials, railing options, and design features to help you choose the right deck for your home and budget.

- ✓ Wood vs Composite vs PVC
- ✓ Composite Decking Options
- ✓ Railing Options
- ✓ Special Features & Upgrades
- ✓ Before & After Projects

WOOD vs COMPOSITE DECKING

Choosing the right material for your deck

WOOD

- ✓ **Lower upfront cost**
Typically less expensive depending on wood type.
- ✓ **Maintenance required**
Needs periodic staining or sealing.
- ✓ **Natural appearance**
Traditional look with customizable stains
- ✓ **Lifespan:** Shorter lifespan without regular maintenance.

COMPOSITE

- ✓ **Higher upfront cost**
More expensive initially, but long term value
- ✓ **Low maintenance**
No staining or painting required
- ✓ **Consistent appearance**
Wide selection of colors and finishes.
- ✓ **Durability:** Resistant to moisture, rot, and insects.

Most homeowners choose composite for long-term durability and minimal maintenance, while wood remains a great option for budget-friendly projects.

COMPOSITE vs PVC DECKING

Choosing the right material for your deck

COMPOSITE

- ✓ **Moderate upfront cost**
Typically less expensive than PVC
- ✓ **Material**
Woodfibers & Plastic
- ✓ **Wood appearance**
Designed to mimic natural wood grain.
- ✓ **Durability:** Resistance to rot, insects, and weather. Slightly heavier under foot.

PVC

- ✓ **Higher upfront cost**
Premium material, higher cost upfront
- ✓ **Material**
100% synthetic
- ✓ **Modern Appearance**
Lightweight with a modern & clean look.
- ✓ **Durability:** Won't absorb water, crack, or splinter. Great for hot, humid, or wet environments.

Composite decking offers durability and value for most homeowners, while PVC decking provides the highest level of moisture resistance and long-term performance.

UPGRADES & ADD ONS

Customize Your Deck

Drink Railing

Adds a flat surface on top of the railing — perfect for drinks, décor, and entertaining.

Fascia Board

White fascia board is included in your project. Upgrade options are available to match your decking color for a seamless look.

Deck Border

A contrasting border around the deck perimeter creates a finished, custom appearance.

Decorative Post Caps

Standard post caps are included. Upgrade options such as solar lights and decorative styles are available.

Post & Column Wraps

Enhance structural posts with decorative wraps for a more finished and architectural look.

ADA Hand Rail

Required by code for certain stair configurations. Designed for safety while complementing the deck style.

Deck Gate

Adds safety and convenience — ideal for pets, children, or stairway access control.

Lattice Skirting

Closes in the space beneath the deck while allowing airflow and maintaining a clean appearance.

Under Deck Living Space

Transform the space below your deck into a usable patio or seating area.

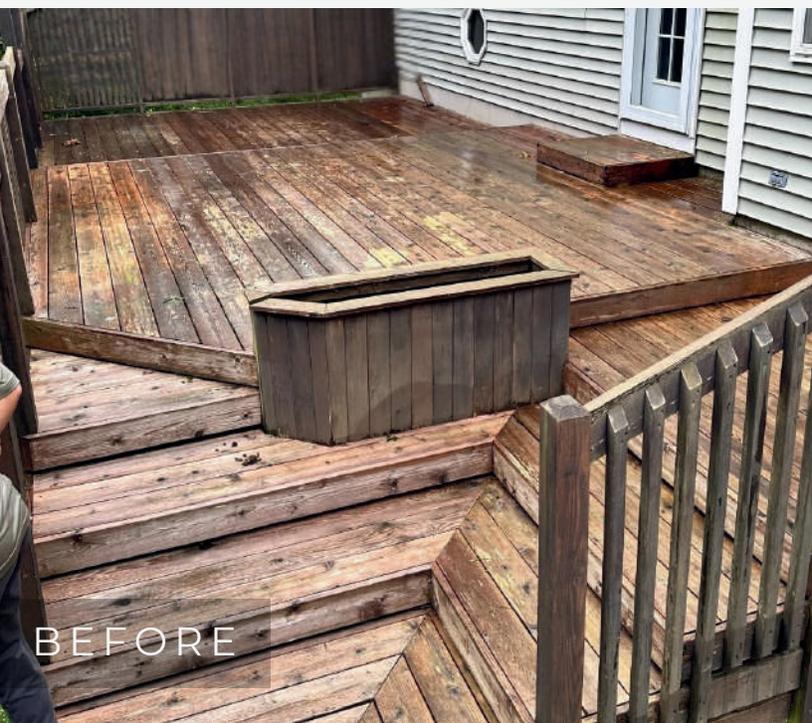

Drink Railings

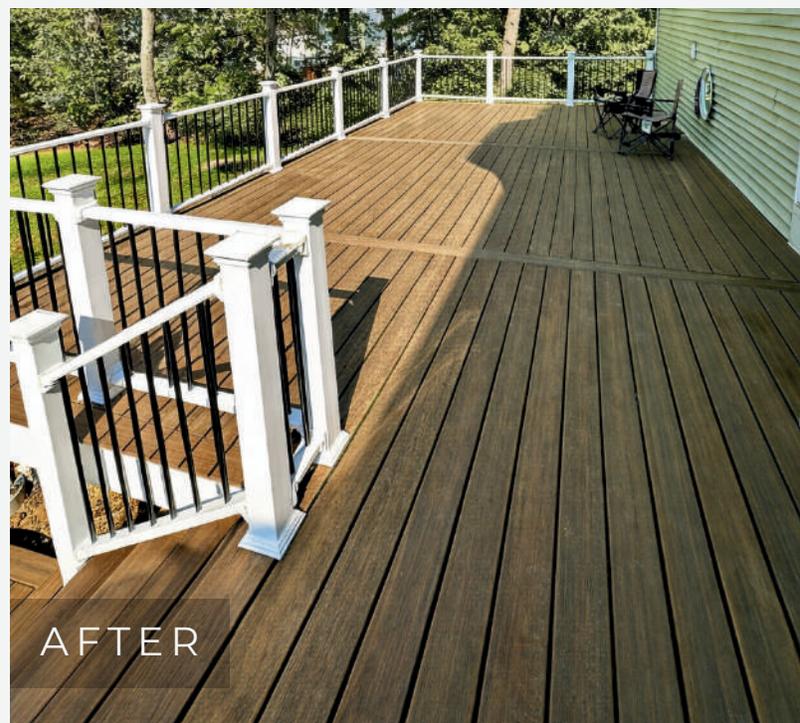

OUR DECK PROJECTS

Real transformation built in Southern NH

Every deck we build is designed for durability, safety, and everyday living. Below are real before-and-after transformations showing how thoughtful design and quality materials can completely redefine an outdoor space.

BEFORE

AFTER

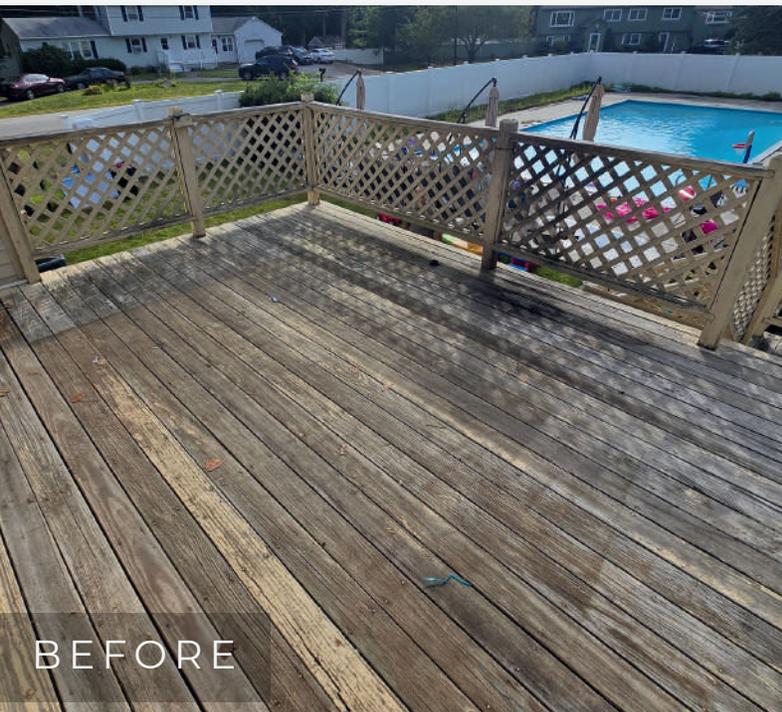

OUR DECK PROJECTS

Real transformation built in Southern NH

Full Deck Renovation- 20x14 | Trex Enhanced Naturals

Trex composite decking with upgraded vinyl railing, black balusters, and drink rail.

Elevated Deck Rebuild- 12x14 | Trex Select

Replaced an aging wood deck with low-maintenance composite decking and vinyl railing.

OUR DECK PROJECTS

Real transformation built in Southern NH

Full Deck Renovation- 14x12 | Trex Enhanced Naturals

Replaced an aging elevated deck with low-maintenance composite decking and vinyl railing, and repositioned the stairs for improved access to the pool.

Full Deck Renovation- 21x14 | Trex Enhanced Naturals

Replaced an aging wood deck with low-maintenance composite decking and vinyl railing, and repositioned the stairs for improved access to the pool.

COMMON QUESTIONS

Working with M&M Landscaping & Lawncare

How long does a deck project take?

Most deck projects take 1-3 weeks depending on size, materials, and site conditions.

Do you handle permits?

Yes — we manage permits and ensure your project meets local building codes.

Composite or wood decking?

We typically recommend composite decking for durability and low maintenance, but we build with a variety of materials.

Can you reuse my existing deck frame?

Sometimes. We inspect all framing and only reuse structural components that meet current code and safety standards. If converting from wood deck to composite, a new frame is required.

COMPLETE OUTDOOR PROJECTS

More than just decks

In addition to deck construction, we also provide:

- Hardscaping & Patios
- Fence Installation
- Retaining Walls
- Lawn Mowing & Maintenance
- Spring & Fall Cleanups
- Snow Removal
